(B) Mode
(C) Median
(D) Range

- 491.** Since the data is symmetrical, which measure of center is the best use?
- (A) Mean
 - (B) Mode
 - (C) Median
 - (D) Range
- 492.** It is a numerical measure that describes a characteristic of a sample.
- (A) Statistic
 - (B) Parameter
 - (C) Sample
 - (D) Population
- 493.** The Arithmetic mean of numerical values of the deviations of items from some average value is called
- (A) Standard deviation
 - (B) Range
 - (C) Mean deviation
 - (D) None of these
- 494.** Find the mean: 2, 12, 1, 5, 4
- (A) 24
 - (B) 4.8
 - (C) 11
 - (D) 13
- 495.** The interesting variation in real data can be lost by focusing too much attention on simplistic summaries such as average values.
- (A) True
 - (B) False
 - (C) All the above
 - (D) None of the above
- 496.** If categories can be related as proportions (e.g. income, years at school), we have a(n) scale.
- (A) Nominal
 - (B) Ordinal
 - (C) Internal
 - (D) Ratio
- 497.** Numerical data used to measure & describe characteristics of groups is:
- (A) Descriptive statistics
 - (B) Correlational research
 - (C) Experimental research
 - (D) None of above
- 498.** In a study of bird populations, a scientist records the number of birds seen in 5 different areas: 15, 18, 20, 22, and 25. What is the average number of birds observed per area?
- (A) 18
 - (B) 20
 - (C) 21
 - (D) 22
- 499.** Find the mean of the following cell phone usage per month: 445, 516, 618, 575, 288
DON'T ROUND YOUR ANSWER:)
- (A) 488.4
 - (B) 484
 - (C) 488
 - (D) 487.5
- 500.** When asking participants for their height or weight, which scale of measurement is being used?
- (A) Nominal
 - (B) Ordinal
 - (C) Interval
 - (D) Ratio
- 501.** Find the mean of the following set of data: 14.2, 7.8, 11.5, 8, 10.5
- (A) 12.5
 - (B) 11.25
 - (C) 13.125
 - (D) 10.4
- 502.** The middle number in a set of data:
- (A) Mean
 - (B) Median
 - (C) Mode
 - (D) Range

- 503.** Descriptive statistics
- (A) Use data from a sample to answer questions about population.
 - (B) Allow you to generalize beyond the data at hand.
 - (C) Summarize and describe data.
 - (D) None of above
- 504.** What is the sum of the range, mean, median, and mode of the following data set? 15, 2, 7, 3, 11, 5, 12, 2, 6
- (A) 28
 - (B) 17
 - (C) 23
 - (D) 32
- 505.** Collection of data is a feature of statistics in which sense?
- (A) Singular Sense
 - (B) Plural Sense
 - (C) Either Singular or Plural sense
 - (D) Both Singular & Plural sense
- 506.** Which descriptive statistic would a researcher use to describe how close a student's SAT score is to a school's average SAT score?
- (A) Correlation coefficient
 - (B) Mean
 - (C) Median
 - (D) Standard deviation Edit
- 507.** The mean absolute deviation is 0.1 for a data set. What conclusion can be drawn?
- (A) The data points are close to the median
 - (B) The data points are far from the median
 - (C) The data points are far from the mean
 - (D) The data points are close to the mean
- 508.** The number which occurs most frequently in a distribution.
- (A) Mean
 - (B) Median
 - (C) Mode
 - (D) None of the choice s
- 509.** Describe the data: eye color
- (A) Ordinal
 - (B) Nominal
- 510.** You work as a volunteer coordinator. You need to figure out the average number of volunteers you had working for you on Saturdays in April. On the first Saturday, 52 people volunteered. On the second, 40 people volunteered. On the third, 82 volunteered, and on the fourth, 54 volunteered. What was the average number of volunteers on Saturdays in April?
- (A) 54
 - (B) 57
 - (C) 61
 - (D) 68
 - (E) 71
- 511.** In ___ objects are assigned to mutually exclusive, labeled categories, it is the lowest measurement and is used to categorize data without order.
- (A) Nominal scale
 - (B) Ratio scale
 - (C) Ordinal scale
 - (D) Interval scale
- 512.** The researcher reports the standard error of measurement (SEM). This is:
- (A) The spread of scores of a group of test takers on a single test
 - (B) The spread of scores of a single individual if he/she took a test repeated times
 - (C) A different term for the standard deviation
 - (D) A measure to use alone as an index of reliability
- 513.** Classify the data: Time it takes to get to school
- (A) Categorical
 - (B) Quantitative
- 514.** What is a characteristic of a population?
- (A) Unit

- (B) Sample
(C) Parameter
(D) Statistic
515. A statistic that always gets larger as data become less consistent is the
(A) Mean
(B) Percentile
(C) Median
(D) Standard deviation
516. Which average refers to the value that appears most in a data set?
(A) Mean
(B) Median
(C) Mode
(D) Range
517. A biologist is studying the average number of leaves on a particular species of tree. She counts the number of leaves on 4 different trees and records the following numbers: 50, 55, 60, and 65. What is the average number of leaves per tree?
(A) 55
(B) 57.5
(C) 60
(D) 62.5
518. Range is
(A) The difference between the third quartile and the first quartile
(B) The difference between the greatest and least data values.
519. Which statistical measures are commonly used in norm-referenced tests?
(A) Growth charts and rubrics
(B) Objective checklists only
(C) Teacher's marginal comments
(D) Mean, median, standard deviation, percentile rank
520. Hannah wants to find the mean of these numbers: 5, 11, 2, 12, 4. What is it?
(A) 4.1
(B) 6
(C) 4.5
(D) 4
521. A measure of how closely one thing is related to another
(A) Hypothesis
(B) ESP
(C) Correlation
(D) Survey
522. I have no axes at all. I help compare parts to a whole. What am I?
(A) Circle Graph
(B) Histogram
(C) Line Graph
(D) Bar Graph
523. Taos, Acoma, Zuni, and Cochiti are the names of four Native American pueblos from the population of pueblos in Arizona and New Mexico. Identify the data level.
(A) Nominal
(B) Ordinal
(C) Interval
(D) Ratio
524. A researcher determines that there is a positive correlation between sleep and test scores. This means as the amount of sleep is increased then test scores:
(A) Decrease
(B) Remain the same
(C) Cannot be determined
(D) Increase
525. What measure represents the value that repeats the most
(A) Mode
(B) Median
(C) Mean
(D) None of above

526. It is a plot used in statistics to show cumulative frequencies.
- (A) Bar graph
 - (B) Histogram
 - (C) Frequency polygon
 - (D) Ogive
527. A research lab's monthly electricity consumption (in kWh) for six months is 150, 180, 160, 170, 140, and 190. What is the average monthly electricity consumption?
- (A) 165 kWh
 - (B) 160 kWh
 - (C) 175 kWh
 - (D) 155 kWh
528. Rolly had three test scores of 78, 76, 74, 75, 76, and 74 while Jelyn had scores of 72, 82, 74, 79, 77, and 75. How did Rolly's average (mean) score compare with Jelyn's average score?
- (A) Rolly was 1 point higher.
 - (B) Rolly was 1 point lower.
 - (C) Both averages were the same.
 - (D) Rolly was 2 points lower.
529. Choose the example below that best represents continuous data.
- (A) Students in one classroom
 - (B) Pages in one book
 - (C) Tire pressure
 - (D) Pictures in one album
530. Let x , y , z be three observations. The mean of these observations is
- (A) $\frac{x \times y \times z}{3}$
 - (B) $\frac{x + y + z}{3}$
 - (C) $\frac{x y z}{3}$
 - (D) $\frac{x \times y + z}{3}$
531. Which statistical measure is used to describe the spread of data?
- (A) Mean
 - (B) Median
 - (C) Mode
 - (D) Standard deviation
532. What do we mean by the mean of our data?
- (A) Sum of all data
 - (B) Largest minus smallest data
 - (C) Smallest minus largest data
 - (D) Average of all data
533. What does the height of a bar represent in a bar chart?
- (A) The height of a bar indicates the color of the category.
 - (B) The height of a bar shows the average value of all categories.
 - (C) The height of a bar represents the time duration of the category.
 - (D) The height of a bar represents the value or frequency of the category.
534. A researcher conducted a correlational research study on the number of hours students sleep at night and the amount of inattentive behavior during the school day. The resulting data showed a correlation of -0.75. This is an example of what?
- (A) Strong positive
 - (B) Strong negative
535. If a bar chart shows a left-skewed distribution, what can be inferred about the mean and median?
- (A) The mean is less than the median.
 - (B) The mean is greater than the median.
 - (C) The mean is equal to the median.
 - (D) The mode is less than the median.
536. The mean proportion of 11 and 44.
- (A) 3
 - (B) 11
 - (C) 22
 - (D) 33
537. A statistical measure based upon the entire population is called parameter while measure based upon a sample is known as:
- (A) Inference
 - (B) Statistics
 - (C) Sample parameter
 - (D) None of these

538. A cumulative relative frequency distribution shows
- (A) The proportion of data items with values less than or equal to the upper limit of each class
 - (B) The proportion of data items with values less than or equal to the lower limit of each class.
 - (C) The percentage of data items with values less than or equal to the upper limit of each class
 - (D) The percentage of data items with values less than or equal to the lower limit of each class
539. μ means in statistics
- (A) Sample mean
 - (B) Population mean
 - (C) Sample s.d
 - (D) Population s.d
540. The Correlation Coefficient is a numerical index that provides information about the ____ and ____ between two variables.
- (A) Strength, reliability
 - (B) Reliability, validity
 - (C) Strength, direction
 - (D) Reliability, direction
541. Make a frequency table to organize the data. What is the most common age when students are required to be in school for the states shown?
- (A) 5
 - (B) 6
 - (C) 7
 - (D) 8
542. A characteristic of the entire population of data is called a ____
- (A) Population
 - (B) Parameter
 - (C) Sample
 - (D) Statistic
543. Summarizes data using a single number. The single number is found by finding the sum of the data divided by the number of pieces of data.
- (A) Median
 - (B) Range
 - (C) Mean
 - (D) Mode

1.5.3 Inferential Statistics

1. A mathematical methods that employ probability theory for deducing (inferring) the properties of a population from the analysis of the properties of a data sample drawn from it. It is concerned also with the precision and reliability of the inferences it helps to draw. It is called?
 - (A) Inferential statistics
 - (B) Descriptive statistics
 - (C) Nominal statistics
 - (D) Correlation statistics
2. Analysis of variance is a statistical method of comparing the ____ of several populations.
 - (A) Standard deviations
 - (B) Variances
 - (C) Means
 - (D) Proportions
3. Which test is used when you have a related design? (repeated measures)
 - (A) Mann Whitney
 - (B) Wilcoxon
4. What test we can used to find the differences between three or more groups from an independent-measures design?
 - (A) Wilcoxon
 - (B) Kruskal-Wallis
 - (C) Mann-Whitney
 - (D) Friedman

5. A correlation does not prove ____
(A) Hyperinflation
(B) Causation
(C) Demonstration
(D) Improvisation
6. A hypothesis test that allows for investigation of statistical significance in the analysis of frequency distributions is the
(A) Z-test.
(B) T-test
(C) Chi-square test
(D) F test
7. Which statistical procedure should be used in order to answer this research problem: "Is there a significant difference in the patients' weight before and after the surgery?"
(A) Paired Samples T-test
(B) ANOVA
(C) Independent Samples T-test
(D) Multiple Regression Analysis
8. Inferential statistics is ____
(A) A techniques to improve the efficiency and effectiveness of the organization.
(B) Making generalization about population by analyzing the sample.
(C) Is a techniques to implement a strategic plan.
(D) Is a good representation of a population
9. What does a correlation coefficient measure?
(A) Population variance
(B) Relationship strength and direction
(C) Group differences
(D) Variable manipulation
10. To be considered statistically significant the researchers must be ____ % certain that the results did not occur by chance or luck.
(A) 10
(B) 75
(C) 95
(D) 100
11. Which examines the presence of a statistical difference between two means
(A) Pearson's R
(B) T-test
(C) Analysis of Variance (ANOVA)
(D) Multiple Regression
12. What are the common statistical analysis techniques used to analyze experimental data?
(A) Counting techniques
(B) Some common statistical analysis techniques used to analyze experimental data include t-tests, ANOVA, regression analysis, chi-square tests, and correlation analysis.
(C) Descriptive statistics
(D) Qualitative analysis
13. Deals on making inferences from or conclusions on larger groups & population
(A) Inferential Statistics
(B) Descriptive Statistics
(C) Statistics
(D) Statistic
14. Statistically Significant means the experiment?
(A) Couldn't have happened by luck
(B) Happened by luck
15. A statistical framework for conceptualizing, investigating, and designing reliable observations. It is used to determine the reliability of measurements under specific conditions which is particularly useful for assessing the reliability of performance assessments best describes which of the following?
(A) Classic Test (Reliability) Theory
(B) Item Response Theory
(C) Classic Validity Theory
(D) Generalisability Theory
16. A multivariate statistical analysis technique that is used to analyze structural relationships. This technique is the combination of factor analysis and multiple regression analysis, and it is used to analyze the structural relationship

- between measured variables and latent constructs.
- (A) Path Analysis
 - (B) Structural Equation Model
 - (C) Quantitative Research
 - (D) Mixed Methods
17. A general method of drawing conclusions regarding differences of population means when two or more comparison groups are involved.
- (A) T-TEST
 - (B) ANALYSIS OF VARIANCE (ANOVA)
 - (C) PEARSON'S CORRELATION (PEARSON'S R)
 - (D) None of above
18. Z-test is generally used when the sample size is:
- (A) Less than 30
 - (B) More than 30
 - (C) Exactly 10
 - (D) Unknown
19. It is the statistical method used in making decisions using experimental data.
- (A) Observation
 - (B) Simple analysis
 - (C) Analytical testing
 - (D) Hypothesis testing
20. What is a key aspect of making an inference?
- (A) Making a statement without any prior observation.
 - (B) Using evidence to form a logical conclusion.
 - (C) Stating facts gathered from observations.
 - (D) Making a random guess.
21. A hospital compares the effectiveness of three treatments on patient recovery time. Which is the best statistical test?
- (A) Chi-square test
 - (B) ANOVA
 - (C) Linear regression
 - (D) Correlation coefficient
22. It is concerned with making predictions or inferences about a population from observations and analyses of a sample.
- (A) Inferential Analysis
 - (B) Descriptive Analysis
 - (C) Bivariate Analysis
 - (D) None of above
23. Statistical method used to compare the means of three or more groups to determine if there is a significant difference between them
- (A) ANOVA (Analysis of Variance)
 - (B) Pearson's correlation coefficient (r)
 - (C) Spearman Rho
 - (D) None of above
24. Litzy collects data from a random sample of 7th graders. Out of 40 respondents, 7 attend afterschool programs. Of the 200 7th graders attending Litzy's school, how many would be expected to attend afterschool programs?
- (A) 14 7th graders
 - (B) 28 7th graders
 - (C) 35 7th graders
 - (D) 42 7th graders
25. Avyaan, Avni, and Aarav are on a quest to discover how hypotheses can be verified. What is the magical tool they need to use?
- (A) M-value
 - (B) T-value
 - (C) P-value
 - (D) F-value
26. What is a common statistical method used by data crunchers to find relationships between variables?
- (A) Regression analysis
 - (B) Microscopy
 - (C) Spectroscopy
 - (D) Chromatography

27. Statistical inference occurs when you:
- (A) Compute descriptive statistics from a sample
 - (B) Take a complete census of a population
 - (C) Present a graph of data
 - (D) Take the results of a sample and draw conclusions about a population
28. Which statistical test is used for testing relationships in quantitative data?
- (A) Thematic analysis
 - (B) Chi-Square test
 - (C) Content analysis
 - (D) Grounded theory
29. Tell if the statement is Descriptive or Inferential: The chances of you getting a new car is about the same as passing your statistics class.
- (A) Descriptive
 - (B) Inferential
30. What are the parametric tests in the following list? F test t test Sign test Median test
- (A) 1 and 2 are correct.
 - (B) 3 and 4 are correct.
 - (C) 1 and 4 are correct.
 - (D) 2 and 3 are correct.
31. Another name for a directional hypothesis is
- (A) One-tailed hypothesis
 - (B) Two-tailed hypothesis
 - (C) Three-tailed hypothesis
 - (D) Four-tailed hypothesis
32. If the results of a study show a significant difference at the 0.05 level, this means:
- (A) There is a 5% chance the results are due to random variation
 - (B) The results are conclusive and cannot be disputed
 - (C) The study must be repeated for confirmation
 - (D) The difference is not statistically significant
33. In a research study, if the confidence interval for a mean is narrow, it indicates:
- (A) Greater uncertainty in the estimate
 - (B) Greater precision in the estimate
 - (C) No significant results
 - (D) A higher likelihood of Type I error
34. Which of the following terms refers to a statistical method that can be used to statistically equate groups on a pretest or some other variable?
- (A) Analysis of covariance.
 - (B) Matching.
 - (C) Experimental control.
 - (D) Differential influence.
35. Which test is used for correlations?
- (A) Mann Whitney U
 - (B) Spearman's Rho
 - (C) Wilcoxon T test
 - (D) Chi Squared
36. The ____ measures the strength of the relationship between 2 variables.
- (A) Correlation Coefficient
 - (B) Causation
 - (C) Independent Variable
 - (D) None of above
37. Part of the population of 4,500 elk at a wildlife preserve is infected with a parasite. A random sample of 50 elk shows that 8 of them are infected. How many elk are likely to be infected?
- (A) 720 elk
 - (B) 400 elk
 - (C) 90 elk
 - (D) 562.5 elk
38. When do we use Multiple Regression?
- (A) When we have 1 continuous DV and 1 continuous IV
 - (B) When we have 1 continuous DV and more than 1 continuous IV
 - (C) When we have 1 continuous IV and more than 1 continuous DV
 - (D) When we have 1 continuous DV and more than 1 categorical IV

39. "The purpose of this study was to determine if there is difference in self-efficacy between beginner and advance level badminton players." Which test would you use to analyse the data collected?
- (A) Independent t-test
 - (B) Paired Samples t-test
 - (C) ANOVA
 - (D) Correlation
40. A test of statistical significance indicates how confident the researcher is about
- (A) The interceder reliability of their structured interview schedule.
 - (B) Passing their driving test.
 - (C) Understanding the difference between bivariate and multivariate analysis.
 - (D) Generalizing their findings from the sample to the population.
41. After displaying research results with a scatter plot, we can confirm the hypothesis about correlation between two variables.
- (A) True
 - (B) False
42. What do you call the decision making process for evaluating claims about a population based on the characteristics of a sample purportedly coming out from the population?
- (A) Hypothesis Testing
 - (B) Hypothesis
 - (C) Alternative Hypothesis
 - (D) Null Hypothesis
43. The term P-Value refers to what?
- (A) The pattern of data variation
 - (B) Whether a result occurs due to chance or to the variable you're testing
 - (C) The extent to which the findings of a study can be applied to other situations
 - (D) A statistical measurement of the probability of obtaining the observed results if the null hypothesis is true
44. What is the main purpose of a t-test in research?
- (A) To compare the means of two groups to see if they are significantly different
 - (B) To compare the variance between three or more groups
 - (C) To test how one variable predicts another
 - (D) To test differences in frequencies among categories
45. Which Test is Appropriate? A stadium manager is interested in whether the fans that buy tickets are demographically the same as the general population of the city. Currently 42% are Caucasian, 35% are Hispanic, 12% are African American, 8% are Asian, and the rest are defined as other.
- (A) Chi-square Goodness of Fit Test
 - (B) Chi-Square Test for Homogeneity
 - (C) Chi-Square Test for Independence/Association
 - (D) Not a Chi-square test
46. From a purely statistical standpoint, in order to compare a control group (which does not receive the IV or experimental manipulation) to the experimental group the researcher will need
- (A) A correlation coefficient
 - (B) Only descriptive statistics
 - (C) Percentile rank
 - (D) A test of significance
47. A statistic is different from a parameter because it
- (A) Represents a sample, whereas a parameter represents a population.
 - (B) Represents a population, whereas a parameter represents a sample.
 - (C) Is derived from a random sample, whereas a parameter is derived from a non-random sample.
 - (D) Is derived from a nonrandom sample, whereas a parameter is derived from a random sample

48. When the researchers implement flipped learning model in class A (experimental group), butnot in class B (control group), the research use ____ test
- (A) One-Way Analysis of Variance
 - (B) T-Tests for dependent groups
 - (C) T-Tests for independent groups
 - (D) Central tendency
49. A researcher wants to know if gender affects device preference. What test should be used?
- (A) Regression
 - (B) T-test
 - (C) Chi-square
 - (D) Correlation
50. A decision-making process for evaluating claims about a population
- (A) Alternative
 - (B) Null
 - (C) Hypothesis testing
 - (D) Critical values
51. A range of values where the true value will most likely fall
- (A) Accuracy
 - (B) Point Estimate
 - (C) Precision
 - (D) Interval Estimate
52. In testing for the difference between two populations, it is possible to use
- (A) Mann Whitney
 - (B) Kruskal Wallis
 - (C) Wilcoxon
 - (D) None of the above
53. Which test requires a repeated measures design?
- (A) Chi squared
 - (B) Spearman's Rho
 - (C) Mann Whitney U
 - (D) Wilcoxon T test
54. What is statistical estimation?
- (A) Methods for rounding answers in statistical calculations.
 - (B) Methods to determine the best graph to represent statistical data.
 - (C) Methods for reducing errors in inferential statistics.
 - (D) Methods for reducing errors in descriptive statistics.
55. Lucy collects data from a random sample of seventh-graders. Out of 40 respondents, 7 attend afterschool programs. Of the 200 seventh-graders attending Lucy's school, how many would be expected to attend afterschool programs?
- (A) 14 seventh-graders
 - (B) 28 seventh-graders
 - (C) 35 seventh-graders
 - (D) 42 seventh-graders
56. True or false.A study that establish that two variables are related, always means that there is a direct (causal) relationship between the two variable.
- (A) True
 - (B) False
57. What does a null hypothesis state?
- (A) There is no significant difference between groups
 - (B) There is a significant difference between groups
 - (C) The hypothesis is always true
 - (D) The hypothesis is always false
58. Which of the following statistical tests is the appropriate one to adapt when analyzing the relationship between continuous or progressive quantitative data such as blood pressure and advancing age?
- (A) Regression analysis
 - (B) T-test
59. Suppose a researcher identifies the variables as Nominal, which of the following inferential statistics will he use?

- (A) Pearson r
 - (B) Spearman rho
 - (C) ANOVA
 - (D) Chi square
60. Twenty-five children are chosen randomly from a school playground. Their heights are measured when they first come into school the next morning, and again just before they go home that same evening. What statistical test could be used to test the hypothesis that their morning heights are no different from their evening heights?
- (A) Independent T Test
 - (B) Paired T Test
 - (C) Regression
 - (D) Z test
61. If the findings of the research showed that the difference between the experimental and control group was relatively large, it would be said that it is
- (A) Randomized
 - (B) Had confounding variables
 - (C) Statistically significant
 - (D) Had a standard deviation
62. What types of statistics allows quantitative researchers to draw conclusions about populations?
- (A) Inferential
 - (B) Predictive
 - (C) Descriptive
 - (D) Quantitative
63. It is rare to find correlation coefficients above ____ in psychology (Research Methods and Statistics Part III)
- (A) +0.50
 - (B) +0.80
 - (C) +1.00
 - (D) +0.10
64. What does a p-value of less than 0.05 indicate in statistical testing?
- (A) The null hypothesis is true
 - (B) There is a statistically significant result
 - (C) The data is unreliable
 - (D) The test should be repeated
65. Studying the relationship between weekly yoga hours and body weight illustrates which inferential focus?
- (A) Differences between predefined groups
 - (B) Relationships between quantitative variables
 - (C) Design of randomized controlled experiments
 - (D) Summarization of sample-level patterns
66. Which test is appropriate for comparing before-and-after measurements on the same subjects?
- (A) Kruskal-Wallis H for ranks
 - (B) One-way ANOVA across three groups
 - (C) Paired t-test for related samples
 - (D) Independent samples t-test groups
67. The p value measures
- (A) The probability of the null hypothesis being true given the results that were observed.
 - (B) The probability of not obtaining a statistically significant result if the experiment were repeated.
 - (C) The probability that the obtained result could have occurred by chance.
 - (D) The probability of obtaining a result as extreme as the data if the null hypothesis were true.
68. ____ is used to test relationships between quantitative variables. In other words, it's a measure of how things are related
- (A) Regression
 - (B) Correlation
 - (C) Variance
 - (D) None of above
69. At the end of your research study, you determine that the results were "statistically significant." What does this mean in general?

- (A) The results met a threshold considered to be scientifically meaningful.
(B) The hypothesis was worth testing.
(C) The results could not have occurred as the result of chance.
(D) The hypothesis has been proven.
70. Which of the following statistical measures is most helpful for indicating the extent to which high school grades predict college grades
(A) Standard deviation
(B) Mean
(C) Median
(D) Correlation coefficient
(E) Range
71. What does correlation express in research?
(A) Correlation expresses the degree to which two variables are related to each other in research.
(B) Correlation expresses the causation between two variables in research.
(C) Correlation expresses the independence of two variables in research.
(D) Correlation expresses the randomness between two variables in research.
72. A test that is designed to compare two separate groups of data.
(A) One way ANOVA
(B) Mixed ANOVA
(C) Independent samples t-test
(D) Paired samples t-test
73. A middle school has 490 students. Mae surveys a random sample of 60 students and finds that 24 of them have dogs. How many students are likely to have dogs?
(A) 8 students
(B) 40 students
(C) 192 students
(D) 196 students
74. In order to help generalize about outside populations based on immediate research participants, action researchers utilize.
(A) Inferential statistics.
(B) Implied statistics.
(C) Descriptive statistics.
(D) None of the above.
75. In the social sciences the accepted probability level is usually
(A) .05 or less
(B) 1.0 or higher
(C) .0001 or less
(D) .05 or higher
76. What is the main purpose of an ANOVA (Analysis of Variance)?
(A) To compare the relationship between two continuous variables
(B) To compare the means of three or more groups
(C) To determine if two variables are correlated
(D) To analyze individual scores within a single group
77. The ____ is the probability of observing values of the test statistic that are as contradictory or even more contradictory to H_0 as the test statistic obtained in our sample.
(A) P-value
(B) X-value
(C) A-value
(D) H_0 -value
78. Inferential statistics is used to:
(A) Describe only what is observed in the data
(B) Draw conclusions about a population based on a sample
(C) Count the total number of observations
(D) Create frequency tables only
79. The study that would best rule out chance factors would have a significance level of $P =$
(A) .05
(B) .01
(C) .001
(D) .08

80. What letter do we use to represent correlation coefficient?
(A) C
(B) R
(C) P
(D) H
81. If differences are found between groups in a quasi-experimental design, what statistical method should be used to control for known differences?
(A) ANOVA
(B) ANCOVA
(C) T-test
(D) Regression
82. The chi. Square test is designed by
(A) Fisher.
(B) Karl pearson.
(C) Laplace.
(D) Gauss.
83. A team wants to compare typing speed before and after using a new predictive keyboard. What test is appropriate?
(A) ANOVA
(B) Independent-samples t-test
(C) Chi-square
(D) Paired-samples t-test
84. What statistical test is used to determine if there is a significant association between two categorical variables?
(A) Chi-square test
(B) T-test
(C) ANOVA
(D) Z-test
85. Using data/evidence to draw conclusions
(A) Inference
(B) Observations
86. Information based on prior knowledge or experience is known as an
(A) Observation
(B) Inference
(C) Qualitative
(D) Quantitative
87. Which statistical tool is appropriate for determining the significant difference in the mean growth increment of Eucheuma cultured in municipal waters using lantay and hanging methods?
(A) T-test
(B) Correlation analysis
(C) Chi-square test
(D) Regression analysis
88. Which test is the part of the parametric test?
(A) Sign Test.
(B) Run Test for Randomness.
(C) Kruskal-Willis Test.
(D) Z-test.
89. A researcher compares average heights between groups defined by favorite meal. What type of inferential task is this?
(A) Estimation of measurement instrument reliability
(B) Prediction about differences between groups
(C) Description of single-sample characteristics
(D) Exploration of within-person time trends
90. What type of test assesses the difference between two related samples?
(A) T-test for independent samples
(B) T-test for dependent samples
(C) ANOVA
(D) Chi-square test
91. The correlation between two observed attributes is calculated as “-.74”. From this, it can be concluded that:
(A) One attribute causes the other attribute not to occur
(B) As one attribute increases, the other is likely to increase

- (C) As one attribute increases, the other is likely to decrease
- (D) One attribute causes the other attribute to occur
- (E) The two attributes are unrelated
92. Statistics that are used to interpret data and draw conclusions.
- (A) Independent variable
- (B) Replication
- (C) Inferential statistics
- (D) Statistical significance
93. Which statistical tool is best for predicting outcomes?
- (A) Mean
- (B) Mode
- (C) Correlation
- (D) Regression
94. What would you use to determine whether significant differences were observed between all levels of your independent variable?
- (A) Box-plots
- (B) F statistic
- (C) Post-hoc tests
- (D) Descriptive statistics
95. How can a researcher increase the statistical power of a study?
- (A) Lower the alpha level
- (B) Use a smaller sample size
- (C) Increase sample size or effect size
- (D) Raise the p-value cutoff
96. Which statistic from descriptive analysis is most directly used inside ANOVA computations shown in the table?
- (A) Interquartile Range
- (B) Sum of Squares
- (C) Coefficient of variation
- (D) Mode frequency Edit
97. Why are researchers so careful about drawing conclusions regarding statistical significance?
- (A) They want to make sure an observed difference isn't due to chance.
- (B) They need to make sure the results are important.
- (C) Statistical significance is primarily a subjective decision, so researchers need to be more careful.
- (D) Statistical significance determines which research method should be used for a hypothesis.
98. A formal way of predicting no significant differences between datasets
- (A) Null hypothesis
- (B) Alternative hypothesis
- (C) Two-tailed hypothesis
- (D) One-tailed hypothesis
99. Charlotte conducts a survey with a sample of students from her school to estimate the average amount of time all students in the school spend on homework. Which concept involves generalizing from Charlotte's sample to the entire school population?
- (A) Statistical inference using sample data
- (B) Random assignment within one group
- (C) Descriptive statistics of individual cases
- (D) Convenience sampling of volunteers
100. A statistical test used to compare 2 or more group means is known as ____
- (A) T-test for correlation coefficients.
- (B) Simple regression.
- (C) Post hoc test.
- (D) One-way analysis of variance.
101. The term "effect size" refers to:
- (A) The probability of making a Type I error
- (B) The strength of a relationship or difference
- (C) The percentage of variance explained by a model
- (D) The reliability of a measurement tool

- 102.** What is an independent t-test used for?
- (A) Comparing means from a sample and a population
 - (B) Comparing means from two separate samples
 - (C) Comparing means from two related samples
 - (D) Comparing means from more than two samples
- 103.** The necessary condition required for using a Paired sample t test is
- (A) The sample size in both the samples should not be same.
 - (B) The two samples should not be related.
 - (C) The two samples should be at least of size 50.
 - (D) Two observations are taken from the same individual-one prior to the application of treatment and other after the application of treatment.
- 104.** Making predictions about a population based on a sample is ____
- (A) Inferential
 - (B) Categorical
 - (C) Independent
 - (D) None of above
- 105.** Which technique is used to help us determine if results can be generalized to a larger population?
- (A) Inferential statistics
 - (B) Longitudinal studies
 - (C) Descriptive statistics
 - (D) Cross-section studies
- 106.** A hypothesis test in which rejection of the null hypothesis occurs for values of the point estimator in either tail of the sampling distribution is called
- (A) The null hypothesis
 - (B) The alternative hypothesis
 - (C) A one-tailed test
 - (D) A two-tailed test
- 107.** Which best describes a t-test?
- (A) It is a type of descriptive statistics.
 - (B) It is used to determine if there are significant differences.
 - (C) It can be used as long as the data is not normally distributed
 - (D) All of the above.
- 108.** What test is the one tool scientists use to analyze differences in samples?
- (A) B-test
 - (B) M-test
 - (C) T-test
 - (D) Z-test
- 109.** Having or expressing meaning; meaningful statistically
- (A) Variable
 - (B) Original
 - (C) Significant
 - (D) Generalizable
- 110.** A measure of the internal consistency that is determined by arbitrarily dividing the total set of items (e.g., questions) relating to a construct of interest into halves (e.g., odd-numbered and even-numbered questions) and comparing the results obtained from the two subsets of items thus created best describes which of the following?
- (A) Parallel forms reliability
 - (B) Split-Half Method
 - (C) Kuder-Richardson Method
 - (D) Coefficient Alpha
- 111.** An inferences is ____
- (A) A conclusion reached by finding and putting together clues and evidence from the text
 - (B) Creating questions about the text that are not answered in the text
 - (C) A statement of ideas or information that a passage of text will discuss
 - (D) Readers relate what they read to personal experiences

- 112.** What is an inference?
- (A) Just a guess.
 - (B) A statement based off of your observations.
 - (C) The same as an observation.
 - (D) Examples of something.
- 113.** When would you use a One-Way ANOVA instead of a t-test?
- (A) When you have two groups and one dependent variable
 - (B) When you are testing frequency counts in a survey
 - (C) When you are measuring one group at two time points
 - (D) When you have more than two groups to compare on one variable
- 114.** In 1975, a random sample of 1484 adult U.S. citizens was surveyed, and 193 strongly agreed with the statement, "People should take care of themselves." Then, in 1991, a survey of 1013 adult U.S. citizens showed that only 61 strongly agreed with the statement. Does this indicate that the proportion of U.S. adults who strongly agree with the given statement has dropped?
- (A) 1 proportion z-test
 - (B) 2 proportion z-test
 - (C) 1 sample t-test
 - (D) 2 sample t-test
- 115.** Inference is
- (A) Using a sample to make a judgement about the population
 - (B) A form of bias
 - (C) Random sampling
 - (D) A census
- 116.** Uses clues from observations to explain something that might have happened in the past or is happening in the present
- (A) Inference
 - (B) Prediction
- 117.** A ____ provides information about the direction and magnitude of the relationship between two or more variables
- (A) Median
 - (B) Correlation coefficient
 - (C) Standard deviation
 - (D) Mean
- 118.** In which of the following cases could you use a paired-samples t-test?
- (A) When comparing the same participants performance before and after training
 - (B) When assessing relationships between two groups
 - (C) When comparing two separate groups
 - (D) When comparing men and women's scores
- 119.** Correlation does not equal causation: true or false?
- (A) False
 - (B) True
- 120.** What type of data is needed for an unrelated t-test?
- (A) Nominal
 - (B) Ordinal
 - (C) Interval/Ratio
 - (D) None of above
- 121.** Which test is NOT used for correlations?
- (A) Mann Whitney U
 - (B) Spearman's
 - (C) Pearson
 - (D) Chi Squared
- 122.** T-test is usually used when sample size is:
- (A) < 30
 - (B) > 30
 - (C) > 100
 - (D) Infinite
- 123.** Inferential statistics makes judgements or claims from analyzing ____
- (A) ____ a sample from a population.

- (B) — a whole population.
(C) — data obtained.
(D) — a random sample.
- 124.** Which statistical procedure should be used in order to answer this research problem: “Do motivation and self-efficacy significantly predict the achievement test results of the students? ”
- (A) Independent Samples T-test
(B) Multiple Regression Analysis
(C) Correlation
(D) Paired Samples T-test
- 125.** Which test is used for comparing the means of three or more groups?
- (A) T-test
(B) Z-test
(C) ANOVA
(D) Chi-square test
- 126.** The Spearman rho is used under which condition?
- (A) The predictor and criterion variables are measured on a continuous scale
(B) The predictor and criterion variables are measured on a categorical scale.
(C) The predictor and criterion variables are measured on an ordinal scale
(D) The predictor variable is ranked while the criterion variable is measured on a continuous scale.
- 127.** After conducting an experiment, Dr. Fitzpatrick concluded that there was a statistically significant difference between the scores of the experimental and control groups. In other words,
- (A) The difference is highly meaningful and important to scientists.
(B) The results are replicable.
(C) The scores differed by five points or more.
(D) It is unlikely that the difference occurred by chance.
- 128.** Only about 20% of people who try to quit smoking succeed. Sellers of a motivational tape claim that listening to their recorded messages can help people quit. What is the alternative hypothesis?
- (A) $P = 0.2$
(B) $P = 0.25$
(C) $P < 0.2$
(D) $P > 0.2$
- 129.** It is used to test hypotheses, look at cause and effect, and make predictions.
- (A) True
(B) False
- 130.** Which statistical procedure should be used in order to answer this research problem: “Does the house size significantly predict the price of the house? ”
- (A) Mean and Standard Deviation
(B) Correlation
(C) Regression Analysis
(D) Frequency and Percentage
- 131.** It allows the comparison of the means of the two groups.
- (A) T-TEST
(B) ANALYSIS OF VARIANCE (ANOVA)
(C) PEARSON’S CORRELATION (PEARSON’S R)
(D) None of above
- 132.** A study which shows a relationship between two variables is known as
- (A) An experiment.
(B) An interview.
(C) A naturalistic observation.
(D) A correlation.
- 133.** What statistical method is used to find relationships between variables?
- (A) Mean
(B) Correlation
(C) Frequency
(D) Range

134. Descriptive or inferential? By 2040 at least 3.5 billion people will run short of water (World Future Society).
- (A) Descriptive
 - (B) Inferential
135. When is it appropriate to use a Chi-Square test?
- (A) When comparing the means of numerical data
 - (B) When analyzing frequencies or counts in categorical data
 - (C) When testing changes in continuous variables over time
 - (D) When comparing means across four different conditions
136. Which test would you use to see whether the fans that buy tickets are demographically the same as the general population of the city. Currently 42% are Caucasian, 35% are Hispanic, 12% are African American, 8% are Asian, and the rest are defined as other.
- (A) Chi-square Goodness of Fit Test
 - (B) Chi-Square Test for Homogeneity
 - (C) Chi-Square Test for Independence/Association
 - (D) Not a Chi-square test
137. The F-test
- (A) Is essentially a two tailed test.
 - (B) Is essentially a one tailed test.
 - (C) Can be one tailed as well as two tailed depending on the hypothesis.
 - (D) Can never be a one tailed test.
138. An attempt to explain why something happened
- (A) Inference
 - (B) Observations
139. It is not important and necessary to examine differences between and among the mean scores of groups so that inferences can be made from a smaller group (sample) to the population of interest.
- (A) True
 - (B) False
140. A company wants to compare employee satisfaction levels across three departments (HR, Finance, and Marketing). Which test should be used?
- (A) Correlation
 - (B) Regression
 - (C) ANOVA
 - (D) T-test
141. A manager of a local store samples the receipts of every fifth person who goes through the line. Out of 50 people, 4 had an item that was priced incorrectly. If 600 people go through his store each day, how many people would you expect to have an incorrect price?
- (A) 30
 - (B) 25
 - (C) 48
 - (D) 50
142. What kind of approach do we use to determine the amount of variance that an intervening variable explains in both the independent and dependent variables?
- (A) Multiple regression
 - (B) Partial correlations
 - (C) Mediating
 - (D) Control
143. Pauline is testing the claim that students from her university have better spatial memory than the average student in the country. She measures the average spatial memory of 50 students and compares it to the national average. What test is she using and what are the degrees of freedom of this test?
- (A) Independent samples t test; 49
 - (B) One sample t test; 48
 - (C) One sample t test; 49
 - (D) Independent samples t test; 48
144. A researcher calculates statistical significance for her study and finds a 5 percent

- chance that results are due to chance. which of the following is an accurate interception to this finding?
- (A) This is well beyond the range of statistical significance
 - (B) This is the minimum result typically considered statistically significance
 - (C) This is not statistically significance
 - (D) There is no way to determine statistical significance
- 145.** Testing hypothesis is a
- (A) Inferential statistics
 - (B) Descriptive statistics
 - (C) Data preparation
 - (D) Data analysis
- 146.** To predict the value of the dependent variable for a new case based on the knowledge of one or more independent variables, we would use
- (A) Regression analysis
 - (B) Correlation analysis
 - (C) Kolmogorov-Smirnov test
 - (D) One-way analysis of variance
- 147.** If the p-value is less than the significance level (α), we ____ the null hypothesis.
- (A) Accept
 - (B) Reject
 - (C) Retest
 - (D) Ignore
- 148.** If a research study results in a correlation of 1.00, what relationship is present between the independent and dependent variables?
- (A) Perfect positive correlation
 - (B) Perfect negative correlation
 - (C) No correlation between the variables
 - (D) None of above
- 149.** There are 600 students at Hilda's school. Out of 30 students she surveys, 8 of them ride their bikes to school. Estimate how many students ride their bikes to school from the population.
- (A) 160 students
 - (B) 20 students
 - (C) 74 students
 - (D) 240 students
- 150.** The ____ is used to determine whether the variability between group means is larger than the variability of the observations within the groups.
- (A) T test
 - (B) Z test
 - (C) F test
 - (D) R test
- 151.** The researcher in question 727 now attempts a more complex experiment. One group receives no assertiveness training, a second group receives four assertiveness training session, and a third receives six sessions. The statistic of choice would be the
- (A) Mean
 - (B) T test
 - (C) Two-way ANOVA
 - (D) ANOVA
- 152.** Analysis tool used in statistics that splits an observed aggregate variability inside a data set into two parts: systematic and random factors. The systematic factors have a statistical influence on the given data set, while the random factors do not. Analysts use this test in a study.
- (A) Linear Regression
 - (B) Multiple
 - (C) Regression
 - (D) ANOVA
- 153.** A manager samples receipts of every fifth person in line. Out of 50 people, 4 had a mis-priced item. If 600 people go to the store each day, how many can you expect to have a mis-priced item?
- (A) 50 people
 - (B) 80 people
 - (C) 48 people
 - (D) 12 people

154. Chi-Square Test is a ____
(A) Parametric Test
(B) Nonparametric test
155. A correlation test such as Pearson r should be used when:
(A) Both variables are continuous and normally distributed.
(B) The data is categorical.
(C) There is only one variable.
(D) The variables are not related at all.
156. Jackson is conducting a study to compare the effectiveness of two teaching methods. He wants to understand not just whether there is a difference, but how strong that difference is. What does effect size quantify in research findings?
(A) Strength of a relationship or group difference
(B) Probability results occurred by random chance
(C) Number of variables included in a model
(D) Precision of a sampling procedure used
157. A conclusion drawn from data and observations
(A) Inquiry
(B) Inference
(C) Investigation
(D) None of above
158. Which statistical procedure should be used in order to answer this research problem: "Is there a significant difference in the perception of teachers and school administrators about assessment practices?"
(A) Mean and Standard Deviation
(B) Correlation
(C) Paired Samples T-test
(D) Independent Samples T-test
159. Which analysis method is most suitable for testing the relationship between multiple independent variables and one dependent variable?
(A) Multivariate regression analysis
(B) Analysis of variance
(C) Chi-square test
(D) T-test
160. Hypotheses test may also be called as
(A) Significance test.
(B) Informal test.
(C) Test.
(D) Moderating test.
161. Which statistical analysis tests the relationship between two nominal variables?
(A) T-test
(B) Regression analysis
(C) Chi-square test
(D) ANOVA
162. An advantage of Correlations is:
(A) They can identify relationships between variables.
(B) They provide causal explanations.
(C) They eliminate all biases.
(D) They are always accurate.
163. Which looks into the statistical difference among the two or more groups
(A) Pearson's R
(B) T-test
(C) Analysis of Variance (ANOVA)
(D) Multiple Regression
164. Entails estimating or extracting factors; deciding how many factors to retain; and rotating factors to an interpretable orientation (Let the data speak for it self)
(A) Factor analysis
(B) Exploratory factor analysis
(C) Confirmatory factor analysis
(D) Discriminant evidence
165. The null hypothesis is ____
(A) Prediction of no change/no difference/no relationship; nothing is happening/going to happen

- (B) Prediction that there is a change/difference of the relationship; something is happening
- 166.** For which of the following test both the dependent and independent variables should be metric ones?
- (A) Regression
 - (B) ANOVA
 - (C) T-test
 - (D) Spearman's Correlation
- 167.** It is used to conclude the data. Inferential statistics requires statistical tests performed on samples, and it draws conclusions by identifying the differences between the 2 groups. Tests calculate the p-value that is compared with the probability of chance (α) = 0.05. If the p-value is less than α , then it is concluded that the p-value is statistically significant.
- (A) Quasi
 - (B) Descriptive Statistics
 - (C) Inferential statistics
 - (D) Simple Statistics
- 168.** Sofia is comparing the effectiveness of a new therapy on depression with a more traditional form of treatment. She compares the prevalence of depression symptoms in 15 patients who have undergone the new therapy with the symptoms of 15 other patients who have undergone the traditional treatment. Which of the following test is most suited to the design of her study?
- (A) Mixed ANOVA
 - (B) Independent samples t-test
 - (C) Related samples t-test
 - (D) Linear regression
- 169.** Which statistical procedure should be used in order to answer this research problem: "Is there a significant difference in the research competencies between public high school graduates and private high school graduates?"
- (A) Correlation
 - (B) Independent Samples T-test
 - (C) ANOVA
 - (D) Paired Samples T-test
- 170.** Power analysis builds on the concepts of
- (A) Validity
 - (B) Reliability
 - (C) Internal consistency
 - (D) Effect size
- 171.** A **university** is investigating whether students' **preferred study methods (Online vs. Offline)** are related to their **degree program (MBA vs. BBA)**. Which test should be used?
- (A) Chi-square test
 - (B) Regression
 - (C) ANOVA
 - (D) T-test
- 172.** Jon finds a box of 350 postcards. He selects a random sample of 75 postcards and finds that 27 already have a stamp on them. Predict the total number of postcards in the box with stamps on them.
- (A) 9,450 postcards
 - (B) 126 postcards
 - (C) 13 postcards
 - (D) 5 postcards
- 173.** Which analysis comes under inferential analysis?
- (A) Hypothesis Testing.
 - (B) Multivariate Analysis.
 - (C) Bivariate Analysis.
 - (D) Univariate Analysis.
- 174.** TRUE/FALSE. The formal procedure for investigating our ideas about the world using statistics is called hypothesis testing.
- (A) True
 - (B) False
- 175.** When properly conducted, inferential methods connect sample findings to the real-world population. What enables this connection?
- (A) Averaging descriptive charts visually
 - (B) Assuming samples always equal populations

- (C) Using evidence from observed sample data
(D) Ignoring sampling variability entirely
- 176.** A prediction has been made that the chance that a person will be robbed in a certain city is 15%.
(A) Inferential
(B) Descriptive
- 177.** What statistic is often used for nominally scaled variables?
(A) Chi-square
(B) Pearson product moment
(C) T-Test
(D) ANOVA
- 178.** Quantitative data is analyzed through:
(A) Coding
(B) Statistics
(C) Narratives
(D) Observation
- 179.** A P-Value score of ____ is acceptable for results to be considered statistically significant in the field of psychology (Research Methods and Statistics Part III)
(A) 0.01
(B) 0.05
(C) 1.00
(D) 0.80
- 180.** The following are true regarding Pearson Product-Moment Correlation Test except:
(A) Both population are normally distributed
(B) The subjects are randomly selected
(C) It is applied for nominal and ordinal data
(D) Used to measure the degree of relationship
- 181.** Test to compare two means
(A) Chi-square
(B) T-test
(C) ANOVA
(D) Z-score
- 182.** If a Null hypothesis denoted as
(A) H1
(B) H0
(C) H3
(D) H2
- 183.** Deals with making generalizations about larger groups & population on the basis of information obtained by the study of one or more samples
(A) Inferential Statistics
(B) Descriptive Statistics
(C) Statistics
(D) Statistic
- 184.** Correlation does not equal ____
(A) Causation
(B) Determination
(C) Observation
(D) Youth Nation
- 185.** A statistical test conducted to compare means of more than two populations
(A) Pearson Correlation
(B) Chi-square test
(C) Independent Sample t-test
(D) One Way ANOVA
- 186.** Tests the relationship between several independent variables and one dependent variable
(A) Pearson's R
(B) T-test
(C) Analysis of Variance (ANOVA)
(D) Multiple Regression
- 187.** A statistical statement of how likely it is that an obtained result occurred by chance.
(A) Range
(B) Standard deviation
(C) Statistical significance
(D) None of above

- 188.** What is inferential analysis?
- (A) Finding absolute numbers
 - (B) Making sure there are minimal errors
 - (C) Show relationship between variables generalize results and make predictions
 - (D) Making inferences and then collecting more data to validate findings
- 189.** Why is it important to report effect sizes in addition to p-values?
- (A) P-values only tell you if an effect exists, not how large it is
 - (B) Effect sizes are easier to calculate
 - (C) P-values are always wrong
 - (D) Effect sizes determine statistical significance
- 190.** Which of the following test should be used if there are one between, one within subjects factor?
- (A) One-way ANOVA
 - (B) Two-ways ANOVA
 - (C) One-way repeated measure ANOVA
 - (D) Mixed Between-Within ANOVA
- 191.** Which type of data is compatible with inferential statistics?
- (A) Categorical data
 - (B) Qualitative data
 - (C) Numeric data
 - (D) Quantitative data
- 192.** Used to test differences of continuous variables (mean scores) between two groups.
- (A) Analysis of Variance (ANOVA)
 - (B) Correlation
 - (C) Chi-square
 - (D) T-test
- 193.** Who invented the correlation coefficient and developed the ideas behind finger-printing and eugenics?
- (A) Charles Darwin
 - (B) Sir Francis Galton
 - (C) Alfred Binet
 - (D) Wechsler
- 194.** If a study finds $p < 0.05$, this typically means:
- (A) Strong evidence for the null hypothesis
 - (B) Results are unreliable
 - (C) No significant findings
 - (D) Evidence against the null hypothesis
- 195.** A null hypothesis assumes:
- (A) Relationships are always linear
 - (B) One variable influences another
 - (C) A significant relationship exists
 - (D) No significant relationship exists
- 196.** Which method compares more than two group means?
- (A) ANOVA (Analysis of Variance)
 - (B) Regression analysis
 - (C) Chi-square test
 - (D) T-test
- 197.** Barb has a directional hypothesis. How can she test for statistical significance?
- (A) Two-tailed test
 - (B) Barb needs a new plan.
 - (C) One-tailed test
 - (D) None of above
- 198.** Inferential Statistics is used to explain the results from the sample as being representative for the ____
- (A) Sample group
 - (B) Whole population
 - (C) Control group
 - (D) Experimental group
- 199.** Hypothesis can be verified using ____
- (A) M-value
 - (B) T-value
 - (C) P-value
 - (D) F-value

- 200.** What does the confidence level indicate in a study?
- (A) How confident researchers are in the sample
 - (B) How confident researchers can be that the study's results would be replicated
 - (C) The cost per survey
 - (D) The range in which a statistic may fluctuate
- 201.** Which test would you use to see if people on computers and people on handhelds use the same Internet search engines? 1000 web searches from a computer and 1500 web searches from a hand held were tracked to see what search engine was used.
- (A) Chi-square Goodness of Fit Test
 - (B) Chi-Square Test for Homogeneity
 - (C) Not a Chi-square test
 - (D) None of above
- 202.** A company wants to test if a new pricing strategy increased sales. Which approach should they use?
- (A) Descriptive statistics
 - (B) One-sample or two-sample hypothesis test
 - (C) ANOVA
 - (D) Linear algebra transformation
- 203.** Is a statistical measure that expresses the extent to which two variables are linearly related
- (A) Psychoactive drug
 - (B) Extrasensory perception
 - (C) Correlation
 - (D) Central tendency
- 204.** A statistic is an unbiased estimator of a parameter when
- (A) The statistic is calculated from a random sample.
 - (B) In many samples, the values of the statistic are very close to the value of the parameter.
 - (C) In a single sample, the value of the statistic is equal to the value of the parameter
 - (D) In many samples, the values of the statistic are centered at the value of the parameter.
- 205.** What statistical test can be used for observing the changes between base line and endline study?
- (A) Chi-Square Test
 - (B) Independent Sample t-Test
 - (C) Correlation
 - (D) Paired Sample t-Test
- 206.** ____ is a statistical method that deduces from a small but representative sample the characteristics of a bigger population.
- (A) Sampling
 - (B) Inferential statistics
 - (C) Correlational studies
 - (D) Descriptive statistics
- 207.** A very small ____ statistic means that your observed data fits your expected data extremely well. In other words, there is a relationship.
- (A) Mean
 - (B) Median
 - (C) Mode
 - (D) Chi-square test
- 208.** A UX team wants to compare satisfaction scores between two unrelated groups. What test should they use?
- (A) Independent-samples t-test
 - (B) Correlation
 - (C) Paired-samples t-test
 - (D) Chi-square
- 209.** The ANOVA procedure is a statistical approach for determining whether or not
- (A) The means of two or more samples are equal
 - (B) The means of more than two samples are equal
 - (C) The means of two or more populations are equal
 - (D) The means of two samples are equal

- 210.** Define what inference is.
- (A) An assumption or conclusion that is rationally and logically made, based on the given facts or circumstances
 - (B) Predicting the circumstances
 - (C) The author stating the main idea in the paragraph or text
 - (D) The author providing information to the reader what is happening in the text
- 211.** Statistical analysis in quantitative research is primarily used to:
- (A) Explore cultural contexts
 - (B) Interpret numerical data and test hypotheses
 - (C) Collect qualitative information
 - (D) Generalize findings to a population
- 212.** An inference is a ____ guess
- (A) Wild
 - (B) Unknown
 - (C) Educated
 - (D) Prediction
- 213.** You want to know if task time differs between two software versions used by the same participants. What test applies?
- (A) Paired-samples t-test
 - (B) Chi-square
 - (C) Independent-samples t-test
 - (D) Correlation
- 214.** In ANOVA, between groups design refers to systematic variance attributable to the ____
- (A) IVs (independent variables)
 - (B) DVs (dependent variables)
 - (C) Random error
 - (D) Sample size
- 215.** T-tests, ANOVA, and regression analysis are part of what type of statistics?
- (A) Descriptive Statistics
 - (B) Inferential Statistics
 - (C) Hypothesis Testing
 - (D) Observations
- 216.** A good inference doesn't have to be true but logical and acceptable.
- (A) True
 - (B) False
- 217.** Which of the following statistical process is used to generalize the results from sample to its respective population
- (A) Descriptive statistics
 - (B) Comparative statistics
 - (C) Inferential statistics
 - (D) Predictive statistics
- 218.** What is a 'null hypothesis' in research?
- (A) A hypothesis that assumes no relationship between variables
 - (B) A hypothesis that predicts an outcome
 - (C) A general assumption of the study
 - (D) A variable that cannot be measured
- 219.** ANOVA is used to test the strength of association between more than two variables.
- (A) TRUE
 - (B) FALSE
- 220.** If the results are significant we can..
- (A) Reject the null hypothesis
 - (B) Reject the alternate hypothesis
 - (C) Accept the null hypothesis
 - (D) None of above
- 221.** A statistical index of the relationship between two things from -1.00 to +1.00.
- (A) Scatterplot
 - (B) Variable
 - (C) Correlation
 - (D) Correlation coefficient
- 222.** Which statistical procedure should be used in order to answer this research problem: "Is there a significant difference in the perception of freshmen, sophomores, and juniors about online learning?"
- (A) Paired Samples T-Test
 - (B) Independent Samples T-test
 - (C) Correlation
 - (D) ANOVA

- 223.** Which statistical procedure should be used in order to answer this research problem: "Is there a significant difference between pre-test and posttest scores?"
- (A) Paired Samples T-test
 - (B) Independent Samples T-test
 - (C) ANOVA
 - (D) Correlation
- 224.** In a chi square goodness of fit test, you must have
- (A) Expected counts for two samples
 - (B) Observed proportions for one categorical variable
 - (C) Observed counts for one categorical variable
 - (D) Observed proportions for two categorical variables
- 225.** To complete a t test you would consult a tabled value of t. In order to see if significant differences exist in an ANOVA you would consult
- (A) The mode
 - (B) A table for t values
 - (C) A table for F values
 - (D) The chi-square
- 226.** What does correlation measure in psychological research?
- (A) The cause of a phenomenon
 - (B) The extent to which two factors vary together
 - (C) The ethical standards of a study
 - (D) The replication of findings
- 227.** A statistical method used in finance, investing, and other disciplines that attempts to determine the strength and character of the relationship between one dependent variable (usually denoted by Y) and a series of other variables (known as independent variables).
- (A) Topology
 - (B) Correlation
 - (C) Regression
 - (D) ANOVA
- 228.** When comparing two studies measuring the same phenomenon, the study with a statistical power of 0.5 is more likely to ____ than the study with a statistical power of 0.8.
- (A) Result in a Type II error
 - (B) Give you a more precise estimate of the effect
 - (C) Produce a statistically significant finding
 - (D) Result in a Type I error
- 229.** Which scenario best illustrates a population inference?
- (A) Predicting overall customer churn rate nationwide
 - (B) Transforming data into standardized z-scores
 - (C) Describing average satisfaction in the sample
 - (D) Listing software tools used for analysis
- 230.** What method should be used if a researcher wants to know how different levels of an independent variable affect the dependent variable at different levels of another independent variables?
- (A) Two-way analysis of variance.
 - (B) Multiple correlation method.
 - (C) Factorial analysis of variance method.
 - (D) Analysis of covariance method.
- 231.** Statistical power is the probability of concluding there was an effect when there was one. Power = ____
- (A) 1-beta
 - (B) Alpha
 - (C) Beta
 - (D) 1-alpha
- 232.** Devise a data analysis plan for a study investigating the correlation between class attendance and exam scores.
- (A) Use thematic analysis to categorize responses
 - (B) Perform a Pearson correlation analysis to examine the relationship

- (C) Conduct narrative analysis to explore student experiences
(D) Use descriptive statistics to summarize the data
233. Mathematical methods that allow us to determine whether we can generate findings from our sample to the full population
(A) Naive Realism-
(B) Inferential statistics
(C) Rapid eye movement
(D) Reliability
234. A statistical test used to determine whether a correlation coefficient is statistically significant is called the
(A) One-way analysis of variance
(B) T-test for independent for correlation coefficients sample
(C) Chi-square test for contingency table
(D) T-test for correlation coefficients
235. Chi square test is example of:
(A) Parametric test
(B) Non parametric test
(C) Descriptive test
(D) Survey test
236. An INFERENCE is ____
(A) A logical conclusion
(B) A guess based on evidence
(C) Both
(D) None of above
237. Deals with the formulation of inferences about conditions that exist in a population from study of a sample drawn from a population.
(A) Statistics
(B) Descriptive statistics
(C) Inferential statistics
(D) Statistician
238. ANOVA stands for ____
(A) Analysis of Variation
(B) Analysis of Variance
(C) Analysis of Variability
(D) A Non-Visual Analysis
239. Which statistical method is used to predict relationships between two variables?
(A) Regression
(B) Frequency distribution
(C) Chi-square
(D) T-test
240. Joe hypothesizes that a new drug he has just invented will enhance mice's memories. He feeds the drug to experimental group and gives the control group a placebo. He then times the mice as they learn to run through a maze. In order to know whether his hypothesis has been supported, Joe would need to use
(A) Inferential statistics
(B) Scatter plott
(C) Descriptive statistics
(D) Histograms
241. In research, confidence intervals are usually set at what figure?
(A) 5%
(B) 95%
242. What statistical technique purposes to test the relationship between two continuous variables?
(A) T-Test for two dependent samples
(B) T-Test for independent samples
(C) Chi Square Test
(D) Pearson's r
243. ANOVA is used to compare the differences in ____ for more than 2 populations
(A) Variances
(B) Means
(C) Regression
(D) None of above
244. A statistical statement of how likely it is that an obtained result occurred by chance

- (A) Statistical Significance
 - (B) Culture
 - (C) Hindsight Bias
 - (D) Range
245. What do we mean by the word inference/inferences?
- (A) Conclusion
 - (B) Conditional statement
 - (C) Hypothesis
 - (D) Syllogism
246. If a researcher found a .77 correlation between amount of time spent studying and student's performance on exam, which of the following would be true?
- (A) Increasing studying time increases exam performance.
 - (B) Having a higher exam performance increases time studying.
 - (C) Students who spend more time study tend to perform better on exams.
 - (D) More time studying causes better exam performance.
247. Which method helps determine the relationship between continuous variables in research?
- (A) Linear regression analysis
 - (B) Analysis of variance (ANOVA)
 - (C) Logistic regression analysis
 - (D) Factor analysis
248. Predictive validity reflects:
- (A) The extent to which a score on a scale or test predicts scores on some criterion measure.
 - (B) The degree to which a test measures what it claims to be measuring.
 - (C) The consistency of a research study or measuring test.
 - (D) The extent to which a test appears to measure what it is supposed to measure.
249. Which test hypothesis states that there is no difference between two parameters?
- (A) Null hypothesis
 - (B) Point hypothesis
 - (C) Significance hypothesis
 - (D) Alternative hypothesis
250. If it is statistically meaningful, it has ____
- (A) Significance
 - (B) Instrument
 - (C) Caption
 - (D) Verify
251. An example of using inferential statistics in research is:
- (A) Descriptive analysis of survey data
 - (B) Predicting election outcomes based on a sample
 - (C) Summarizing data using graphs
 - (D) Calculating the mean of a dataset
252. What statistical tool is appropriate when the predictor is categorical and the outcome is also categorical?
- (A) Spearman's r
 - (B) Chi-square Test
 - (C) Sign Test
 - (D) Kruskal-Wallis H Test
253. Numerical value obtained from applying the estimator using the sample data; can be a value or range of values that approximate a parameter
- (A) Estimate
 - (B) Estimator
 - (C) Estimation
 - (D) None of above
254. Which method is most appropriate to test whether two group means differ?
- (A) Median comparison without assumptions
 - (B) Regression predicting a dependent variable
 - (C) T-test comparing group averages
 - (D) Correlation analysis between variables

255. Action researchers are often interested in testing hypotheses and making generalizations beyond immediate research participants. This is usually accomplished using —
- (A) Descriptive statistics
 - (B) Inferential statistics
 - (C) Implied statistics
 - (D) None of above
256. Which of the following is not used to test whether the difference in the means of the two groups is statistically significant?
- (A) A paired-samples t-test
 - (B) An independent-samples t-test
 - (C) ANOVA (analysis of variance)
 - (D) Chi-square test
257. Which type of statistical analysis would you use to compare the means of three or more groups?
- (A) Regression analysis
 - (B) ANOVA
 - (C) T-test
 - (D) Chi-square
258. Relies on few or no assumptions about the shape of the distribution. will rely on median and interquartile ranges to describe the distribution
- (A) Parametric
 - (B) Nonparametric
259. Making decisions and drawing conclusions about populations.
- (A) Descriptive Statistics
 - (B) Inferential Statistics
 - (C) Qualitative Variable
 - (D) Quantitative Variable
260. What determines how likely any difference between experimental groups is due to chance?
- (A) Statistical analysis
 - (B) Sample size
 - (C) Experimental design
 - (D) Control variables
261. What statistical tool is used to compare the means of two or more groups?
- (A) Regression Analysis
 - (B) Correlation Analysis
 - (C) ANOVA (Analysis of Variance)
 - (D) T-Test
262. Which statistical procedure should be used in order to answer this research problem: "Is there a significant relationship between height and weight of the patients? "
- (A) Frequency
 - (B) Correlation
 - (C) Multiple Regression Analysis
 - (D) Percentage
263. When two variables appear to have a relationship it is said they have a —
- (A) Random sample
 - (B) Random assignment
 - (C) Control factor
 - (D) Correlation
264. What is the significance of a P-value smaller than 0.05?
- (A) The results are likely due to random chance
 - (B) The results are statistically significant
 - (C) The results do not need further analysis
 - (D) The data is inconclusive
265. It is important to know the difference between correlation and causation. Which statement below best describes correlation?
- (A) The extent to which two characteristics or phenomena prove that characteristic A caused characteristic B.
 - (B) The extent to which two characteristics or phenomena tend to found together or change together.
 - (C) The extent to which two characteristics or phenomena tend to operate in different ways.
 - (D) None of above

266. When studying the effect of qualitative data on outcome which is quantitative in a sample size of less than 30, which is the appropriate test to use?
- (A) T-test
 - (B) Z-test
 - (B) Coefficient of Correlation.
 - (C) Scatter Plots/Diagram.
 - (D) None of these.
267. What is "Inference"?
- (A) Marking a text with notes and/or comments
 - (B) A logical guess made by connecting bits of information
 - (C) Important ideas throughout a work that support the central message
 - (D) The study skill of outlining or summarizing the ideas of a lecture
268. When is the chi-square test commonly used in mixed method research?
- (A) To compare means of different groups
 - (B) To test for the association between categorical variables
 - (C) To measure the strength and direction of the relationship between two variables
 - (D) To predict an outcome based on a set of predictor variables
269. Which statistical method is most appropriate for analyzing data that deviates from a normal distribution?
- (A) Parametric tests
 - (B) Non-parametric tests
 - (C) Predictive tests
 - (D) Standardized tests
270. ANOVA is used when:
- (A) Two samples are compared
 - (B) More than two samples are compared
 - (C) Only one sample is checked
 - (D) None
271. If one knows that the yield and rainfall are closely related then one want to know the amount of rain required to achieve a certain production. For this purpose we use analysis
- (A) Regression Analysis.
 - (A) Pearson correlation
 - (B) T-test
 - (C) Mode
 - (D) Chi-square
272. A student wants to know if there's a relationship between time spent on a task and years of computer experience. What test should they use?
273. A researcher commits Type I Error when he
- (A) Accepts Null hypothesis when it is true.
 - (B) Rejects the Null Hypothesis when it is true.
 - (C) Rejects Null hypothesis when it is false.
 - (D) Accepts Null hypothesis when it is false.
274. Which of the following is expected if discriminant validity is present?
- (A) High correlations between distinct values
 - (B) Low correlations between distinct values
 - (C) No correlation between any values
 - (D) High correlation within the same value
275. What do you call the allowable error in a research?
- (A) Alpha Error
 - (B) Margin of Error
 - (C) Type I Error
 - (D) Type II Error
276. An experimenter finds a difference between an experimental group and a control group that is less likely due to chance and more likely due to the manipulation of the independent variable. This finding then is most likely to be
- (A) A replication.
 - (B) Statistically significant.
 - (C) Below the margin of error.
 - (D) Reliable, but not valid.
 - (E) Valid, but not reliable.

277. Stephanie is designing an experiment to investigate the effect of listening to calming music on positive emotions. Even though the usual alpha level is 0.05, Stephanie feels that she wants to adopt more stringent criteria for her study, so she chooses an alpha level of 0.01. This strategy reduces the probability of:
- (A) Type I error
 - (B) Type II error
 - (C) Standard error
 - (D) P-value error
278. You are given two sets of data measuring the same information, both with the same sample size. Set A has a larger Standard Error than Set B. If you were looking for a 99.8% Confidence Interval, which set would have a larger Margin of Error?
- (A) Set A
 - (B) Set B
 - (C) Not enough information
 - (D) I have no idea what you're asking me to do
279. When you want to determine the probability that the observed result is due to chance alone, you look for which of the following in a statistical test?
- (A) P value
 - (B) Power
280. If a sample is representative of a population, data obtained from the sample can be used to make ____
- (A) Questions
 - (B) Populations
 - (C) Biased sample
 - (D) Inferences.
281. The use of the laws of probability to make inferences and draw statistical conclusions about populations based on sample data is referred to as ____
- (A) Descriptive statistics
 - (B) Inferential statistics
 - (C) Sample statistics
 - (D) Population statistics
282. The chi-square test of independence relies upon what type of data?
- (A) Measured data
 - (B) Percentages
 - (C) Categorical data
 - (D) Absolute values
283. When selecting types of tests, if your sample size is small you are forced to use
- (A) Parametric
 - (B) Nonparametric
284. Which test compares the means of two groups or scores and can use independent or paired samples?
- (A) T-test.
 - (B) Chi-square test.
 - (C) ANOVA.
 - (D) Regression analysis.
285. A fast-food chain surveys customers about their **preferred menu item (Burger, Pizza, or Pasta)** and their **age group (Teens, Adults, Seniors)**. A **Chi-square test** is performed, and the p-value is **0.002**. What should they conclude?
- (A) Food preference **significantly differs** by age group
 - (B) All age groups prefer the same food
 - (C) The relationship is not significant
 - (D) The test result is invalid
286. Which of the following is true about statistical testing?
- (A) It is always done on the alternative hypothesis
 - (B) It is done on the null hypothesis
 - (C) It does not involve hypotheses
 - (D) It can ignore sampling methods
287. Which of the following is not a statistical tool for Inferential Statistics?
- (A) Mean
 - (B) ANOVA
 - (C) Pearson
 - (D) T-test

288. A statistical measure of the association between two variables is called a(n)
- (A) Independent variable.
 - (B) Dependent variable.
 - (C) Control variable.
 - (D) Correlation coefficient.
289. When asked to determine the probability of rejecting the null hypothesis when it is false or accepting the alternative hypothesis when it is true, this refers to
- (A) Power
 - (B) Relative risk
290. Harry collects data from a random sample of seventh-graders. Out of 25 respondents, 10 ride the bus to school. Of the 150 seventh-graders who attend Harry's school, how many would be expected to ride the bus to school?
- (A) 40 seventh graders
 - (B) 50 seventh graders
 - (C) 60 seventh graders
 - (D) 90 seventh graders
291. Z-test is appropriate when:
- (A) Population standard deviation is known
 - (B) Population standard deviation is unknown
 - (C) Data is qualitative
 - (D) Sample size is very small
292. The number of independent values or quantities that can be assigned to a statistical distribution
- (A) Alpha
 - (B) Critical Values
 - (C) Degree of Freedom
 - (D) Z values
293. What statistical test is appropriate to determine if there is a significant mean difference in temperature, pH, and oxygen of *E. coli* cultured in municipal waters of Estancia, Iloilo, Philippines using lantay and hanging methods?
- (A) Analysis of Variance (ANOVA)
 - (B) Chi-square test
 - (C) Pearson correlation
 - (D) Regression analysis
294. When analyzing quantitative data, which of the following techniques would be most appropriate?
- (A) Thematic analysis
 - (B) Regression analysis
 - (C) Content analysis
 - (D) Focus group moderation
295. When looking at statistical significance, social workers and social scientists have settled on ____ to be the most common cutoff point to separate findings.
- (A) 5
 - (B) .05
 - (C) .5
 - (D) None of above
296. What is the purpose of a null hypothesis?
- (A) To propose a specific relationship between variables
 - (B) To represent the absence of an effect or difference
 - (C) To guide the selection of research topics
 - (D) To suggest potential outcomes of the research study
297. Which statistical tool is used to measure the strength and direction of the relationship between the number of hours studied and the exam scores?
- (A) Regression Analysis
 - (B) Correlation Analysis
 - (C) Inferential Statistics
 - (D) Descriptive Statistics
298. What is 'statistical significance' and why is it important?
- (A) Statistical significance means results are always correct and reliable.
 - (B) Statistical significance indicates that results are unlikely to be due to chance, helping validate research findings.

- (C) Statistical significance indicates that results are always due to chance.
(D) Statistical significance is a measure of the sample size used in research.
- 299.** An important statistical technique that enables us to decide whether or not we will believe the claims made about populations with unknown parameters is known as
(A) Statistics
(B) Hypothesis testing
(C) Experiment
(D) Sample design
- 300.** Researchers look for a relationship between two co-variables.
(A) Correlations
(B) Case Study
(C) Longitudinal Study
(D) None of above
- 301.** Which test does not use ordinal data?
(A) Mann Whitney U
(B) Wilcoxon T test
(C) Spearman's Rho
(D) Chi Squared
- 302.** What does the term "significance" mean in regards to scientific research?
(A) How consistently an experiment achieves the same results
(B) Whether a study achieved what the researchers intended it to
(C) Probability that a difference happened by sampling error or chance
(D) Acceptance in the scientific community
- 303.** Aiden is conducting psychological research and finds a small p-value in his results. What does this indicate about his findings?
(A) Greater effect size regardless of sample
(B) Lower likelihood results are due to chance
(C) Higher likelihood results are due to chance
(D) Higher measurement error across samples
- 304.** Which statement about an inference is correct?
(A) An inference is not based on any evidence.
(B) An inference is based only on what a text says.
(C) An inference always turns out to be right.
(D) An inference requires that you use clues.
- 305.** A statistical test conducted to find the relationship between two variables measured as qualitative/categorical variables
(A) Pearson Correlation
(B) Chi-square test
(C) Independent Sample t-test
(D) One Way ANOVA
- 306.** What does Inference mean?
(A) Finding details in a story
(B) Use clues and what you already know to come up with an idea
(C) Giving a reason for your answer
(D) Using what I know
- 307.** Which of the following is an example of inferential statistics in PSPP?
(A) Calculating mean and standard deviation
(B) Creating frequency tables
(C) Hypothesis testing (e.g., t-test, ANOVA)
(D) Recoding variables
- 308.** A researcher wants to compare the average task completion time between users who used a mouse and those who used a touchscreen. What test should be used?
(A) Paired-samples t-test
(B) Correlation test
(C) Independent-samples t-test
(D) Chi-square test

309. What statistical technique should be used for this research question, "Is there a significant difference between the pretest and posttest scores of learners in reading comprehension test?"
- (A) T-Test for two dependent samples
 - (B) T-Test for independent samples
 - (C) Chi Square Test
 - (D) Pearson's r
310. Which statistical test is appropriate for comparing means between two groups?
- (A) Chi-square test
 - (B) Independent Samples t-test
 - (C) Pearson correlation
 - (D) Descriptive statistics
311. A T-Test is used to find which of the following?
- (A) A Relationship
 - (B) A Pot of Gold
 - (C) A Difference
 - (D) The letter 'T' Edit
312. What is the term for a statistical technique used to forecast future trends based on historical data?
- (A) Regression analysis
 - (B) Time series analysis
 - (C) Cluster analysis
 - (D) Association analysis
313. Hypothesis testing is most closely related to the work of
- (A) Robert Hoppock
 - (B) Sigmund Freud
 - (C) Lloyd Morgan
 - (D) Fisher
314. T-test is used when there is ____
- (A) 2 dependent variables and 1 independent variable
 - (B) 1 dependent variable and 2 independent variables
 - (C) 1 dependent variable and 1 independent variable
 - (D) 2 dependent variable and 2 independent variables
315. A correlation coefficient enables you to:
- (A) Establish whether the data is telling you what you think it should tell you.
 - (B) Assess whether two variables measure the same phenomenon.
 - (C) Measure the difference between two variables.
 - (D) Quantify the strength of the linear relationship between two ranked or quantifiable variables.
316. Inferential statistical procedures are useful to explain data that result from research processes.
- (A) True
 - (B) False

1.5.4 Data Interpretation

1. How does the midpoint between two numbers on a bar graph's vertical axis help in interpreting data?
 - (A) It shows the average of all data points
 - (B) It helps in estimating values that fall between two marked numbers
 - (C) It indicates the maximum value for the graph
 - (D) It is used to divide the graph into sections
2. What is the purpose of a pie chart in data interpretation?
 - (A) To represent data in a linear format
 - (B) The purpose of a pie chart in data interpretation is to visually represent the proportions of different categories within a dataset.
 - (C) To display only one category of data
 - (D) To confuse the audience with unnecessary details

3. What does the noun "inference" or the verb "infer" mean?
 - (A) To find a fact directly from the text
 - (B) To determine something that is almost certainly true from the text, even though it wasn't stated directly
 - (C) To state something that the text didn't say and may or may not be true
 - (D) To determine which ideas from the text are opinions rather than facts
4. When data seems to be "gathered" around a particular value or values.
 - (A) Symmetry
 - (B) Gap
 - (C) Cluster
 - (D) Peak
5. In RRL writing, "synthesis" means:
 - (A) Summarizing and connecting findings of multiple studies
 - (B) Listing articles separately
 - (C) Quoting entire articles
 - (D) Avoiding critical thinking
6. The function of the Discussion is to:
 - (A) Interpret your results in light of what was already known about the subject of the investigation, and to explain our new understanding of the problem
 - (B) Explain clearly how you carried out your study in the following general structure and organization
 - (C) Objectively present your key results, without interpretation
 - (D) Establish the context of the work being reported
 - (E) Explain how the data were analyzed
7. Data interpretation is crucial because data often comes from multiple sources and should be organized upon entry into the analysis process.
 - (A) True
 - (B) False
8. The interpretation of data is designed to help people make sense of numerical data that has been collected, analyzed, and presented.
 - (A) True
 - (B) False
9. It involves taking the result of data analysis, making inferences on the relations studied, and using them to conclude.
 - (A) Data Coding
 - (B) Classification
 - (C) Data Analysis
 - (D) Data Interpretation
 - (E) Describe Data
10. Explain the importance of data interpretation in quantitative research.
 - (A) Collected data does not need to be analyzed in quantitative research
 - (B) Data interpretation is not important in quantitative research
 - (C) Data interpretation is important for making sense of the collected data and drawing meaningful conclusions.
 - (D) Drawing conclusions from data is not necessary in quantitative research
11. Drawing inferences means ____
 - (A) What you think will happen.
 - (B) To show that something is definitely true.
 - (C) Making a logical guess based on text details and what you already know.
 - (D) Adjusting your thoughts, usually to make them better.
12. What does it mean to analyze data in scientific research?
 - (A) To analyze data means to collect and organize data.
 - (B) To analyze data means to create a hypothesis.
 - (C) To analyze data means to examine and interpret the data collected during an experiment.
 - (D) None of the above

13. The body of a formal report should ____
- (A) Define important and unfamiliar terms
 - (B) Identify the individuals responsible for commissioning the report
 - (C) Discuss, analyze, interpret, and evaluate the research findings or solution to the problem
 - (D) Include a description of all secondary and primary data collected during the research phase of writing the report
14. When you explain or interpret things that you observe, you are
- (A) Classifying
 - (B) Predicting
 - (C) Inferring
 - (D) Observing
15. What is the primary purpose of using a Venn Diagram in scientific data interpretation?
- (A) To show the chronological order of events.
 - (B) To illustrate the logical relationships between different sets of data.
 - (C) To display the frequency of data points.
 - (D) To calculate the average of a data set.
16. What is the purpose of the discussion section in a quantitative research study?
- (A) To present the findings objectively
 - (B) To analyze the data statistically
 - (C) To interpret the results
 - (D) To describe the research methods
17. Hal has used four different colors to show the different products that his company sells. What will Hal use to explain the different product colors?
- (A) X-axis
 - (B) Y-axis
 - (C) Legend
 - (D) Chart title
18. The final major section of text in the paper. This is where the author explains the meanings and implications of the results.
- (A) DISCUSSION
 - (B) LITERATURE REVIEW
 - (C) INTRODUCTION
 - (D) TABLE OF CONTENTS
19. Which task is central to the Discussion section?
- (A) Hide acknowledged limitations
 - (B) Interpret findings meaningfully
 - (C) Repeat the abstract wording
 - (D) List every dataset collected
20. This section is where you present your findings and interpretation of your collected data. You usually present them in a table together with the interpretation and discussion (in paragraph form).
- (A) References
 - (B) Result and Discussion
 - (C) Method
 - (D) Introduction
21. It showcases summarized data collected in order to show trends, relationships or differences among variables.
- (A) Figures, Tables and Charts
 - (B) Surveys
 - (C) Research Paper
 - (D) Quantitative Research
22. "Comparing document to each other to determine whether they provide the same information or reach the same conclusion" is known as ____
- (A) Corroboration.
 - (B) Sourcing.
 - (C) Contextualization.
 - (D) Negative criticism.
23. How can data interpretation help in making informed decisions based on charts and graphs?
- (A) Charts and graphs are not reliable sources of information
 - (B) Data interpretation has no impact on decision-making

- (C) Data interpretation helps in understanding trends and patterns in data, which can inform decision-making.
- (D) Understanding trends and patterns in data is not important for decision-making
24. Which word best completes the sentence?
'The pie chart was used to ____ the survey results.'
- (A) Eat
(B) Sing
(C) Illustrate
(D) Dance
25. The image shows motor gasoline consumption in the United States between 1960 and 2012. What is most likely an effect of the trend?
- (A) Increase in the production of automobiles
(B) Contamination of groundwater resources
(C) Variation in the level of pollution in the atmosphere
(D) Reduction in the surface water temperatures of oceans
26. Evaluates the results of the study or research
- (A) Discussion
(B) Literature Review
(C) Outline
(D) Variable
27. It refers to the process of making conclusions based on the presented data.
- (A) Analysis
(B) Interpretation
(C) Collection
(D) Organization
28. When you are assessing the strength of research arguments and evidence, which of the following should you ignore?
- (A) Relevance
(B) Consensus
(C) Representativeness
(D) Sufficiency
29. A research study finds conflicting results across different focus groups. What should the researcher do?
- (A) Compare findings to identify underlying themes
(B) Ignore inconsistent responses
(C) Repeat the study with different participants
(D) Choose the responses that best fit the hypothesis
30. Which scientific skill is essential for interpreting data from experiments?
- (A) Artistic ability
(B) Data visualization
(C) Musical talent
(D) Physical strength
31. What are inferences?
- (A) Part of the story where things change.
(B) Educated guesses base on evidence.
(C) Making observations.
(D) The moral of a story.
32. Explaining the meaning of something from your point of view is an?
- (A) My Story
(B) Interpretation
(C) Testimony
(D) None of above
33. Decide what the results mean and communicate that info with others!
- (A) Conclusion
(B) Hypothesis
(C) Test
(D) Research
34. Why is precaution necessary in interpretation?
- (A) To avoid misinterpretation of data
(B) To collect data
(C) To present data
(D) To write conclusions

35. When presenting results, a common method for visualizing data is:
(A) Writing a detailed report
(B) Using tables and graphs
(C) Conducting interviews
(D) Performing additional statistical tests
36. Which of these is NOT a choice for organising your literature review?
(A) Chronological
(B) List
(C) Topic/issue
(D) Methodology
37. Consider the following statement: 'Observations, in themselves, are of little statement.' What is the basis of making such a statement?
(A) They are without any purpose.
(B) They must be related to other facts for generalization.
(C) They are not systematic and not amenable to scientific interpretation.
(D) They are meaningful only if collected by a scientist.
38. Which term means confirm; support w/ additional evidence?
(A) Facts
(B) Corroborate
(C) Accuracy
(D) Secondary source
39. Interpretation
(A) Is the first step in the perception process.
(B) Occurs when a speaker simplifies complex information.
(C) Occurs when the mind explains messages that have been selected and organized.
(D) Occurs when we examine stimuli to discover patterns.
40. An active process whereby individuals perceive and assign meaning to phenomena, relying on their working models to do so.
(A) Interpretation
(B) Empathic listening
(C) Red herring
(D) Code
(E) Fallacy
41. If the bar for "Cabbage" is the shortest on a vegetable sales graph, what conclusion can you draw?
(A) Cabbage is the most popular vegetable
(B) The least pounds of cabbage were sold
(C) Cabbage sales are equal to carrot sales
(D) Cabbage was not sold at all
42. What is the main purpose of the Interpretation Phase in the research process?
(A) To give meaning to the analyzed data and explain the implications of the findings.
(B) To collect raw data from various sources.
(C) To formulate the research hypothesis.
(D) To review the existing literature on the topic.
43. In data interpretation in case of two graphs, two charts or tables we need to understand
(A) The difference between them
(B) The relationship between them
(C) There is no correlation
(D) The importance of pie charts and tables
44. An attempt to explain or interpret an observation
(A) Qualitative
(B) Quantitative
(C) Observation
(D) Inference
45. Interpreting data accurately and correctly will affect the reliability of your conclusion and generalization.
(A) TRUE
(B) FALSE

46. This section presents interpretations explaining how and why they do not confirm the original hypothesis (for quantitative) and assumptions (qualitative, if there is any).
- (A) Methods
 - (B) Discussion
 - (C) Conclusion
 - (D) Results
47. Why is it important to evaluate research findings?
- (A) To find errors in the research.
 - (B) To determine the credibility and relevance of the information.
 - (C) To challenge the existing knowledge.
 - (D) To showcase the researcher's critical thinking skills.
48. Tabulation refers to:
- (A) Collection of data
 - (B) Editing of data
 - (C) Summarizing data in tables
 - (D) Analysis of data
49. In data interpretation a paragraph consists of several sentences that deal with
- (A) Varied subjects
 - (B) A single subject or topic
 - (C) A story
 - (D) Many sample study together
50. What is the definition of an inference?
- (A) Just a guess
 - (B) A conclusion based on facts or evidence
 - (C) A type of observation
 - (D) A scientific example
51. Number of people in ten different countries.
- (A) Bar chart
 - (B) Line graph
52. What should a written review of literature include?
- (A) A collection of random articles
 - (B) A list of all books in a library
 - (C) A personal opinion about research topics
 - (D) A summary and analysis of relevant studies
53. Checking if information is true is evaluating for:
- (A) Tone
 - (B) Purpose
 - (C) Cultural Sensitivity
 - (D) Accuracy
54. What is the main purpose of a line graph like this one?
- (A) To compare two things
 - (B) To show changes and trends over time
 - (C) To sort data into categories based on frequency
 - (D) So you don't have to read words
55. Why is it important to critically evaluate statistical findings in psychological research? (Cureton (1950))
- (A) Because all statistical findings are inherently flawed.
 - (B) Because misinterpretations or methodological errors can lead to misleading conclusions.
 - (C) Because high validity coefficients always indicate a test is reliable.
 - (D) None of above
56. Using observations to make a logical theory or good guess.
- (A) Observation
 - (B) Inference
 - (C) Measuring
 - (D) Qualitative Observation
57. What is data interpretation?
- (A) Data interpretation is the process of analyzing and making sense of data.
 - (B) Data interpretation is the process of storing data.
 - (C) Data interpretation is the process of visualizing data.

- (D) Data interpretation is the process of collecting data.
58. Contain reviews of the test, updated or independent studies of its psychometric soundness, or examples of how the instrument was used in either research or an applied context
- (A) Test catalogues
 - (B) Test manuals
 - (C) Reference volumes
 - (D) Journal articles
 - (E) On-line databases
59. Discussion explains the meaning of the results.
- (A) TRUE
 - (B) FALSE
 - (C) All the above
 - (D) None of the above
60. John wants to identify the exact value that each column in his chart represents. Which option should he choose?
- (A) Gridelines
 - (B) Arrows
 - (C) Pictures
 - (D) Labels
61. In the scientific method, how should researchers describe their findings in relation to the hypotheses?
- (A) Proven or disproven
 - (B) Supported, doesn't support, or inconclusive
 - (C) Confirmed or denied
 - (D) Validated or invalidated
62. What is the role of integration in the interpretation phase?
- (A) To separate findings
 - (B) To compare data sources
 - (C) To synthesize insights from both strands
 - (D) To eliminate bias
63. Teachers should study the errors of their students; they often indicate the
- (A) Need for differentiated curriculum
 - (B) Extent of their knowledge
 - (C) Remedial strategies needed
 - (D) Pathways for ability grouping
64. Which visualization is misleading for precise comparisons?
- (A) Bar chart
 - (B) Line chart
 - (C) Pie chart
 - (D) Dot plot
65. Using observations to make a logical theory or conclusion is called a(n) ____
- (A) Observation
 - (B) Inference
 - (C) Measuring
 - (D) Qualitative Observation
66. This is where the scientists will be discussing more in depth the results of the research.
- (A) Theoretical framework
 - (B) Methodology
 - (C) Discussion
 - (D) Results
67. Is it possible that two different researchers may present the same data analysis and results, but discuss them differently, each using a different lens to uncover alternative insights linked to the research question?
- (A) True
 - (B) False
 - (C) It can be true or false
 - (D) None of above
68. Interpretation means:
- (A) Collection of data
 - (B) Drawing conclusions from data
 - (C) Tabulating data
 - (D) Editing

69. Grouping similar topics together to simplify interpretation or find broader themes.
(A) Dynamic Topic Modeling (DTM)
(B) HDP
(C) Topic clustering
(D) LSA
(E) Hyperparameters
70. Researchers are only responsible for data collection, not its interpretation or dissemination.
(A) TRUE
(B) FALSE
(C) All the above
(D) None of the above
71. What is a valid inference you can make based off of this data?
(A) The data is symmetrical
(B) No inference can be made
(C) People spend more time exercising than playing video games
(D) People spend more time playing video games than exercising
72. How can visualizations help in interpreting data trends?
(A) Visualizations help in interpreting data trends by making patterns and relationships more apparent.
(B) Visualizations can only represent numerical data, not trends.
(C) Visualizations obscure data trends and make them harder to understand.
(D) Visualizations are only useful for aesthetic purposes and do not aid in analysis.
73. Observation or Inference? The plant on the left is growing more because it has been receiving more water.
(A) Observation
(B) Inference
74. Precaution in interpretation is:
(A) Objectivity
(B) Prejudice
(C) Guesswork
(D) Assumptions
75. An inference is an assumption based on direct observations and background information. Which of these is an inference for a barking dog? SELECT ONE ANSWER!
(A) The dog wants to go outside.
(B) The dog sees a mailman or stranger.
(C) The dog is hungry.
(D) All of these are logical inferences.
76. A conclusion that you come to by evaluating the evidence and details that have been presented
(A) Inference
(B) Quote
(C) Textual evidence
(D) Central idea
77. In this step, researchers make comparisons between the findings and the literature.
(A) Valuating findings
(B) Analyzing findings
(C) Interpreting findings.
(D) None of above
78. Why is data visualization important?
(A) Data visualization does not help in identifying patterns in data.
(B) Data visualization is only important for entertainment purposes.
(C) Data visualization makes data analysis more complicated.
(D) It helps us grasp complex information quickly.
79. A logical explanation of what you observe based on your own experience.
(A) Qualitative observation
(B) Quantitative observation
(C) Inference
(D) None of above

80. How can researchers ensure the accuracy of data interpretation in quantitative research?
- (A) By guessing the results
 - (B) By using reliable measurement tools, conducting thorough data analysis, and implementing validation techniques.
 - (C) By ignoring outliers in the data
 - (D) By using untested and unreliable measurement tools
81. Which graph represents relation between whole and its parts?
- (A) Pictogram
 - (B) Pie graph
 - (C) Line graph
 - (D) Tabulated data
82. If you wanted to determine the top 25% of a data set, which type of display would be most efficient?
- (A) Dot plot
 - (B) Bar graph
 - (C) Histogram
 - (D) Box plot
83. The survey results clearly — that full-time students had a higher level of satisfaction with IT support than their part-time counterparts.
- (A) Demonstrate
 - (B) Quite content
 - (C) Comparative analysis
 - (D) Overwhelming majority
 - (E) -
84. What is the final step in doing research?
- (A) Define research problem
 - (B) Design research
 - (C) Formulate hypothesis
 - (D) Interpret and Report
85. If the bar for Ben is twice as tall as the bar for Charlie, how many books did Charlie read if Ben read 12 books?
- (A) 4
 - (B) 5
 - (C) 6
 - (D) 8
86. The interpretation of data helps researchers to categorize, manipulate, and summarize the information in order to answer critical questions.
- (A) True
 - (B) False
87. When relating results to literature in the Discussion, what is the primary goal?
- (A) Show how findings align or differ
 - (B) Replace limitations with strengths
 - (C) Summarize figures without stats
 - (D) Avoid citing competing studies
88. After interpreting the information gathered, what should be done to organize the data?
- (A) Cluster similar needs together, order them, decide what's necessary, and outline the critical needs
 - (B) Store raw notes without changes for future reference
 - (C) Summarize only the most positive comments
 - (D) Remove statements that do not match initial assumptions
89. How can a student improve clarity in the Results section?
- (A) Use clear tables and graphs
 - (B) Add personal opinions
 - (C) Repeat the introduction
 - (D) Remove labels
90. The act or process of reaching a conclusion about something from known facts or evidence
- (A) Inference
 - (B) Relevant
 - (C) Evidence
 - (D) Misleading

91. What is one advantage of a researcher acting as a group member in a study?
- (A) It ensures complete objectivity.
 - (B) It allows for better data interpretation.
 - (C) It reduces the time needed for research.
 - (D) It guarantees large sample sizes.
92. In an experiment, a student measures the growth of a plant over time. The data is plotted on a graph with time on the x-axis and height on the y-axis. What type of graph is most appropriate for this data?
- (A) Bar graph
 - (B) Line graph
 - (C) Pie chart
 - (D) Scatter plot
93. OBSERVATION-VS-INFERENCE: Which of the following is an INFERENCE?
- (A) The clouds are very gray today.
 - (B) There are puddles in the street.
 - (C) I hear thunder in the distance.
 - (D) It must have rained last night.
94. Which example shows explanatory synthesis?
- (A) Studies show mixed results on online learning; this paper explains how engagement varies by context.
 - (B) Online learning is better than traditional learning.
 - (C) Many researchers disagree about online learning.
 - (D) Students like online learning more.
95. Which of these is an inference?
- (A) The grass is green.
 - (B) They are running to get away from predators.
 - (C) The animals are running.
 - (D) The animals can jump.
96. When you explain or interpret things you observe, you are making an/a ____ It is based on reasoning from what you already know.
- (A) Prediction
 - (B) Classification
 - (C) Inference
 - (D) Model
97. What is the purpose of the key (legend) in a bar chart?
- (A) To describe the trends in the chart
 - (B) To show the numerical values of the bars
 - (C) To explain what each bar represents
 - (D) To provide a title for the chart
98. Provides an explanation of the results in relation to the previous studies presented in the literature review.
- (A) RESULTS
 - (B) DISCUSSION
 - (C) CONCLUSION
 - (D) REFERENCES
 - (E) RESEARCH REPORT
99. What is the purpose of clearly stating the limitations in reporting the results of Marketing research?
- (A) It is not necessary to include it in the report
 - (B) Helps businesses calculate the level of errors and omissions in the research process when making decisions.
 - (C) Because businesses require reporting
 - (D) Because it is a mandatory requirement of an MKT research report
100. A good INFERENCE is ____
- (A) A wild guess
 - (B) Never supported
 - (C) Supported with evidence
 - (D) Is hard to find
101. In the Results section, which practice should be avoided?
- (A) Use concise tables
 - (B) Present figures effectively
 - (C) Avoid interpretation here
 - (D) Report p-values clearly

- 102.** When interpreting a circle graph, how much should the "whole" be?
(A) 110%
(B) 10%
(C) 1000%
(D) 100%
- 103.** The process of showing and explaining the result of the research conducted or the interpretation of the data gathered.
(A) Collection of Data
(B) Presentation of Data
(C) Presentation of Facts
(D) Analysis of Data
- 104.** The unstructured nature of the interview necessitates the researcher to have the competence in gathering and ____ the information collected.
(A) Writing
(B) Interpreting
(C) Remembering
(D) Paraphrasing
- 105.** Interpretation involves:
(A) Collecting data
(B) Making sense of analyzed data
(C) Choosing a topic
(D) Reviewing literature
- 106.** What is the purpose of interpreting graphs and charts in science?
(A) To collect data
(B) To form a hypothesis
(C) To visually represent data and identify patterns
(D) To conduct experiments
- 107.** Type of graph that shows changes in quantities over time and distance.
(A) Line graph
(B) Pie graph
(C) Table
(D) Bar and column graph
- 108.** Height of the plant from week 1 to week 10
(A) Bar chart
(B) Line graph
- 109.** What is one feature of bar charts that is important to describe?
(A) The colors of the bars
(B) The font used in the title
(C) The trends and comparisons shown
(D) The size of the chart
- 110.** The broken vase on the floor could have been knocked over by the cat. (This is an example of an ____)
(A) Observation
(B) Inference
- 111.** What is the role of "discussion" in academic papers?
(A) To summarize the introduction
(B) To analyze and interpret results
(C) To provide personal opinions
(D) To list references
- 112.** A logical conclusion based on observation, past experiences, and prior knowledge.
(A) Inference
(B) Observation
(C) Prediction
(D) Classification
- 113.** What is NOT included in the Results section?
(A) Tables and graphs
(B) Statistical findings
(C) Interpretation of the findings
(D) Numerical data
- 114.** Interpretation in research refers to:
(A) Editing data
(B) Drawing meaning from analysis
(C) Report formatting
(D) Writing references

115. In a quantitative research report, evaluation of the study results is found in the ____ section?
- (A) Discussion
 - (B) Method
 - (C) Results
 - (D) None of above
116. An explanation of how the evidence supports a claim is ____
- (A) Reasons
 - (B) Reasoning
 - (C) Evidence
 - (D) Counterclaim
117. In the Quantitative Research Report, this section is where the researcher interprets and evaluates study results, giving emphasis to relationships between the results and the hypothesis of the study.
- (A) Discussion
 - (B) Results
 - (C) Method
 - (D) Introduction
 - (E) Abstract
118. A ____ is a summary of what the person said reworded by the reporter.
- (A) Quotation
 - (B) Attribution
 - (C) Balance
 - (D) Paraphrase
119. Synthesizing related literature means:
- (A) Combining ideas from multiple sources to create a new perspective
 - (B) Copying text word-for-word
 - (C) Listing titles without explanation
 - (D) Ignoring differences in findings
120. After gathering the data of the study, Chloe presented them into comprehensible statements. In which major element of Chapter 4 these explanations belong to?
- (A) Recommendations
 - (B) Presentation
 - (C) Analysis
 - (D) Interpretation
121. Avoiding naive empiricism in the interpretation of visual data means:
- (A) Understanding the context in which they were produced
 - (B) Ensuring that visual images such as photographs are accurately taken
 - (C) Only using visual images with other data gathering sources
 - (D) Planning the capture of visual data carefully
122. The part of a scientific report that analyses the data, identifies trends, looks for strengths and weaknesses, identifies improvements and makes predictions about real-life applications.
- (A) Discussion
 - (B) Conclusion
 - (C) Rationale
 - (D) Research Question
123. When you explain or interpret the things you observe, you are making an ____
- (A) Experiment
 - (B) Inference
 - (C) Wild Guess
 - (D) Lie
124. What graph misleading is used in this statement? “using green for losses, and red for profits”
- (A) Cherry Picking Data
 - (B) Omitting the baseline
 - (C) Going Against Conventions
 - (D) Manipulating the Y-Axis
125. Wayne asked 150 students if they liked Dr. Pepper. If twenty two percent said they do not like Dr. Pepper. How many do like Dr. Pepper?
- (A) 128
 - (B) 172

- (C) 117
(D) 33
126. Which of the following is NOT a question you should ask when you see numbers in a study?
- (A) How were the data produced?
(B) What do we want to measure?
(C) What exactly was measured?
(D) How much money was spent?
127. What does synthesizing literature mean?
- (A) Combining ideas to find connections
(B) Copying text from multiple sources
(C) Listing all available studies
(D) Rewriting research titles
128. Which answer choice best defines Inference?
- (A) Characteristics, facts
(B) Using what you already know and what you learn from the text to make a guess
(C) Information or proof directly from the text
(D) Information that you provide from outside of the text
129. The results of National Achievement Test (NAT) are interpreted against a set of mastery level. This means that NAT is categorized as / an ____ test. I. Criterion-referenced II. Norm-referenced
- (A) I only.
(B) Either I or II.
(C) II only.
(D) Neither I or II.
130. Which of the following gives the BEST definition of the term "infer" as it relates to the study of a text?
- (A) To draw a reasoned conclusion based on evidence
(B) To guess
(C) To hint at but not state directly
(D) To restate an idea in different wording
131. What does the "Write the Account" step in ethnography aim to achieve?
- (A) To forge a final product incorporating both participants' views (emic) and the researcher's interpretation (etic).
(B) To identify patterns or themes in the cultural group.
(C) To compile a detailed description of the group.
(D) To focus solely on the researcher's perspective.
132. Study the graph. Which is the best descriptive phrase?
- (A) The dollars of money spent on books in Italy
(B) The number of money spent on books in Italy
(C) The amount of money spent on books in Italy
(D) None of above
133. Why is interpretation necessary in research?
- (A) To provide deeper meaning to findings
(B) To increase the sample size
134. To display data which compares favorite movie types, you should use a ____
- (A) Circle Graph
(B) Bar Graph
(C) Line Graph
(D) None of above
135. What should be included to make charts easily understood?
- (A) No additional information
(B) Only a legend
(C) Only axis labels
(D) Chart title and axis labels
136. "I don't think the cat put this mask on by itself." This statement is a(n)
- (A) Inference
(B) Prediction
(C) Quantitative observation
(D) Model

- 137.** Why graphs, tables and charts are inserted in the research report
(A) For better understanding
(B) To attract other researchers
(C) To save pages
(D) None of above
- 138.** Fact or opinion: To reach the hardwood trees, loggers damage other trees and soil, making it hard for young trees to grow.
(A) Fact
(B) Opinion
- 139.** This is the objective analysis of literary or scientific article that emphasizes on whether or not the author supported his main points with reasonable and applicable arguments based on facts.
(A) Book Review
(B) Article Critique
(C) Literature Review
(D) Research Report
- 140.** Which type of chart values are arranged vertically?
(A) Bar Chart
(B) Line Chart
(C) Column Chart
(D) Area Chart
- 141.** Processed data that has a meaning and is in context.
(A) Index
(B) Information
(C) Integrated document
(D) Interaction
(E) Internet of things
- 142.** To tell information again using fewer words
(A) Clarify
(B) Customize
(C) Paraphrase
(D) Summarize
- 143.** Data may be organized into:
(A) Graphics
(B) Graphs
(C) Tables
(D) All of these
- 144.** A key at the side of a chart or graph that indicates what the symbols or colours and patterns represent in the chart of the graph.
(A) Legend.
(B) Scales.
(C) Non-contiguous data.
(D) Contiguous data.
- 145.** Organize data in a way that is easy to read and interpret
(A) Graph
(B) Variable
(C) Data sheet
(D) Obsevation
- 146.** What is the purpose of a data chart?
(A) To represent large quantities of data
(B) To show relationships between different parts of data
(C) To make data easily readable
(D) All of the above
- 147.** There is a critical analysis of all data used so that there is no error in the researcher's interpretations.
(A) Analytical
(B) Systematic
(C) Controlled
(D) Original work
- 148.** Data is raw, unprocessed facts, while information is:
(A) Processed data that is meaningful and useful
(B) The physical storage medium for data
(C) The technology used to collect and analyse data
(D) The people who use data to make decisions

149. Why is it important to relate findings to the research question in the Discussion?
- (A) To introduce new data
 - (B) To show relevance of results
 - (C) To lengthen the paper
 - (D) To repeat methodology
150. Haphazard ordering of data upon entry into the analysis process does not affect the quality of data interpretation.
- (A) True
 - (B) False
151. A technique used to identify the main themes or topics within a collection of documents.
- (A) Topic modeling
 - (B) LDA
 - (C) Document-Term Matrix (DTM)
 - (D) Bag of words (BOW)
 - (E) TF-IDF
152. Why is it important to choose appropriate intervals for a histogram?
- (A) To make the histogram visually appealing
 - (B) To ensure the histogram is informative and easy to interpret
 - (C) To increase the number of data points represented
 - (D) To simplify the data analysis process
153. What is the significance of the scale on a line graph?
- (A) The scale on a line graph is significant as it provides context for the data, enabling accurate interpretation of values and trends.
 - (B) The scale determines the color of the graph lines.
 - (C) The scale indicates the type of graph being used.
 - (D) The scale is only used for decorative purposes.
154. Which section explains the meaning and implications of the results?
- (A) Introduction
 - (B) Results
 - (C) Methodology
 - (D) Discussion
155. Corresponds to the category labels in a pie chart and series names in other charts.
- (A) Plot area
 - (B) Legend
 - (C) Gridlines
 - (D) Slice
156. Data Interpretation is used to derive information from
- (A) From a group of people
 - (B) From everywhere
 - (C) Collected set of data
 - (D) None of the above
157. Observation or Inference? The scissors look sharp enough to cut a penny.
- (A) Observation
 - (B) Inference
158. What is the purpose of the discussion section in a research report?
- (A) To present the methodology
 - (B) To summarize the literature review
 - (C) To analyze and interpret the results
 - (D) To list references
159. You have been tracking your exercise routine, which involves running, lifting weights, yoga, and stretching. You want to see what percentage each category represents. Which type of chart would be best for this purpose?
- (A) Column
 - (B) Line
 - (C) Pie
 - (D) Bar
160. What is the last (final) stage of statistical methods?
- (A) Collection of data
 - (B) Interpretation of data
 - (C) Analysis of data
 - (D) Presentation of data

- 161.** When interpreting data, an analyst must try to discern the differences between correlation, causation, and coincidences, as well as much other bias
(A) True
(B) False
- 162.** Presents the information gathered through the research
(A) Reference
(B) Results
(C) Summary
(D) Quotes
- 163.** What is the primary goal of drawing conclusions from patterns and themes in qualitative research?
(A) To prove a predetermined hypothesis
(B) To establish statistical significance
(C) To make sense of the data and provide insights
(D) To ignore potential limitations of the study
- 164.** The Discussion section mainly focuses on:
(A) Listing raw experimental data
(B) Comparing results with objectives, hypotheses, or literature
(C) Explaining how equipment was set up
(D) Repeating the methodology in different words
- 165.** In the process of drawing conclusions in qualitative research, why is it important to acknowledge any unexpected findings or deviations from the initial research plan?
(A) To downplay the significance of the study
(B) To align with the theoretical framework
(C) To maintain transparency and integrity in the research
(D) To ignore potential areas for future exploration
- 166.** What does confirmation bias have to do with research?
(A) Confirmation bias ensures all research findings are accurate.
(B) Confirmation bias can lead to skewed research results by favoring information that supports existing beliefs.
(C) Confirmation bias helps researchers remain neutral in their studies.
(D) Confirmation bias is a method to validate all research hypotheses.
- 167.** The results of research or an experiment
(A) Measures
(B) Findings
(C) Samples
(D) Variables
- 168.** Data interpretation refers to using diverse analytical methods to review data and arrive at relevant conclusions.
(A) True
(B) False
- 169.** Fundamental questions to answer in the discussion include:
(A) Do your results provide answers to your testable hypotheses? If so, how do you interpret your findings?
(B) How the data were summarized (Means, percent, etc) and how you are reporting measures of variability?
(C) Did you describe the site where your field study was conducted?
(D) No questions
(E) No correct answer
- 170.** When evaluating and selecting sources for your literature review, you need to focus on
(A) The innovative approaches or methods defined
(B) Key concepts and the way they are they defined
(C) Questions or problems the author does not address in the source
(D) The recommendations it provides

171. When interpreting a correlation coefficient expressing the relationship between two variables, it is very important to avoid ____
- (A) Checking the strength of the relationship
 - (B) Jumping to the conclusion of causality
 - (C) Checking the direction of the relationship
 - (D) Expressing a relationship with a correlation coefficient
172. How are pie charts different from bar charts?
- (A) Pie charts and bar charts both display data in a circular format
 - (B) Pie charts and bar charts both use rectangular bars to represent the data
 - (C) Pie charts and bar charts both show the proportion of each category
 - (D) Pie charts display data in a circular format, showing the proportion of each category, while bar charts use rectangular bars to represent the data and compare the values of different categories.
173. Data interpretation aims to:
- (A) Present raw data only
 - (B) Give meaning to analyzed data
 - (C) Replace researchers' opinions
 - (D) None of these
174. Data interpretation involves both quantitative and qualitative analysis to provide a comprehensive understanding of the data.
- (A) True
 - (B) False
175. What conclusion can be made about this graph?
- (A) The cooler the temperature, the louder the crickets chirp.
 - (B) The crickets cannot chirp at temperatures lower than 10 degrees C.
 - (C) The warmer the temperature, the more often crickets chirp.
 - (D) The temperature and the chirping of crickets are not related.
176. An idea or a conclusion based on an observation is
- (A) An inference
 - (B) A prediction
 - (C) A classification
 - (D) Science
177. What are two of the best ways to summarize data for your audience?
- (A) Animations and Audio
 - (B) Tables and Charts
 - (C) Text and Images
 - (D) Graphs and Videos
178. Which practice best improves the Discussion section?
- (A) Repeating raw data
 - (B) Connecting results to research questions
 - (C) Adding unrelated information
 - (D) Removing limitations
179. Why should results be presented in logical order?
- (A) To reduce pages
 - (B) To improve data interpretation
 - (C) To avoid graphs
 - (D) To hide errors
180. Inferences are logical explanations that help us make sense of what we ____
- (A) Want
 - (B) Desire
 - (C) Dream about
 - (D) Observe
181. Jude is unsure what the data in his group's column chart represents. There are two colored columns and he is unsure which color represents his data set. Which chart element would Jude use to identify what each color represents on the chart?
- (A) Legend
 - (B) Identity
 - (C) Title
 - (D) Horizontal axis

- 182.** Which of the following should not be included in the methods and data section?
- (A) The operationalization of the concepts used in the analysis
 - (B) The source of data analyzed
 - (C) An explanation of statistical tests performed
 - (D) An interpretation of the research findings
- 183.** What does it mean to synthesize information in research?
- (A) To copy information from one source
 - (B) To combine information from multiple sources
 - (C) To ignore conflicting information
 - (D) To summarize a single source
- 184.** Which chart will BEST represent the effect of increasing the frequency of a company's radio advertisements on sales?
- (A) Column
 - (B) Pie
 - (C) Stacked bar
 - (D) XY scatter
- 185.** Explain how to interpret data relationships in a pie chart.
- (A) Look at the legend to understand the data relationships
 - (B) Measure the circumference of each slice
 - (C) Compare the size of each slice to understand the proportion of each category in the data.
 - (D) Count the number of colors used in the chart
- 186.** How can data interpretation help in understanding environmental racism?
- (A) By ignoring statistical evidence
 - (B) By analyzing pollution levels in different communities
 - (C) By focusing only on economic data
 - (D) By disregarding community health reports
- 187.** Observation or Inference: The 2 people on the sidewalk got into a car accident.
- (A) Observation
 - (B) Inference
- 188.** What type of information should NOT be included in the Results section?
- (A) Raw data
 - (B) Tables and figures
 - (C) Interpretation of findings
 - (D) Computed values
- 189.** What is a common challenge faced by researchers when interpreting qualitative data?
- (A) Inability to use statistical software
 - (B) Over-reliance on quantitative measures
 - (C) Subjectivity in data analysis
 - (D) Difficulty in collecting large sample sizes
- 190.** It is the process of making value judgment from collected data.
- (A) Interpretation
 - (B) Evaluation
 - (C) Assessment
 - (D) Measurement
- 191.** How can data be organized to help scientists see their results in an easily readable format?
- (A) Charts, graphs, or tables
 - (B) Books, articles, or essays
 - (C) Videos, podcasts, or blogs
 - (D) Songs, poems, or stories
- 192.** It is the step in converting data to information where the report generated is disseminated.
- (A) Retrieval
 - (B) Acquisition
 - (C) Manipulation
 - (D) Distribution
- 193.** A ____ is a visual representation of data.
- (A) Table
 - (B) Chart
 - (C) Border
 - (D) Spreadsheet

- 194.** Marcus has just decoded a message. What MOST likely happened?
- (A) He formed his ideas into words
 - (B) He interpreted a message
 - (C) He wrote his message on paper
 - (D) He transmitted a message.
- 195.** What do tally charts and bar graphs have in common?
- (A) Both use tally marks
 - (B) Both do not need titles
 - (C) Both show data
 - (D) Both show bars
- 196.** How can outliers in a bar chart affect the interpretation of the data?
- (A) Outliers make the data more accurate
 - (B) Outliers can distort the perception of the overall trend or distribution of the data.
 - (C) Outliers have no impact on the interpretation of the data
 - (D) Outliers only affect the visual appeal of the bar chart
- 197.** An interpretation based upon an observation is called
- (A) A fact
 - (B) An inference
 - (C) A classification
 - (D) A measurement
- 198.** What is the purpose of analysing data in research?
- (A) To write a research proposal
 - (B) To encourage student engagement
 - (C) To encourage students to do research in different fields including education
 - (D) In order to interpret and present data into useful information
- 199.** The perception of a relationship between two factors where none exists
- (A) Dependent variable
 - (B) Illusory correlation
 - (C) Direct correlation
 - (D) Descriptive statistic
- 200.** What does putting data into a framework or structure provide?
- (A) More information
 - (B) Rules
 - (C) Context
 - (D) None of above
- 201.** This part of the research process is more related to the thinking aspect.
- (A) Data collection and analysis
 - (B) Identification of possible answers to the research question
 - (C) Development of a conceptual framework
 - (D) Interpretation of the result
- 202.** Error analysis in research focuses on:
- (A) Identifying potential inaccuracies in data interpretation
 - (B) Intentionally introducing errors
 - (C) Avoiding mathematical calculations
 - (D) Increasing sample size to hide errors
- 203.** What is the discussion section of research?
- (A) You are trying to find reasons for results.
 - (B) You are trying to answer the questions.
 - (C) You are trying to ask your students to explain.
 - (D) You are trying to check the research instrument
- 204.** Information is ____
- (A) None of the below
 - (B) Meaningless
 - (C) Numbers and characters
 - (D) Data + Data
- 205.** If the information is too long.
- (A) Paraphrase
 - (B) Summaries
 - (C) Direct Quotations
 - (D) None of above

- 206.** How do you interpret the results of an experiment?
- (A) Draw conclusions without comparing to the hypothesis.
 - (B) Only focus on the results without context.
 - (C) Ignore the data and rely on intuition.
 - (D) Interpret the results by analyzing data, comparing to the hypothesis, and identifying patterns.
- 207.** What does interpretation in research primarily involve?
- (A) Explaining and drawing inferences
 - (B) Conducting experiments
- 208.** Which of the following is NOT a typical reason to include a literature review in a research study?
- (A) To identify gaps in the current research
 - (B) To provide a theoretical framework for your study
 - (C) To compare your findings to previous research results
 - (D) To showcase impressive academic vocabulary
- 209.** A theoretical framework is used to:
- (A) Replace data analysis
 - (B) Guide interpretation of findings
 - (C) Eliminate limitations
 - (D) Avoid literature review
- 210.** Ben surveyed 40 students about their favorite color. This circle graph shows the results. Identify each pair of colors that together could represent the results of a group of exactly 20 students.
- (A) Yellow and Green
 - (B) Green and Pink
 - (C) Blue and Green
 - (D) Pink and Blue
 - (E) Red and Green
- 211.** It is a graphical display of data or information that is constructed in rows and columns.
- (A) Bar graph
 - (B) Pie graph
 - (C) Information mapping
 - (D) Table
- 212.** When relating findings to pertinent literature, what is the significance of discussing the limitations of the study?
- (A) To undermine the credibility of the research
 - (B) To highlight areas for future research
 - (C) To ignore potential biases in the study
 - (D) To discourage further exploration of the topic
- 213.** A company wants to ensure that the data it has collected over the year is useful. Based on the characteristics of data, what is needed to make the results useful?
- (A) Interpretation
 - (B) Collection
 - (C) Translation
 - (D) Tabulation
- 214.** If the experiment results do not support the hypothesis, what should the report include?
- (A) A new hypothesis to fit the results
 - (B) A statement saying the experiment was a failure
 - (C) An objective discussion explaining possible reasons for the outcome
 - (D) A complete deletion of the results
- 215.** Data that has been grouped to find meaning
- (A) Information
 - (B) Trademark
 - (C) Copyright
 - (D) Digital product
- 216.** Refers to drawing of conclusions or generalizations from the analysed data.
- (A) Analysis of Data
 - (B) Collection of Data
 - (C) Interpretation of Data
 - (D) Non Parametric

217. Which of these options is a reasonable inference?
- (A) I got home and the house smells like fish, my kitchen must be full of fish
 - (B) I got home and the house smells like fish, my aunt must be making steaks
 - (C) I got home and the house smells like fish, my aunt must be making fish
 - (D) I got home and the house smells like fish, the neighbor must be cooking fish
218. What can be inferred if a bar chart shows a skewed distribution to the right?
- (A) The mean is greater than the median.
 - (B) The mean is less than the median.
 - (C) The mean is equal to the median.
 - (D) The mode is greater than the median.
219. When interpreting a pie chart, why is it important to consider the total percentage of the chart?
- (A) To confuse the audience
 - (B) To make the chart look more colorful
 - (C) To provide context and enable accurate comparison of individual segments.
 - (D) To hide important information
220. In data interpretation, what does the term 'correlation' mean?
- (A) A cause-and-effect relationship between variables
 - (B) A measure of how two variables move in relation to each other
 - (C) The average of two data sets
 - (D) The difference between two data points
221. How can outliers in a data set affect the interpretation of a line graph?
- (A) They make the graph more accurate
 - (B) They can skew the trend line
 - (C) They have no effect on the graph
 - (D) They always indicate an error in data collection
222. ____ are explanations that use observations to draw conclusions.
- (A) Predictions
 - (B) Inferences
 - (C) Observations
 - (D) None of above
223. A Graphic representation of data. A circle is divided into sectors which shows a percentage of a whole.
- (A) Line Chart
 - (B) Pie Chart
 - (C) Bar Chart
 - (D) Graphs
224. What is a key precaution during interpretation?
- (A) Using subjective opinions
 - (B) Avoiding bias
225. Which part explains the meaning of the findings?
- (A) RESULTS
 - (B) ABSTRACT
 - (C) DISCUSSION
 - (D) TITLE
226. Observation or Inference? He must have hit a pothole in the road.
- (A) Observation
 - (B) Inference
227. Which of the following is the best way to present the results of a research?
- (A) Textual explanation
 - (B) Visual description
 - (C) Both
 - (D) None of above
228. Students were asked which ice cream flavor they like the most. The results are shown in the circle graph. Which conclusion can be made?
- (A) Sally is a student so she must like chocolate ice cream.
 - (B) The cafeteria's strawberry ice cream must not be very good.

- (C) The school should buy more chocolate ice cream than vanilla ice cream.
- (D) Many students have not tried the peanut butter ice cream.
- 229.** By organizing our data into tables and graphs we can better see ____
- (A) Patterns in our evidence to help us understand key concepts.
- (B) Rectangles and squares to help us become better at math.
- (C) Random pieces of data to confuse us.
- (D) Neat rows and columns.
- 230.** Which plan demonstrates that findings will be interpreted accurately and objectively?
- (A) Title page and project summary
- (B) Budget and resources plan
- (C) General information section
- (D) Data management and statistical analysis plan
- 231.** List a disadvantage of Correlations
- (A) Cannot determine causation
- (B) Requires large sample sizes
- (C) Difficult to interpret
- (D) Time-consuming to calculate
- 232.** A study on urban poverty reveals different experiences among participants. How should the researcher handle this variation?
- (A) Identify common themes while recognizing individual differences
- (B) Only focus on participants with similar experiences
- (C) Use statistical tests to verify consistency
- (D) Exclude participants who provide conflicting data
- 233.** The process of identifying educational goals and the extent to which these objectives have been realized or met.
- (A) Examination
- (B) Evaluation
- (C) Planning
- (D) Assessment
- 234.** This is a misuse of statistics where a claim was used but no comparison is made.
- (A) Misleading graphs
- (B) Implied connections
- (C) Detached statistics
- (D) Changing the subject
- 235.** Mini conclusion used to explain what you see, hear, or experience.
- (A) Observation
- (B) Inference
- 236.** Why do we need the results of the study?
- (A) To show our findings
- (B) To show the research method
- (C) To show the rationale of the study
- (D) To give a referenceTagsChapter 4
- 237.** What should you do to interpret the implications of the results in data analysis?
- (A) Discuss how the findings align with previous research and theoretical frameworks
- (B) Use the right method to deal with missing data
- (C) Select appropriate tests based on the study design
- (D) Check for assumption violations and consider alternative methods if necessary
- 238.** Given cheaper computing and advanced models, which research priority is most aligned with the modern approach?
- (A) Collecting only qualitative anecdotes from executives
- (B) Focusing solely on brand awareness tracking
- (C) Extracting deeper insights to inform precise decisions
- (D) Increasing sample size without any analysis plan
- 239.** A survey of 50 people asked about their favorite ice cream flavors. The results showed that 20 liked chocolate, 15 liked vanilla, and 15 liked strawberry. Which graph would best display this information?

- (A) Histogram
 - (B) Bar graph
 - (C) Pie chart
 - (D) Line graph
- 240.** How does confirmation bias impact research and data interpretation?
- (A) Confirmation bias has no effect on research outcomes.
 - (B) Confirmation bias leads researchers to seek out information that contradicts their hypotheses.
 - (C) Confirmation bias enhances the objectivity of research findings.
 - (D) Confirmation bias can result in skewed data interpretation by favoring information that supports existing beliefs.
- 241.** Which of the statement below describes the Data Interpretation process?
- (A) Makes use of tables that summarize statistical information
 - (B) Describes trends in the data to a single variable or question
 - (C) Assigns meaning to the data and arrives at a relevant conclusion
 - (D) Makes use of figures that portray variables and their relationships
- 242.** What is the importance of labeling axes in a histogram?
- (A) It makes the histogram look more attractive.
 - (B) It provides context for the data, indicating what the intervals and frequencies represent.
 - (C) It allows for more data to be displayed in a smaller space.
 - (D) It is not necessary if the data is simple.
- 243.** Processed data that provides meaningful thought.
- (A) Information
 - (B) Data
 - (C) Software
 - (D) Hardware
- 244.** The ____ helps to identify various plotted data series.
- (A) X-Axis
 - (B) Y-Axis
 - (C) Legend
 - (D) Gridlines
- 245.** Observation or Inference? When the Sun came out, it made the rain stop.
- (A) Observation
 - (B) Inference
- 246.** What is a final step of conducting a correlational study?
- (A) To interpret the strength and the direction of the results
 - (B) To identify individuals to study
 - (C) To analyze the data using the correlation statistic for either continuous or categorical data
 - (D) To collect data and monitor potential threats to the validity of the scores
- 247.** Which of the following sentences is an example of an inference?
- (A) The book is on the table.
 - (B) The sky is blue.
 - (C) The character must be sad because she is crying.
 - (D) The car is red.
- 248.** Must logically summarize and combine into a coherent whole the surveyed findings and ideas of other researchers and authors through the researcher own words and logical views.
- (A) Hypothesis
 - (B) Conceptual Framework
 - (C) Paraphrasing
 - (D) Synthesis
- 249.** What feature should be added to explain the chart's purpose?
- (A) X-axis
 - (B) Y-axis
 - (C) Legend
 - (D) Chart title

- 250.** Which of the following best describes interpretive validity?
- (A) Ability to generalize the study results across settings.
 - (B) Degree to which a theoretical explanation fits the data.
 - (C) Accurately portraying the meanings given by the participants to what is being studied.
 - (D) Factual accuracy of an account as reported by the researcher.
- 251.** Data interpretation means:
- (A) Drawing meaningful conclusions
 - (B) Just presenting graphs
 - (C) Collecting data
 - (D) Editing reports
- 252.** When you make an inference you figure out —
- (A) Something that was explained in the text
 - (B) Something that was NOT explained in the text.
- 253.** Which chart should be used for comparing the contribution of individual items to the whole?
- (A) Column Chart
 - (B) Pie
 - (C) Line Chart
 - (D) None of above
- 254.** Writing the synthesis of five articles regarding global warming in one paragraph.
- (A) Elementary Reading
 - (B) Systematic Skimming
 - (C) Analytic Reading
 - (D) Comparative Reading
- 255.** Drawing an Inference You've made many inferences in your life, but you might not even know it. For instance, your cat runs up to you the minute you step through the door. She meows, rubs your legs, runs into the kitchen and stares at the cupboard where you normally store the cat food. It doesn't take much effort to figure out that your cat wants food. You've just drawn an inference. You draw many inferences in your everyday life?
- (A) TRUE
 - (B) FALSE
- 256.** Mohit created a pie chart but wants to display the exact percentage of each slice on the chart. Which feature should he add?
- (A) Axis Title
 - (B) Data Labels
 - (C) Gridlines
 - (D) Legend
- 257.** Pie charts are a good data display because —
- (A) They show the correlation of points
 - (B) They show the percentages of the whole data set
- 258.** A bar graph illustrates the amount of rainfall over four seasons. If the bar for spring is the highest, what can be inferred?
- (A) It rains only in spring.
 - (B) It rains the most in spring.
 - (C) Other seasons have more rainfall.
 - (D) Rainfall is consistent throughout the year.
- 259.** The purpose of graphs, charts and tables is to
- (A) Help scientists visualize results from an experiment.
 - (B) Make the experiment look nice.
 - (C) Practice what I learned in Math class.
 - (D) Practice my drawing skills.
- 260.** The results section includes interpretation of data.
- (A) TRUE
 - (B) FALSE
 - (C) All the above
 - (D) None of the above

261. When writing about graphs/tables you should write about the overall trend.
(A) True
(B) False
262. The plant on the left is growing more because it has been receiving more water.
(A) Observation
(B) Inference
263. An airline identifies that flight delays increased last month due to a combination of crew shortages and unusual weather patterns at a specific hub. This analysis is:
(A) Prescriptive Analytics
(B) Descriptive Analytics
(C) Predictive Analytics
(D) Diagnostic Analytics
264. During her research project, Zoe is conducting a literature review on the effects of social media on mental health. What is a key aspect of synthesizing information during her literature review?
(A) Summarizing without analysis
(B) Ignoring conflicting studies
(C) Organizing and synthesizing gathered information
(D) Focusing only on recent publications
265. How should you summarize the key trends?
(A) Identify main patterns and significant changes over time.
(B) Ignore any outliers or anomalies.
(C) Focus only on the most recent data.
(D) List all data points without analysis.
266. What is the purpose of using different colors in a pie chart?
(A) To match the background color
(B) To make the chart more boring
(C) To confuse the audience
(D) To visually distinguish between different categories or data points.
267. What role does critical analysis play in academic research?
(A) It helps in evaluating sources and arguments effectively.
(B) It simplifies the research process.
(C) It is less important than data collection.
(D) It discourages independent thought.
268. What is the purpose of interpreting results in psychological research?
(A) To finalize the research without further questions
(B) To sum up findings and explore further questions
(C) To prove the hypothesis conclusively
(D) To avoid any possible issues with the research
269. What is an important consideration when presenting research findings? -A)-B)-C)
(A) The number of graphs and charts used
(B) The complexity of the data
(C) The clarity and relevance
(D) The length of the report
270. It explains what the results mean.
(A) Conclusion
(B) Discussion
(C) Results/Findings
(D) None of above
271. What does "correlation" refer to in educational research?
(A) A definitive cause-and-effect relationship
(B) A scoring guide
(C) A strong connection between two variables without implying causation
(D) The difference between the highest and lowest scores
272. What type of data can you use a stacked bar chart to display?
(A) Categorical
(B) Numerical

273. Process of making sense of study results & examining their implications.
- (A) Evaluation
 - (B) Interpretation
 - (C) Intervention
 - (D) Example
274. What is the main function of a research report?
- (A) To present theoretical frameworks
 - (B) To list references
 - (C) To provide interpretations and analyses based on experiments
 - (D) To summarize a topic
275. Getting to know your data set in depth
- (A) Is tedious, time-consuming, and repetitious
 - (B) Is an unnecessary part of doing qualitative research
 - (C) Involves looking over the data once or twice
 - (D) Is essential for making meaningful interpretations of data
276. A decision-making process is most effective when:
- (A) It relies on intuition only
 - (B) It is supported by accurate, timely, and relevant data
 - (C) It ignores historical data trends
 - (D) None of above
277. Which aesthetic is best for showing precise quantitative differences?
- (A) Color hue
 - (B) Area
 - (C) Position on a common scale
 - (D) Shape
278. In writing your research results you should:
- (A) Make sure you have used the right kind of analysis mechanism for your data
 - (B) Understand your variables
 - (C) Build a clear argument from data to knowledge
 - (D) All answers are correct
279. Which of the following is a key aspect of interpreting research results?
- (A) Transforming results into meaningful conclusions
 - (B) Ignoring the original hypothesis
 - (C) Presenting results without context
 - (D) Focusing solely on quantitative data
280. Which action best shows scientific reasoning in an IMRAD paper?
- (A) Decorating pages
 - (B) Interpreting results based on data
 - (C) Copying previous studies
 - (D) Avoiding limitations
281. What does it mean to interpret data?
- (A) Read the title only
 - (B) Understand what the data shows and how it applies to a problem
 - (C) Redraw it in another color
 - (D) Hide it
282. The Analysis section of a research paper should:
- (A) Just describe the data without any processing
 - (B) Apply statistical, computational, or mathematical methods to interpret the data
 - (C) Replace the abstract with a summary of findings
 - (D) Only repeat results from previous studies
283. A researcher concludes, "There is a significant positive correlation between physical activity and mental health." This statement implies:
- (A) An increase in one variable causes an increase in the other.
 - (B) The two variables are strongly related.
 - (C) Physical activity has no impact on mental health.
 - (D) Statistical analysis was unnecessary.

284. Which section of a research report interprets the results and explains their significance?
- (A) Results
 - (B) Discussion
 - (C) Conclusion
 - (D) Methodology
285. Why is it important to ensure that the data in a pie chart adds up to 100%?
- (A) To accurately represent the distribution of data in a pie chart.
 - (B) To show a random distribution
 - (C) To make the chart more colorful
 - (D) To confuse the audience
286. What is the purpose of using different colors for bars in a bar chart?
- (A) To visually distinguish between different categories or groups of data.
 - (B) To represent the frequency of data points.
 - (C) To indicate the time period of the data.
 - (D) To show the average value of the data.
287. What structure is a justification for each outcome and shows whether the results are in line with the hypotheses?
- (A) Discussions
 - (B) Review of Literature
 - (C) References
 - (D) Conclusions
288. Practice 3: Data Interpretation involves evaluating representations of psychological concepts in quantitative and qualitative research, including tables, graphs, charts, figures, and —
- (A) Diagrams
 - (B) Equations
 - (C) Paragraphs
 - (D) Stories
289. What is the primary role of data crunchers in scientific research?
- (A) To collect data from experiments
 - (B) To analyze and interpret data
 - (C) To conduct experiments
 - (D) To publish research papers
290. What are the common mistakes to avoid when interpreting a bar chart?
- (A) Misinterpreting the scale of the y-axis, not comparing bars correctly, and not providing clear labels and titles.
 - (B) Using different colors for each bar
 - (C) Not including a key to explain the colors used in the chart
 - (D) Reading the bars from left to right instead of right to left
291. Step 7: What does your data tell you?
- (A) Conclusion
 - (B) Theory
 - (C) Interpret data
 - (D) Hypothesis
292. What must be included at the top of a bar chart?
- (A) Complex graphics
 - (B) A detailed description
 - (C) A title
 - (D) A legend
293. Shows a contribution of a number to the whole as shown in a slice
- (A) Line Chart
 - (B) Bar Chart
 - (C) Column Chart
 - (D) Pie Chart
294. Tables and charts are two of the best ways to summarize data for your audience.
- (A) TRUE
 - (B) FALSE
295. Why should raw data be summarized before presentation?
- (A) To confuse readers
 - (B) To make results clearer
 - (C) To hide mistakes
 - (D) To reduce accuracy

- 296.** This is where the outcome of the study is interpreted and evaluated against the existing body of research literature.
- (A) Abstract
 - (B) Discussion
 - (C) Methodology
 - (D) Results
- 297.** What structure is a justification for each outcome and shows whether the results are in line with the hypotheses?
- (A) Discussion
 - (B) Review of Literature
 - (C) Reference
 - (D) Conclusion
- 298.** Data is unorganized, while information is structured or organized. True or False.
- (A) True
 - (B) False
- 299.** How can you interpret a line graph?
- (A) By analyzing the trend or pattern of the data over time or across different categories.
 - (B) By tasting the graph
 - (C) By smelling the graph
 - (D) By listening to the graph
- 300.** Why is discussion of results important in research?
- (A) To repeat the data
 - (B) To explain the meaning of findings
 - (C) To introduce new variables
 - (D) To list materials
- 301.** The Results and Discussion sections should:
- (A) Present findings clearly, analyze them, and compare with past research
 - (B) Only state whether the hypothesis was correct
 - (C) Contain the full reference list
 - (D) Replace the introduction and literature review
- 302.** What is statistics the study of?
- (A) Data and data interpretation
 - (B) Stats
 - (C) Asking people questions about stuff
 - (D) Rolling dice and flipping coins
- 303.** Which of the following should be avoided while interpreting research results?
- (A) Objectivity
 - (B) Over-generalization
 - (C) Logical reasoning
 - (D) Evidence-based explanation
- 304.** It is important to try to summarize the information that has been collected in an appropriate format and it is useful to consider how to convey the results to colleagues. Presentations may include:
- (A) Matrices, charts, concept maps, graphs and figures
 - (B) Guides, manuals and reviews on a subject, written in a style and language according to the level of the target audience
 - (C) Doctoral theses and scientific articles on the subject
 - (D) None of above
- 305.** It is in this section that you fully interpret and evaluate your results.
- (A) Discussion.
 - (B) Introduction.
 - (C) Results.
 - (D) Method.
- 306.** Accuracy in data collection ensures-
- (A) Biasness in results
 - (B) Interpretation of results in correct conclusions
 - (C) Interpretation of results in wrong conclusions
 - (D) None of the above
- 307.** Do twice as many of the people surveyed spend 40 to 59 minutes driving to work as spend 20 to 39 minutes? Explain how you can tell from the graph.

- (A) Yes, the 40-59 bar is twice as high as the bar for 20-39.
(B) No, the numbers are equal.
(C) No, fewer people spend 40 to 59 minutes.
(D) Yes, the Vikings are better than the Packers.
- 308.** What are the results or conclusions derived from analyzing data collected during a study
(A) Database
(B) Research
(C) Source
(D) Findings
- 309.** Research Step #4: Presenting means ____
(A) Collecting information
(B) Showing how information connects
(C) Creating a format to show research
(D) Putting information in order (like an outline)
- 310.** If a finding is statistically significant one must also interpret the data, calculate an effect size indicator, and make an assessment of practical significance
(A) True.
(B) False.
(C) Neither True nor False just a statement.
(D) None of the above.
- 311.** Information is created after data are:
(A) Stored in spreadsheets
(B) Analyzed and interpreted
(C) Observed repeatedly
(D) None of these
- 312.** How can you interpret a pie chart to understand the data better?
(A) Focus on the legend to understand the data
(B) Compare the size of each slice to understand the proportion of each category in the data.
(C) Count the number of colors used in the chart
(D) Measure the circumference of each slice

1.5.5 Drawing Conclusions

- 1.** What is the first thing you need to do when you are writing your conclusion?
(A) Present new information that helps clarify your topic
(B) Restate your thesis in slightly different terms to remind the reader of what you were trying to show
(C) Write a full summary of everything that was in your paper
(D) Write the conclusion you came to about your topic
- 2.** What is an example of a conclusion statement?
(A) I (accept/reject) my hypothesis because ____
(B) The data was collected by ____
(C) The procedure was followed by ____
(D) The experiment was conducted on ____
- 3.** A conclusion is a ____ of what you have learned from the experiment.
(A) Question
(B) Problem
(C) Summary
(D) Conclusion
- 4.** What should be the first sentence of your conclusion?
(A) A personal request to the reader
(B) A plot summary of your text
(C) Restatement of your problem
(D) Restatement of your thesis
- 5.** This word means to come to some kind of determination/conclusion about something.
(A) Understand
(B) Express
(C) Conclude
(D) Determine

6. When do we draw conclusions during a science investigation?
- (A) Before we make an hypothesis
 - (B) Before an experiment
 - (C) After we do the experiment and record our results
 - (D) None of above
7. What should you use to write your conclusions?
- (A) A good guess
 - (B) A science book
 - (C) Ask a friend
 - (D) Our experimental data
8. Makes connections among the findings and generates a conclusion from these.
- (A) Introduction
 - (B) Methodology
 - (C) Results
 - (D) Discussion
9. Supporting idea for why a claim is convincing
- (A) Counterclaim
 - (B) Citation
 - (C) Reason
 - (D) Opinion
10. Conclusion should restate the main thesis, highlight the most relevant findings of the research, and discuss the implications (solutions) of your findings.
- (A) True
 - (B) False
 - (C) All the above
 - (D) None of the above
11. What is the primary benefit of analyzing and interpreting data carefully in research?
- (A) It ensures that the data supports the researcher's initial hypothesis.
 - (B) It helps to fill in gaps when the data is insufficient.
 - (C) It leads to accurate conclusions and reliable recommendations.
 - (D) It allows for the rapid publication of results.
12. A conclusion or explanation about one's collected information.
- (A) Observation
 - (B) Inference
13. What is the purpose of a conclusion paragraph?
- (A) Bring up new information to change the readers mind.
 - (B) Confuse the reader in order to get him or her to think like you
 - (C) Explain to the reader what you showed about the topic and what was learned from your research
 - (D) Stretch the paper out so you can reach the page limit your teacher assigned
14. Look at the graph. What conclusion can you make based solely on this graph?
- (A) Sunflowers are yellow and daisies are blue
 - (B) The daisy grew taller than the sunflower
 - (C) The sunflower grew taller than the daisy
 - (D) The sunflower has more leaves than the daisy
15. Which of the following is NOT a purpose of the research conclusion?
- (A) It demonstrates good organization
 - (B) It does not leave a final impression to the readers
 - (C) It gives the written work a sense of completeness
 - (D) It stresses out the importance of the thesis statement
16. A valid conclusion must:
- (A) Match the research objectives
 - (B) Only use raw data for reference
 - (C) Be based on assumptions
 - (D) Ignore limitations of the study

17. Pick the reasoning that best explains the evidence:
- (A) Thomas Edison invented the lightbulb, phonograph, and the kinetograph—an early movie camera.
 - (B) My grandfather was an immigrant who worked hard and became a successful small business owner
 - (C) Thomas Edison was an inventor who had to work hard before he was successful, so his words come from personal experience.
 - (D) You fail 100% of the things you don't try.
18. What should not be included in the conclusion?
- (A) Literature review
 - (B) Summary
 - (C) Implication
 - (D) Major findings
19. These are concerned with the real-life implications of the study.
- (A) Theoretical recommendations
 - (B) Methodological recommendations
 - (C) Practical recommendations
 - (D) None of above
20. The Conclusion in a full report should:
- (A) Introduce new data
 - (B) Summarize key findings, state contributions, and relate back to objectives
 - (C) List all references used
 - (D) Contain raw experimental calculations
21. Which sentence best fits the Conclusion section purpose?
- (A) Introduce new datasets entirely
 - (B) State contribution and implications
 - (C) Replicate background literature
 - (D) Restate every result verbatim
22. What is the most suitable verb to complete the sentence below? A conclusion should — the findings already presented in the report.
- (A) Repeat
 - (B) Illustrate
 - (C) Explain
 - (D) Not include
23. Which of the following is NOT a part of the checklist for writing a conclusion?
- (A) A sense of closure
 - (B) Main points of the paper addressed and pulled together
 - (C) Remind the reader of the importance of the topic
 - (D) Validate the review of related studies
24. To draw a reasonable conclusion from the information presented.
- (A) Imagery
 - (B) Inference
 - (C) Irony
 - (D) Litotes
25. Draw a conclusion from the statement. If a parasite lives in or on a host organism, then it harms its host. A virus is a parasite.
- (A) It will harm the host.
 - (B) I have a cold.
 - (C) It lives in or on a host
 - (D) Invalid
26. Identify the inference in the following scenario: "After hearing loud thunder, Sarah concluded that it was going to rain soon."
- (A) Hearing loud thunder.
 - (B) Sarah concluding that it was going to rain soon.
 - (C) The loudness of the thunder.
 - (D) The fact that it was going to rain.
27. Which of the following is not a characteristic of a good conclusion?
- (A) Discuss the researcher's assumptions and ideas about the topic under study
 - (B) Have a structure that brings back what the research set out to do
 - (C) Makes logical links between the various parts of the arguments starting from the hypothesis

- (D) There should be textual and tabular presentations of data
28. The summary at the end of an experiment that explains the results is called ____
- (A) Conclusion.
 - (B) Procedures.
 - (C) Materials.
 - (D) Responding variable.
29. Research implications are basically the conclusions that you draw from your results and explain how the findings may be important for policy, practice, or theory.
- (A) True
 - (B) False
30. Draw a conclusion from the statement. Given: If you live in Orlando, then you live in Florida. Roger lives in Orlando. Conclusion: ?
- (A) Roger lives in Disney Land
 - (B) Roger is an old person.
 - (C) Roger lives in Florida
 - (D) Roger lives in Orlando
31. What is typically included in the conclusion of a research report?
- (A) Personal opinions and anecdotes from the researcher.
 - (B) List of references and citations used.
 - (C) Detailed methodology and data collection process.
 - (D) Summary of findings, implications, and suggestions for future research.
32. Your psychology professor refers to a research study and says the results were “statistically significant.” Which step in the scientific method does this apply?
- (A) Drawing conclusions
 - (B) Developing a research question
 - (C) Gathering evidence
 - (D) Replicating results
33. When conducting an experiment, why do we analyze our data?
- (A) To form a question to investigate
 - (B) To draw a valid conclusion for that experiment
 - (C) To design the experiment
 - (D) To create a hypothesis
34. Interpretation of statistical results helps in drawing conclusions by:
- (A) Providing evidence to support or refute hypotheses
 - (B) Ignoring the data collected
 - (C) Focusing only on raw numbers without context
 - (D) Avoiding any form of analysis
35. In writing the conclusion, remember to ____
- (A) Follow the sequence on how the questions are arranged in the Statement of the problem
 - (B) Generalize the conclusions to avoid item by item presentation
 - (C) Link the conclusion from the related studies included
 - (D) Match the number of conclusions to the number of findings, to the number of recommendations
36. What problem occurs if results are not supported by data?
- (A) Better conclusions
 - (B) Invalid findings
 - (C) Improved discussion
 - (D) Clear methodology
37. Evidence should ____
- (A) Strongly support your claim, make sense, is reasonable
 - (B) Not support your claim
 - (C) Support your claim, not make sense, isn't reasonable
 - (D) None of above
38. Inferences always need evidence.
- (A) True
 - (B) False

39. True or False-In your conclusion you state whether your hypothesis was correct or incorrect
(A) True
(B) False
40. The conclusion isn't the answer of the main problem of the study.
(A) True
(B) False
(C) All the above
(D) None of the above
41. The process of drawing a conclusion on the basis of evidence → reasoning
(A) True
(B) False
(C) All the above
(D) None of the above
42. In writing the conclusion, it should contain numerals, figures, and tables because it gives impact and scope of generalization.
(A) TRUE
(B) FALSE
43. Which of the following words means drawing a conclusion or make an educated guess based on evidence you see, hear, read etc..
(A) Explicit detail
(B) Argument
(C) Textual evidence
(D) Inference
44. Choose the correct definition of the term: conclusion
(A) A detailed examination of the elements or structure of something
(B) A statement or theory that is put forward as a premise to be maintained or proved
(C) A supposition or proposed explanation made on the basis of limited evidence as a starting point for further investigation
(D) The end or finish of an event, process, or text
45. Conclusion is the short summary of the entire research.
(A) TRUE
(B) FALSE
46. What is a statement or conclusion that answers the original question/problem?
(A) Evidence
(B) Reasoning
(C) Communicating
(D) Claim
47. What is the role of a conclusion in a research thesis?
(A) To introduce new arguments
(B) To summarize the main points and restate the thesis
(C) To list all references used
(D) To provide a detailed analysis of each chapter
48. Explains how the data described in the body of the document may be interpreted or what conclusions may be drawn.
(A) Results and conclusion
(B) Body
(C) Conclusion
(D) Recommendation
49. What is the primary purpose of formulating recommendations in the conclusion of a research study?
(A) To impose the researcher's opinions on the audience
(B) To highlight limitations of the study
(C) To suggest practical actions based on research findings
(D) To provide a summary of the literature review
50. What should the conclusion of a research paper include?
(A) New ideas not previously raised in the report
(B) A summary of the methodology and results

- (C) A clear summary of what was learned
(D) A discussion of practical applications and implications
51. The conclusion section should:
(A) Summarize findings and explain if the hypothesis was supported
(B) Introduce new variables to test
(C) Ignore unexpected results
(D) Repeat the entire report word for word
52. Step 8: Compare your results with your hypothesis. Were you correct in your prediction?
(A) Theory
(B) Data
(C) Procedure
(D) Conclusion
53. Reasoning is the process
(A) Draw conclusions
(B) Thinking
(C) Forgetting
(D) Interference
54. What should researchers acknowledge in the discussion section?
(A) Their personal opinions on the research topic
(B) The strengths of their methodology
(C) The limitations and weaknesses of the study
(D) The funding sources for the study
55. Michael fed different diets to three groups of guinea pigs. His experiment showed that guinea pigs need vitamin C and protein in their diets.
(A) Recognize the problem
(B) Form a hypothesis
(C) Test hypothesis with an experiment
(D) Analyze data
(E) Draw conclusions
56. What should the conclusion of William's research report include?
(A) A list of references
(B) A personal opinion
(C) A detailed methodology
(D) A summary of findings
57. What does it mean to draw a conclusion?
(A) To take a random guess at something.
(B) To draw a good guess based on evidence and detail from a source, as well as your own personal experience.
(C) To draw a good guess based on the mood that you are in that day.
(D) To base a good guess on your own personal experience.
58. These are broad statements or generalizations which are based on the research results or findings.
(A) Methods
(B) Discussion
(C) Conclusion
(D) Results
59. Which of the following is an example of using an observation to draw a conclusion?
(A) Assuming it will rain because the sky is dark.
(B) Noticing that a plant's leaves are drooping and concluding it needs water.
(C) Believing a friend is mad because they didn't say hello.
(D) Predicting a team will win based on their past performance.
60. The researcher draws conclusions and answers the research problem based on the outcome of the data analysis.
(A) Finalize Facts
(B) Filter Facts
(C) Find Facts
(D) Focus Facts
61. It refers to the statements made by the researcher for the beneficiaries of the study.

- (A) Sampling
(B) Conclusion
(C) Recommendations
(D) Interpretation
62. The conclusion should be concise and engaging.
(A) True
(B) False
(C) All the above
(D) None of the above
63. Which IMRAD section benefits most from critical thinking?
(A) Introduction
(B) Methodology
(C) Results
(D) Discussion
64. What part of the research answers the research questions or outcomes formulated by the researcher?
(A) Conclusion.
(B) Hypothesis.
(C) Recommendation.
(D) Theoretical Framework.
65. When Josh found out 90 percent of the geometry class watched football, he could make a guess about the entire group that they liked it.
(A) Guess
(B) Survey
(C) Questionnaire
(D) Generalization
66. Collecting evidence is used to support a.
(A) Data
(B) Conclusion
(C) Opinions
(D) Investigations
67. What do psychologists do after they analyze their research observations?
(A) Form a reesearch question
(B) Form a hypothesis
(C) Conduct a study
(D) Draw conclusions
68. The final step of the scientific method; the researcher develops a reason for the occurrence of the phenomenon they are studying
(A) Observation/form a question
(B) Form a hypothesis
(C) Test hypothesis
(D) Analyze the results
(E) Draw a conclusion
69. Conclusions should appropriately answer at least one of the specific questions raised at the beginning of the investigation in the order they are given under the statement of the problem.
(A) TRUE
(B) FALSE
70. The conclusion of a research paper should:
(A) Summarize findings and suggest future work
(B) Repeat the introduction
(C) Introduce new data
(D) Contain tables
71. What is the term for a conclusion reached on the basis of evidence and reasoning?
(A) Inference
(B) Hypothesis
(C) Theory
(D) Law
72. What does 'Conclude / Conclusion' mean in writing? Fill in the blank: Conclude / Conclusion means ____
(A) Wrapping up your writing by restating main points and giving a final message.
(B) Introducing new ideas.
(C) Listing references.
(D) Summarizing only the first paragraph.
73. In the Conclusion Chapter, you should state whether or not the objectives of your research

- have been achieved and whether they are as you have expected.
(A) TRUE
(B) FALSE
74. Which one is the major component to include in the formulation of a conclusion?
(A) Major Findings
(B) Tables and Figures
(C) Materials and Procedures
(D) Review of Related Literature
75. TRUE or FALSE? Conclusions of a research study are based from the summary of findings
(A) TRUE
(B) FALSE
76. Conclusion part need not include ____
(A) Future scope of the study
(B) Outcome of study
(C) Statement from abstract
(D) None of the above
77. The conclusion is part of the recommendations section.
(A) TRUE
(B) FALSE
78. Conclusion, theory advancement and new knowledge is the last process in scientific method.
(A) True
(B) False
79. In what step do you decide if your hypothesis is supported or rejected by your data?
(A) Experiment
(B) Research
(C) Conclusion
(D) Collecting data
80. After the data is analyzed the hypothesis is stated as correct or incorrect in the ____
(A) Conclusion
(B) Experiment
(C) Hypothesis
(D) Table of contents
81. The conclusion refers to the final chapter, where you wrap up your dissertation with a final reflection on what you did and how you did it.
(A) TRUE
(B) FALSE
82. How can a writer use logic and reasoning to strengthen their argument?
(A) By using emotional appeals and personal stories.
(B) By presenting clear and coherent arguments, providing evidence and examples to support their points, and avoiding faulty reasoning.
(C) By relying solely on opinions and subjective reasoning.
(D) By including contradictory evidence and examples.
83. What is the example of the suggestion of further studies?
(A) "The purpose of the research is to compare pre-and post-tests."
(B) "Next research should focus more on a number of students in the group."
(C) "The results found that post-test is higher than pre-test."
(D) "There are two purposes of the current study." TagsChapter 5
84. What do you mean by the term findings of the study
(A) Findings by the researcher
(B) Mistakes found in research report
(C) Hidden details of the company
(D) None of above
85. ____ is a conclusion that is based on many facts and examples.
(A) Generalization
(B) Paragraph
(C) Glossary

- (D) Hypothesis
(E) Purpose
86. Conclusions based on research findings
(A) Insights and Recommendations
(B) Model In-put
87. Ajit is a graduate student in psychology who is conducting research on the effectiveness of two types of therapy in the treatment of phobias. Ajit is at the stage where he uses statistics to analyze the data he has collected in order to determine if his initial hypothesis is supported by the research. At which stage of the scientific method is Ajit working?
(A) Drawing conclusions
(B) Developing a research question
(C) Gathering evidence
(D) Replicating results
88. Always remember that conclusion is a summary of your work.
(A) True
(B) False
(C) All the above
(D) None of the above
89. This part of the research answers the question: "What do your observations mean?"
(A) Abstract.
(B) Methodology.
(C) Conclusion.
(D) Summary.
90. What is a conclusion in scientific research?
(A) A conclusion is a hypothesis that has been tested.
(B) A conclusion is a detailed procedure for conducting experiments.
(C) A conclusion is a summary of the results and findings of an experiment.
(D) A conclusion is a law that describes natural events.
91. How should the limitations of a study be addressed in the discussion section?
(A) By ignoring any potential weaknesses
(B) By minimizing the importance of limitations
(C) By openly acknowledging them and their impact on the findings
(D) By providing additional research to cover up the weaknesses
92. What should be included in the Conclusion section of a research report?
(A) Quotations and footnotes
(B) Physical appearance of the report
(C) Recommendations for future research
(D) Related literature
93. What are the conclusions based on in pedagogical research?
(A) Pedagogical experiment
(B) Intuition
(C) Researcher's personality
(D) Opponents' statements
(E) On exercises
94. How can you effectively use evidence to strengthen your arguments?
(A) Use evidence that is unrelated to your argument
(B) Present evidence in a confusing and disorganized manner
(C) Ignore the relevance and credibility of the evidence
(D) Gather relevant and credible evidence that supports your claims, present it clearly and logically, and explain how it directly supports your argument.
95. Which step is being described? My hypothesis was incorrect because the grass seed did not grow better in the plastic bottle than the grass seed in the milk carton.
(A) Analyze results (data)
(B) Ask a question
(C) Draw a conclusion
(D) Experiment plan

96. How does drawing a conclusion from observations differ from making an inference?
- (A) Drawing a conclusion is based on multiple observations, while an inference can be based on a single observation.
 - (B) Conclusions are always correct, whereas inferences can be wrong.
 - (C) Inferences are made before observations, while conclusions are made after.
 - (D) There is no difference; they are the same process.
97. Conclusion
- (A) Logical result or generalization
 - (B) Beginning
 - (C) Explains the purpose
 - (D) Contains the hook
98. What is the main topic Sherlock Bones is teaching?
- (A) How to cook
 - (B) How to solve math problems
 - (C) How to write stories
 - (D) How to make inferences
99. What is usually written at the end of the Discussion section?
- (A) Research title
 - (B) Implications and conclusions
 - (C) Statistical formulas
 - (D) Variables
100. Draw a conclusion from the statement. If you go fishing, then you will need to bring your fishing rod. You go fishing.
- (A) You will need to bring your fishing rod.
 - (B) Invalid
 - (C) You are a boring person.
 - (D) You are going to catch a fish.
101. Conclusion paragraph
- (A) Containing a restatement of the thesis and a closing statement
 - (B) Introducing new arguments and evidence
 - (C) Summarizing the main points without a thesis
 - (D) Providing a detailed analysis of the topic
102. It is necessary to base the recommendations of the study from the conclusion.
- (A) True
 - (B) False
103. When all of the data in a marketing research project have been collected and analyzed, the next step for the researcher is to
- (A) Develop a testable hypothesis.
 - (B) Make recommendations based on the findings.
 - (C) Develop a research design for the project.
 - (D) Decide whether the project should be continued.
104. How can reasoning be used to strengthen a scientific claim?
- (A) By ignoring evidence and focusing on personal beliefs
 - (B) By connecting evidence logically to the claim and explaining why the evidence supports the claim
 - (C) By making assumptions without evidence
 - (D) By relying solely on anecdotal evidence
105. Conclusion provides the readers with recommendations that can be explored concerning the topic
- (A) True
 - (B) False
 - (C) All the above
 - (D) None of the above
106. The sum of the squares of the sides of a triangle is equal to the square of the third side. You conclude that the triangle must be a right triangle.
- (A) Deductive
 - (B) Inductive

107. Information that can be inferred from the results of the research
- (A) Implications
 - (B) Association
 - (C) Confirmation
 - (D) Limitations
108. When making a conclusion, you should decide whether the data you collected ____ your hypothesis or not
- (A) Hypothesis
 - (B) Question
 - (C) Support
 - (D) None of above
109. How to explain the evidence and prove your claim.
- (A) Transitions
 - (B) Premise
 - (C) Justification
 - (D) Sufficient Evidence
110. When scientists share their findings with other scientists, they are:
- (A) Experimenting
 - (B) Making a hypothesis
 - (C) Analyzing data
 - (D) Communicating results
111. Conclusions are derived primarily from:
- (A) Data analysis and interpretation
 - (B) Review of related literature
 - (C) Theoretical frameworks
 - (D) Research hypotheses
112. People may draw different conclusions based on the same evidence?
- (A) True
 - (B) False
113. What can you conclude from the fact that lots of research is being done into wind and solar energy?
- (A) In the future, these technologies may be far more sophisticated and efficient
 - (B) We don't really know how solar and wind energy can be used to produce electricity
 - (C) These technologies are too complicated to be widely used
 - (D) These technologies will someday be more expensive
114. A conclusion must have which of the following:
- (A) A sentence that describes the controlled variables.
 - (B) The directions to the experiment, written so others can follow them.
 - (C) A sentence that analyzes the data.
 - (D) The material list with all ingredients.
115. Choose a correct conclusion. After I ate strawberries, my lips swelled. Swollen lips after eating strawberries may be a sign of an allergy. Conclusion: ____
- (A) I do not like strawberries.
 - (B) Strawberries is not a fruit.
 - (C) Strawberries are not sweet,
 - (D) Likely I am allergic to strawberries.
116. What should be the basis for your recommendations?
- (A) Assumptions
 - (B) Findings
 - (C) Theories
 - (D) Variables
117. A conclusion reached on the basis of evidence and reasoning
- (A) Inference
 - (B) Observation
 - (C) Skepticism
 - (D) Argument
118. What is the last step of the scientific method?
- (A) Reading
 - (B) Experiment
 - (C) Observation
 - (D) Draw conclusions

- 119.** When a researcher wants to conclude his/her research findings, he/she should
- (A) Based the conclusion on analysis of data related to hypotheses or research questions posed
 - (B) Based the conclusion on previous research findings
 - (C) Based the conclusion on literature review
 - (D) Based the conclusion on previous research hypotheses
- 120.** What should be acknowledged in the findings section?
- (A) Funding sources
 - (B) Future research ideas
 - (C) Personal biases
 - (D) Limitations of the study
- 121.** Draw a conclusion from the statement. If you live in Orlando, then you live in Florida. You live in Orlando.
- (A) You live in Disney Land
 - (B) You are an old person.
 - (C) You live in Florida
 - (D) You live in Orlando
- 122.** The discussion of results and reflection includes the following, except:
- (A) Results and Discussion
 - (B) Conclusion
 - (C) Recommendation
 - (D) Action Plan
- 123.** What does it mean to draw a conclusion in research?
- (A) Choose a favorite result
 - (B) Interpret what the data reveals about your hypothesis
 - (C) End the research early
 - (D) Change your question
- 124.** The value of a scientific article is expressed:
- (A) When there is a reasonable conclusion based on the data and results obtained.
 - (B) By the recognition that further research is needed.
 - (C) When the author confirms that additional complete research is necessary.
 - (D) When the article is published in a popular journal.
- 125.** A summary of what you have learned from a scientific experiment is called a(n) ____
- (A) Hypothesis
 - (B) Answer
 - (C) Conclusion
 - (D) Result
- 126.** What is the significance of the implications section in James's research paper?
- (A) To provide personal opinions
 - (B) To list all references
 - (C) To discuss broader implications of findings
 - (D) To summarize the introduction
- 127.** The end of an event or process
- (A) Cohesion
 - (B) Tension
 - (C) Conclusion
 - (D) Compassion
- 128.** What is the point where you reach a determination about your hypothesis called?
- (A) Conclusion
 - (B) Hypothesis
 - (C) Experiment
 - (D) Observation
- 129.** Hey there, curious minds! What is the purpose of a conclusion in a research report that Charlotte and Brennan wrote?
- (A) To summarize the key facts in the body of the report
 - (B) To tell the reader to have a great day
 - (C) To tell the reader "The End"
 - (D) To introduce facts about the topic
- 130.** In doing research, what will support a conclusion of a study so that it can be valid and trust?

- (A) Factual evidence
 - (B) Hypothesis
 - (C) Implications
 - (D) Assumptions
- 131.** The conclusion contains the details of the findings obtained from the study.
- (A) True
 - (B) False
 - (C) All the above
 - (D) None of the above
- 132.** When the researcher writes the theoretical implications of one's findings, what is this stage in the research?
- (A) Drawing the conclusion
 - (B) Formulating research problems
 - (C) Making recommendations
 - (D) Writing the conceptual framework
- 133.** The final part or a summary of reasonable inferences is called ____
- (A) Conclusion
 - (B) Variable
 - (C) Experiment
 - (D) Problem
- 134.** True or False: A conclusion is the point where you reach a determination about your hypothesis.
- (A) True
 - (B) False
- 135.** In a research, study the conclusions should be based on
- (A) Related literature.
 - (B) Data collected.
 - (C) Analysis of data.
 - (D) Both B and C.
- 136.** What should be included in the discussion?
- (A) Results significance
 - (B) Results overview
 - (C) Results calculation
 - (D) Results application
- 137.** In suggesting future courses of action, it is important to ensure that the suggestions are viable and are closely related to the research topic.
- (A) True
 - (B) False
- 138.** It brings a sense of finality and resolution.
- (A) Billboard
 - (B) Lead
 - (C) Conclusion
 - (D) Summary
- 139.** Angela's experiment proved that earthworms move away from light.
- (A) Recognize the problem
 - (B) Form a hypothesis
 - (C) Test hypothesis with an experiment
 - (D) Analyze data
 - (E) Draw conclusions
- 140.** When writing a conclusion, you should:
- (A) Restate the thesis, synthesize main points, and suggest implications without introducing new information
 - (B) Introduce completely new arguments
 - (C) Copy and paste your introduction
 - (D) List all your sources again
 - (E) Apologize for any weaknesses in your work
- 141.** Recommendations in a research paper should:
- (A) Address issues beyond the study's scope
 - (B) Provide solutions related to findings
 - (C) Focus solely on research methodology
 - (D) Be written before drawing conclusions
- 142.** It sums up the key points of the discussion.
- (A) Presentation
 - (B) Recommendation
 - (C) Analysis
 - (D) Conclusion

143. Which component is necessary in the report writing of action research?
- (A) Hypothesis generation
 - (B) Evaluation / Analysis / Reflection
 - (C) Data collection methods
 - (D) Literature review
144. What does a quality conclusion include?
- (A) New evidence
 - (B) Transition and thesis restatement
 - (C) Summary
 - (D) Transition, thesis restatement, and summary of evidence
145. The conclusion of an experiment should:
- (A) Restate the hypothesis and discuss the results
 - (B) Include personal beliefs
 - (C) Avoid mentioning unexpected findings
 - (D) Be written before analyzing data
146. This is where we summarized the important points that we were able to gather in the conduct of our research.
- (A) Conclusion
 - (B) Discussion
 - (C) Recommendation
 - (D) Abstract
147. The statements below tell us of the steps to follow in writing a good conclusion EXCEPT for one. Which is it?
- (A) Draw logical connections between your conclusions and the ideas stated in your research study.
 - (B) It is okay to oppose points in your study and let your reader think of your purpose.
 - (C) Ensure that your conclusion is linked to your introduction.
 - (D) Merge your conclusion to your recommendations.
148. The final step when conducting research is to ____
- (A) Analyze the data.
 - (B) Develop a hypothesis.
 - (C) Collect the data.
 - (D) State findings and conclusions.
149. When a scientist shares her findings with other scientists, she is
- (A) The science instructor.
 - (B) Communicating results
 - (C) Drawing conclusions
 - (D) Away from all people.
150. What is the significance of the conclusion section in a research report?
- (A) To provide a recap of the study's main findings
 - (B) To list references
 - (C) To present raw data
 - (D) To describe the research design
151. When you decide whether or not data supports the original hypothesis, you are:
- (A) Asking questions
 - (B) Drawing conclusions
 - (C) Making observations
 - (D) Forming hypotheses
152. These are inferences, deductions, abstractions, implications, interpretations, general statements, and/or generalizations based upon the findings.
- (A) Conclusions
 - (B) Recommendations
 - (C) Statement of the Problem
 - (D) Summary of Findings
153. The main purpose of conclusion is to make recommendations for future work on the topic.
- (A) True
 - (B) False
 - (C) All the above
 - (D) None of the above

154. Which of the following is an example of a good discussion statement?
- (A) "The graph shows a line."
 - (B) "The increase in efficiency by 12% compared to previous studies indicates that the proposed design is more effective for renewable energy applications."
 - (C) "We got some results, and they seem okay."
 - (D) "The data is shown above, no explanation is needed."
155. When you are writing what your findings showed, what is an important to do?
- (A) Bring up something new as a final thought
 - (B) Explain to the readers the main points you touched on about your topic
 - (C) Make an outlandish claim to confuse the reader
 - (D) Use a quote that allows someone famous to make your argument for you
156. Conclusions formulated by the researcher must be based on actual findings. This concept implies that whatever you conclude on the basis of your findings is correct and can be verified by you and others.
- (A) Comprehensive
 - (B) Critical
 - (C) Valid
 - (D) Verifiable
 - (E) Empirical
157. What is an example of Interpretation and Drawing Conclusions?
- (A) Marsh grass growth is limited by available nitrogen.
 - (B) Similar plots of grass were used. Control group has no nitrogen added while experimental group did.
 - (C) Sampled plots, recorded data, and found out experimental group is larger.
 - (D) Additional nitrogen was the reason it grew more.
158. What conclusion can be reached using inductive reasoning from the following? When the sun comes up, the rooster crows. When the rooster crows, the hen lays an egg. What happens when the sun comes up?
- (A) It won't rain.
 - (B) The fog melts away.
 - (C) Everybody wakes up.
 - (D) The hen lays an egg.
159. An ____ is a conclusion about our observations.
- (A) Experiment
 - (B) Idea
 - (C) Inference
 - (D) Observation
160. What you learned from the experiment is the ____
- (A) Conclusion
 - (B) Hypothesis
 - (C) Variable
 - (D) Materials
161. Is the following conclusion correct? A scientist observed a bumble bee in a large field. The bumble bee landed only on pink flowers. The scientist concluded that all bumblebees prefer pink flowers
- (A) It is incorrect because there are no pink flowers
 - (B) It is correct because I know all about bees
 - (C) It is incorrect because it is not logical to draw conclusions about all bees after observing just one.
 - (D) It is correct because i have done research on bees
162. In an experiment testing how different surfaces affect the speed of rolling objects, which of the following should be included in the conclusion?
- (A) A summary of the experiment and findings
 - (B) Only the results that support the hypothesis

- (C) The scientist's opinion on rolling objects
(D) Unrelated data from other experiments
- 163.** What is a conclusion in a research paper?
(A) A summary of the main findings or results of the study.
(B) A description of the research methodology.
(C) A list of references used in the study.
(D) A statement of the research question.
- 164.** Which of the following is a conclusion indicator?
(A) Because
(B) Since
(C) Therefore
(D) For
- 165.** We make inferences every day in real life. How? We look at details around us and draw conclusions. Imagine that you look out the window and see people wearing heavy coats, hats, and gloves. These people are shivering and sipping hot coffee, too. Based on these details, what is the best conclusion to draw?
(A) There is a sale on coffee at the grocery store.
(B) The weather is cold.
(C) These people are attending a fashion show.
(D) These people are very upset.
- 166.** What should be acknowledged in the findings section of Evelyn's research project?
(A) The unrelated studies
(B) The personal opinions of the researcher
(C) The funding sources
(D) The limitations of the study
- 167.** In the conclusion of a literature review, what should you do?
(A) Provide a summary of the main points and emphasize their significance
(B) Write a personal reflection on the research process
(C) Introduce new topics not discussed in the review
(D) Include a list of your favorite movies
- 168.** It suggests what can be done based on the research.
(A) Conclusion
(B) Discussion
(C) Recommendation
(D) None of above
- 169.** What is necessary for drawing a valid conclusion from observations?
(A) Personal opinions about what was observed.
(B) A large number of observations about unrelated events.
(C) Reliable and sufficient observational data.
(D) Making an inference without any observational data.
- 170.** What does "reasoning process" help with?
(A) Retrieving data
(B) Choosing the most effective algorithms
(C) Drawing conclusions from past information
(D) Common sense
- 171.** It directly answers the research questions based on the results and discussion.
(A) Abstract
(B) Questionnaire
(C) Conclusion
(D) Bibliography
- 172.** The dog is muddy because it is probably raining outside
(A) Qualitative Observation
(B) Quantitative Observation
(C) Inference
(D) None of the Above
- 173.** Research can help you reach new ____
(A) Conclusions

- (B) Places
(C) People
(D) Words
- 174.** A strong conclusion in a research report should:
(A) Introduce new data and findings
(B) Summarize the key findings and their implications
(C) Critique the methodology used in the study
(D) Discuss related topics to broaden the discussion
- 175.** Which sentence best demonstrates the use of evidence in supporting an argument?
(A) The sky is blue because it is my favorite color.
(B) Studies show that regular exercise improves mental health.
(C) I think cats are better than dogs because they are cute.
(D) Everyone knows that the earth is flat.
- 176.** A VALID INFERENCE is ____
(A) A wild guess
(B) Never supported
(C) Supported with evidence
(D) Is hard to find
- 177.** Which transition signals a conclusion?
(A) In addition,
(B) Similarly,
(C) For example,
(D) In short,
- 178.** Describe the process of constructing a scientific explanation based on evidence and reasoning.
(A) Ignoring data and making assumptions
(B) Gathering evidence, analyzing data, and using logical reasoning to form a conclusion
(C) Guessing without any evidence
(D) Relying solely on personal beliefs
- 179.** What conclusion can you draw from this line graph?
(A) For the most part, the older the teenagers get, the more likely they are to have a cell phone.
(B) Older teens have less cell phones.
(C) People in their thirties have the least cell phones.
(D) No one should own a cell phone.
- 180.** Using the Law of Detachment, draw a conclusion based on the statements given: If a plane flies to China, then it will be a long flight. Sarah bought a ticket to China.
(A) Sarah will get stuck in the security line.
(B) Sarah will have a long flight.
(C) Sarah will need to bring a neck pillow and headphones.
(D) Sarah will get stuck with a middle seat on the plane.
- 181.** Which part of an argument is used to draw a final judgment based on the evidence presented?
(A) Claim
(B) Evidence
(C) Counterclaim
(D) Conclusion
- 182.** What is the role of a conclusion in a research essay?
(A) To introduce new arguments
(B) To restate the thesis and summarize key points
(C) To provide detailed evidence
(D) To ask questions
- 183.** The results of the research are used as a ____ in conducting more researches or in planning new projects.
(A) Future plan
(B) Springboard
(C) Draft
(D) Program

184. This is the closure of the investigation.
- (A) Theoretical framework
 - (B) Conclusion
 - (C) Discussion
 - (D) Results
185. The statement/decision regarding whether the hypothesis was supported or refuted
- (A) Conclusion
 - (B) Significant effect
 - (C) Citation
 - (D) Assumption
186. Research implications suggest how the findings may be important for policy, practice, theory, and subsequent research.
- (A) True
 - (B) False
187. Imagine you're a detective like Samuel, Luna, and Ethan, solving the mystery of your research. What would "Conclusion" represent in your detective work?
- (A) The recipe for your research
 - (B) The most important message in a text
 - (C) Your final answer after gathering all the clues
 - (D) The information you collect during your investigation
188. What is the final conclusion of your research?
- (A) A way to tie the thesis of what you were trying to prove, with all of the evidence you used for a final thought of what was learned
 - (B) A way to stretch the paper to reach your page requirement
 - (C) A place for a final quote
 - (D) The place for your thesis

1.6 Research Report Writing

1.6.1 Research Paper Components

1. A research paper is a brief report of research work based on [2011-JUNE]
 - (A) Primary Data only
 - (B) Secondary Data only
 - (C) Both Primary and Secondary Data
 - (D) None of the above
2. Commonly features a summary of the results that were obtained in the study, describes how those results address the topic under investigation and/or the issues that the research was designed to address,
 - (A) Discussion
 - (B) Introduction
 - (C) Limitations
 - (D) Charts
3. In the context of a research thesis, what does 'literature review' refer to?
 - (A) A summary of the thesis
 - (B) An analysis of the author's previous works
 - (C) A review of existing research on the topic
 - (D) A list of references
4. It includes a brief background [descriptive information] of the problem generally coming from existing reports or data. This part should not be opinionated.
 - (A) Title
 - (B) Abstract
 - (C) Method
 - (D) Introduction
5. A student wants to compare findings with other studies. Which section should be used?
 - (A) Introduction
 - (B) Methodology
 - (C) Results
 - (D) Discussion
6. Which section of the research paper where the degrees of the panel of examiners are stated?

- (A) Acknowledgement
 - (B) Approval Sheet
 - (C) Contents
 - (D) Title Page
7. The last paragraph of the introduction should be the ___ of the study?
- (A) Locale
 - (B) Rationale
 - (C) Statement of Hypothesis
 - (D) Significance of the Study
8. Which IMRAD section answers the question “What did you find?”
- (A) Introduction
 - (B) Methodology
 - (C) Results
 - (D) Discussion
9. Which section of the research paper contains the purpose statement and the research questions?
- (A) Overview
 - (B) Statement of the problem
 - (C) Significance of the study
 - (D) Background of the study
10. Which section shows how the research was conducted?
- (A) Introduction
 - (B) Results
 - (C) Methodology
 - (D) Bibliography
11. Your goal at this stage is to prepare your audience to understand how your research relates to the background you have given, highlighting gaps/problems in current knowledge that justify or explain the need for further investigation.
- (A) Establishing a Research Territory
 - (B) Establishing a Niche
 - (C) Occupying the Niche
 - (D) None of the above
12. Which part of a scientific paper is most likely to be written by the research adviser?
- (A) Abstract
 - (B) Introduction
 - (C) Discussion
 - (D) Acknowledgments
13. It is the name of your research that indicates what it is about.
- (A) Abstract
 - (B) Title
 - (C) Research
 - (D) None of above
14. Which is an element of a Good Research Proposal
- (A) Objectives
 - (B) Introduction
 - (C) Title
 - (D) All of the above
15. Which of the following is not a common element of a research proposal and a research report?
- (A) Objectives and hypotheses.
 - (B) Implications for further research.
 - (C) References to previous research.
 - (D) Sources of information/data.
16. What is the primary consideration when selecting a research title?
- (A) Length
 - (B) Clarity and relevance
 - (C) Humor
 - (D) Complexity
17. What is the focus of the Results and Discussion section in the IMRAD format?
- (A) Synthesizing related literature
 - (B) Describing the research instruments
 - (C) Presenting key findings and their implications
 - (D) Listing references and citations

18. It provides a brief overview of the study's relationship to the literature's needs and its intended goals and contributions.
- (A) Introduction
 - (B) Literature Review
 - (C) Definition of Terms
 - (D) Scope and Limitation
19. In which section of the research report would you find raw data?
- (A) Literature review
 - (B) Appendices
 - (C) Introduction
 - (D) Discussion
20. Which section of a research report contains an explanation of problems in past research?
- (A) Summary of previous research
 - (B) Results and discussion
 - (C) Research procedures
 - (D) Conclusion
21. This section includes all pertinent documents that could be used to establish the validity and reliability of the entire research paper.
- (A) Results
 - (B) Appendices
 - (C) Discussion
 - (D) Hypotheses
22. Which of these is the BEST example of an academic research title?
- (A) An Investigation on the Relationship between Study Habits and Academic Performance of Grade 12 Students
 - (B) Study Habits vs. Grades
 - (C) School Stuff
 - (D) Why Students Study
23. The ___ section describes what the authors think their results mean. This is usually the most important section in the article.
- (A) Introduction
 - (B) Abstract
 - (C) Results
 - (D) Discussion
 - (E) Methods (or methodology)
24. What part of the report contains names of people and or organizations who helped you with your study?
- (A) Introduction
 - (B) Acknowledgement
 - (C) Main Body
 - (D) Recommendations
25. It is advisable to create a Table of Contents at ___ of the digital document (2 Mark)
- (A) Beginning
 - (B) End
 - (C) Bottom
 - (D) None
26. You need to be precise in facts and dates in writing a research paper.
- (A) TRUE
 - (B) FALSE
27. An ___ is a well organized plan of the paper explaining in topical form the contents of the paper in order they are to appear.
- (A) Primary source
 - (B) Secondary source
 - (C) Outline
 - (D) URL
28. Which of these is an example of expository writing?
- (A) Poetry
 - (B) Research papers
 - (C) Comic books
 - (D) Novels
29. Which of the following options does not belong to the procedures section?
- (A) Data analysis
 - (B) The sample
 - (C) Instrumentation
 - (D) The research question

30. What are the key components typically included in the methods section of a research article?
- (A) Study design, Participants or subjects, Data collection, Procedure
 - (B) Results, Discussion, Conclusion, References
 - (C) Hypothesis, Literature Review, Abstract, Appendix
 - (D) Introduction, Methods, Results, Discussion
31. Which of the following statements below is the most convincing way to begin a research paper?
- (A) "I think you should listen to the evidence that I will present to you."
 - (B) "I feel that you should listen to the evidence that I will present to you."
 - (C) "The evidence presented will demonstrate that ____"
 - (D) "I believe this evidence is important because ____"
32. Which component of a project report provides additional information not included in the main text?
- (A) Acknowledgement
 - (B) Abstract
 - (C) Appendix
 - (D) Bibliography
33. What is a title?
- (A) The border of the paper
 - (B) A phrase that appears at the top of each page
 - (C) The name of your paper
 - (D) None of above
34. What is a research title?
- (A) Summarizes main idea or topic
 - (B) Set of Questions to be answered
 - (C) Relevance of the study
 - (D) Introduction of the study
35. Which of the following is not discussed in the methodology?
- (A) Setting of the research
 - (B) Sampling strategy used
 - (C) Instruments used for data collections
 - (D) The key findings
36. Part of research paper which is stated in interrogative form.
- (A) Introduction
 - (B) Hypothesis
 - (C) Statement of the Problem
 - (D) Significance of the Study
37. How many Chapters are there in a research manuscript?
- (A) 1
 - (B) 3
 - (C) 5
 - (D) 7
38. Materials and methods section
- (A) Must be specific.
 - (B) Can say "I did" or "I will".
 - (C) Must be general with gaps so that someone else can change things.
 - (D) Should not include information like volumes or quantities.
39. PART OF RESEARCH WHICH CONTAINS PURPOSE OF YOUR REPORT, THESIS STATEMENT AND BACKGROUND OF THE STUDY
- (A) INTRODUCTION
 - (B) CONCLUSION
 - (C) METHODOLOGY
 - (D) None of the above
40. This part presents the context of the study, stating the external factors which gave rise to the research proposal.
- (A) Backround of the Study
 - (B) Statement of the Problem
 - (C) References
 - (D) Methodology

41. Explains how the research was conducted
(A) Conclusion
(B) Discussion
(C) Introduction
(D) Methodology
42. This part of the introduction sets the situation behind your research work, as well as the foundations and motivations behind the topic.
(A) The research gap
(B) The background of the study
(C) The statement of the problem
(D) None of the above
43. The main function of the title in an engineering research paper is to:
(A) Entertain the reader
(B) Summarize the main focus of the study
(C) Provide detailed methodology
(D) Replace the abstract
44. What is the term for the section of a research paper that reviews existing literature related to the research topic?
(A) Literature Review
(B) Conclusion
(C) Introduction
(D) Methodology
45. Formal writing assignment on a specific theme that requires the reading and analyzing of primary sources
(A) Rough draft
(B) Research paper
(C) Thesis
(D) Transition words
46. A document outlining the plan for a research project.
(A) Research proposal
(B) Research report
(C) Research summary
(D) Research article
47. The function of Introduction is
(A) Establish the context by providing a brief and balanced review of the pertinent published literature that is available on the subject
(B) Clearly identifying the subject area of interest
(C) A circle
(D) The primary subject matter quickly without losing focus
(E) There is no correct answer
48. Which revision best strengthens logical organization in a manuscript?
(A) Combine limitations into the abstract
(B) Place figures before defining terms
(C) Add unrelated literature anecdotes
(D) Align methods, results, and conclusions
49. According to the lesson, which section of the research report corresponds to “The How” and details the procedures used?
(A) Introduction
(B) Methodology
(C) Results
(D) Discussion
50. What is the first goal of a research title?
(A) To capture the reader’s attention
(B) To summarize the literature review
(C) To present the conclusion
(D) To list the methodology steps
51. These questions are used to evaluate the ____ Procedures Used. a. Is the research design described in detail? b. Is it adequate? c. Are the samples described? d. Are relevant variables recognized? e. Are appropriate controls provided? f. Are data-gathering instruments appropriate? g. Are validity and reliability established? h. Is the statistical treatment appropriate?
(A) Introduction
(B) Literature Review
(C) Methodology
(D) Results
(E) Discussion/Conclusion

52. Prince, Ronnie, Dominic, Marvin asked Mhar, "Which research section where you report the findings of your study based upon the methodology you have applied to gather information?"
- (A) Analysis
 - (B) Discussion
 - (C) Results
 - (D) Conclusion
53. Which section lists the specific benefits to certain groups?
- (A) Scope and Delimitation
 - (B) Significance of the Study
 - (C) Literature Review
 - (D) References
54. What elements should be included in a well-structured research title?
- (A) The research findings and a summary of the literature
 - (B) A catchy phrase and the author's name
 - (C) The research question and the scope of the study
 - (D) Keywords, the main question, and the methodology
55. Where should a Grade 10 student place a bar graph showing test scores?
- (A) Introduction
 - (B) Methodology
 - (C) Results
 - (D) References
56. Which section of an IMRAD paper presents the background of the study?
- (A) Methodology
 - (B) Results
 - (C) Introduction
 - (D) Discussion
57. This section contains the substantial amount of information that needs to be clearly and accurately presented and analyzed.
- (A) Title
 - (B) Abstract
 - (C) Introduction
 - (D) Body
58. The introduction explains why the research is not important.
- (A) TRUE
 - (B) FALSE
 - (C) All the above
 - (D) None of the above
59. This part of a research paper tells the explanation of why the research topic is valuable
- (A) Conclusion
 - (B) Bibliography
 - (C) Introduction
 - (D) Scope and Delimitation
60. A section which details how the research was performed. It typically features a description of the participants/subjects that were involved, the study design, the materials that were used, and the study procedure.
- (A) RESULTS
 - (B) APPENDICES
 - (C) METHODS
 - (D) TITLE
61. What section in the research paper focuses on providing a comprehensive summary of the findings and points out what was learned from the study?
- (A) Conclusion
 - (B) Recommendations
 - (C) References
 - (D) Summary
62. Which section of a scientific paper typically includes the research title, researchers, and research adviser?
- (A) Introduction
 - (B) Abstract
 - (C) Title Page
 - (D) References

63. Which of the following is not part of Scientific Research Paper Chapter 1?
- (A) Scope and Limitation
 - (B) Definition of Terms
 - (C) Hypothesis of the Study
 - (D) Significance of the Study
64. Which research term refers to historical/contextual background of a problem?
- (A) Introduction
 - (B) Background of the Study
 - (C) Title
 - (D) RRL
65. What is the first stage of writing a research paper?
- (A) Find citations
 - (B) Type up a rough draft
 - (C) Make a Works Cited
 - (D) Choose a subject
66. Identify what chapter of a research study the given element belongs. RECOMMENDATIONS
- (A) Chapter 1
 - (B) Chapter 2
 - (C) Chapter 3
 - (D) Chapter 4
 - (E) Chapter 5
67. Why is IMRAD effective for communicating scientific research?
- (A) It limits explanations
 - (B) It organizes research logically
 - (C) It avoids experiments
 - (D) It shortens studies
68. Establishes the context and significance of the research being conducted by summarizing current understanding
- (A) Problem statement
 - (B) Theoretical Framework
 - (C) Literature Review
 - (D) Introduction
69. The RPP component consists of the following things except ____
- (A) Subject identity
 - (B) Competency standards
 - (C) Learning activities
 - (D) Student attendance
70. In a scientific research paper, where is the research title usually found?
- (A) At the beginning of the introduction
 - (B) On the cover page
 - (C) In the abstract
 - (D) At the end of the paper
71. Which section of the IMRAD format includes the research method, sampling method, and procedure?
- (A) Introduction
 - (B) Method
 - (C) Results
 - (D) Discussion
72. What comes after the Summary of Findings, Conclusion, and Recommendations?
- (A) Abstract
 - (B) Preliminaries
 - (C) Methodology of the Study
 - (D) References
73. What is the primary purpose of a "Definition of Terms" section in a research proposal?
- (A) To define every single term used in your research proposal
 - (B) To demonstrate your understanding of complex terminology
 - (C) To provide clear definitions of key terms that may be unfamiliar to readers
 - (D) To introduce and define potential variables for your study
74. What information does NOT belong in the introduction?
- (A) Lead
 - (B) Transition sentence
 - (C) Thesis statement
 - (D) Topic sentences

75. A piece of academic writing that provides analysis, interpretation, and argument based on in-depth research.
- (A) Term
 - (B) Research paper
 - (C) Research
 - (D) Hypothesis
76. This appears within the body paragraphs of a research paper. These are considered anything that supports an idea, claim, or belief.
- (A) Claim
 - (B) Evidence
 - (C) Research Question
 - (D) Research
77. Which section provides context and relevant information about the research topic?
- (A) Introduction
 - (B) Results
 - (C) Discussion
 - (D) Conclusion
78. What is the purpose of an outline in research?
- (A) To highlight the limitations of the research.
 - (B) To provide a structured framework for organizing and presenting the main ideas and supporting details of a research paper or project.
 - (C) To provide a list of references used in the research.
 - (D) To summarize the main findings of the research.
79. Important components that should be included in the Background of the Study are:
- (A) Statement of the problem, context, significance, and relevant literature
 - (B) List of references only
 - (C) Detailed methodology and data analysis
 - (D) Future recommendations and conclusions
80. Be sure to clearly state the purpose and/or hypothesis that you investigated
- (A) In the Introduction
 - (B) In the conclusion
 - (C) In the Results
 - (D) In the Discussion
 - (E) In the Title
81. A ___ is a statement that is arguable and used as a primary point to prove an argument.
- (A) Elaborate
 - (B) Claim
 - (C) Thesis
 - (D) Cite
82. Which research section should provide a recommendation of how to improve researchers' studies?
- (A) Methodology
 - (B) Recommendation
 - (C) References
 - (D) Result and discussion
83. In which section of a research proposal would you include references to prior studies?
- (A) Introduction
 - (B) Literature Review
 - (C) Results
 - (D) Methodology
84. It contains the paper's title, author's name, and the date of accomplishment of the research.
- (A) Cover page
 - (B) Abstract
 - (C) Findings
 - (D) Respondents
85. Provides the methodological details of the paper.
- (A) Aim and Issue
 - (B) Theoretical framework
 - (C) Results, Analysis and Discussion
 - (D) Method

86. A description of the context or reasons for conducting research, including what motivated the researcher to explore the topic and any existing knowledge or gaps in understanding that led to the study.
- (A) Review of Related Literature
 - (B) Significance of the Study
 - (C) Background of the Study
 - (D) Statement of the Problem
87. This section of the research paper is used to present the overall structure plan of conducting the research paper
- (A) Statistical Analysis.
 - (B) Theoretical Framework.
 - (C) Conceptual Framework.
 - (D) Instrumentation.
88. Why might a writer use statistics (numerical data) in her research paper?
- (A) It appeals to logos
 - (B) It shows that the writer has strong evidence to support claims
 - (C) Both of these are reasons to use statistics
 - (D) None of the above
89. What is a claim that disagrees with the writer's claim?
- (A) Claim
 - (B) Rebuttal
 - (C) Counterclaim
 - (D) Anecdote
90. An ordered list that incorporates parenthetical documentation for information in it, which often comes from note cards or other research sources. Topics and subtopics are expressed in single, complete sentences.
- (A) Bibliography
 - (B) Graph
 - (C) Chart
 - (D) Outline
91. In priorities of the Research synopsis, one can include
- (A) Title Page, Table of Content, and Index of Tables.
 - (B) Title Page and List of Graph only.
 - (C) Title Page and Supervisor's Certificate only.
 - (D) None of the above.
92. In his Research class, Teacher C rated the studies of the students according to how they applied the principles and concepts in writing a good research paper. Which performance criteria is he referring to?
- (A) Validity of the content
 - (B) Impact of the performance
 - (C) Work quality and craftsmanship
 - (D) Adequacy of method and behavior
93. Evaluate the following erroneous research title and justify what makes it wrong. Effects of Coconut Oil and Beeswax Edible coating.
- (A) The title is incomplete and lacks clarity about the subject and variables.
 - (B) The title is too specific and detailed.
 - (C) The title uses too many technical terms.
 - (D) The title is too long and complex.
94. Which section discusses the implications of the research?
- (A) Discussion or Conclusion section
 - (B) Introduction section
 - (C) Methodology section
 - (D) Literature Review section
95. Which of the following is a key component of a well-structured quantitative research paper?
- (A) Detailed literature review
 - (B) Personal anecdotes and opinions
 - (C) Extensive use of qualitative data
 - (D) Speculative conclusions
96. It is the first part of your research paper that is read the most.
- (A) Cover Page
 - (B) Title of the Study
 - (C) Dedication Page
 - (D) Statement of the Problem

97. Which element of an argument does the following responds to and refutes (disproves) counterclaims addressed in the argument?
- (A) Claim
 - (B) Reasons (warrants) and evidence
 - (C) Counterclaim
 - (D) Rebuttal
 - (E) Impact
98. Which of the following should appear first in your research paper?
- (A) Works cited page
 - (B) Introduction
 - (C) Title
 - (D) Conclusion
99. The title of the research study is written on acknowledgement page.
- (A) False
 - (B) True
100. The research title 'Antibacterial effects of C₂H₅OH extract of Carica papaya leaves' is erroneous because:
- (A) C₂H₅OH is not a specific extract and refers to ethanol, making the title unclear.
 - (B) Carica papaya leaves do not have any antibacterial properties.
 - (C) The title does not mention the method of extraction.
 - (D) The title is too broad and does not specify the bacteria tested.
101. The study hopes to promote awareness on alternatives to address the health needs of the jurisdiction. This statement constitutes what part of Chapter 1?
- (A) Significance of the Study
 - (B) . Introduction
 - (C) Scope and Delimitation
 - (D) Statement of the Problem
102. Which contain topic of the study name of the researcher and guide etc
- (A) Index
 - (B) Table
 - (C) Title page
 - (D) None of the above
103. In which section of a scientific article are you MOST LIKELY to find a figure?
- (A) Materials and Methods
 - (B) Abstract
 - (C) Results
 - (D) Discussion
104. The final chapter of the research or thesis section contains:
- (A) Analytical framework
 - (B) Conclusion and recommendation
 - (C) Methodological framework
 - (D) None of above
105. What is the primary purpose of the procedure section in a research proposal?
- (A) To describe the research design.
 - (B) To outline the data analysis procedures.
 - (C) To present the research questions.
 - (D) To summarize the literature review.
106. Where in a research report is the identifying information included?
- (A) In the abstract
 - (B) In the title
 - (C) In the bibliography
 - (D) In the appendix
107. It is a brief summary of the researcher's main ideas and restates the paper's main thesis, giving the reader the sense that the stated goal of the paper has been accomplished.
- (A) Introduction
 - (B) Statement of the Problem
 - (C) Conclusions
 - (D) Recommendations
108. Which of the following is NOT a consideration when writing a research title?
- (A) The title must be in phrase form.
 - (B) The title must be limited to 10 to 15 substantive words.

- (C) Indicate accurately the subject and the scope of the study.
(D) Should include analysis of, study of, and investigation of and the like.
- 109.** What is the title of Chapter 1 in research paper?
(A) The Problem and Its Background
(B) Review of Related Literature
(C) Methodology
(D) Conclusions and Recommendations
- 110.** All of the following components must be included in a research proposal EXCEPT:
(A) Hypothesis
(B) Bibliography
(C) Abstract
(D) Methodology
- 111.** The section of the report that explains existing scientific understandings that relate to your investigation.
(A) Results
(B) Rationale
(C) Safety
(D) Background Theory
- 112.** TRUE or FALSE? Summary of findings, conclusions, and recommendations of a study are found in Chapter 5.
(A) TRUE
(B) FALSE
- 113.** Which part of Chapter V includes statistical analysis and a brief write-up about whether or not the results emerging as a result of analysis are significant?
(A) Conclusions
(B) Recommendations
(C) Statement of the Problem
(D) Summary of Findings
- 114.** What is the correct order of sections in a typical research paper?
(A) Abstract, Introduction, Methodology, Results, Discussion
(B) Introduction, Abstract, Results, Discussion, Methodology
(C) Methodology, Results, Discussion, Abstract, Introduction
(D) Results, Discussion, Methodology, Abstract, Introduction
- 115.** Which section explains how data were collected?
(A) ABSTRACT
(B) DISCUSSION
(C) METHODOLOGY
(D) RESULTS
- 116.** Which of these sections comes first in a research report?
(A) Results
(B) Conclusion
(C) Literature review
(D) Discussion
- 117.** A personal subject that reflects your opinions is not suitable for a research paper.
(A) True
(B) False
(C) All the above
(D) None of the above
- 118.** Complete the statement: Definition of terms is important part of research paper or report in which the key or important ____ in the study are clearly defined.
(A) Description
(B) Parts
(C) Statement
(D) Terms
- 119.** Framework or guide for writing a research paper
(A) Outline
(B) Paraphrase
(C) Secondary sources
(D) Thesis

- 120.** In what chapter normally found the Presentation, Analysis and Interpretation of data?
(A) Chapter I
(B) Chapter II
(C) Chapter III
(D) Chapter IV
- 121.** The — provides context for what the authors want to do, and often includes a review of other work that has been done on this topic in the past.
(A) Introduction
(B) Abstract
(C) Results
(D) Discussion
(E) Methods (or methodology)
- 122.** These are found at the end of a research paper that contain supplementary information. They can include raw data, interview transcripts, tables, figures, and more.
(A) Methodology
(B) Discussion
(C) Appendices
(D) Conclusion
- 123.** If a researcher wants to explain why the results differ from previous studies, which section should be revised?
(A) Introduction
(B) Methodology
(C) Results
(D) Discussion
- 124.** Which part of the research paper requires your command of language and writing skills such as summarizing, paraphrasing and writing indirect speeches?
(A) Scope and Delimitation
(B) Assumptions of the Study
(C) Statement of the Problem
(D) Review of related Literature
- 125.** What section in a research paper gives the researcher the chance to give suggestions to matters for the improvement of the research study?
(A) Conclusion
(B) Recommendations
(C) References
(D) Summary
- 126.** True or False? Every research paper must have at least one statistic to make the essay effective.
(A) True
(B) False
- 127.** It is the blueprint or plan for your research paper. It is an organized list of related ideas that you will include in your discussion (Calderon & Gonzales, 1993, cited in Abdelgafur, et al., 2020).
(A) Brainstorming list
(B) Timeline
(C) Inventory
(D) Outline
- 128.** Which of the following parts of a research paper that includes the related studies and current updates, which are relevant to the present study?
(A) Abstract
(B) Methodology
(C) Review of Related Literature
(D) Conclusion and Recommendation
- 129.** A — is a statement the writer is trying to prove is true.
(A) Evidence
(B) Claim
(C) Counter-claim
(D) Conclusion
- 130.** Which section is most appropriate for explaining tools and materials used?
(A) Introduction
(B) Methodology
(C) Results
(D) Discussion

131. Which of the following is not a function of a research proposal of a study?
- (A) What is proposed to be done in a study?
 - (B) How answers will be found to what is proposed
 - (C) Why proposed strategies of investigation are selected
 - (D) What answers have been found to what is proposed
132. TRUE OR FALSE: The title "Oral Reading Proficiency of Grade 7 Student of Coletto National High School" is a research title.
- (A) TRUE
 - (B) FALSE
133. An assertion or opinion and its supporting points, evidence, and reasoning
- (A) Relevance
 - (B) Sufficiency
 - (C) Evidence
 - (D) Argument
134. This contains copies of table, questionnaires, interview rates, observation checklist, and other materials that are indispensable or necessary in completing your research study.
- (A) Appendix
 - (B) Recommendation
 - (C) Findings
 - (D) Reference
135. Describe the procedures for your study in sufficient detail that other scientists could repeat your work to verify your findings
- (A) In the Materials and Methods
 - (B) In the Introduction
 - (C) In the Results
 - (D) In the Conclusion
 - (E) In the Acknowledgments
136. When you state why you are making a claim, you are giving your:
- (A) Counterclaim
 - (B) Thesis Statement
 - (C) Reasons
 - (D) Rebuttal
137. Which section of a research paper summarizes key findings and future directions?
- (A) Abstract
 - (B) Methodology
 - (C) Conclusion and Future Work
 - (D) References
138. Which part of the research paper must contain the gathered information from the respondents?
- (A) Chapter 1
 - (B) Chapter 2
 - (C) Chapter 3
 - (D) Chapter 4
 - (E) Chapter 5
139. A student wants to explain how data were collected in an experiment. Which IMRAD section should be used?
- (A) Introduction
 - (B) Methodology
 - (C) Results
 - (D) Discussion
140. Your position or assertion about a particular topic or issue is called
- (A) Concession
 - (B) Claim
 - (C) Rebuttal
 - (D) Thesis
141. On the title page of an APA Style essay, the title block in the center of the page typically includes:
- (A) The title, your name, and the date
 - (B) The title, your name, and the name of the class
 - (C) The title, your name, and your school
 - (D) The title, your name, and the instructor's name

- 142.** The final product of a research project should include:
- (A) Title page
 - (B) Type-written work
 - (C) Bibliography
 - (D) All of the above
- 143.** What is the relationship between a research title and the study's hypothesis?
- (A) The title is a detailed explanation of the hypothesis
 - (B) The title is unrelated to the hypothesis
 - (C) The title provides a concise indication of the hypothesis
 - (D) The title is a humorous take on the hypothesis
- 144.** Offers future directions for the study.
- (A) Recommendation
 - (B) Conclusion
 - (C) Discussion
 - (D) Acknowledgement
 - (E) Appendices
- 145.** Which of the following is a common method for organizing a research paper?
- (A) Chronological order
 - (B) Random order
 - (C) Alphabetical order
 - (D) Reverse order
- 146.** Where does the researcher locate the research methodology?
- (A) Chapter 1
 - (B) Chapter 2
 - (C) Chapter 3
 - (D) Chapter 4
 - (E) Chapter 5
- 147.** Which of the following is a potential outcome of a poorly defined research title?
- (A) Increased readership
 - (B) Confusion about the study's focus
 - (C) Higher citation rates
 - (D) More funding opportunities
- 148.** It is the way the research paper is written; this is also referred to the format being adopted in academic writing.
- (A) Voice
 - (B) Diction
 - (C) Style
 - (D) Scope
- 149.** What is a collection of facts, information, discussions, and results that are relevant to the researcher's study?
- (A) Introduction
 - (B) Review of Related Literature
 - (C) Methodology
 - (D) None of the Above
- 150.** The purpose of this section is to describe past important research and it relate it specifically to the research problem. It should be a synthesis of the previous literature and the new idea being researched.
- (A) Literature Review
 - (B) Abstract
 - (C) Methods
 - (D) None of the above
- 151.** What should a research title avoid?
- (A) Essential terms
 - (B) Engaging language
 - (C) Unnecessary words
 - (D) Clear focus
- 152.** Journal articles are often broken down into specific pieces, which include:
- (A) Abstract, introduction, method, discussion, and references
 - (B) Abstract, introduction, method, results, and references
 - (C) Abstract, introduction, method, results, and discussion
 - (D) Abstract, introduction, method, results, discussion, and references

153. What is the function of appendices in research reports?
- (A) Displaying mean scores
 - (B) Summarizing and interpreting data
 - (C) To house detailed supplemental information
 - (D) Creating word clouds
154. You should write about what you did and how you did it in ____
- (A) Introduction
 - (B) Literature Review
 - (C) Methodology
 - (D) References
155. Which of the following is necessary and expected in each body paragraph of an academic essay?
- (A) Rephrased thesis
 - (B) A concluding sentence
 - (C) Evidence
 - (D) First person pronouns
156. Its purpose is to familiarize readers with the problem by giving them a brief background of the research
- (A) Theoretical framework
 - (B) Abstract
 - (C) Introduction
 - (D) Discussion
157. Generally research papers have been given more weightage instead of research articles because these will be
- (A) Based on data.
 - (B) Incorporated with statistics.
 - (C) Both of the above.
 - (D) None of the above.
158. What is the main difference between a research title and a research hypothesis?
- (A) A title is a question, a hypothesis is a statement
 - (B) A title summarizes the research, a hypothesis predicts the outcome
 - (C) A title is longer than a hypothesis
 - (D) A title is more detailed than a hypothesis
159. An assertion of the truth of something
- (A) Thesis
 - (B) Argument
 - (C) Claim
 - (D) Warrant
160. What is the main purpose of the Recommendations section?
- (A) To summarize key points of the study
 - (B) To propose practical applications or future research directions
 - (C) To review the research methods used
 - (D) To list all sources referenced
161. Terms that connote meaning from the conceptual definitions to facilitate understanding of the text by the reader.
- (A) Background of the Study
 - (B) Definition of Terms
 - (C) Research Title
 - (D) Statement of the Problem
162. The title should be specific enough to describe the contents of the paper.
- (A) TRUE
 - (B) FALSE
 - (C) All the above
 - (D) None of the above
163. What part of the research report contains the substantial amount of information that needs to be clearly and accurately presented and analyzed?
- (A) Introduction
 - (B) Body
 - (C) Conclusion
 - (D) References
164. Which part of a research proposal states the focus of the study?
- (A) Methodology
 - (B) Research Title

- (C) Findings
(D) Conclusion
- 165.** Directions: After you submit your Background of the Study and once it is corrected in accordance with the guidelines given, you may start incorporating your Background of the Study to your research manuscript. What should you do after your Background of the Study is corrected?
(A) Start incorporating it into your research manuscript
(B) Discard it and write a new one
(C) Submit it as your final manuscript
(D) Skip to the conclusion section
- 166.** Chapter 2 of Research paper corresponds to ____?
(A) Cites studies which are related in purpose, methodology, findings and conclusions
(B) Materials and procedures
(C) States the origin of the problem
(D) Discuss the results of the experiment
- 167.** Which sequence best represents the typical sections of an APA-style paper?
(A) Introduction, abstract, title page, figures
(B) Methods, discussion, references, title page
(C) Abstract, title page, results, acknowledgments
(D) Discussion, methods, figures, dedication

(E) Title page, abstract, introduction, methods
- 168.** Among individual sections under the BODY division are Results and Discussions.
(A) True
(B) False
(C) All the above
(D) None of the above
- 169.** Which section of a research report typically includes the research question?
(A) Methodology
(B) Introduction
(C) Literature Review
(D) Conclusion
- 170.** Which word means "connected with the subject matter of the argument or discussion?"
(A) Relevant evidence
(B) Supporting Evidence
(C) Clear reasons
(D) Thesis
- 171.** Which of the following BEST describe the function of Definition of Terms?
(A) It provides unambiguous meaning to terms.
(B) They give the right direction of the research.
(C) It establishes the rules and procedures in conducting the study.
(D) They push for an empirical study to prove the existence of relationship of variables.
- 172.** The section that needs to be reviewed for determining the research gap is ____
(A) Title
(B) Keywords
(C) Objective
(D) Limitation
- 173.** What idea must be presented in the introductory paragraph?
(A) Call to action
(B) Examples and details
(C) Support evidence
(D) Position or thesis statement
- 174.** Part of research paper that contains the beneficiaries of the research and their benefits.
(A) Introduction
(B) Hypothesis
(C) Statement of the Problem
(D) Significance of the Study
- 175.** Which is the proper size font for your research paper?

- (A) 12
(B) 14
(C) 11
(D) 16
- 176.** Which section explains the background, research problem, and objectives?
(A) Methods
(B) Introduction
(C) Results
(D) Discussion
- 177.** From this proposed title, “Business and Accounting”, give a comment about this title.
(A) Somewhat catchier but gives almost no information at all about the article.
(B) Describes the topic, but does not give any information about the method of the study
(C) Catchy main title and is followed by a subtitle that gives information about the content and method of the study
(D) Describes the topic and the method of the study but is not particularly catchy.
- 178.** Which sequence best represents the core tasks of the introduction section?
(A) Summarize findings, list tables, describe methods, thank funders
(B) Recruit participants, collect data, analyze outcomes, publish
(C) Report results, discuss meaning, cite references, conclude
(D) Define problem, review literature, identify gaps, state aims
- 179.** The Introduction section of the research plan
(A) Gives an overview of prior relevant studies
(B) Contains a statement of the purpose of the study
(C) Concludes with a statement of the research questions and, for quantitative research, it includes the research hypothesis
(D) All of the above
- 180.** In which section are tables and graphs commonly presented?
(A) Introduction
(B) Methodology
(C) Results
(D) References
- 181.** A good research title should reflect the:
(A) Researcher’s mood
(B) Main focus and scope of the study
(C) Detailed methodology
(D) Bibliography
- 182.** In ____ the author introduces the reader to the circle of problems, gives a statement of the main question of the study in order to prepare for a better assimilation of the material presented:
(A) Introduction;
(B) Table of contents;
(C) Preface;
(D) Main content;
(E) Abstract;
- 183.** The opinion statement in an argument
(A) Bibliography
(B) Evidence
(C) Claim
(D) Reason
- 184.** When writing a research paper, which of the following outlines the most effective approach to present your findings?
(A) Start with a literature review, followed by methodology, results, and discussion.
(B) Present the results first, then discuss the implications without a clear introduction.
(C) Conclude with a summary of findings before introducing the research question.
(D) Include all sections in a random order without clear transitions.
- 185.** Among individual sections under the Preliminary Material division are Introduction and Literature Review.

- (A) True
(B) False
(C) All the above
(D) None of the above
- 186.** In which section is the researcher allowed greater flexibility to express opinions, discuss implications for educational practice, and suggest additional research?
(A) Discussion.
(B) Significance of the study.
(C) Results.
(D) Review of the literature.
- 187.** The ____ section describes what the authors plan to do to investigate their topic. This could be an experiment, thorough research into others' work, interviews, or something else.
(A) Introduction
(B) Abstract
(C) Results
(D) Discussion
(E) Methods (or methodology)
- 188.** In which section would you find key data often shown in figures or tables?
(A) Abstract
(B) Methods
(C) Discussion
(D) Results
- 189.** ____ provides background information about the research topic
(A) Title
(B) Abstract
(C) Introduction
(D) Discussion
- 190.** The study limitations are typically described in the Discussion section of the report
(A) True
(B) False
- 191.** In which section of a research paper would you find a detailed explanation of the research design, data collection methods, and analysis procedures?
(A) Results
(B) Methods
(C) Conclusion
(D) Introduction
- 192.** The APA format allows for up to five levels of headings.
(A) True
(B) False
- 193.** The article template ensures that:
(A) Each author writes freely
(B) All articles look different
(C) Reviewers can follow a structured format
(D) There are no keywords
- 194.** Which section of an article describes how the research was conducted?
(A) References
(B) Method
(C) Introduction
(D) Discussion
- 195.** It establishes the scope, context, and significance of the research being conducted. It leads the reader from a general subject area to a particular topic of inquiry.
(A) Introduction
(B) Questionnaire
(C) Hypothesis
(D) Results
- 196.** When crafting a strong introduction for a research paper, which element is essential to include?
(A) A detailed explanation of the research methods
(B) A clear thesis statement outlining the main argument
(C) A summary of every source that will be used

- (D) A list of all possible distractions related to the topic
- 197.** Which is NOT true about related literature?
- (A) It enriches the knowledge and comprehension of the researcher about the variables being studied.
 - (B) It is part of Chapter II.
 - (C) It boosts the confidence of the researcher.
 - (D) It answers all the research questions.
- 198.** A literature review can be published as an independent piece of work.
- (A) True
 - (B) False
- 199.** Where are research questions usually found?
- (A) RESULTS
 - (B) REFERENCES
 - (C) INTRODUCTION
 - (D) ABSTRACT
- 200.** It sets the scenario for the readers to understand why the study was conducted.
- (A) Abstract
 - (B) Introduction
 - (C) Materials and Methods
 - (D) Conclusion and Recommendations
- 201.** Which section of a research report contains a statement of the goals of the current study?
- (A) Purpose Of Current Research
 - (B) Research procedures
 - (C) Results and discussion
 - (D) Conclusion
- 202.** How does a research proposal differ from a concept paper?
- (A) A research proposal is more detailed and includes evidence of the researcher's background knowledge
 - (B) A concept paper is more detailed than a research proposal
 - (C) A research proposal is shorter than a concept paper
 - (D) A concept paper presents findings, while a research proposal does not
- 203.** It describes past important researches and how they specifically relate to the research thesis. It is a synthesis of the previous literature and the new idea being researched.
- (A) Bibliography
 - (B) Review of Related Literature
 - (C) Methodology
 - (D) Background of the Study
- 204.** A research paper is a brief report of research work based on
- (A) Primary Data only
 - (B) Secondary Data only
 - (C) Both Primary and Secondary Data
 - (D) None of the above
- 205.** The core ingredients of a dissertation are
- (A) Introduction; Data collection; Data analysis; Conclusions and recommendations
 - (B) Executive summary; Literature review; Data gathered; Conclusions; Bibliography
 - (C) Research plan; Research data; Analysis; References
 - (D) Introduction; Literature review; Research methods; Results; Discussion; Conclusion
- 206.** Where would you include a discussion of the theoretical framework in a research proposal?
- (A) Introduction
 - (B) Methodology
 - (C) Literature Review
 - (D) Results
- 207.** What structural feature is being described when the author leaves lasting impression to his/her audience?
- (A) Headline
 - (B) Conclusion
 - (C) Body paragraphs
 - (D) Synopsis

- 208.** In the IMRAD format, where would the statement of the problem typically be found?
- (A) Method
 - (B) Results
 - (C) Introduction
 - (D) Discussion
- 209.** In which section are the findings of the research presented?
- (A) Methodology
 - (B) Abstract
 - (C) Results
 - (D) Discussion
- 210.** The components of a good research title include:
- (A) Clarity, specificity, and relevance
 - (B) Ambiguity and vagueness
 - (C) Irrelevant details and lengthiness
 - (D) Complex jargon and unnecessary words
- 211.** What is the goal of the introductory paragraph in a research paper?
- (A) Identify the points the rest of the paper will cover
 - (B) Ask a question that the paper will answer
 - (C) Summarize everything the paper was about
 - (D) Tell what you knew before you did research
- 212.** Which of the following is NOT a characteristic of a good research title?
- (A) Summarizes the main idea
 - (B) Engaging for readers
 - (C) Long and complex
 - (D) Identifies the variables
- 213.** What does novelty mean in academic writing?
- (A) Entertainment value
 - (B) Lack of importance
 - (C) New or original contribution
 - (D) Repeated information
- 214.** The last paragraph within a research paper that helps to conclude the ideas expressed throughout the paper and revisit the major claim.
- (A) Claim
 - (B) Conclusion
 - (C) Introduction
 - (D) Thesis
- 215.** If you need to present “The What” or the findings of your study, which section should you write?
- (A) Introduction
 - (B) Methodology
 - (C) Results
 - (D) Discussion
- 216.** This section should also discuss how the results relate to previous research mentioned in the literature review, any cautions about the findings, and potential for future research.
- (A) Results
 - (B) Methods
 - (C) Discussion/Conclusion
 - (D) None of the above
- 217.** In a conventional research paper, which chapter contains the Review of Related Literature?
- (A) Chapter 1: Introduction
 - (B) Chapter 2: Review of Related Literature
 - (C) Chapter 3: Methodology
 - (D) Chapter 5: Bibliography
- 218.** Define: Title (in research)
- (A) The Title in research is the name of the research project that clearly reflects its content and purpose.
 - (B) The Title in research is the list of references used in the study.
 - (C) The Title in research is the summary of the research findings.
 - (D) The Title in research is the methodology used in the research.

- 219.** The specific idea on which the research is focused. In the final draft, this changes into a thesis statement.
- (A) Paraphrase
 - (B) Conclusion
 - (C) Controlling idea/question
 - (D) None of the above
- 220.** Which of the following makes up the major part of your paper?
- (A) An introductory paragraph
 - (B) Body paragraphs
 - (C) A thesis statement
 - (D) A Works Cited page
 - (E) Research
- 221.** All are elements of the Research Title except:
- (A) Research design
 - (B) Subject of the study
 - (C) Variables or phenomenon
 - (D) Data collection method
- 222.** How many chapters are there in writing a research paper?
- (A) 4
 - (B) 5
 - (C) 6
 - (D) 7
- 223.** Organization of the paper
- (A) Bibliography
 - (B) Works Cited
 - (C) Paraphrase
 - (D) Outline
- 224.** Choose the most correct title page header from those listed below:
- (A) Running Head:Your Title
 - (B) RUNNING HEAD:Your Title
 - (C) YOUR TITLE
 - (D) Running head:YOUR TITLE
- 225.** The definition of terms in a research study is included in which section?
- (A) Chapter 1:Introduction
 - (B) Chapter 2:Review of Related Literature
 - (C) Chapter 3:Design of the Study
 - (D) Chapter 4:Data Analysis and Interpretation
 - (E) Chapter 5:Summary and Conclusion
- 226.** Which is NOT a guideline for writing an effective research title?
- (A) Identify key variables
 - (B) Use current field nomenclature
 - (C) Include “study of” or “analysis of”
 - (D) Suggest relationships between variables
- 227.** Which part of an action research contains few sources that define the concepts related to the current study and related studies reviewed and analyzed that served as bases in the pursuit of the study?
- (A) Review of Literature
 - (B) Appendix
- 228.** In which section of an article would the real-world problem be found?
- (A) Introduction
 - (B) Method
 - (C) Results
 - (D) Discussion
- 229.** What section of a research paper provides a visual illustration of the study’s variables and how they interact?
- (A) Methodology
 - (B) Literature Review
 - (C) Conceptual Framework
 - (D) Abstract
- 230.** What is the primary purpose of the introduction section?
- (A) To present the results
 - (B) To explain the methods
 - (C) To stimulate interest and provide context
 - (D) To summarize the findings

231. Provides a background of the problem that the study wants to study further.
- (A) Introduction
 - (B) Results
 - (C) Methodology
 - (D) Abstract
232. A research paper contains:
- (A) A compilation of information on a topic
 - (B) Original research as deemed by the author
 - (C) Peer-reviewed original research or evaluation of research conducted by others
 - (D) Can be published in more than one journal
233. The name of the document, the writer's name, the teacher/professor's name, and the date of publication are located in what component?
- (A) Body
 - (B) Footnotes
 - (C) Header
 - (D) Title Page
234. This gives name to the research and it is also a means to identify the contribution of the researcher.
- (A) Research Question
 - (B) Research Title
 - (C) Research Objectives
 - (D) Research Hypothesis
235. This page includes title of the research study, name of the researcher, institution to which the report is to be submitted and the month and year of submission of the report.
- (A) Title Page
 - (B) Acknowledgement
 - (C) Research Declaration
 - (D) None of above
236. What is the first part of a scientific paper?
- (A) Title, authors, abstract, keywords
 - (B) Introduction
 - (C) Literature review
 - (D) Background information
237. Tables and graphs for the gathered data are presented under the introduction section.
- (A) True
 - (B) False
 - (C) All the above
 - (D) None of the above
238. In what section of a research proposal would you discuss the instruments you plan to use for data collection?
- (A) Abstract
 - (B) Introduction
 - (C) Methodology
 - (D) Literature Review
239. It serves as a space for materials that help clarify your research, but do not belong to the main text. This is where the researchers attach a copy of their research instrument such as interview transcripts, questionnaires, or surveys.
- (A) Sample
 - (B) Appendix
 - (C) Population
 - (D) Variable
240. Where should a hypothesis be stated in an IMRAD paper?
- (A) Introduction
 - (B) Methodology
 - (C) Results
 - (D) Discussion
241. This section announces your topic, provides context, and a rationale for the working paper.
- (A) Introduction
 - (B) Review of Related Literature
 - (C) Hypothesis of the Study
 - (D) Methodology

242. Every research paper is unique and does not follow any organizational pattern.
(A) True
(B) False
243. What is the purpose of the Research Paper Assessment?
(A) To assess what students know about research procedure, structure, source citing, ability to analyze and synthesize information
(B) To find out what student knows about the vocabulary and structure of a literary analysis response
(C) To measure student reading progression
(D) To reflect on what the student learned from the activity and what will need to be revisited
244. Presents background information, scope, and focus of the research paper.
(A) Conclusion
(B) Discussion
(C) Introduction
(D) Results
245. Which component is unique to the IM-RAD format compared to the conventional research paper?
(A) Bibliography
(B) Method
(C) Results and Discussion as a combined section
(D) Review of Related Literature
246. Which paper section establishes why the study is needed?
(A) Introduction
(B) Methodology
(C) Results
(D) Conclusion
(E) Discussion
247. Which part of a research paper discusses the implications of the findings?
(A) Introduction
(B) Discussion
(C) Methodology
(D) Abstract
248. What is the primary purpose of a research paper?
(A) To summarize existing knowledge
(B) To present an argument supported by evidence
(C) To entertain the reader
(D) To list facts without analysis
249. Which of the following is required at the beginning of your paper?
(A) An introductory paragraph
(B) Body paragraphs
(C) A conclusion paragraph
(D) A Works Cited page
250. One of the first tasks you'll face as you write a research paper is choosing a topic. The topic is the ____ of the paper.
(A) Theme
(B) Summary
(C) Subject
(D) Analysis
251. A beginning part that explains what is going to follow is ____
(A) A rough draft
(B) A bibliography
(C) An introduction
(D) A conclusion
252. This section contains the author's expression of gratitude to persons or organizations who, in one way or another, contributed something during the preparation and conduct of the study and writing of the manuscript.
(A) Acknowledgment
(B) Preface
(C) Dedication
(D) Introduction
253. The scope and limitation section should include the potential impacts and broader implications of the study's findings.

- (A) True
(B) False
- 254.** Which section is where the results of the study are interpreted and evaluated?
(A) Methodology
(B) Results
(C) Discussion
(D) Abstract
- 255.** Which section of a research article provides a detailed explanation of the methods used for data collection?
(A) Introduction
(B) Literature review
(C) Methodology
(D) Discussion
- 256.** The Rationale of the Study is the section in the research paper which provide ideas and background that caused the researcher to undergo the study. it may be composed of 3 to 5 paragraphs or a total of 1-2 pages only.
(A) TRUE
(B) FALSE
- 257.** The relevance of the Background of the Study in your research paper is:
(A) To provide context and rationale for the research
(B) To present the final results of the research
(C) To list all the references used in the research
(D) To describe the statistical methods used
- 258.** What is the typical structure of a quantitative research paper?
(A) Introduction, methods, results, and discussion
(B) Introduction, literature review, findings, and personal reflections
(C) Introduction, theory, opinions, and recommendations
(D) Introduction, interviews, case studies, and conclusions
- 259.** Which section is arguably the most important?
(A) Methodology
(B) Discussion
(C) Results
(D) Abstract
- 260.** Presents some of the fundamental concepts needed by the readers to better understand the study.
(A) RELATED CONCEPTS
(B) RELATED STUDIES
(C) All the above
(D) None of the above
- 261.** The ___ analyzes the most important results from the discussion and evaluates those results in the context of the entire work
(A) Conclusion
(B) Abstract
(C) Introduction
(D) Analytical Report
- 262.** True or False? Creating an outline, either formal or informal, can help you organize your ideas so that you write a more logical research paper.
(A) True
(B) False
- 263.** Which components belong in the Methods section to enable replication?
(A) Participant characteristics and materials
(B) Step-by-step procedure description
(C) Extensive interpretation of results
(D) Details sufficient for study replication
- 264.** Chapter of research that analyze existing knowledge.
(A) Background of the study
(B) Review of Literature
(C) Methodology
(D) Results and Discussion
(E) Conclusion and Recommendation

265. This section is where you thank people who have supported you during the research process
- (A) Title Page
 - (B) Acknowledgement Page
 - (C) Approval Page
 - (D) Dedication Page
266. Which section of a research report typically includes research objectives and background?
- (A) Abstract
 - (B) Introduction
 - (C) Conclusion
 - (D) Results
267. In which section of a research report would the following sentence most likely appear? "It was hypothesized that social support is positively related to psychological adjustment following a mastectomy"
- (A) The method section
 - (B) The introduction
 - (C) The results section
 - (D) The discussion
268. A closing paragraph that summarizes the main points of Akhil's research on climate change and is intended for the readers to know why this research should matter to them after they read it.
- (A) Introduction
 - (B) Conclusion
 - (C) Results
 - (D) Thesis Statement
269. TRUE OR FALSE: The title "Socio-political Analysis of the Stories of Nick Joaquin and Influence in the Philippine Literary Setting" is a research title.
- (A) TRUE
 - (B) FALSE
270. Identify Me! Given stress in this section of the paper is the research problem and its background, objectives, research questions, and hypotheses
- (A) Methodology
 - (B) Introduction
 - (C) Title
 - (D) Abstract
271. Place the Acknowledgments between
- (A) The Discussion and the Literature Cited
 - (B) The Methods and Materials
 - (C) The Introduction and Abstract
 - (D) The Title and Affiliation
 - (E) The Affiliation and Literature Cited
272. Which section of a research paper presents the findings?
- (A) Results section
 - (B) Introduction
 - (C) Literature review
 - (D) Methodology
 - (E) Acknowledgments
273. Which section explains how participants, instruments, and procedures were used?
- (A) Methodology
 - (B) Abstract
 - (C) Results
 - (D) Acknowledgments
 - (E) Conclusion
274. Which is a part of a scientific paper?
- (A) Margins
 - (B) Debate
 - (C) Abstract
 - (D) Disclaimer
275. Which section allows the readers to evaluate the quality of the research?
- (A) Discussion
 - (B) Methodology
 - (C) Abstract
 - (D) Results
276. The reasons and evidence that are used to prove the claim are called ____
- (A) Purpose

- (B) Claim
(C) Appeal
(D) Support
277. "Do not place or use too much references or citations" is one of the steps in making a good introduction in research?
(A) Yes
(B) No
(C) Maybe
(D) None of these
278. What is the first part of a research proposal?
(A) Literature Review
(B) Introduction
(C) Results and Discussion
(D) Methodology
279. This part of research paper should answer the basic questions about the research.
(A) Introduction
(B) Statement of the Problem
(C) Hypothesis
(D) Significance of the Study
280. This section will describe the research design and methodology used to complete the study. The general rule of thumb is that readers should be provided with enough detail to replicate the study.
(A) Literature Review
(B) Methods
(C) Results
(D) None of the above
281. It is the part of a research paper that explains and presents the collected data after doing the statistical analysis?
(A) Recommendation.
(B) Methodology.
(C) Result.
(D) Discussion.
282. What is the role of the methodology section in a research paper?
(A) To discuss the implications of the research
(B) To outline the steps taken to conduct the research
(C) To present the theoretical framework of the research
(D) None of above
283. What tense should be used in the methodology?
(A) Present
(B) Past
(C) Future
(D) None of the above
284. Identify Me! This part of the research paper explains the procedure in collecting and analyzing data and also describing the sources of data.
(A) Methodology
(B) Results and Discussion
(C) Conclusions
(D) Recommendations
285. What is the first part of a scientific article?
(A) Title, author, abstract, keywords
(B) Introduction
(C) Background information
(D) Literature review
286. It shows the different sections of the research paper and the page numbers on which they begin.
(A) Definition of Terms
(B) Abstract
(C) Table of Contents
(D) References
287. It is part of the introduction where you will provide an overview of the scope of the research.
(A) Brief background
(B) Objectives of the Study
(C) Significance of the Study
(D) Literature Review

288. It is a section of a research paper that explains which among the variables were insignificant and significant.
- (A) Introduction
 - (B) Method
 - (C) Discussion
 - (D) None of above
289. Which component of a research report details the research objective and how the results be used?
- (A) Methodology
 - (B) Executive Summary
 - (C) Purpose
 - (D) Respondent Profile
290. Which part of the research paper provides background and rationale?
- (A) Abstract
 - (B) Results
 - (C) Introduction
 - (D) Conclusion
291. Which of the following essential parts of the introduction cites the specific benefits one can get from the findings of the research report?
- (A) Brief Background
 - (B) Objective of the Study
 - (C) Significance of the Study
 - (D) Literature Review
292. Which section of the research report is likely to have the most information to help you set-up the same study and test the findings again (i.e., conduct a replication)?
- (A) Introduction
 - (B) Methods
 - (C) Results
 - (D) Discussion
293. It introduces the research topic which ends in an assertion that the research to be undertaken is necessary based on the background set.
- (A) Recommendations
 - (B) Discussion
 - (C) Conclusion
 - (D) Background/Introduction
294. This section includes what the paper has achieved?, was the research successful?, did it answer the problem?
- (A) Introduction
 - (B) Methods
 - (C) Conclusion
 - (D) Limitation
 - (E) Abstract
295. Which part of a research paper discusses how the research was conducted, including experimental setup and data collection?
- (A) Introduction
 - (B) Conclusion
 - (C) Methodology
 - (D) Abstract
296. First paragraph with a sentence that sums up what the entire paper is about.
- (A) Introduction
 - (B) Body
 - (C) Conclusion
 - (D) None of above
297. Which part of a position do the main arguments, sufficient evidences, and counterarguments on an issue is located?
- (A) Introduction
 - (B) Rationale
 - (C) Body
 - (D) None of above
298. Twelve-point font, Times New Roman, one-inch margins, and double-spaced:
- (A) Research
 - (B) Sources
 - (C) Parenthetical citation (in-line citation)
 - (D) Research paper format

- 299.** What does the Introduction section of a research report include?
- (A) Results interpretation
 - (B) Key question and literature review
 - (C) Discussion of anomalies
 - (D) Data analysis
- 300.** Compare and contrast Background of the Study and Literature Review.
- (A) Background of the Study provides context and rationale, while Literature Review summarizes existing research.
 - (B) Background of the Study lists all references, while Literature Review presents research methods.
 - (C) Background of the Study discusses only results, while Literature Review explains only theories.
 - (D) Background of the Study is optional, while Literature Review is mandatory.
- 301.** It is a written summary of journal articles, books, and other documents that describes the past and current state of information on the topic of a research study.
- (A) Conceptual Framework
 - (B) Research Hypotheses
 - (C) Review of Related Literature
 - (D) Research Design
- 302.** What is “Research Background”
- (A) Goes beyond the context of your topic
 - (B) Specific information about your topic
 - (C) Is an overview of your topic
 - (D) Is the methodology process used in your study
- 303.** Which of the following will include quotes or paraphrases from your sources?
- (A) An introductory paragraph
 - (B) Body paragraphs
 - (C) A thesis statement
 - (D) A Works Cited page
 - (E) Research
- 304.** The part of a research report that describes the procedure to arrive at the result.
- (A) Review of Literature
 - (B) Methods
 - (C) Hypothesis
 - (D) Introduction
- 305.** An index of figures used in the study
- (A) LIST OF FIGURES
 - (B) LIST OF TABLES
- 306.** This part gives the broad overall topic and providing basic background information. It then narrows down to the specific research question relating to this topic. It provides the purpose and focus for the rest of the paper and sets up the justification for the research.
- (A) Title
 - (B) Abstract
 - (C) Introduction
 - (D) None of the above
- 307.** Which of the following is NOT typically included in an academic introduction?
- (A) Detailed results and data analysis
 - (B) Background information on the topic
 - (C) The thesis statement or research question
 - (D) The significance of the study
 - (E) An overview of the paper’s structure
- 308.** What is the purpose of quoting statistics or statements from influential people or organizations in the introduction of a research paper?
- (A) To establish the credibility of the researcher.
 - (B) To demonstrate the relevance of the topic.
 - (C) To provide evidence for the research findings.
 - (D) To summarize the literature review.
- 309.** This structure of a concept paper for project presents the methodology, the goals, and the objective of the project.

- (A) Cover Page
 - (B) Project Description
 - (C) Introduction
 - (D) Rationale
- 310.** Which of the following is NOT part of a written methodology?
- (A) Sampling procedure
 - (B) Instrument description
 - (C) Hypotheses testing
 - (D) Research implications
- 311.** True or False: YOU make the argument; sources are just there to support what you're saying.
- (A) True
 - (B) False
- 312.** What makes a research title effective?
- (A) It contains complex jargon.
 - (B) It is clear, concise, and specific.
 - (C) It is completely unrelated.
 - (D) It is long and highly detailed.
- 313.** Research title describes the topic, —, the sample, and the results of your study.
- (A) Questions
 - (B) Methods
 - (C) Discussion
 - (D) Problem
- 314.** Key terms/phrases.
- (A) Introduction
 - (B) Hypothesis
 - (C) Scope and Delimitation
 - (D) Definition of Terms
- 315.** What are the 5 central components to the body of a research article?
- (A) An introduction, a list of the main ideas, methodology, a blueprint, and the results
 - (B) A blueprint, an introduction, a literature review, a summary of the data, and the results
 - (C) An introduction, a literature review, a list of the key measures, the results, and a conclusion
 - (D) An introduction, a literature review, the methodology, the results, and a conclusion
- 316.** Which of these is not typically included in the introduction section of a research paper?
- (A) Background of the study
 - (B) Hypotheses or research questions
 - (C) Data analysis
 - (D) Problem statement
- 317.** What does the Results section of a research report typically contain?
- (A) Data and analysis
 - (B) Introduction and methodology
 - (C) Abstract and conclusion
 - (D) Discussion and references
- 318.** The core elements of dissertation are
- (A) Introduction; Data Collection; Data Analysis; Conclusions and Recommendations.
 - (B) Executive Summary; Literature review; Data gathered; Conclusions; Bibliography.
 - (C) Research Plan; Research Data; Analysis; References.
 - (D) Introduction; Literature Review; Research Methodology; Results; Discussion and Conclusion.
- 319.** Which IMRAD section should be strengthened if conclusions are weak?
- (A) Introduction
 - (B) Methodology
 - (C) Results
 - (D) Discussion
- 320.** A good background of research allows readers to:
- (A) Understand the study's context and significance
 - (B) Skip reading the rest of the paper

321. Which section is NOT part of the Research Proposal?
- (A) Introduction
 - (B) Literature review
 - (C) Data Analysis
 - (D) References
322. The Method section of the research plan typically specifies
- (A) The research participants
 - (B) The results of prior studies that address the phenomena of interest
 - (C) The apparatus, instruments, and materials for the research study
 - (D) The planned research procedures
 - (E) A, c and d
323. What is the main focus of the Discussion and Conclusions section in a research paper?
- (A) To define the problem
 - (B) To summarize prior studies
 - (C) To analyze the findings and compare them with previous studies
 - (D) To describe the method used to gather data
324. The ____ section is a report on what happened when the authors investigated their topic.
- (A) Introduction
 - (B) Abstract
 - (C) Results
 - (D) Discussion
 - (E) Methods (or methodology)
325. This section might include things that the researchers were not able to find out due to time or money.
- (A) Discussion
 - (B) Limitations
 - (C) Methods
 - (D) Conclusion
326. This contains the restatement of major findings, limitations of the study, recommendations, and implications.
- (A) Introduction
 - (B) Methodology
 - (C) Conclusion
 - (D) References
327. Which IMRAD section answers the question “Why is this study important?”
- (A) Results
 - (B) Methodology
 - (C) Introduction
 - (D) References
328. Which part is not found in the methodology?
- (A) Information about materials and setting
 - (B) Population and participants
 - (C) Validity and reliability of the research instruments
 - (D) Findings of the research questions
329. Acknowledgement is the section where you thank everyone helping with research.
- (A) True
 - (B) False
330. This part of the research paper determines who benefits from the study and how that specific audience will benefit from its findings.
- (A) Review of Related Literature
 - (B) Research Methodology
 - (C) Statement of the Problem
 - (D) Significance of the Study
331. It provides the theoretical framework of the study within which the research has been conducted, background information of the topic as well as the need for and rationale for the research, to make the material more logical, useful and interesting for readers.
- (A) List of Tables
 - (B) Table of Contents
 - (C) Title Page
 - (D) Introduction section

332. The "D" in IMRAD stands for ____
- (A) Discussion
 - (B) Direction
 - (C) Discrepancy
 - (D) Discreet
333. What parts make up the final product of your research papers?
- (A) Title Page, Introduction, Body, Conclusion, and Reference Page.
 - (B) Title Page, Abstract, Body, and Reference Page
 - (C) Abstract, Title page, Body, Summary, and Reference Page.
 - (D) Title Page, Body, and Reference Page.
334. Which sections of a research article should you read after the abstract?
- (A) The introduction and conclusion
 - (B) The Methods, Results, and Discussion sections
 - (C) The limitations and recommendations
 - (D) The bibliography
335. All key terms should be defined. In a hypothesis-testing study, these are primarily the terms that describe the variables of the study. Which section does the previous paragraph refer to?
- (A) Justification
 - (B) Purpose
 - (C) Procedures
 - (D) Definitions
336. Part of research paper which contains the research design, research locale and participants and instrument used in the study.
- (A) Problem and Its Background
 - (B) Review of Related Literature
 - (C) Research Methodology
 - (D) Summary, Conclusion and Recommendation
337. It helps in simplifying some of the technical terms which are vital in the understanding of the research project.
- (A) Research Design
 - (B) Definition of Terms
 - (C) Scope and Delimitation
 - (D) Research Hypothesis
338. This section tells the reader what problem your study is attempting to solve.
- (A) Abstract
 - (B) Background of the study
 - (C) Introduction
 - (D) Methodology
339. Where do you state the research problem and objectives of the study?
- (A) Abstract
 - (B) Results & Discussion
 - (C) Introduction
 - (D) Recommendations
340. What makes the research title 'An investigation of the effects of electronics uses on Interpersonal Relationship in adults' erroneous?
- (A) It contains a grammatical error and lacks specificity.
 - (B) It is too short and lacks a research variable.
 - (C) It is too broad and uses technical jargon.
 - (D) It is too specific and lacks a hypothesis.
341. The "M" in IMRAD stands for ____
- (A) Method
 - (B) Middle
 - (C) Mediate
 - (D) Master
342. The research title should be:
- (A) Long and detailed
 - (B) Vague
 - (C) Clear and specific
 - (D) Funny
343. Wilson, Rain, Polo, Rance and Angelo are supposed to choose a topic to research about, what will they write in order to present the background information, scope, and focus of the research paper?
- (A) Methodology

- (B) Introduction
(C) Research Title
(D) Literature Review
- 344.** Important words and terms in the study need to be defined so that readers can understand them.
(A) Bibliography
(B) Statement of the Problem
(C) Review of Related Literature
(D) Definition of Terms
- 345.** The section of a research paper where the authors provides the data collected during their study.
(A) Research Instrument
(B) Data
(C) Questionnaire
(D) Result (Findings)
- 346.** What part of the research paper integrates the related literature?
(A) Introduction
(B) Conclusion
(C) Discussion
(D) Results
- 347.** How should a literature review be structured in a research paper?
(A) By including direct quotations for each source
(B) By focusing on experimental studies
(C) By using headings and subheadings to classify parts of the topic
(D) By including only theoretical papers
- 348.** Which section of the article includes suggestions for further research?
(A) Abstract
(B) Introduction
(C) Method
(D) Discussion
- 349.** What purposes are accomplished by the introduction to a research paper?
(A) It provides background information and key terms.
(B) It grabs the reader's attention.
(C) It presents the main idea, or thesis statement.
(D) All of the above
- 350.** This is an important part of research paper or report in which the key or important terms in the study are clearly defined.
(A) Background of the study
(B) Conceptual Framework
(C) Definition of Terms
(D) Hypothesis
- 351.** The Literature Review section should:
(A) Summarize past studies, highlight gaps, and justify the research
(B) Present final results of the study
(C) Provide the author's biography
(D) Contain tables of raw data only
- 352.** Besides preface the preliminary section of a thesis includes
(A) Tables of contents.
(B) List of tables.
(C) List of figures.
(D) All of the above.
- 353.** A conclusion drawn from experimental data belongs in which section?
(A) Introduction
(B) Methodology
(C) Results
(D) Discussion
- 354.** Which of the following sections is not a basic section if a quantitative research paper?
(A) Results
(B) References
(C) Methods
(D) Criticisms

355. In which section of a marketing research paper would you most likely find cited studies and theoretical models?
- (A) Methodology
 - (B) Data Collection
 - (C) Literature Review
 - (D) Research Questions
356. Which item is most appropriate to place in the Introduction rather than the Methods?
- (A) Randomization block sizes used
 - (B) Manufacturer model numbers
 - (C) Exact doses of an intervention
 - (D) Rationale derived from literature gaps
357. What is the missing part of this quantitative research title: DIGITAL INEQUALITY TO TEACHERS AND LEARNERS DURING THE PANDEMIC
- (A) Research locale
 - (B) Independent variable
 - (C) Dependent variable
 - (D) Research goal or result
358. Which part of the research paper deals with identifying who will benefit from the research?
- (A) Assumption of the Study
 - (B) Scope and Delimitation
 - (C) Significance of the Study
 - (D) Background of the Study
359. The "R" in IMRAD stands for ____
- (A) Results
 - (B) Ready
 - (C) Render
 - (D) Reduce
360. What is the purpose of Chapter 1 in IT research?
- (A) To present the research findings and conclusions
 - (B) To provide an overview of the research topic and context
 - (C) To describe the research methodology and analysis techniques
 - (D) To outline the limitations and ethical considerations
361. Which part of a research essay provides a summary of the main points and restates the thesis?
- (A) Introduction
 - (B) Body
 - (C) Conclusion
 - (D) Abstract
362. One way of showing the scope of the study through the research title is by using ____
- (A) Acronyms
 - (B) Sub topics
 - (C) Key words
 - (D) Lengthy of words
363. Which of the following does NOT aim to precisely condense larger work to present only the key ideas?
- (A) Abstract
 - (B) Summary
 - (C) Precis
 - (D) Concept Paper
364. The introduction contains the purpose of the study and the current state of the field of the study.
- (A) True
 - (B) False
 - (C) All the above
 - (D) None of the above
365. Which section answers the question "So What?" by explaining the implications of the findings?
- (A) Abstract
 - (B) Introduction
 - (C) Discussion
 - (D) References

- 366.** The concise and specific name of the study is the:
- (A) Background of the Study
 - (B) Title
 - (C) Statement of the Problem
 - (D) Introduction
- 367.** The following are presented in the Introduction of the research, EXCEPT
- (A) Background of the study
 - (B) Definition of terms
 - (C) Statement of the problem
 - (D) Limitations of the study
- 368.** Identify what chapter of a research study the given element belongs. DEFINITION OF KEY TERMS
- (A) Chapter 1
 - (B) Chapter 2
 - (C) Chapter 3
 - (D) Chapter 4
 - (E) Chapter 5
- 369.** In which part of a research paper would you typically find a detailed explanation of the research methodology used in the study?
- (A) Abstract
 - (B) Introduction
 - (C) Methods
 - (D) Results
- 370.** Which part of a research paper typically includes charts and graphs?
- (A) Introduction
 - (B) Literature Review
 - (C) Results
 - (D) Conclusion
- 371.** What are the questions that you need to ask yourself when you start writing the research paper?
- (A) Why?
 - (B) How?
 - (C) What?
 - (D) So what?
 - (E) All the Above
- 372.** What is the purpose of the introduction section in a research paper?
- (A) An outline of the procedure, sample and materials used This is a wrong answer
 - (B) The rationale behind an investigation- This is a correct answer
 - (C) The raw data from an investigation This is a wrong answer
 - (D) The main conclusions of an investigation- This is a wrong answer Edit
- 373.** A good research title must be
- (A) Correlational
 - (B) Modern
 - (C) Relevant
 - (D) None of above
- 374.** The methodology contains the description of the participants and instruments.
- (A) True
 - (B) False
 - (C) All the above
 - (D) None of the above
- 375.** What part of the Chapter 1 presents the importance and benefits of the study?
- (A) Conceptual Framework
 - (B) Definition of Terms
 - (C) Scope and Limitation
 - (D) Significance of the Study
- 376.** It is one of the main parts of a research paper that includes the purpose, hypothesis, problem or engineering goals, and research objectives?
- (A) Results
 - (B) Discussion
 - (C) Conclusion
 - (D) Introduction
- 377.** Its function is to educate the reader about the area under study.
- (A) Results And Discussion
 - (B) Analysis of Data
 - (C) Design of the Study
 - (D) The Review of Related Literature

378. This is where the writer explains how the data was gathered and how the survey was conducted
- (A) Method section
 - (B) Conclusion section
 - (C) Analysis section
 - (D) None of above
379. Which section of a research paper is most likely to include the literature review?
- (A) Chapter 3
 - (B) Chapter 2
 - (C) Chapter 4
 - (D) Chapter 1
380. A standard article template usually includes:
- (A) Cover page only
 - (B) Only results
 - (C) Abstract, Introduction, Methodology, Results, Conclusion, References
 - (D) Diagrams only
381. Not just a summary or a mere restatement of the research paper but a synthesis of the important points that recommend new avenue for future research
- (A) Recommendation
 - (B) Conclusion
 - (C) Discussion
 - (D) Acknowledgement
 - (E) Appendices
382. Paragraphs need to be unified around a single idea and all information included in an essay need to create an effective argument to answer the research question.
- (A) True
 - (B) False
383. The section of a research paper whose purpose is to interpret and describe the significance of your findings in light of what was already known about the research problem being investigated. It explains new understanding or insights that emerged as a result of your study of the problem.
- (A) Abstract
 - (B) Hypothesis
 - (C) Discussion
 - (D) Conclusion
384. General statement about study. Includes TIOC (Topic-Issue-Objective-Contribution)
- (A) Introduction
 - (B) Statement of the Problem
 - (C) Hypothesis
 - (D) Significance of the Study
385. This step will occur prior to writing a draft of your research paper. This provides a general description or plan of your essay with basic concepts, but not much detail.
- (A) Synthesis
 - (B) Research Question
 - (C) Outline
 - (D) Claim
386. The first major section of text in the paper
- (A) Title page
 - (B) Literature review
 - (C) Citations
 - (D) Introduction
387. The main task of this part of the research work is to give the reader (opponent) a more complete picture of the state of the issue or issues raised by the topic:
- (A) Literature review
 - (B) Conclusion
 - (C) Experiment
 - (D) Annotation
 - (E) The economic part
388. What is the primary purpose of a research title in a scientific study?
- (A) To summarize the entire research
 - (B) To attract readers' attention
 - (C) To provide a brief overview of the research topic
 - (D) To list all the researchers involved

389. It shows what needs to be done, such as suggestions, based on the results of your study. It usually listed in order of priority.
- (A) Results
 - (B) Discussion
 - (C) Conclusion
 - (D) Recommendations
390. This is where we can find an explanation of why the research topic is valuable.
- (A) Conclusion
 - (B) Assumption statement
 - (C) Introduction
 - (D) None of above
391. Limitations of the study are generally found in which of these sections?
- (A) Introduction
 - (B) Discussion
 - (C) Results
 - (D) Methods
392. In which section do researchers present their findings without interpretation?
- (A) Introduction
 - (B) Methods
 - (C) Results
 - (D) Discussion
393. What is the term for a closing paragraph that summarizes the main points of a research?
- (A) Introduction
 - (B) Conclusion
 - (C) Results
 - (D) Thesis Statement
394. What part of the research paper sets the stage for the entire study?
- (A) Introduction
 - (B) Statement of the problem
 - (C) Framework
 - (D) Research Instrument
395. This part of a research article should be specific and indicate the problem the research project addresses using keywords that will be helpful in literature reviews in the future.
- (A) Title
 - (B) Abstract
 - (C) Introduction
 - (D) None of the above
396. Which section of the article includes statistical data?
- (A) References
 - (B) Introduction
 - (C) Method
 - (D) Results
397. What is the first assessed piece in Performance Task #1?
- (A) End of Course Exam
 - (B) Individual Written Argument
 - (C) Team Multimedia Presentation
 - (D) Individual Research Report
398. Which section addresses the limitations of the study?
- (A) Discussion
 - (B) Results
 - (C) Introduction
 - (D) Abstract
399. The scope of the study is particularly indicated in what chapter?
- (A) Chapter 1
 - (B) Chapter 2
 - (C) Chapter 3
 - (D) Chapter 4
400. The introduction of a study includes the
- (A) Literature review
 - (B) Design
 - (C) Implications for nursing
 - (D) Methods of measurement

- 401.** Multiple Choice: Read each question carefully and choose the BEST answer. Which is NOT part of Chapter 1 of a qualitative research paper?
- (A) Background of the Study
 - (B) Research Methodology
 - (C) Significance of the Study
 - (D) Statement of the Problem
- 402.** What is required for the Method section of a research paper to be considered systematic?
- (A) It should involve charts and tables
 - (B) It should define the problem
 - (C) It should be precise and allow another person to duplicate the study
 - (D) It should provide a rationale for the findings
- 403.** Which of the following is not part of Chapter IV of the research paper?
- (A) Data Analysis
 - (B) Data Interpretation
 - (C) Data Gathering
 - (D) Data Presentation
- 404.** The last paragraph in an academic paper that summarizes the essay, restates the thesis and/or gives an overall solution or recommendation to the issue discussed in the paper.
- (A) Body
 - (B) Introduction
 - (C) Conclusion
 - (D) None of the above
- 405.** A research paper
- (A) Contains original research as deemed by the author.
 - (B) Is a compilation of information on a topic.
 - (C) Can be published in more than one journal.
 - (D) Contains peer-reviewed original research or evaluation of research conducted by others.
- 406.** It's a helpful place to consider your audience and what information they will need to understand the rest of your paper.
- (A) Abstract
 - (B) Methodology
 - (C) Background of the study
 - (D) Introduction
- 407.** The review of related literature is placed:
- (A) In the introduction chapter
 - (B) At the end of the research paper
 - (C) In the methodology section
 - (D) In the appendix
- 408.** How should a research paper title be structured?
- (A) Long and descriptive
 - (B) Brief and focused
 - (C) General and vague
 - (D) Complex and intricate
- 409.** Which part of the research paper lists the details of the contents of the paper?The title
- (A) The abstract
 - (B) The title
 - (C) The discussion
 - (D) The table of contents
- 410.** This section presents the relevant background to establish the context of the research (Brief Background).
- (A) Title
 - (B) Abstract
 - (C) Introduction
 - (D) Body
- 411.** In the introduction, the primary purpose is to
- (A) Present detailed data
 - (B) Provide a rationale for the study and introduce the research question
 - (C) Discuss the study's limitations
 - (D) Present the literature review in full

- 412.** The organism(s) studied, description of the study site, the experimental OR sampling design, the protocol for collecting data, how the data were analyzed Should be in the section of:
- (A) Materials and methods
 - (B) Abstract
 - (C) Introduction
 - (D) Results
 - (E) Acknowledgments
- 413.** Which should provide recommendations of how other researchers could improve on research be included?
- (A) Conclusion
 - (B) Methods and Data
 - (C) References
 - (D) Results and Discussion
- 414.** Function of section Materials and Methods:
- (A) Explain clearly how you carried out your study in the following general structure and organization
 - (B) Explain the context of the work being reported
 - (C) References to other literature
 - (D) Explain the basic design of the study
 - (E) Explain the major aspects of the entire paper
- 415.** Any additional material which will add to your report/paper.
- (A) RESULTS
 - (B) APPENDICES
 - (C) METHODS
 - (D) TITLE
- 416.** If readers cannot repeat the experiment, which section is most problematic?
- (A) Introduction
 - (B) Methodology
 - (C) Results
 - (D) Discussion
- 417.** Which section presents tables, figures, and data?
- (A) INTRODUCTION
 - (B) RESULTS
 - (C) REFERENCES
 - (D) TITLE
- 418.** Provide a clear statement of the rationale for your approach to the problem studied
- (A) In the Introduction
 - (B) In the conclusion
 - (C) In the Results
 - (D) In the Discussion
- 419.** The section that explains the meaning of important words in a study.
- (A) Definition of terms
 - (B) Review of literature
 - (C) Methodology
 - (D) Findings
- 420.** Write T if the statement is true, and F if it is false. The methodology section includes research design and sampling.
- (A) True
 - (B) False
- 421.** The methodology section should only describe the materials
- (A) TRUE
 - (B) FALSE
 - (C) All the above
 - (D) None of the above
- 422.** What section of a marketing research paper includes industry background and current trends to introduce the topic?
- (A) Literature Review
 - (B) Research Methodology
 - (C) Scope and Limitation
 - (D) Background of the Study
- 423.** In a research report, which section is primarily responsible for detailing the methods and procedures used in the study?

- (A) Results
 - (B) Methods
 - (C) Conclusion
 - (D) Introduction
- 424.** In which chapter or section of a research paper can you find research methodology?
- (A) 1
 - (B) 2
 - (C) 3
 - (D) 4
- 425.** Always use ____ tense in the 'Materials and Methods' section.
- (A) Simple past
 - (B) Simple present
 - (C) Future
 - (D) None of above
- 426.** To write a good research background, you need to include?
- (A) Importance
 - (B) Literature review
 - (C) Research questions
 - (D) Outline of your paper
 - (E) All of them are correct
- 427.** A good research title must be
- (A) Correlational
 - (B) Modern
 - (C) Relevant
 - (D) None of the above
- 428.** What does not include the structure of a scientific publication:
- (A) The red line;
 - (B) The title of the article;
 - (C) Keywords;
 - (D) Bibliographic list;
 - (E) Abstract;
- 429.** What is support?
- (A) A policy speech
 - (B) Something implied
 - (C) Citations
 - (D) Reasons and evidence that are used to prove the claim
- 430.** The Title Page is ____
- (A) Don't choose this one.
 - (B) The formal cover of your paper
 - (C) Don't choose this one either, k?
 - (D) None of the above
- 431.** What is the order of the flow of a scientific paper?
- (A) Abstract, discussion, introduction, materials and methods, results, conclusion, references
 - (B) Abstract, introduction, materials and methods, results, discussion, conclusion, references
 - (C) References, conclusion, discussion, results, materials and methods, introduction, abstract
 - (D) Introduction, abstract, results, conclusion, references, materials and methods
- 432.** What does the acronym IMRAD stand for?
- (A) Introduction, Method, Results, and Analysis Data
 - (B) Introduction, Method, Results, and Discussion
 - (C) Introduction, Materials, Results, and Analysis
 - (D) Introduction, Methodology, Review, and Discussion
- 433.** What does the Results section of a research paper typically include?
- (A) A summary of prior studies
 - (B) The problem definition
 - (C) Charts and/or tables presenting the findings
 - (D) The participants' selection process
- 434.** To abstract elements for a quantitative research study such as a journal article, conference paper, or dissertation or thesis, you might identify the following, EXCEPT ____

- (A) Research problem
(B) Research questions or hypotheses
(C) Bibliography
(D) Data collection procedure
- 435.** Which of the following is a characteristic of a well-written research paper?
(A) Subjective opinions
(B) Biased language
(C) Clear and concise language
(D) Informal tone
- 436.** The first page of the paper is
(A) Literature review
(B) Charts
(C) Title page
(D) Works cited
- 437.** Where is your thesis statement located in your research paper?
(A) After the title
(B) Last sentence of the introduction
(C) First sentence of your conclusion
(D) In the works cited
- 438.** This disproves the opposing viewpoint and explains why the opponent is wrong.
(A) Claim
(B) Counterargument
(C) Reasons
(D) Evidence
- 439.** What section of a research contains the general and specific questions?
(A) Introduction
(B) Methods
(C) Review of Related Literature
(D) Statement of the Problem
- 440.** The research paper requires a writer to combine elements of several sources into one argumentative essay. This process is referred to as ____
(A) Summarize
(B) Evidence
(C) Synthesis
(D) Paraphrase
- 441.** What part of the research paper presents the summary of the study, findings, conclusions, and some other suggestions for future studies?
(A) Abstract
(B) Methodology
(C) Review of Related Literature
(D) Conclusion and Recommendation
- 442.** All terms are presented in the part of the Methodology except ____?
(A) Related Literature and Studies.
(B) Data Gathering.
(C) Instruments.
(D) Sampling.
- 443.** What part of the research paper contains the copy of the instruments or the sensory evaluation sheets used in the conduct of the research?
(A) Abstract
(B) Acknowledgement
(C) Analysis
(D) Appendices
- 444.** What chapter of your research paper can you find the background of the study?
(A) Chapter 1
(B) Chapter 2
(C) Chapter 3
(D) Chapter 4
- 445.** Where should the significance of the study be discussed?
(A) Results only
(B) Methodology
(C) Introduction
(D) References
- 446.** The layout of a research paper typically includes:

- (A) Abstract, Introduction, Methodology, Results, Conclusion
(B) Only abstract and conclusion
(C) References only
(D) None
- 447.** A rule of thumb is that the ____ section should be sufficiently detailed for another researcher to duplicate your research.
(A) Abstract
(B) Methods
(C) Conclusion
(D) References
- 448.** Which of the following should emphasize the importance of the results of the research project?
(A) Scope and Delimitation
(B) Significance of the Study
(C) Statement of the Problem
(D) Background of the study
- 449.** Part of research paper which contains the different literature cited in the study.
(A) Problem and Its Background
(B) Review of Related Literature
(C) Research Methodology
(D) Summary, Conclusion and Recommendations
- 450.** It establishes the context of the research
(A) Statement of the Problem
(B) Background of the Study
(C) Significance of the Study
(D) Scope and Delimitation of the Study
- 451.** Describe your experimental design clearly
(A) In the Materials and Methods
(B) In the Introduction
(C) In the Results
(D) In the Conclusion
(E) In the Highlights of manuscript
- 452.** The Method section should start on a separate page in a manuscript.
(A) True.
(B) False.
(C) Doubtful.
(D) None of the above.
- 453.** What part of a research report contains the data gathering procedure which explains the profile of the participants and its context in the environment?
(A) Introduction
(B) Literature Review
(C) Methodology
(D) Conclusion
- 454.** Which of the following is a key component of a research essay's introduction?
(A) A detailed analysis of the topic
(B) A list of references
(C) A thesis statement
(D) A personal anecdote
- 455.** How many component are in a research report?
(A) 5
(B) 10
(C) 6
(D) 7
- 456.** This is the first paragraph within a research paper. This includes an attention getter, background information, and a claim.
(A) Research Question
(B) Introduction
(C) Claim
(D) Conclusion
- 457.** It is a structured, formal document that explains what you plan to research (your research topic), why it's worth researching (your justification), and how you plan to investigate it (your methodology).
(A) Research Proposal
(B) Research Paper
(C) Research Problem
(D) Research

- 458.** The objective of writing/presenting a research paper is
- (A) To develop acquaintance with the people.
 - (B) To gain prestige in the held.
 - (C) To disseminate the knowledge.
 - (D) To recognize oneself as a researcher.
- 459.** True or False: Shade A if the statement is TRUE; Shade B if the statement is FALSE. An effective research title is brief but sufficiently describes the focus of the study.
- (A) True
 - (B) False
- 460.** The roadmap that will show the structure of the paper is provided within the? answer choice s
- (A) Introduction
 - (B) Abstract
 - (C) Methodology
 - (D) None of above
- 461.** This part is the integral part of your paper. It contains the fewest words(usually a maximum of 12 content words)
- (A) Title
 - (B) Abstract
 - (C) Method
 - (D) Introduction
- 462.** Which section of a research paper outlines the methods used to collect and analyze data?
- (A) Conclusion
 - (B) Discussion
 - (C) Methodology
 - (D) Results
- 463.** In Chapter V, you do not need to explain anymore why you used the design and the instruments used.
- (A) TRUE
 - (B) FALSE
- 464.** The research participants are described in detail in which section of the research plan?
- (A) Discussion.
 - (B) Data analysis.
 - (C) Method.
 - (D) Introduction.
- 465.** How does the Discussion section address the results?
- (A) By ignoring them
 - (B) By describing how they address the topic under investigation
 - (C) By listing them without explanation
 - (D) By comparing them to unrelated studies
- 466.** In which section we should describe the research gaps?
- (A) Literature review
 - (B) Introduction
 - (C) Methods
 - (D) Conclusion
- 467.** What part of a research report contains the summary and synthesis of all available sources directly related to the study?
- (A) Introduction
 - (B) Literature Review
 - (C) Methodology
 - (D) Conclusion
- 468.** In the IMRaD framework, which section should detail sampling, instruments, and procedures?
- (A) Introduction
 - (B) Results
 - (C) Methods
 - (D) Discussion
- 469.** It provides a brief overview of the study as it relates to the needs of the literature (blankspots/ blindspots) and its intended goals and contributions
- (A) Introduction
 - (B) Literature Review
 - (C) Definition of Terms
 - (D) Scope and Delimitation

470. Which part of a research paper explains its importance?
(A) Abstract
(B) Significance of the Study
(C) Methodology
(D) Conclusion
471. What is the purpose of recommendations in a research paper?
(A) To draw inferences from the findings
(B) To suggest practical and achievable actions based on the research
(C) To summarize key points
(D) To provide a challenge to the reader
472. What is the purpose of the title page in a paper?
(A) To provide a summary of the research
(B) To list the references used
(C) To identify the paper and its authors
(D) To present the research findings
473. The section in research paper that explains the types and sources of data as well as the method you used in collecting and analyzing the data you have gathered.
(A) Conclusion
(B) Method
(C) Introduction
(D) Abstract
474. The ___ provides information that is vital to understand the main body of the research.
(A) Background of the study
(B) Statement of the problem
(C) Purpose of the study
(D) Overview of the study
475. It is an academic work that aims to persuade people that the researchers have the integral skills and work plan to complete a research.
(A) Hypothesis
(B) Concept paper
(C) Research proposal
(D) Thesis
476. Why should the Introduction move from general to specific information?
(A) To confuse readers
(B) To gradually explain the research focus
(C) To shorten the paper
(D) To avoid citations
477. What part of an experiment contains the data tables and graphs?
(A) Results
(B) Conclusion
(C) Hypothesis
(D) Materials
478. A good title is one that has the minimum possible amount of words that describe accurately the content of the section:
(A) True
(B) False

1.6.2 Abstract Writing

1. Which type of abstract presents major findings of the research?
(A) Argumentative
(B) Narrative
(C) Descriptive
(D) Summative
2. To quickly determine if an article will be useful, which aspect of the article would be MOST helpful?
(A) Abstract
(B) References
(C) Length
(D) None of above
3. Which of the following is usually not included in the abstract of a research report?
(A) Purpose of the study
(B) Participants

- (C) Interpretation of results
(D) Acknowledgements to certain individuals who assisted with the project
4. Which is not true for an abstract?
(A) No more than 300 words
(B) Includes everything briefly
(C) Provide research objectives
(D) No conclusion
5. Which part summarizes the entire research?
(A) INTRODUCTION
(B) ABSTRACT
(C) RESULTS
(D) DISCUSSION
6. This is the summary of your research usually around 250-300 words.
(A) Title
(B) Abstract
(C) Method
(D) Introduction
7. Which part of a research paper provides a summary of the entire study?
(A) Introduction
(B) Conclusion
(C) Abstract
(D) Discussion
8. The ____ is a basic summary of the article that appears right at the beginning. It explains the major points.
(A) Introduction
(B) Abstract
(C) Results
(D) Discussion
(E) Methods (or methodology)
9. What are included in a report abstract?
(A) Highlight topic, methods, data, and results
(B) List of the main parts of the report
(C) Label, report, features title, author
(D) Methodology
10. A paragraph before the text that summarizes the article
(A) Subjects
(B) Heading
(C) Abstract
(D) Footnote
11. Which of the following is NOT found in a research abstract?
(A) Conclusion
(B) Methodology
(C) Major Findings
(D) References
12. Although abstract is the first section of your paper, the abstract should be written last since it will summarize the contents of your entire paper.
(A) True
(B) False
(C) All the above
(D) None of the above
13. Provides a brief account of the main content of an academic paper.
(A) Background
(B) Abstract or summary
(C) Table of contents
(D) Introduction
14. Which word means give a brief statement about the key ideas of a source?
(A) Main idea
(B) Details
(C) Summarize
(D) Infographic
15. The ideal abstract length for most engineering reports is:
(A) 50-80 words
(B) 100-150 words
(C) 150-250 words
(D) 400-500 words

16. Identify Me! It provides the reader with a brief description of the overall research, how it was done, statistical techniques employed, key results, and relevant implications or recommendations with keywords used in the study.
- (A) Introduction
 - (B) Methodology
 - (C) Abstract
 - (D) Title
17. The Abstract is also known as the title page. The page presents information about the research paper's title.
- (A) True
 - (B) False
 - (C) All the above
 - (D) None of the above
18. In which section of a research report does the author summarize the study's background, methods, findings, and conclusions?
- (A) The introduction
 - (B) The results section
 - (C) The abstract
 - (D) The discussion
19. It defines as a short summary of the completed research.
- (A) Abstract.
 - (B) Background of the study.
 - (C) Methodology.
 - (D) Conceptual Framework.
20. It is intended to describe your research work without going into great detail.
- (A) Library Database
 - (B) Abstract
 - (C) Electronic Book
 - (D) Bibliography
21. It is a brief narration of what the researcher did, the reasons why the research was undertaken, the problems posed or objectives set and the method used to answer the problems posed or achieve the objectives set. It is followed by a concise summary of major results or findings, conclusions and recommendations.
- (A) Research Report
 - (B) Review of Related Literature
 - (C) Abstract
 - (D) Background/Introduction
22. The abstract contains how many number of words?
- (A) 200-300
 - (B) 400-500
 - (C) 300-400
 - (D) 100-200
23. What is usually omitted from the abstract?
- (A) The history of the research that led to the current program of work
 - (B) The procedure the participant experienced
 - (C) The implications of the work
 - (D) A description of the sample
24. A brief description that appears at the beginning of an article to summarize the contents.
- (A) Formal Outline
 - (B) Abstract
 - (C) Sentence Outline
 - (D) Precis
25. Which of the following should generally be avoided in a research paper title?
- (A) Independent and dependent variables
 - (B) Specific key terms related to the study
 - (C) Abbreviations and acronyms
 - (D) Mention of technology or process used
26. It contains the summary of the research.
- (A) Findings
 - (B) Conclusion
 - (C) Abstract
 - (D) Statement of the Problem

27. Abstract is NOT important in the structure of a research paper
(A) True
(B) False
28. A general rule-of-thumb is that the title should contain
(A) The key words describing the work presented
(B) The results of the work presented
(C) Explanation of idea of work
(D) The object of investigation
(E) The methods of investigation
29. A short summary of research findings is usually found in:
(A) Abstract
(B) Review
(C) Bibliography
(D) Appendix
30. What is abstract in a report?
(A) A Title fly
(B) Key words to introduce the research topic
(C) Introduction part
(D) Include aims and outcome of the research
31. What provides a brief summary of a research paper?
(A) Conclusion
(B) Abstract
(C) Significance of the Study
(D) Introduction
32. This section provides an overview of the study, its essence, and its main theme.
(A) Title
(B) Abstract
(C) Introduction
(D) Body
33. It is concise summary of your paper
(A) Conclusion
(B) Introduction
(C) Purpose
(D) Abstract
(E) Title
34. ____ gives a very brief overview of the report in a condensed form.
(A) Abstract
(B) Introduction
(C) Methodology
(D) Discussion
35. Brief report of research is called
(A) Abstract
(B) Index
(C) Conclusion
(D) None of the above
36. Which section of a research report provides a summary of the entire study, including the research question, methods, results, and conclusion?
(A) Introduction
(B) Abstract
(C) Discussion
(D) Literature Review
37. A short summary of your completed research. It is intended to describe your work without going into detail.
(A) Research
(B) Introduction
(C) Abstract
(D) Discussion
38. What refers to the comprehensive summary or overview of your research?
(A) Introduction
(B) Statement of the Problem
(C) Abstract
(D) References

39. Gives a gist of the entire research paper.
(A) Abstract
(B) Introduction
(C) Methodology
(D) Results
40. What part of the research report is an overview that highlights all important aspects of the research including the research method, data collection, process, and research findings?
(A) Title
(B) Table of Contents
(C) Abstract
(D) Findings
41. The abstract is written after completing the research.
(A) TRUE
(B) FALSE
42. All of these are ways to give your attention getter at the beginning except
(A) Give a striking statement
(B) Ask the audience a question
(C) Give a quote
(D) Starting with your thesis/main idea
43. What is the main purpose of the abstract in a research proposal?
(A) To persuade the reader to fund the research.
(B) To summarize the research proposal.
(C) To provide a detailed explanation of the methodology.
(D) To present the research findings.
44. The meaning of 'Abstract' is:
(A) A detailed explanation of the research methods.
(B) A brief summary of the research, including its purpose, methods, results, and conclusions.
(C) A list of references used in the research.
(D) A discussion of future research directions.
45. It is a short summary of the entire research.
(A) Conclusion
(B) Abstract
(C) Introduction
(D) None of above
46. Which of the following is not usually found in a research study's abstract?
(A) Concise results
(B) Methods used
(C) Purpose or goal
(D) Conflicting studies
47. What is the function of an abstract in a research paper?
(A) To provide a detailed analysis
(B) To summarize the main points
(C) To list all references
(D) To introduce the research topic
48. Which section of a research report provides a summary of the entire study, including the purpose, methodology, and findings?
(A) Introduction
(B) Literature Review
(C) Abstract
(D) Conclusion
49. Which part of the research report serves as "The Summary"?
(A) Title Page
(B) Abstract
(C) Introduction
(D) Methodology
50. The abstract contains detailed step-by-step procedures.
(A) TRUE
(B) FALSE
(C) All the above
(D) None of the above

51. Keywords in an engineering research paper are important because they:
- (A) Add extra words to meet length requirements
 - (B) Support indexing and improve discoverability
 - (C) Replace the need for an abstract
 - (D) Provide a summary of results
52. What does the term 'abstract' refer to in research?
- (A) A list of references used in the study.
 - (B) A detailed analysis of research methods.
 - (C) A brief summary of a research paper or article.
 - (D) The main findings of the research.
53. A short summary of Technical Report is called ____
- (A) Research Abstract.
 - (B) Guide.
 - (C) Article.
 - (D) Publication.
54. It is a concise summary of all the findings, generally found at the beginning of the research report.
- (A) Abstract
 - (B) References
 - (C) Discussion
 - (D) Literature review
55. To abstract elements for a quantitative research study such as a journal article, conference paper, or dissertation or thesis, it is not necessary to identify the:
- (A) References
 - (B) Research problem
 - (C) Results of the study
 - (D) Research questions or hypotheses
56. It is a brief overview of a study
- (A) Abstract
 - (B) Significance of the study
 - (C) Introduction
 - (D) Data
57. This section lets readers get the gist or essence of your paper or article quickly
- (A) Acknowledgement Page
 - (B) Dedication Page
 - (C) List of Tables and Figures
 - (D) Research Abstract
58. Part of article that summarizes the problem or objective of your research, and its method results and conclusions is called ____
- (A) Introduction
 - (B) Method
 - (C) Abstract
 - (D) Results and Discussion
59. Which combination best reflects the relationship among abstract, introduction, and methods?
- (A) Abstract summarizes; introduction motivates; methods operationalize
 - (B) Abstract debates; introduction concludes; methods speculates
 - (C) Abstract narrates; introduction catalogs; methods editorializes
 - (D) Abstract details; introduction replicates; methods advertises
60. The abstract should be written prior to writing a conclusion.
- (A) True
 - (B) False
 - (C) All the above
 - (D) None of the above
61. Abstract length is usually:
- (A) 5-10 words
 - (B) 50-300 words
 - (C) Over 2000 words
 - (D) No limit
62. ____ summarizes the entire study
- (A) Abstract
 - (B) Title
 - (C) Introduction
 - (D) Methods

63. Which of the following is the most read page of a thesis?
- (A) Table of contents.
 - (B) Title page.
 - (C) Abstract.
 - (D) Research Design.
64. Despite being one of the first sections to be read, the abstract is one of the last few sections to be written.
- (A) True
 - (B) False
 - (C) All the above
 - (D) None of the above
65. The abstract is:
- (A) . A Precis of all important parts of a research report
 - (B) None of these
 - (C) A Summary of all the major findings
 - (D) A list of criticisms of the study
66. How does the abstract of a thesis differ from the introduction?
- (A) The abstract is longer and more detailed than the introduction
 - (B) The abstract provides a summary of the entire thesis, while the introduction sets the context and outlines the research problem
 - (C) The introduction contains references, but the abstract does not
 - (D) Both sections serve the same purpose
67. A brief summary of the content of the paper.
- (A) An abstract
 - (B) Title
 - (C) Introduction
 - (D) Conclusion
 - (E) Application
68. Which part of the preliminary sections includes a brief overview or summary of the research?
- (A) Abstract
 - (B) Acknowledgement
 - (C) Cover Page
 - (D) Approval Sheet
69. Which of the following is NOT typically part of an abstract?
- (A) Objectives
 - (B) Methodology
 - (C) Future references
 - (D) Results
70. What research report is an overview that highlights all important aspects of the research including the research method, data collection, process, and research findings?
- (A) Title
 - (B) Table of Contents
 - (C) Abstract
 - (D) Findings
71. The abstract of a research paper should:
- (A) Contain detailed tables
 - (B) Be a brief summary of key objectives, methods, and findings
 - (C) Include references
 - (D) Exceed two pages
72. Keywords are usually placed:
- (A) At the end of the article
 - (B) Before title
 - (C) After the abstract
 - (D) In the reference list
73. It is a brief statement of the essential contents of the manuscript.
- (A) Abstract
 - (B) Summary
 - (C) Introduction
 - (D) Statement of the problem
74. What is a brief summary of the research report, including the main points, methods, and conclusions?
- (A) Conclusion
 - (B) Hypothesis
 - (C) Thesis
 - (D) Abstract

75. Strategy for writing of Abstract
- (A) Must be written last since it will summarize the paper
 - (B) Must be written in the middle of the paper
 - (C) Must be written in the beginning of the paper
 - (D) No definite strategy
 - (E) Optional section
76. A short summary of your research paper, it is usually in one paragraph of 300 words or less
- (A) Abstract
 - (B) Criterion Validity
 - (C) Research Instruments
 - (D) Hypothesis
77. Keywords should be:
- (A) Random terms
 - (B) Irrelevant to topic
 - (C) Specific, topic-related terms
 - (D) The same as author names
78. When reviewing related articles, which section should you read first?
- (A) The Methods section
 - (B) The abstract
 - (C) The Discussion section
 - (D) The tables
79. This is the summary of the research which includes hypothesis, summary of the method, outline of key results and overview of conclusions
- (A) Abstract
 - (B) Introduction
 - (C) Methodology
 - (D) Review of literature
80. This refers to the summary of the thesis, containing a short discussion of the problem, method and design, conclusion, and the findings:
- (A) Summary of Findings
 - (B) Table of contents
 - (C) Abstract
 - (D) Conclusion
81. The Abstract of a Research Study includes stating the main objectives, describing methods, summarizing the most important results and stating major conclusions and significance.
- (A) True
 - (B) False
82. A brief summary of the research paper
- (A) Abstract
 - (B) Acknowledgement
 - (C) Research
 - (D) Preliminaries
83. When writing an abstract for a research study, what information should be included?
- (A) Only the key results and their statistical significance
 - (B) A detailed critique of the study's methodology
 - (C) A concise summary of the problem, purpose, sample, key results, and implications
 - (D) An exhaustive list of all references cited in the study
84. It is a detailed summary of your study, which should include a broad overview of the paper, your research question, the significance of your study, methods of research, and findings.
- (A) Abstract
 - (B) Background of the study
 - (C) Introduction
 - (D) Methodology
85. Brief description of the report or other printed work in terms of content, purpose, form, and other features are called:
- (A) Annotation
 - (B) Abstract
 - (C) The application
 - (D) Conclusion
 - (E) Introduction

86. Using obsolete terms do not matter in writing the title.
(A) True
(B) False
87. This part of scientific research should not exceed 250 words and should use the past tense of the verb and be written in the third person point of view.
(A) Introduction
(B) Title
(C) Abstract
(D) Methodology
88. ____ is an extremely brief interpretation of the original text by means of compression.
(A) Abstract
(B) Cliches
(C) Details
(D) Purpose
(E) Sentence
89. What section of a research report should you read first to determine its relevance?
(A) The introduction
(B) The methods section
(C) The abstract or summary
(D) The results section
90. What does the abstract of an APA research paper consist of?
(A) An outline of the essay
(B) A glossary of lesser known terms
(C) A concise summary of the major points of your research
(D) A summary of why you researched this particular subject
91. What is the function of an academic abstract?
(A) To provide a summary of the research findings and methods
(B) To present personal opinions
(C) To describe the methodology in detail
(D) To provide a conclusion with new arguments
92. Which statement best captures the primary purpose of an abstract in a research paper?
(A) Present full literature review narrative
(B) Debate limitations and future directions
(C) Provide detailed data tables and figures
(D) Offer a brief overview of the study
93. Abstracts should include:
(A) Aim and the thesis statement
(B) Methodology and a conclusion
(C) The same content as the Discussion section
(D) A summary of all the key research points
94. Which section of a scientific article usually contains the purpose of the study?
(A) Results
(B) Abstract
(C) Methods
(D) Discussion
95. The abstract should be:
(A) Written before the research
(B) Copied from the introduction
(C) A concise standalone summary
(D) Filled with citations
96. Abstract provides:
(A) Detailed tables
(B) Graphs and charts
(C) A summary of the research
(D) Only the title
97. Which section of a research paper provides a brief summary of the entire study, including the purpose, methods, results, and conclusions?
(A) Introduction
(B) Abstract
(C) Discussion
(D) Conclusion

98. How can abstracts assist researchers in their literature search?
- (A) By summarizing the content of research articles
 - (B) By providing full-text access to articles
 - (C) By listing all the references used in a study
 - (D) By providing contact information for authors
99. Which of the following describes Abstract language?
- (A) Secret language used by various groups
 - (B) A language that allows for the possibility of several different meanings
 - (C) Abstract language used to discuss ideas
 - (D) Language used by personnel in a particular field
100. What is the importance of including essential terms in a title?
- (A) To increase word count
 - (B) To aid in indexing and searches
 - (C) To make it more complex
 - (D) To attract more readers
101. This part of research paper is intended to describe your research work without going into great detail.
- (A) Index
 - (B) Abstract
 - (C) Trade Bibliography
 - (D) Table of Contents
102. Which part of the Preliminaries indicate a short summary of the study?
- (A) Approval Sheet
 - (B) Title Page
 - (C) Abstract
 - (D) Table of Contents
103. It allows potential readers to quickly identify what your paper is about and decide if it's worth reading.
- (A) Personalized Cover Page
 - (B) APA/MLA Title Page
 - (C) Abstract
 - (D) Acknowledgements
104. What should be included in the Abstract of a research report?
- (A) A summary of the main findings and conclusions
 - (B) A list of references used in the report
 - (C) An analysis of the limitations of the study
 - (D) A detailed explanation of the methodology
105. Select the most appropriate word count range for a typical abstract in health sciences.
- (A) 150 to 250 words
 - (B) 50 to 90 words
 - (C) 300 to 450 words
 - (D) 600 to 800 words
106. What is an abstract used for?
- (A) For a brief written interview
 - (B) For a written description of a project
 - (C) For a news article
 - (D) None of above
107. This part is used by readers to quickly review the overall content of the paper. It should provide a complete synopsis of the research paper and should introduce the topic and the specific research question, provide a statement regarding methodology and should provide a general statement about the results and the findings.
- (A) Title
 - (B) Introduction
 - (C) Abstract
 - (D) None of the above
108. Is a short summary of the entire paper. It should include main goals, results and conclusions. It can be written but until the very end.
- (A) Title
 - (B) Abstract
 - (C) Conclusion
 - (D) Discussion

- 109.** Abstract should not contain
- (A) Background
 - (B) Objective
 - (C) Keywords
 - (D) Reference
- 110.** Which is true of the following statements:1. A paragraph can consist of two topic sentences.2. The abstract presents the thesis of the text.
- (A) Only statement 1 is correct. Statement 2 is wrong.
 - (B) Only statement 2 is correct. Statement 1 is wrong.
 - (C) Both statements are correct.
 - (D) Both statements are incorrect.
- 111.** What is a brief summary of a research article, thesis, or review called?
- (A) Abstract
 - (B) Introduction
 - (C) Conclusion
 - (D) Discussion
- 112.** Why is it important to tell your reader your topic in your introduction?
- (A) So your reader can be confused
 - (B) So your readers know what your article is going to be about
 - (C) So your reader can feel neutral
 - (D) None of above
- 113.** Summarizes all sections and helps readers decide whether or not to read the entire report
- (A) Abstract
 - (B) Analysis
 - (C) Research
 - (D) Results
- 114.** ____ is a brief summary of a research article, thesis, review, conference proceeding, or any in-depth analysis of a particular subject.
- (A) Conclusion
 - (B) Introduction
 - (C) Synthesis
 - (D) Abstract
- 115.** It presents the major aspects of the entire paper in a prescribed sequence.
- (A) Abstract
 - (B) Context and Rationale
 - (C) Action Research Questions
 - (D) Action Research Methods
- 116.** The Abstract in a full research report should:
- (A) Be a detailed literature review
 - (B) Provide a brief summary of objectives, methods, findings, and conclusion
 - (C) Contain only references
 - (D) List all research gaps in detail
- 117.** What is an overview of the research study called?
- (A) Conclusion
 - (B) References
 - (C) Introduction
 - (D) Abstract
- 118.** What is the maximum number of words in writing the Abstract of the research following the NSTF guidelines?
- (A) 240
 - (B) 250
 - (C) 260
 - (D) 270
- 119.** What is the characteristic of the abstract?
- (A) It is the summary of the whole research.
 - (B) It is the summary of the research problem.
 - (C) It is the summary of the research method.
 - (D) It is the summary of the research results.
- 120.** Required digest or summary of the whole research project.
- (A) Table of Contents
 - (B) Abstract
 - (C) List of Figures
 - (D) None of above

121. Which section of a research report provides a brief summary of the study?
- (A) Discussion
 - (B) Methodology
 - (C) Abstract
 - (D) Introduction
122. Which of the following should NOT be observed in writing an abstract, precis, or summary?
- (A) Annotate the text.
 - (B) Read the text at least twice until you fully understand its content.
 - (C) Add own explanation for emphasis.
 - (D) Edit your draft abstract, precis, or summary by eliminating redundant ideas and making sure it contains the properties of a well-written text.
123. What is the purpose of an abstract in a research report?
- (A) Provide data analysis
 - (B) State the bibliography
 - (C) Summarize the research content
 - (D) Explain the methodology
124. Which section of a research paper provides a summary of the entire study, including the research question, methods, and findings?
- (A) Introduction
 - (B) Abstract
 - (C) Literature Review
 - (D) Conclusion
125. ____ is a short summary of 100-200 words explaining the paper's purpose and key findings.
- (A) Appendices
 - (B) Abstract
 - (C) Acknowledgement
 - (D) References
126. Abstract includes:
- (A) Entire analysis
 - (B) Summary of the study
 - (C) Only references
 - (D) Graphs
127. Which section is written last but placed near the beginning?
- (A) INTRODUCTION
 - (B) ABSTRACT
 - (C) RESULTS
 - (D) DISCUSSION
128. What will an abstract contain?
- (A) The references used in the article
 - (B) The credentials of the authors
 - (C) The key findings of an article
 - (D) None of above
129. The abstract is provided at the?
- (A) Beginning of the article
 - (B) End of the paper
 - (C) Within the introduction
 - (D) None of above
130. You don't need to include citations in the abstract.
- (A) True
 - (B) False
 - (C) All the above
 - (D) None of the above
131. This part gives a quick overview of the article
- (A) Limitations
 - (B) Discussion
 - (C) Abstract
 - (D) Graphs
132. What is 'Abstract'?
- (A) The introduction of the research
 - (B) A brief summary to attract the reader to continue reading
 - (C) A short note in the content section
 - (D) An opportunity to thank those who supported you in the research (placed at the beginning of the article)
133. It appears at the very beginning of a document, but it should be the last thing you write.
- (A) Context Paragraph
 - (B) References
 - (C) Title Page
 - (D) Abstract

1.6.3 Research Article Writing

1. What are scholarly journals?
(A) Magazines for children
(B) Written for a specific audience; filled with technical jargon on a particular topic
(C) Daily newspapers
(D) Personal blogs
2. Daniel was assigned to write an article. He asked Mason, the editor, where he should put his name to give credit for the article. What is the term for this?
(A) Relevant
(B) Extraneous
(C) Byline
(D) Dateline
3. It is the main form of exchange of written information on research work problems between specialists working in one or related fields of science:
(A) Article
(B) Drawing
(C) Diagram
(D) Message
(E) Thesis
4. Which of the following is a characteristic of a scholarly article?
(A) Informal language
(B) Lack of references
(C) Peer-reviewed
(D) Personal opinions
5. Ecological Economics published an article about water quality testing in Costa Rica. The article abstract describes how a team of scientists were able to use this data to mathematically model secondary benefits of clean water on local ecosystems. This source would be considered a(n):
(A) Academic article from a scientific journal
(B) Popular science piece
(C) News source
(D) Investigative journalism piece
6. Which initial step is essential when reading and critiquing a research article?
(A) Skim the abstract only
(B) Confirm journal impact factor
(C) Review the elements of the article
(D) Check author social profiles
7. Who is the 'First Author' in a research article?
(A) The person who contributed the most to the research and writing of the article
(B) The person who funded the research
(C) The person who reviewed the article
(D) The last person listed in the author list
8. What is APA Writing Style?
(A) A software program that writes essays for you.
(B) An Apple writing app
(C) A formal structure for writing research papers
(D) None of above
9. Which type of article is an easy-to-read, concise summary of a condition or disorder based on a review of recent literature but is not exhaustive or systematic in the literature search?
(A) Clinical review
(B) Systematic review
(C) Literature review
(D) Cohort study
10. Which of the following is a key part of writing a scientific article?
(A) Including personal opinions only
(B) Presenting results and methods clearly
(C) Ignoring data that does not fit the hypothesis
(D) Using only pictures

11. Which of the following is a tip for preparing academic writing?
- (A) Use casual language
 - (B) Choose a topic that interests your group and is relevant to your course
 - (C) Focus on a personal anecdote
 - (D) Avoid creating a thesis statement
12. One of the most important considerations in writing is to keep the ____ in mind as you write.
- (A) Jargon
 - (B) Precision
 - (C) Environment
 - (D) Audience
13. A type of academic text which gives evaluation of works published in scholarly journals.
- (A) Conference Paper
 - (B) Article
 - (C) Dissertation
 - (D) Review
14. What should each paragraph in the body of the paper have?
- (A) A conclusion and analysis
 - (B) A topic sentence and supporting sentences with the details
 - (C) Transition words and varying sentence lengths
 - (D) Quotations and ellipsis
15. Which outcome best captures the purpose of research writing in scholarly work?
- (A) Provide entertainment for conference attendees
 - (B) Advertise laboratory services to clients
 - (C) Disseminate new knowledge and findings
 - (D) Replace prior studies with new opinions
16. What should you check in a research article to understand its constraints and suggestions for future research?
- (A) The abstract and introduction
 - (B) The Methods and Results sections
 - (C) The tables and figures
 - (D) The limitations and recommendations
17. What is the importance of adhering to a journal's formatting guidelines?
- (A) To ensure consistency and professionalism in the published article
 - (B) To make the manuscript easier for reviewers to read and assess
 - (C) To comply with ethical publishing standards
 - (D) All of the above
18. A type of writing that is meant to define, inform or explain the author's subject to a reader.
- (A) Descriptive writing
 - (B) Creative writing
 - (C) Expository writing
 - (D) Persuasive writing
19. It is a secondary source. It does not report original research by the author.
- (A) Research plan
 - (B) Abstract
 - (C) Research
 - (D) Article
20. In formal writing, you should avoid:
- (A) Complete sentences
 - (B) Proper grammar
 - (C) Slang words
 - (D) Clear structure
21. This part of a research article serves as a re-statement of the research problem, with a summary of main findings and their significance. This may also include the shortcomings of the research and agenda for future research.
- (A) Discussion
 - (B) Conclusion
 - (C) Methodology
 - (D) Introduction

22. Contains systematized scientific information on any issue (topic or the whole problem), which are obtained on the basis of the analysis of primary sources?
(A) Review article
(B) Private article
(C) Overview drawing
(D) Dissertation
(E) Abstract
23. A corresponding author is:
(A) The one who does the printing
(B) The editor of the journal
(C) The primary contact person for the journal
(D) A student helper
24. What is the typical role of researchers in the publication process of a scientific study?
(A) Reviewing other studies
(B) Writing and submitting the manuscript
(C) Designing the cover page
(D) Editing the journal
25. Which sentence best exemplifies academic writing?
(A) The study shows cool results.
(B) The results of the study suggest that there is a significant correlation between the two variables.
(C) It is obvious that the findings are interesting.
(D) The study is pretty good.
26. Scholarly articles are ____
(A) Are not good choice s for research
(B) Written in school
(C) Written by experts in the field
(D) Provided by wikipedia
27. Research work can be published in
(A) Magazines
(B) Newspapers
(C) Journals
(D) Books
28. Why is IMRAD commonly used in science research?
(A) It is required in all subjects
(B) It follows the scientific method
(C) It eliminates experiments
(D) It focuses only on results
29. The rules for the design of an article are usually published:
(A) In the journal
(B) In newspapers
(C) In the open press
(D) On the Internet
(E) Are not published
30. A(n) ____ is a quarterly, peer-reviewed collection of research papers.
(A) Assignment
(B) Journal
(C) Teaching assistant
(D) Seminar
(E) Tutor
31. Which of these is acceptable in academic writing?
(A) Last but not least
(B) Take for example
(C) In addition to
(D) Moving on to
32. Which of these would you NOT use in academic writing?
(A) A large number of
(B) Lots of
(C) A considerable amount of
(D) Many
33. What is the purpose of a research article template?
(A) To make the article longer
(B) To ensure consistency and standard formatting
(C) To reduce the quality of writing
(D) To remove references

34. An essay that emphasizes the characteristics of a person or thing is an example of
(A) Narrative
(B) Argumentative
(C) Descriptive
(D) None of above
35. Which pair represents end-stage quality control for academic manuscripts?
(A) Brainstorm and mind-map only
(B) Collect and cite later
(C) Format and submit early
(D) Draft and freewrite rapidly
(E) Revise and proofread thoroughly
36. This is a type of academic text which suggests results of research and development that can either affect the academic community or provide relevance to nation-building.
(A) Thesis
(B) Review
(C) Article
(D) Novel
37. Which section of a paper identifies issues that the current research will address?
(A) Results
(B) Introduction
(C) Discussion
(D) Methods
38. Academic Research/Scientific Journal
(A) Time-sensitive, new story
(B) Broad overview of research in a field from multiple sources
(C) Independent writer exploring an issue from multiple perspectives
(D) Peer-reviewed research and experiments
39. What the first step in writing a good article?
(A) To create its structure
(B) To write good abstract
(C) To write good introduction
(D) To write good literature review
(E) To do experiments
40. Before writing an article for publication in a specific journal, the researcher should:
(A) Examine copies of that journal before writing the manuscript.
(B) Identify at least two additional journals for simultaneous submission.
(C) Find a co-author.
(D) Contact the journal editor.
41. What is the method of creating an article made up of the key components or elements regarding a particular topic of discussion?
(A) Copying
(B) Paraphrasing
(C) Quoting
(D) Summarizing
42. What is the primary role of the Introduction in a research article?
(A) Establish context and research question
(B) Report statistical outcomes and tables
(C) Explain stepwise experimental protocols
(D) List citations in standard formats
43. Which of the following is true about the introduction of a research article?
(A) The introduction explains the concepts of the research and defines the direction of the research in its argument.
(B) People who made substantial contributions to the work are described in the introduction.
(C) The introduction is a non-technical summary of the research.
(D) The introduction details methods and procedures and discusses the reason for choosing the research design.
44. A piece of writing appearing in a newspaper
(A) To edit
(B) Encyclopedia
(C) Article
(D) To summarize
(E) MLA format

45. Which feature of academic writing refers to the writer or speaker specifying information, dates, or figures?
- (A) Objectivity
 - (B) Complexity
 - (C) Precision
 - (D) Formality
46. It is a text that is written by professionals and it takes years to publish.
- (A) Non-Academic Texts
 - (B) Thesis Statement
 - (C) Academic Texts
 - (D) Abstract
47. In academic writing, which voice is generally preferred?
- (A) Active voice (e.g., "The researcher conducted the study")
 - (B) Passive voice exclusively (e.g., "The study was conducted")
 - (C) Second person voice (e.g., "You should note that ___")
 - (D) First person singular throughout (e.g., "I think that ___")
 - (E) Conversational voice with slang
48. An academic writer should avoid...
- (A) Unnecessary words.
 - (B) Complete sentences.
 - (C) Descriptions.
 - (D) Combining sentences.
49. What is the 'Data and Methods section of a research article'? The section that describes how the research was conducted and what data was used.
- (A) The section that describes how the research was conducted and what data was used.
 - (B) The section that lists the references used in the research.
 - (C) The section that provides a summary of the research findings.
 - (D) The section that introduces the topic of the research.
50. In which section of the article is the sample described?
- (A) Introduction
 - (B) Method
 - (C) References
 - (D) Abstract
51. Theses, dissertations, or journal articles are examples of ___ literature.
- (A) Conceptual
 - (B) Research
 - (C) Topical
 - (D) Thematic
52. Types of writing commonly that denote the reporting of original research in journals, through scientific papers in standard format is called ___
- (A) Essay
 - (B) Novel
 - (C) Scientific article
 - (D) Newsletter
53. An article, which is an analysis and critical assessment of a published article:
- (A) Review
 - (B) Patent
 - (C) Report
 - (D) Article
 - (E) Analytical, abstract, thematic
54. A piece of writing about a particular subject in a newspaper or magazine.
- (A) Article
 - (B) Issue
 - (C) Problem
 - (D) Discussion
 - (E) Title
55. We must ___ our article in a credible journal.
- (A) Publish
 - (B) Conduct
 - (C) Analyze
 - (D) Write

56. Some common characteristics of a scholarly article include:
- (A) Only available through GoogleScholar or by purchase.
 - (B) Images, advertisements, editorial section, links.
 - (C) Doi, author(s) listed, volume numbers, abstract, references.
 - (D) Has 'Journal' in the title.
57. ___ that describes what we want to say in our terms may present barriers to others who are not familiar with our expressions, buzz-words and jargon.
- (A) Language
 - (B) Attitude
 - (C) Lack of common experience
 - (D) Problems with structure design
58. When matching a journal to your study, what should guide your choice?
- (A) Journal scope alignment with topic
 - (B) Journal cover design aesthetics
 - (C) Number of issues published yearly
 - (D) Submission fees and page color

1.6.4 Research Report Writing

1. The first page of an APA formatted paper is the ____
 - (A) Title page
 - (B) Cover page
 - (C) Abstract
 - (D) First page of the essay
2. Where in a research report would you find the results of previous studies?
 - (A) Introduction
 - (B) Summary of previous research
 - (C) Purpose of current research
 - (D) Conclusion
3. What is the purpose of a short research report?
 - (A) Quickly distribute information
 - (B) Include extensive literature reviews
 - (C) Present detailed statistical findings
 - (D) Thoroughly document all research procedures
4. It is part of the research report where the brief background, objectives, significance, and related researches of the study can be seen.
 - (A) Body
 - (B) Conclusion
 - (C) Introduction
 - (D) Recommendations
5. Which section of the research report includes ethics?
 - (A) Introduction
 - (B) Methodology
 - (C) Results
 - (D) Discussion
6. What structure of a research report is compared to a compass making thereaders navigate the document easily?
 - (A) Title
 - (B) Table of Contents
 - (C) Abstract
 - (D) Findings
7. A/an ____ is to allow author to have a final say on the issue raised in the essay.
 - (A) Introduction
 - (B) Body paragraph
 - (C) Conclusion
 - (D) Thesis statement
8. What should be the length of each body paragraph in a research report?
 - (A) At least five sentences
 - (B) At least three sentences
 - (C) At least seven sentences
 - (D) At least ten sentences

9. Which action belongs in the Results section rather than the Discussion section?
- (A) Explain study limitations
 - (B) Report statistical results
 - (C) Interpret findings contextually
 - (D) Compare with prior studies
10. Conclusions are used for?
- (A) Properly ending a paragraph
 - (B) Properly ending your paper
 - (C) Properly ending a sentence
 - (D) None of the above
11. What word does NOT describe a report?
- (A) Objective
 - (B) Factual
 - (C) Orderly
 - (D) Persuasive
12. Which of the following is the most important first step when starting to write a good report?
- (A) Begin writing the introduction immediately
 - (B) Understand the purpose and audience of the report
 - (C) Add references before writing the main content
 - (D) Use as many technical terms as possible
13. When you have finished researching and are writing your paper, what should be your writing persona? That is, how should you come across in your paper?
- (A) As a student writing for your paper
 - (B) As an instructor writing for student
 - (C) As an expert writing for other experts
 - (D) As reporter writing for the general public
14. Why are results presented without interpretation in the Results section?
- (A) To save time
 - (B) To keep objectivity
 - (C) To avoid statistics
 - (D) To simplify writing
15. When presenting figures and tables in the Results section:
- (A) Each must be numbered, titled, and referred to in the text
 - (B) Titles are optional
 - (C) They should be placed without explanation
 - (D) They should only be included in appendices
16. A non-fiction story or research paper must include ____
- (A) The author's opinion
 - (B) Facts
 - (C) Make believe information
 - (D) Quotes
17. Imagine you're helping Amelia and Kolten with their research report. What should they include on the title page?
- (A) The table of contents
 - (B) The main headings
 - (C) The student's name, the date, and the title of the report
 - (D) The references
18. What is the purpose of outlining the structure of a literature review?
- (A) To create a detailed plot for your literature review
 - (B) To organize the argument and structure of your review
 - (C) To decide which sources to include
 - (D) To list the author's names alphabetically
19. Which of the following is characteristic of an annotated bibliography?
- (A) Annotated bibliographies are often shared to be utilized by other researchers in developing their own.
 - (B) The American Psychological Association published specific rules for how to write one.
 - (C) Annotated bibliographies are often published in journals.
 - (D) Annotated bibliographies tend to be in working documents that can be used to help write a literature review.

20. The Perception of Grade 10 Students on the Growing Numbers of LGBT in DonVicente Rama Memorial National High School, “ is what structure of a researchreport?
(A) Title
(B) Table of Contents
(C) Abstract
(D) Findings
21. Although formal reports are similar to formal proposals, a primary difference is that formal reports ____
(A) Are the product of thorough research and data analysis
(B) Use a more conversational tone
(C) Are longer than formal proposals
(D) Are organized indirectly
22. You need to draw links between the literature in your review.
(A) True
(B) False
23. Which section of a research report includes a comparison of current results to previous results?
(A) Results and discussion
(B) Summary of previous research
(C) Research procedures
(D) Conclusion
24. Where in a research report would you find an interpretation of what the results might mean?
(A) Results and discussion
(B) Research procedures
(C) Summary of previous research
(D) Introduction
25. The mechanics of report writing include:
(A) Content arrangement and language style
(B) Choosing a topic
(C) Selecting respondents
(D) Data coding
26. What should you do about the shortcoming and limitations of your research?
(A) Don't mention them and hope that others won't notice them
(B) Openly discuss them in your research report
(C) Discuss them with your advisor but don't write anything about them
(D) Stress out because they make your research so bad
27. What should be included in the methodology section of a research report?
(A) Conclusions
(B) Data gathering procedure
(C) Main agreements and disagreements
(D) Historical background
28. What should be included in the title page of the report?
(A) Title, author's name, class, date
(B) Title, report, bibliography
(C) Title, side headings, date
(D) Title, references, reports
29. Who should you write your introduction for?
(A) The person reading it
(B) Yourself
(C) Your peers
(D) The person editing it Edit
30. Why is conciseness emphasized in the IM-RAD format?
(A) To align with the standards of research journals and presentations
(B) To reduce the time needed for research review
(C) To eliminate the need for bibliographies
(D) To make the paper suitable for informal audiences
31. When I write and get feedback on the writing, I can change things to make the clearer, so the is less chance of ____ with written communication
(A) Intrusion

- (B) Comprehension
(C) Distortion
(D) Disbelief
32. Which feature best supports objectivity when writing scientific prose?
(A) Emphasizing the author's beliefs and experiences
(B) Including persuasive rhetoric and strong adjectives
(C) Avoiding emotional language and personal opinions
(D) Using vivid anecdotes to engage the reader
33. In writing a research report, we have to write in a straightforward manner.
(A) TRUE
(B) FALSE
(C) All the above
(D) None of the above
34. We usually call the last paragraph as ____
(A) Resolution
(B) Conclusion
(C) Recommendation
(D) Introduction
35. Which of the following is a key characteristic of a research report?
(A) Informal and conversational tone
(B) Well-structured and follows a standardized format
(C) Uses subjective opinions without evidence
(D) Avoids citations and references
36. Which of the following is a guideline for writing research reports?
(A) Use complex language to impress the reader
(B) Include personal opinions
(C) Be objective and accurate
(D) Make the report as lengthy as possible
37. Why is it important to include a title page in a research report?
(A) It provides essential information and helps in clearly identifying the document.
(B) Readers prefer reports without title pages
(C) Titles are outdated and not needed
(D) It adds unnecessary length to the report
38. Introductory paragraphs are used
(A) Introduce yourself to the reader
(B) Introduce the reader to your topic
(C) Introduce your paper to Mrs. Martinez
(D) None of the above
39. What is one of the author's goals after the training workshop?
(A) To focus solely on teaching
(B) To avoid research discussions
(C) To publish research findings
(D) To stop learning about research
40. What is the purpose of the literature review section in a research report?
(A) To present the methodology
(B) To explain the current state of the field
(C) To list references
(D) To provide recommendations
41. Which of the following is not an element normally included in the introduction of a proposal?
(A) Background/statement of the problem or opportunity
(B) The scope of the proposal
(C) Proposed solution to the problem
(D) Statement of qualifications
42. How should tenses be used in the Method section of a research report?
(A) Only past tense should be used
(B) Future tense should be used for clarity
(C) Only present tense should be used
(D) Both past and present tense should be used appropriately

43. What is the purpose of the introduction section in a literature review?
- (A) To provide a historical background
 - (B) To present the methodology
 - (C) To present the results
 - (D) To list references
44. Organizing evidence and arguments: What is the purpose of organizing evidence and arguments in a research paper?
- (A) To confuse the reader and make the paper less convincing
 - (B) To make the paper longer and more difficult to read
 - (C) To present a clear and logical flow of ideas, making the research paper more persuasive and convincing.
 - (D) To hide the main points and make the paper less persuasive
45. What makes a review of literature coherent?
- (A) A mix of unrelated topics
 - (B) Logical flow and organization
 - (C) Randomly listed sources
 - (D) Separate paragraphs with no connection
46. Which of the following is not usually a part of the discussion section in a quantitative research report?
- (A) Present a summary of the important findings and specific results
 - (B) Discuss general implications of the research
 - (C) Include suggestions for future research and practical applications.
 - (D) Discussion of what motivates the research and the literature that preceded the current research study.
47. The final report is written ____ with rich description of culture.
- (A) As a scientific writing
 - (B) In a narrative form
 - (C) As a novel
 - (D) In an art form
48. When communicating with one's supervisor in a written report, one should
- (A) Be clear and concise.
 - (B) Only use technical language.
 - (C) Submit the report as quickly as possible.
 - (D) Use large words to impress the supervisor.
49. Give the right definition of the concept "research report"
- (A) It is a completed study that reports an investigation or exploration of a problem
 - (B) It is a process of assigning individuals at random to groups
 - (C) Is the process of identifying one or more personal characteristics that influence the outcome
 - (D) Is the dependent variable that is the presumed effect of the treatment variable
50. What is NOT a requirement for the Individual Research Report?
- (A) Analyzing main ideas
 - (B) Including personal opinions
 - (C) Summarizing chosen sources
 - (D) Citing all sources used
51. This will be done through a report, or a thesis, which includes all the information related to the research.
- (A) Collecting the data
 - (B) Writing a report
 - (C) Deciding the method of research
 - (D) None of above
52. Writing a literature review should be thematic in nature, based on main themes, follow a logical progression and various arguments should be substantiated from the literature and adhere to an acceptable academic referencing style.
- (A) True
 - (B) False

53. What should a well-prepared research report include?
- (A) Only the conclusions
 - (B) An introduction, methodology, findings, and conclusions
 - (C) Personal opinions
 - (D) Irrelevant data
54. What type of report is written in very simple language?
- (A) Quantitative Research Report
 - (B) Technical Research Report
 - (C) Popular Research Report
 - (D) Qualitative Research Report
55. Why should abbreviations be avoided in research titles?
- (A) They make the title sound informal
 - (B) They can confuse readers unfamiliar with the terms
 - (C) They are always incorrect
 - (D) They make the title too long
56. Where would one expect to find a list of abbreviations used in the research report?
- (A) Main Body
 - (B) Reference Section
 - (C) Preliminary Section
 - (D) Conclusion
57. Tanika must prepare a formal report detailing the findings of a year-long study of her company's new wellness program. In this report she must discuss employee absenteeism before and after the program's implementation. What type of organizational pattern will she likely use?
- (A) Chronological
 - (B) Spatial
 - (C) Compare/Contrast
 - (D) Importance
58. What should be included in the conclusion of a literature review?
- (A) Summarize how the information relates to the problem
 - (B) List unrelated studies
 - (C) Ignore previous findings
 - (D) Present only new information
59. What is the next step after organizing the notes and cards?
- (A) Writing the report's introduction
 - (B) Writing the report's conclusion
 - (C) Writing the report's development
 - (D) Writing the report's title
60. When reporting data:
- (A) Data and conclusions can be slightly adjusted
 - (B) Identify interviewees
 - (C) Communicate in clear language
 - (D) Plagiarize to conceal evidence
61. Which section of the research report explains what other people have done?
- (A) Literature review
 - (B) Results
 - (C) Introduction
 - (D) Abstract
62. What does the Literature Review section demonstrate?
- (A) The researcher's understanding of the field
 - (B) The results of the research
 - (C) The significance of the study
 - (D) The data collection methods
63. Which of the following is not included in the section on participants in a research report?
- (A) Demographic information of the participants
 - (B) How many participants dropped out of the study
 - (C) How many participants were excluded from the study
 - (D) The participants' responses to the experimental manipulation

64. It states the objectives of the report and comments on the way the topic of the report is to be treated.
- (A) Title Page
 - (B) Abstract
 - (C) Table of Contents
 - (D) Introduction
65. It is a concise heading that indicates what the research report is all about.
- (A) Title
 - (B) Appendices
 - (C) Bibliography
 - (D) Table of contents
66. Where should additional, non-essential information be included in a research report?
- (A) In the Introduction section
 - (B) In the Results section
 - (C) In the Discussion section
 - (D) In an Appendix after the Reference List
67. What is the correct order of elements for the Research Report introduction?
- (A) Background, Previous Research, Purpose Statement, The Gap, Hypothesis
 - (B) Background, Previous Research, The Gap, Purpose Statement, Hypothesis
 - (C) Background, The Gap, Purpose Statement, Previous Research, Hypothesis
 - (D) Background, Hypothesis, Purpose Statement, Previous Research, The Gap
68. What are the mechanics of writing a research report?
- (A) The technical aspects of writing, such as grammar and style
 - (B) The process of data collection
 - (C) The process of data analysis
 - (D) The process of data presentation
69. How do you construct the summary of findings of a research study?
- (A) New data about the research study is introduced.
 - (B) Findings are elaborated and explained further.
 - (C) There is brief statement about the purpose, population, method, and sampling technique of the study.
 - (D) All statements of the problems should be presented excluding the results.
70. Physical structure of a study is ____
- (A) A research report presented to an audience
 - (B) A plan for a research report
 - (C) A flexible approach to writing a qualitative report
 - (D) The underlying organization of topics that forms a structure for a research report
71. Kim's Social Studies teacher has assigned her research countries in Europe. What type of document would best summarize her research?
- (A) Minutes
 - (B) Report
 - (C) Agenda
 - (D) Table of Contents
72. "Research recommendation must not introduce new information."
- (A) Strongly disagree
 - (B) Strongly agree
 - (C) Disagree
 - (D) Agree
73. What is the report body?
- (A) It is the section where you present your research findings.
 - (B) It is the section where you summarize the entire report.
 - (C) It is the section where you give your recommendations.
 - (D) It is the section where you make your conclusion.
74. Which key writing principle is essential for professionalism?
- (A) Ambiguity

- (B) Lengthy messages
 - (C) Clarity and conciseness
 - (D) Overuse of jargon
75. Which action strengthens an RRL by demonstrating critical engagement with prior studies?
- (A) Avoid any critique to stay neutral
 - (B) Analyze strengths and weaknesses
 - (C) Summarize findings without synthesis
 - (D) Exclude contradictory evidence
76. Which of the following is a reason to write clearly and concisely:
- (A) It makes the paper look pretty
 - (B) I have no clue
 - (C) The teacher is usually sleepy and can't keep up with long text.
 - (D) Helps keep your audience's attention
77. The conclusion of a research report:
- (A) Can introduce new information.
 - (B) Must be based only on material presented in the report.
 - (C) Is the same as the abstract except that it is presented at the end of the report.
 - (D) Should focus only on the findings of the research.
78. Main body of the research report includes
- (A) Introduction-Statement, significance and purposes.
 - (B) Assumptions and delimitations and assumptions underlying the hypothesis.
 - (C) Definition of important terms, statement of hypothesis.
 - (D) All of the above.
79. The review of literature is usually found in the introduction of the research report
- (A) True
 - (B) False
80. Which of the following is not typically a formal section in a quantitative research report?
- (A) Results
 - (B) Discussion
 - (C) Speculation
 - (D) None of above
81. What should be included in the methods section of Olivia's research report?
- (A) Literature review findings
 - (B) Personal anecdotes
 - (C) Research design and data collection methods
 - (D) Future research ideas
82. When doing a research report, you should only collect information from:
- (A) Textbooks
 - (B) Internet
 - (C) A variety of reliable sources
 - (D) Your parent(s)
83. "Write an article describing what you learned about the ant population on school grounds." This describes what kind of scientific method?
- (A) Communicate results
 - (B) Draw Conclusions
 - (C) Analyze the results
 - (D) Test a hypothesis
84. Which section of the report contains the re-statement of the problem and conclusions?
- (A) Chapter 1
 - (B) Chapter 2
 - (C) Chapter 3
 - (D) Chapter 4
 - (E) Chapter 5
85. A research report is a formal academic writing.
- (A) TRUE
 - (B) FALSE
 - (C) All the above
 - (D) None of the above

86. Which section of the report might have graphs in it?
- (A) Introduction
 - (B) Results
 - (C) Abstract
 - (D) Literature review
87. Results section includes:
- (A) Tables, graphs, findings
 - (B) Theory
 - (C) Literature
 - (D) Speculation
88. What are body paragraphs in a research report?
- (A) The outline and notecards
 - (B) The information sandwiched between the introduction and conclusion
 - (C) The conclusion and supporting details
 - (D) The introduction and conclusion
89. In which section of a research report does the author describe data collection strategies?
- (A) The results section
 - (B) The introduction
 - (C) The method section
 - (D) The discussion
90. Where in a research report would you find general background information about laughter?
- (A) Introduction
 - (B) Summary of previous research
 - (C) Purpose of current research
 - (D) Results and discussion
91. Which of the following is a step in writing a research report?
- (A) Data collection
 - (B) Data analysis
 - (C) Data interpretation
 - (D) All of the above
92. It is a well-crafted document that outlines the processes, data, and findings of a systematic investigation, considered as an objective and accurate source of information. It can be considered as a summary of the research process that clearly highlights findings, recommendations, and other important details.
- (A) Research
 - (B) Research paper
 - (C) Research report
 - (D) Research defense
93. Literature review needs to be presented before discussion in a research report.
- (A) Yes
 - (B) No
 - (C) All the above
 - (D) None of the above
94. Which of the following is primarily used to provide information about current or past events?
- (A) Interview
 - (B) Survey
 - (C) Report
 - (D) Radio Script
95. What is the purpose of the introduction in a research report?
- (A) To present the methodology used in the study.
 - (B) To summarize the findings of the research.
 - (C) To list the references and citations for the report.
 - (D) To provide background, state the research problem, and outline the study's objectives.
96. Which are contains of full report writing?
- (A) Introduction, Literature review, methodology
 - (B) Introduction, Literature review, methodology, Data Analysis
 - (C) Introduction, Literature review, methodology, Data Analysis, Discussion and conclusion, references and appendix

- (D) Introduction, Literature review, methodology, Data Analysis, Discussion and conclusion and references
97. In the second step of the research report, we have to make:
- (A) A summary of the history of the problem.
 - (B) An essay about the problem.
 - (C) A critical analysis of the problem.
 - (D) A conclusion about the research.
98. The parts of your report consist of cover page, table of contents, abstract, introduction, body, conclusion and ____
- (A) References
 - (B) Annotation
 - (C) All the above
 - (D) None of the above
99. What property of a well-written text can be achieved when a composition contains one focused idea?
- (A) Mechanics
 - (B) Unity
 - (C) Language Use
 - (D) Organization
100. The research report is classified based on 2 things ____
- (A) Nature of research and target audience.
 - (B) Good and Bad
 - (C) Near and far
 - (D) Nature or target
101. What is the first section of a research report?
- (A) Conclusion
 - (B) Introduction
 - (C) Results
 - (D) Methods
102. What is the importance of effective research communication?
- (A) To ensure the research findings are understood by the intended audience
 - (B) To increase the visibility and impact of the research
 - (C) To facilitate collaboration and knowledge sharing
 - (D) All of the above
103. The writing of research reports is best regarded as:
- (A) An Unnecessary chore
 - (B) A Skill
 - (C) Something that most students find easy
 - (D) Just like Writing an Essay
104. In prewriting stage, we have to check the citations and format of your research report.
- (A) TRUE
 - (B) FALSE
 - (C) All the above
 - (D) None of the above
105. When you are stating your delimitations, ____ inform readers why you chose this course of study.
- (A) Clearly
 - (B) Cleanly
 - (C) Objectively
 - (D) Kindly
106. Which of the following could be included in the appendix of the Independent Research Project?
- (A) A copy of interview questions as the source of data, used by the researcher
 - (B) The first draft the researcher wrote of the analysis of their results
 - (C) The list of topic ideas the researcher had before they finalised their choice of topic
 - (D) An explanation of all the primary data collected
107. The title page is the first page of a report. It gives the title of the report, the name of the writer, the name of the school or class, and the date.
- (A) Body
 - (B) Report

- (C) Works cited
 - (D) Title Page
- 108.** Be brief by focusing on your main point.
- (A) Be Clear
 - (B) Be Concise
 - (C) Be Concrete
 - (D) Be Coherent
 - (E) Be Courteous
- 109.** Why is accuracy important in a research report?
- (A) It makes the research more entertaining to read
 - (B) It ensures that findings are credible and based on facts
 - (C) It allows the researcher to share personal opinions
 - (D) It helps make the report shorter
- 110.** Where should the page numbers be located on a research report?
- (A) Left Aligned
 - (B) Centered
 - (C) Right aligned
 - (D) None of the above
- 111.** Which of the following should be the focus of the concluding section of a literature review?
- (A) Summarizing all theories
 - (B) Highlighting research gaps and setting up the study's rationale
 - (C) Listing all references
 - (D) Reporting findings
- 112.** How can you make sure your written documents are easy to understand?
- (A) Use paragraphs, headings and appropriate fonts
 - (B) Include as much technical jargon as possible
 - (C) Write in long complicated sentences
 - (D) Write is so a child could understand it
- 113.** Which of the following is a characteristic of a strong research essay?
- (A) It includes personal opinions without evidence
 - (B) It relies solely on one source
 - (C) It presents a clear argument supported by evidence
 - (D) It uses informal language
- 114.** Which of the following is NOT a characteristic of a research report?
- (A) Clarity
 - (B) Cohesion
 - (C) Emotional tone
 - (D) Objectivity
- 115.** What is one way to ensure logical flow in a research paper?
- (A) Use transition words
 - (B) Skip paragraphs
 - (C) Add unrelated facts
 - (D) Use different fonts
- 116.** What type of academic writing presents the research you are conducting in an encapsulated or condensed form?
- (A) Project proposal
 - (B) Research report
 - (C) Action research
 - (D) Conference paper
- 117.** Following the prescribed structure primarily supports which writing goal?
- (A) Shorter methods and results
 - (B) More figures than references
 - (C) Eliminating the abstract fully
 - (D) Higher word count quickly
 - (E) Clear organization and flow
- 118.** Emi and Brennan are working on their final research report. What is the first step they should take?
- (A) Write the introduction
 - (B) Make an outline
 - (C) Place quotes and illustrations
 - (D) Create a title page

- 119.** A Recommendations section is usually included in a full research report to:
- (A) Suggest improvements, applications, or directions for future research
 - (B) Replace the literature review
 - (C) Provide detailed statistical data
 - (D) Summarize the methodology
- 120.** A literature review should be:
- (A) Objective, organized, and critical
 - (B) Informal and opinion-based
 - (C) Strictly a summary of sources
 - (D) Focused on the researcher's personal views
- 121.** Which of the following is NOT an appropriate place to include a definition of a technical term?
- (A) In the body of the document
 - (B) In a glossary
 - (C) In the introduction
 - (D) On the title page
- 122.** What do you call the first paragraph of your research report?
- (A) Introduction
 - (B) Beginning
 - (C) Conclusion
 - (D) Summary
- 123.** Always use ___ tense in the 'Results' section.
- (A) Simple past
 - (B) Simple present
 - (C) Future
 - (D) None of above
- 124.** Which of the following is a long formal essay with the length of five to fifteen pages presenting the writer's views and findings.
- (A) Book Report
 - (B) Formal Report
 - (C) Research Report
 - (D) Informal Report
- 125.** A manuscript ends by suggesting future directions. Where should this primarily appear?
- (A) Results tables exclusively
 - (B) Methods description section
 - (C) Conclusion and Discussion
 - (D) Abstract background only
- 126.** Ask yourself these questions:a. Who am I writing to? An individual or a group of persons?b. What do they know about the topic?c. What are their job titles and areas of responsibility?
- (A) Purpose
 - (B) Reader/Audience
 - (C) Tone
 - (D) None of above
- 127.** What information should be included in the introduction of a formal report?
- (A) Copies of surveys
 - (B) A discussion of the report findings
 - (C) Conclusions and recommendations
 - (D) Explanation of the problem
- 128.** Which of the following is not one of the seven major parts to the research report?
- (A) Footnotes.
 - (B) Abstract.
 - (C) Results.
 - (D) Method.
- 129.** A research report should be:
- (A) Biased
 - (B) Clear and concise
 - (C) Confusing
 - (D) Personal
- 130.** What happens if interpretation is mixed into the Results section?
- (A) Improves clarity
 - (B) Reduces objectivity
 - (C) Saves time
 - (D) Strengthens conclusions

131. Is the introduction written before or after the research is conducted?
- (A) Before, or written as if your research has not yet been conducted
 - (B) After
 - (C) All the above
 - (D) None of the above
132. 'Overall, the findings of the study suggest that ____' is a phrase to be used in Conclusion Chapter.
- (A) TRUE.
 - (B) FALSE
133. Which of the following is the last component of a research report?
- (A) Recommendations
 - (B) Purpose of the study
 - (C) Background information
 - (D) Methodology
134. Organizing the RRL thematically means:
- (A) Grouping studies based on similar topics or variables
 - (B) Listing them randomly
 - (C) Arranging by author name only
 - (D) Ignoring their relevance
135. In a research report, where would you typically find the list of figures and tables?
- (A) Reference Section
 - (B) Preliminary Section
 - (C) Main Body
 - (D) Appendix
136. A research report is a reliable source to recount details about a conducted research and is most often considered to be a true testimony of all the work done to garner specificities of research.
- (A) True
 - (B) False
 - (C) All the above
 - (D) None of the above
137. Lily and Joseph are working on their report. What should they do with quotes and illustrations?
- (A) Place them at the end of the report
 - (B) Place them in the introduction
 - (C) Place them in the report
 - (D) Place them in the conclusion
138. Which of the following is an example of a Research Report?
- (A) A novel summarizing a fictional story.
 - (B) A marketing research report summarizing the supply and demand statistics for a new product.
 - (C) A personal diary entry discussing daily activities.
 - (D) A recipe book with various cooking instructions.
139. This classification of text asserts an argument.
- (A) Research
 - (B) Essay
 - (C) Report
 - (D) Position Paper
140. The solution to a research problem is presented in the report as a part of the
- (A) Appendix
 - (B) Conclusion
 - (C) Recommendation
 - (D) Findings
141. Which information should you choose to include in your report?
- (A) Everything you have collected
 - (B) Only the most exciting information
 - (C) Only the information from books you have read
 - (D) Information that answers the research questions.
142. The process of taking the research and writing it in expository form.
- (A) Revising

- (B) Drafting
 - (C) Editing
 - (D) None of the above
- 143.** What section of the report includes a sentence summarising the purpose of the investigation, a results summary and a link back to the research question?
- (A) Title
 - (B) Background Theory
 - (C) Conclusion
 - (D) Rationale
- 144.** If you don't know the person's name you could write?
- (A) Yo!,
 - (B) Dear Smith,
 - (C) Dear Madam,
 - (D) Hi Katie,
- 145.** It is important to communicate the main idea by planning and restructuring all the information related to the message. Some extra information should also be given to make the topic more clear.
- (A) Conciseness
 - (B) Correctness
 - (C) Clarity
 - (D) Completeness
- 146.** What is the purpose of revising a paper?
- (A) To add more words
 - (B) To improve clarity and coherence
 - (C) To rewrite the entire text
 - (D) To submit it without review
- 147.** A research report is needed to evolve a theory or a principle.
- (A) True
 - (B) False
- 148.** A specific purpose should be explicitly stated in the introduction of an oral presentation.
- (A) True
 - (B) False
- 149.** Which statement about limitations is most appropriate for the Discussion?
- (A) Acknowledge constraints transparently
 - (B) Omit biases to protect readers
 - (C) Briefly note non-significant data
 - (D) Move all limits to the appendix
- 150.** What does it mean for a source to be relevant?
- (A) It means it is connected to the main idea of the paper and will help support the key points.
 - (B) It means it is hip and with it.
 - (C) It means it is the author's favorite source.
 - (D) It means it has nothing to do with what you're writing about.
- 151.** What is the purpose of the Conclusion section?
- (A) To present data analysis methods
 - (B) To summarize main findings and contributions
 - (C) To list all sources cited
 - (D) To describe the research design
- 152.** What should NEVER be used in a formally written paper?
- (A) Pronouns
 - (B) The pronoun 'you'.
 - (C) Contractions
 - (D) Contractions and the pronoun 'you'.
- 153.** Which is not a characteristic of a good report?
- (A) Illegible
 - (B) Clear
 - (C) Concise
 - (D) Grammatically correct
- 154.** What should you check during revision?
- (A) Formatting and grammar
 - (B) Length only
 - (C) Citation styles only
 - (D) The title only

155. Which type of digital communication is best suited for sharing research findings and analysis?
- (A) Newsletters
 - (B) Reports
 - (C) Collaboration Tools
 - (D) Audio
156. Cohesion
- (A) A claim to offset another claim
 - (B) To make corrections to grammar
 - (C) To give a shortened version of a text
 - (D) Ideas, sentences, and paragraphs are linked together with transitions
157. A full engineering research report differs from a short research paper mainly because it:
- (A) Focuses only on results
 - (B) Provides detailed background, methods, results, analysis, and appendices
 - (C) Has fewer references
 - (D) Excludes methodology
158. Why is the IMRAD format important in scientific research?
- (A) It makes the paper longer
 - (B) It helps organize ideas clearly and logically
 - (C) It replaces the need for data
 - (D) It limits creativity
159. A researcher is discouraged from putting too many words in the research title because it can make the title unclear and less focused.
- (A) It can make the title unclear and less focused.
 - (B) It increases the credibility of the research.
 - (C) It attracts more readers to the research.
 - (D) It ensures the research is more detailed.
160. True or False The Introduction locates study within the existing literature on the topic or field of study.
- (A) TRUE
 - (B) FALSE
 - (C) All the above
 - (D) None of the above
161. In the recommendations section, the researcher must not highlight the implications of the findings of the study as examples of practical recommendations.
- (A) True
 - (B) False
162. Which of the following is the step for preparation of the report
- (A) Main body of the report-preliminary section-reference section.
 - (B) Reference section-preliminary section-main body of the report.
 - (C) Preliminary section-main body of the report-reference section.
 - (D) Reference section-main body of the report-preliminary section.
163. What is the final step after completing a research project?
- (A) Starting a new research project immediately
 - (B) Sharing findings through publication or presentation
 - (C) Keeping the results a secret
 - (D) Skipping the conclusion to save time
164. It recognizes persons to whom the author is indebted for guidance and assistance.
- (A) Dedication
 - (B) Acknowledgement
 - (C) Approval Sheet
 - (D) None of above
165. What is not true about writing a research title?
- (A) Be clear and concise.
 - (B) Avoid abbreviations.
 - (C) Use question marks.
 - (D) Check the journal's style guide.

- 166.** What is the strongest reason for reporting the demographic information of participants in research reports?
- (A) Readers will be able to assess the reliability of the conclusions.
 - (B) Readers will be able to assess the generalizability of any effects.
 - (C) Readers will be able to assess if you had conducted the study fairly.
 - (D) Readers will be able to assess the claims in your abstract better.
- 167.** Enables you to thank all those who have helped in carrying out the research.
- (A) Thank you note
 - (B) Acknowledgements
 - (C) Abstract
 - (D) Cover Page
- 168.** Each table within a report should have a title and a number
- (A) Under the table
 - (B) In the first row of the table
 - (C) Above the table
 - (D) In the first column of the table
- 169.** Which part of a research report provides the necessary background through prior studies?
- (A) Chapter 1: Introduction
 - (B) Chapter 2: Review of Related Literature
 - (C) Chapter 3: Design of the Study
 - (D) Chapter 4: Data Analysis and Interpretation
 - (E) Chapter 5: Summary and Conclusion
- 170.** In which section of the research report might the problem statement be located?
- (A) Chapter 1: introduction
 - (B) Chapter 2: literature review
 - (C) Chapter 3: research design
 - (D) Chapter 4: research analysis
- 171.** Final stage in the Research Process is
- (A) Data Analysis
 - (B) Report Writing
- 172.** Which component ensures accountability by naming investigators, study site, and funding body?
- (A) Time frame or schedule
 - (B) General information
 - (C) References list
 - (D) Budget and resources
- 173.** Which is the right sequence in report writing?
- (A) Introduction-Data collection-Conceptual framework
 - (B) Introduction-Sampling-Conceptual framework
 - (C) Introduction-Literature and hypothesis-Conceptual framework
 - (D) All of the above
- 174.** A marketing team submits a detailed report to their manager outlining the results of their latest campaign, including data analysis, key findings, and recommendations for future strategies.
- (A) Oral Communication
 - (B) Written Communication
 - (C) All the above
 - (D) None of the above
- 175.** What is the final step after giving yourself permission to be done with the paper?
- (A) Start the editing process again
 - (B) Submit the paper without any final read-through
 - (C) Print out the final draft and give it one final read-through
 - (D) Ask for more feedback
- 176.** What should the Recommendations section of a research report include?
- (A) Interpretation of findings
 - (B) Limitations of the study
 - (C) Related literature
 - (D) Suggestions for improving the study

177. What line spacing should be used in the body of a research report?
- (A) Single
 - (B) Double
 - (C) Triple
 - (D) None of the above
178. The research papers are written to
- (A) Communicate the research.
 - (B) Become popular in the society.
 - (C) Gain a lot of money.
 - (D) None of the above.
179. The language of the report should be ____
- (A) Formality
 - (B) Formal
 - (C) Casual
 - (D) Loose
180. Finding valid sources is very important in your research report.
- (A) TRUE
 - (B) FALSE
 - (C) All the above
 - (D) None of the above
181. It is part of the research report where the discussion flows.
- (A) Body
 - (B) Conclusion
 - (C) Introduction
 - (D) Recommendations
182. Why is outlining important for a research paper
- (A) I have to turn it in for a grade
 - (B) Research papers are too long to do without one
 - (C) Gives you a guide to follow and exposes where you may need to do more research
 - (D) Outlines are just busy work
183. It is a completed study that reports an investigation or exploration of a problem, identifies questions to be addressed, and includes data collected, analyzed, and interpreted by the researcher.
- (A) Article Research Report
 - (B) Research report
 - (C) Thesis
 - (D) Research Proposal
184. What is the typical layout of a research report?
- (A) Title, Abstract, Introduction, Methodology, Results, Discussion, Conclusion, References
 - (B) Title, Introduction, Results, Discussion, Conclusion
 - (C) Title, Abstract, Methodology, Results, Conclusion
 - (D) Title, Introduction, Methodology, Results, Conclusion
185. What is the final phase in empirical research
- (A) Evaluation of existing research
 - (B) Data analysis
 - (C) Preparation of a research report
 - (D) None of above
186. A multi-page document that usually contains several sub-topics of information related to one main topic.
- (A) Title
 - (B) Header
 - (C) Research report
 - (D) None of the above
187. When writing up your research, which of the following should you not do?
- (A) Start early.
 - (B) Be persuasive.
 - (C) Avoid your supervisor.
 - (D) Avoid racist, sexist.
188. Research reports are recorded data prepared by university students after analyzing information gathered by conducting organized research, typically in the form of surveys or qualitative methods.
- (A) True

- (B) False
 - (C) All the above
 - (D) None of the above
- 189.** What structure presents the results of the systematic investigation?
- (A) Discussion
 - (B) Review of Literature
 - (C) Findings
 - (D) Conclusion
- 190.** In which section of a research report would you find suggestions for future research?
- (A) Results and discussion
 - (B) Conclusion
 - (C) Purpose of current research
 - (D) Summary of previous research
- 191.** Why is it important to follow a standardized format in research reports?
- (A) To impress the audience with complex writing
 - (B) To ensure consistency, credibility, and readability
 - (C) To make the report harder to understand
 - (D) To allow the researcher to write freely without structure
- 192.** Tara is preparing a research report for her final project. She needs to ensure that she follows the correct sequence in report writing. Which is the right sequence for her to follow?
- (A) Introduction-Data collection-Conceptual framework
 - (B) Introduction-Sampling-Conceptual framework
 - (C) Introduction-Literature and hypothesis-Conceptual framework
 - (D) All of the above
- 193.** The advantage of Research report writing in a scientific manner is
- (A) Global Standardization.
 - (B) Global Communication.
 - (C) Global Awakening.
 - (D) Global Welfare.
- 194.** All of the following are important to do in your writing to make your research paper academic and effective EXCEPT which one?
- (A) Avoid overly emotional language in your writing.
 - (B) Avoid specific examples in your writing.
 - (C) Use academic vocabulary instead of informal language.
 - (D) Avoid slang and cliché expressions in your writing.
- 195.** Ellen, Orion, and Kolten are working on their research report. What should they place right after the title page?
- (A) The introduction
 - (B) The conclusion
 - (C) The table of contents
 - (D) The references
- 196.** Why is it important to follow the mechanics of writing in a research report?
- (A) To ensure clarity and readability
 - (B) To collect data
 - (C) To analyse data
 - (D) To present data
- 197.** The research purpose should be clearly stated and identifiable in the research report
- (A) True
 - (B) False
- 198.** What phase in writing a research report includes revising and completing?
- (A) Writing a draft
 - (B) Finalizing the report
 - (C) Writing an outline
 - (D) Conducting the research
- 199.** What is the main focus of the Individual Research Report?
- (A) To entertain the reader
 - (B) To analyze a problem or issue
 - (C) To describe a personal experience
 - (D) To argue a point of view

200. Research report serves as a means for presenting the problem studied, methods and techniques used.
- (A) True
 - (B) False
 - (C) Juniors
 - (D) Parents
201. The method of Research reporting should be
- (A) Scientific.
 - (B) Ethical and attractive.
 - (C) Personal.
 - (D) Favorable to globalization.
202. A closing paragraph that summarizes the main points of your research and is intended for the readers to know why your research should matter to them after they read it.
- (A) Introduction
 - (B) Conclusion
 - (C) Results
 - (D) Thesis Statement
203. This is where the author states well-articulated outcomes of the study and briefly suggests future lines of research in the area based on findings reported in the paper.
- (A) CONCLUSION
 - (B) REFERENCES
 - (C) INTRODUCTION
 - (D) ABSTRACT
204. It provides a brief overview of the study as it relates to its intended goals and contributions.
- (A) Background of the Study
 - (B) Introduction
205. The most important section of a report to a reader is the conclusions and recommendations.
- (A) True
 - (B) False
206. Always consider your ____ when writing anything.
- (A) Boss
 - (B) Audience
207. What is a crucial aspect of writing a research report?
- (A) Clarity and conciseness
 - (B) Overuse of illustration
208. How should the results section of a research report be organized?
- (A) By presenting the literature review first
 - (B) By restating the major findings
 - (C) By discussing the limitations of the study
 - (D) By following the flow of the research questions
209. What should be the point of view in a research report?
- (A) First person
 - (B) Second person
 - (C) No specific point of view
 - (D) Third person
210. What is the importance of formatting a research report?
- (A) To include irrelevant information
 - (B) To confuse readers
 - (C) To create a desirable impression with clarity
 - (D) To make it longer
211. How can a research title impact the visibility of a study?
- (A) Only the abstract affects the visibility of a study
 - (B) A long title is always more visible
 - (C) A clear and relevant title can improve searchability and attract more readers
 - (D) It has no impact on visibility
212. In a technical report which one of the following must be avoided?
- (A) Facts
 - (B) First Person discussion or usage
 - (C) Logical conclusion
 - (D) Literature review

- 213.** Here is an excerpt of a research report: "Our findings shed light on the nature of human's ability to identify in-and out-groups based on language. Our study is one of the first to examine the effects of early language exposure on in-group bias in 4-month-old infants." What section of the research report is the excerpt most likely to be in?
- (A) The introduction
 - (B) The results
 - (C) The discussion
 - (D) The methods
- 214.** Conclusion is usually integrated with..
- (A) Introduction
 - (B) Method
 - (C) References
 - (D) Discussion
- 215.** The research reporting should be carried out
- (A) Through copying.
 - (B) In a scientific way.
 - (C) Through discussion among the scientists.
 - (D) In an imaginary way.
- 216.** The editor is likely to send your manuscript out for review if
- (A) There are enough reviewers that they can pay to review your work.
 - (B) The match between your manuscript and the scope of the journal is strong.
 - (C) Your manuscript has more than one author.
 - (D) Reviewers like you.
- 217.** It is a suggestion given for the improvement of the research.
- (A) Conclusion
 - (B) Abstract
 - (C) Recommendation
 - (D) Summary of findings
- 218.** Which of the following best describes how research should usually be presented in the body of a literature review report?
- (A) The major findings of the study should be briefly reported.
 - (B) Most of the details of how the study was conducted should be carefully described.
 - (C) The abstract of the research should be paraphrased.
 - (D) Only the reference to the study should be provided.
- 219.** Where do scientists typically publish their research findings?
- (A) Popular magazines
 - (B) Social media platforms
 - (C) Peer-reviewed journals
 - (D) Newspapers
- 220.** The introduction section should:
- (A) Present background and rationale for the study
 - (B) Include raw data
 - (C) Contain appendices
 - (D) Only list previous work
- 221.** Literature reviews have multiple characteristics, including the tendency to be very focused on a specific research question, and which of the following?
- (A) They are often created without established guidelines for content and formatting.
 - (B) They are rarely published in journals.
 - (C) They are solely a long list of critical summaries
 - (D) They can be included in a research proposal, an empirical journal article, or can be a standalone article.
- 222.** What must students do for the research report assignment?
- (A) Investigate research questions and write up findings in an academic report
 - (B) Take a math test
 - (C) Read a storybook
 - (D) Draw a picture

- 223.** "Organize the information" means:
- (A) Review your material
 - (B) Be sure that you have a suitable structure or outline of the report
 - (C) Make a list of all the potential topics or sections of the report
 - (D) Highlight key terms and ideas that relate to the purpose of the report
- 224.** A common mistake in writing results and discussion is:
- (A) Presenting data with visuals
 - (B) Separating raw results from interpretation
 - (C) Mixing results, analysis, and conclusion in one section without clarity
 - (D) Highlighting significant findings
- 225.** An annotated bibliography will also be useful when
- (A) Analyzing data
 - (B) Writing your data commentary
 - (C) Writing a literature review
 - (D) None of the above
- 226.** Anika, a Grade 10 student, was tasked by the teacher to submit a completed study that reports an investigation or exploration of a problem by identifying questions to be addressed, and includes data collected, analyzed and interpreted. What does the teacher actually want Anika to do?
- (A) Research Report
 - (B) Science Project
 - (C) Reflection paper
 - (D) Documentaries
- 227.** Choose true or false There is no single way to structure a research report, but there are certain elements that must be present.
- (A) True
 - (B) False
 - (C) All the above
 - (D) None of the above
- 228.** These are presented, through tables and graphs, in chronological order based on how problems are stated.
- (A) Methods
 - (B) Discussion
 - (C) Conclusion
 - (D) Results
- 229.** The research report should have
- (A) The preliminary, main text and end matter.
 - (B) Only the main text.
 - (C) The preliminary and main text.
 - (D) All the research findings.
- 230.** What is the significance of a well-defined research title?
- (A) It helps in indexing the research
 - (B) It ensures funding for the research
 - (C) It guarantees publication
 - (D) It attracts more researchers
- 231.** Which part of a research report contains the conceptual framework of the study?
- (A) Chapter 1:Introduction
 - (B) Chapter 2:Literature Review
 - (C) Chapter 3:Methodology
 - (D) Chapter 4:Data Analysis
- 232.** The introductory section of a research report should aim to:
- (A) Identify the specific focus of the study
 - (B) Provide a rationale for the dissertation, or article
 - (C) Grab the reader's attention
 - (D) All of the above
- 233.** The tone of a research report should be:
- (A) Emotional and persuasive
 - (B) Objective and formal
 - (C) Casual and conversational
 - (D) Critical and biased

234. Communicates what was actually done in a study and what resulted refers to..
(A) A proposal
(B) A research proposal
(C) A research
(D) A research report
235. What tone should a research report use?
(A) CASUAL
(B) INFORMAL
(C) FORMAL
(D) FRIENDLY
236. Making a good introduction is very important in research?
(A) Yes
(B) No
(C) Maybe
(D) None of these
237. The person or persons who are meant to read the text
(A) Characters
(B) Audience
(C) Authorship
(D) Format
238. True or False: Shade A if the statement is TRUE; Shade B if the statement is FALSE. A review of related literature should be written as a coherent and organized discussion.
(A) True
(B) False
239. What are the types of Research Reports?
(A) Warrants
(B) Audiovisual materials
(C) Journal articles
(D) Protocols
240. Clear and accurate information/ data are presented and analyzed in the body of a research report.
(A) TRUE
(B) FALSE
(C) All the above
(D) None of the above
241. The Introduction of a full research report should:
(A) Present detailed numerical results
(B) Provide background, research problem, objectives, and significance of the study
(C) List only the references used
(D) Contain raw data tables
242. Why is preparing outline important in writing a research report?
(A) This will provide the writer the information he or she needs.
(B) This will help the writer organize his or her notes and thoughts
(C) This will guide the writer to come up with a successful result in writing project
(D) This will help the organizer and reader to understand the explained title.
243. The title of a research report should be short and specific.
(A) TRUE
(B) FALSE
(C) All the above
(D) None of the above
244. What is the importance of a well-structured research report?
(A) It limits the audience for the research findings.
(B) It reduces the credibility of the research.
(C) It complicates the understanding of research methods.
(D) It enhances clarity and communication of research findings.
245. The ___ commonly features a summary of the results that were obtained in the study, describes how those results address the topic under investigation
(A) Discussion
(B) Abstract
(C) Methods
(D) References

246. Reports should be written using ____ language.
- (A) Descriptive
 - (B) Informal
 - (C) Persuasive
 - (D) Formal
247. Which statement is correct about the ending summary?
- (A) It focuses on the major findings of the report
 - (B) It has more detailed information than the executive summary
 - (C) It reviews all the sections of the research report
 - (D) It contains the same information as the executive summary
248. Which section of the report introduces the research focus and key terms?
- (A) Introduction
 - (B) Title Page
 - (C) Discussion
 - (D) References
249. Which of the following is NOT a recommended strategy for enhancing the readability of a research proposal?
- (A) Using consistent terms throughout the proposal
 - (B) Using transitional words and phrases to connect ideas
 - (C) Using complex and technical language to demonstrate expertise
 - (D) Presenting ideas in a clear and orderly manner
250. Which ONE of these phrases is best avoided in a proposal?
- (A) This research seeks to ____
 - (B) This research draws upon the work of ____
 - (C) The intention is to complete the study by ____
 - (D) I hope to ____
251. What is the first part of structuring the final report?
- (A) Results
 - (B) Methods
 - (C) Introduction
 - (D) Discussion
252. RESEARCH REPORT IS THE LAST PHASE OF RESEARCH
- (A) FALSE
 - (B) TRUE
 - (C) All the above
 - (D) None of the above
253. Why is report preparation an essential part of research?
- (A) It serves as a final evaluation of the research
 - (B) It is not necessary if the data is clear
 - (C) It complicates the research findings
 - (D) It delays the dissemination of results
254. Reports should be ____
- (A) Objective
 - (B) Subjective
 - (C) Neither objective nor subjective
 - (D) Both objective and subjective
255. What should be included in the body of a research report?
- (A) Personal anecdotes and experiences
 - (B) Information from notecards and sources
 - (C) A variety of opinions
 - (D) Quotations from multiple sources
256. The purpose of ____ is to communicate to the readers the methodology & the results of the study
- (A) Research design
 - (B) Research problem
 - (C) Research
 - (D) Research report.

257. A title reads: "Health." Which revision best follows guidance on titles and keywords?
- (A) "Hospital hand hygiene compliance among nurses"
 - (B) "Storytime: our journey in hospital research"
 - (C) "All about health and wellness generally"
 - (D) "Super-detailed analysis of every hospital issue ever"
258. How is the title of a research report formatted?
- (A) Left align, initial caps
 - (B) Centered, initial caps
 - (C) Centered, all caps, bold
 - (D) Left align, all caps, bold
259. Organization is not essential to your research report. Readers can still understand your point.
- (A) TRUE
 - (B) FALSE
 - (C) All the above
 - (D) None of the above
260. Layout of a research report does NOT include:
- (A) Title page
 - (B) Table of contents
 - (C) Bibliography
 - (D) Voucher copy
261. What should be considered when discussing limitations in a research report?
- (A) Limitations should be acknowledged and discussed critically
 - (B) Limitations should be discussed in a separate section
 - (C) Limitations should be ignored
 - (D) Limitations should be mentioned briefly without analysis
262. Which of the following choice s states the role of Significance of the Study in a research report?
- (A) It provides an overview of the scope of the research.
 - (B) It discusses previous studies done on the chosen topic.
 - (C) It cites the benefits one can get from the findings of the research.
 - (D) It articulates what the writer intends to find out or achieve in the study.
263. It is a systematic arrangement of data, usually in rows and columns, for ready reference.
- (A) Charts
 - (B) PowerPoint
 - (C) Table
 - (D) Video
264. Which of the following research documents is NOT considered a research report?
- (A) Case study
 - (B) Peer-reviewed journal article
 - (C) Blog post
 - (D) Thesis
265. The final part of a research report is usually:
- (A) Methodology
 - (B) Conclusion
 - (C) Keywords
 - (D) Bibliography
266. The form of presentation of research results is not ____
- (A) Publishing an analytical review of research work in the form of an article;
 - (B) Publishing them as an article in scientific journals;
 - (C) Publishing them as an article in scientific and industrial journals;
 - (D) Publishing them in the form of an article in collections of scientific works;
 - (E) Publishing them in the form of an article in scientific and practical conferences;
267. Checking the capitalitization, grammar, and spelling of my report is in this step:
- (A) Outlining

- (B) Drafting
(C) Revising
(D) Proofreading
268. There is no need to follow the structure of a research report.
(A) TRUE
(B) FALSE
(C) All the above
(D) None of the above
269. What part of an essay or a research paper is found at the end of the paper?
(A) Rough draft
(B) Conclusion
(C) Introduction
(D) Topic
270. When selecting the right medium for a report
(A) You should choose the ones that are most convenient.
(B) You should choose the ones that are most economical
(C) Your decisions should reflect your audience's expectations.
(D) You should always present your report in writing.
271. Which part of a research report summarizes the findings?
(A) Introduction section
(B) Discussion section
(C) Results section
(D) Literature review section
272. A reason or set of reasons that something is true, with evidence
(A) Bibliography
(B) Argument writing
(C) Claims
(D) Counterargument
273. To find out what previous researchers have done in relation to the current study, the best place to find that information would be in a research report's
(A) Introduction
(B) Methods
(C) Results
(D) Abstract
274. The function of the Results section is to:
(A) Objectively present your key results, without interpretation
(B) Establish the context of the work being reported
(C) The organism(s) studied
(D) How the data were analyzed
(E) Explain clearly how you carried out your study in the following general structure and organization
275. What type of essay is the Individual Research Report?
(A) Descriptive essay
(B) Opinion essay
(C) Research report/Literature review
(D) Persuasive essay
276. Which of the following is a benefit of having a well-defined research title?
(A) It allows for more extensive funding opportunities
(B) It helps in attracting the right audience to the research
(C) It simplifies the peer review process
(D) It guarantees publication in high-impact journals
277. Which of the following is NOT a component of a typical research report?
(A) Abstract
(B) Methodology
(C) Personal anecdotes
(D) Findings
278. A research report opens with background information followed by a ____
(A) Objective

- (B) Thesis Statement
 - (C) Personal reflection
 - (D) None of the previous options
279. Expresses gratitude to individuals or organizations that contributed to the research.
- (A) ACKNOWLEDGEMENTS
 - (B) ABSTRACT
280. What are some common mistakes to avoid in research report formatting?
- (A) Neglecting to number sections
 - (B) Inconsistent formatting styles, improper citation methods, lack of clear structure, excessive use of jargon, failure to proofread for errors
 - (C) Including irrelevant data
 - (D) Using inconsistent fonts
281. What comes after you finish your first draft of your research report (thesis, dissertation, or article)?
- (A) You finished your work! Now relax.
 - (B) You will now be revising, revising, and then revising some more.
 - (C) You can submit your work to your advisor.
 - (D) You should submit your work to an academic journal.
282. It is a systematic write up on the findings of the study and follows a definite style.
- (A) Body
 - (B) Conclusion
 - (C) Objectives
 - (D) Research Report
283. Research report provides systematic knowledge on problems and issues analyzed.
- (A) True
 - (B) False
284. All of these are reasons that clarity is lost in academic writing EXCEPT for...
- (A) Misspellings
 - (B) Using acronyms
 - (C) Proper use of adjectives and adverbs
 - (D) Too many ideas in a small space
285. It is an expanded paper that presents interpretations and analyses of a phenomenon based on experiments and previous information
- (A) RESULTS
 - (B) DISCUSSION
 - (C) CONCLUSION
 - (D) REFERENCES
 - (E) RESEARCH REPORT
286. In report writing, which section interprets the meaning of data?
- (A) Review of literature
 - (B) Abstract
 - (C) Discussion
 - (D) Bibliography
287. A disadvantage of using reports to communicate
- (A) Could over simplify a topic too much
 - (B) Can become too complex and messy with too many components
 - (C) If the information does not flow between sections it can become confusing
 - (D) Time and skill to create is at higher levels
288. What is a monograph?
- (A) A collection of articles on various topics
 - (B) A detailed written study on a single subject
 - (C) A type of patent
 - (D) A brief summary of multiple studies
289. In the weak report about the train issue, what is the biggest problem with the sentence: "There was a problem with the signal or something"?
- (A) Too long
 - (B) Contains jargon
 - (C) Vague and imprecise
 - (D) Too many details

- 290.** A good research report is one which
- (A) Communicates the research findings to the persons from whom the data collected.
 - (B) Communicates the research findings in simple form to the readers.
 - (C) Communicates the research findings to the government.
 - (D) Communicates the research findings to the business community.
- 291.** The research report follows a format similar to that of an academic essay?
- (A) True
 - (B) False
 - (C) All the above
 - (D) None of the above
- 292.** “The Perception of Grade 10 Students on the Growing Numbers of LGBT in Tappaan Integrated School,” is what structure of a research report?
- (A) Title
 - (B) Table of Contents
 - (C) Findings
 - (D) Abstract
- 293.** What was a primary characteristic of past academic writing?
- (A) Accessibility
 - (B) Informality
 - (C) Rigid structure
 - (D) Broad audience focus
- 294.** The front matter of a formal report refers to the preliminary sections before the body section.
- (A) True
 - (B) FALSE
- 295.** Research reports are used in academic and professional settings.
- (A) TRUE
 - (B) FALSE
 - (C) All the above
 - (D) None of the above
- 296.** What is optional to include on the title page of a research report?
- (A) The name of the document
 - (B) The writer's name
 - (C) The teacher/professor's name
 - (D) The date of publication
- 297.** Research report is a means for evaluating research ability.
- (A) True
 - (B) False
- 298.** When writing a research proposal, the introduction is a preview of the whole study.
- (A) True
 - (B) False
- 299.** What is the main purpose of the Methods section in a research report?
- (A) To explain the research findings
 - (B) To describe how the research was conducted
 - (C) To interpret the data
 - (D) To discuss future research directions
- 300.** What section of a research report typically includes the title page, acknowledgments, and abstract?
- (A) Main Body
 - (B) Reference Section
 - (C) Preliminary Section
 - (D) Conclusion
- 301.** How will you present gathered information in the body of the research report?
- (A) By using charts, graphs, or tables
 - (B) By using dialogues and quotations
 - (C) By using end notes or foot notes
 - (D) By using survey questionnaires
- 302.** Only the ____ should be in the header (margin) of a research report.
- (A) Page Number
 - (B) Teacher Name
 - (C) Date
 - (D) Class Name

- 303.** What is the significance of using varied sources in a research paper?
- (A) It makes the paper longer
 - (B) It enhances credibility and depth of analysis
 - (C) It simplifies the writing process
 - (D) It reduces the need for citations
- 304.** A research report is a well-crafted document that outlines the processes, data, and findings of a systematic investigation.
- (A) True
 - (B) False
 - (C) All the above
 - (D) None of the above
- 305.** Which statement about readers is most accurate?
- (A) Your audience consists only of the reader(s) for whom the report was originally intended.
 - (B) No matter who your audience is, you should include as much detail as possible in your report.
 - (C) Your intended audience will affect things like your writing style and vocabulary.
 - (D) Even if your readers support the project, you should still use persuasive strategies to ensure the project is accepted.
- 306.** What is a tangible output of project research?
- (A) An unorganized collection of data
 - (B) A brief conversation with peers
 - (C) A report
 - (D) An opinion piece
 - (E) A preliminary idea
- 307.** It highlights the major topics that are covered and provides background information on why the data in the report was collected.
- (A) Introduction
 - (B) Background of the study
 - (C) Table of contents
 - (D) Results and discussion
- 308.** Effective academic writing should be:
- (A) Vague and informal
 - (B) Clear, coherent, and precise
 - (C) Full of fragments
 - (D) Repetitive and confusing
- 309.** Imagine you did an experiment in which you taught tricks to a group of dogs. Which of the following is the best example of a title for a graph in your lab report based on this experiment?
- (A) Average number of tricks performed by dogs after 3 weeks of training
 - (B) Figure 1. Number of tricks
 - (C) Figure 1. Average number of tricks performed by dogs after 3 weeks of training
 - (D) Table 1. Average number of tricks performed by dogs after 3 weeks of training
- 310.** Dylan is designing his document to enhance readability and comprehension. What is the best advice you can give Dylan?
- (A) Justify the left and right margins so they are both even.
 - (B) Create white space by using headings, bulleted or numbered lists, short paragraphs, and effective margins.
 - (C) Use multiple typefaces within the document.
 - (D) Use ALL CAPS anywhere in a document you want to emphasize your point.
- 311.** A well-written Results section should prioritize which combination?
- (A) Detailed theoretical debate
 - (B) Effective tables and figures
 - (C) Speculative mechanisms
 - (D) Clear findings presentation
- 312.** Where do I look to find what pages a name, place or important fact is mentioned?
- (A) Table of Contents
 - (B) Book Title
 - (C) Glossary
 - (D) Index

- 313.** What is necessarily true if you know that a researcher is an author on a certain research article?
- (A) That he or she was involved in the data analysis
 - (B) That he or she was involved in the inception or development of that study
 - (C) That he or she was did something hands on with the project
 - (D) That he or she was critical on at least one intellectual component of the study
- 314.** What is the primary purpose of using the IM-RAD format in research reporting?
- (A) To ensure the paper is lengthy and detailed
 - (B) To make the research paper concise and ready for publication or presentation
 - (C) To provide an informal overview of the study
 - (D) To organize the bibliography into thematic sections
- 315.** Choose the right definition of limitations:
- (A) Summary of quantitative information presented as a chart, graph
 - (B) Suggestions made by the researcher about additional studies
 - (C) Potential weaknesses or problems with the study identified by the researcher
 - (D) Statement that reviews the major conclusions to each of the research questions
- 316.** What are the 3 parts of a research report?
- (A) Abstract, Thesis Statement, Conclusion
 - (B) Introduction, Body, Conclusion
 - (C) Research Questions, Result, Recommendations
 - (D) None of the above
- 317.** A strong Introduction should primarily demonstrate which quality?
- (A) Logical, relevant background and rationale
 - (B) Extensive statistical analysis and tests
 - (C) Detailed budget and procurement plan
 - (D) Personal opinions of the researcher
- 318.** How can you show what you learned from your research?
- (A) Write a report.
 - (B) Make a poster to show other people.
 - (C) Both a and b
 - (D) None of above
- 319.** What should be included in the literature review section of a research report?
- (A) Personal opinions on the topic
 - (B) Summary of existing research, identification of gaps, discussion of theoretical frameworks, analysis of methodologies.
 - (C) Future research predictions
 - (D) Historical context of the research
- 320.** The final paragraph of an article can begin with which of the following words?
- (A) Inadvertantly.
 - (B) Beautifully.
 - (C) Furthermore or secondly.
 - (D) In conclusion or finally.
- 321.** An informative title is preferred when writing a research report.
- (A) True
 - (B) False
 - (C) All the above
 - (D) None of the above
- 322.** What type of specialized language should you avoid to ensure your writing is easily interpreted by a wide audience?
- (A) Jargon
 - (B) Synonyms
 - (C) Verbs
 - (D) Articles
- 323.** What type of report is presented after carrying out industry-based research?
- (A) Technical Research Report
 - (B) Qualitative Research Report
 - (C) Quantitative Research Report
 - (D) Popular Research Report

324. Which of the following is a formal way to communicate in a workplace?
- (A) Report writing
 - (B) Social media posts
 - (C) Informal text messages
 - (D) Casual conversation
325. Which section of a research report provides a detailed account of the procedures and techniques used to conduct the research?
- (A) Introduction
 - (B) Methodology
 - (C) Results
 - (D) Discussion
326. Restates thesis and main points. Tells the importance of the topic.
- (A) Concluding paragraph
 - (B) Introductory paragraph
 - (C) Body paragraph
 - (D) Thesis
327. How does the limitations section help readers?
- (A) By providing entertainment
 - (B) By helping them understand the scope of the research
 - (C) By confusing them with technical jargon
 - (D) By offering unrelated information
328. How does a research adviser typically support the publication process?
- (A) By writing the entire paper
 - (B) By providing feedback and revisions
 - (C) By designing the journal layout
 - (D) By selecting the journal
329. The executive summary of a research report includes ____
- (A) All the materials necessary for replication
 - (B) A synopsis of the problem, findings, and recommendations
 - (C) A summary of findings from secondary sources and the research design
 - (D) Recommendations and implementation strategies
330. Which criterion best evaluates a Title & Abstract in a research report?
- (A) Highly technical, dense, exceeds scope and detail
 - (B) Focuses on citations and formatting exclusively
 - (C) Concise, informative, reflects purpose and scope
 - (D) Narrative style, creative language, minimal data
331. What is the Body of the Report referred to?
- (A) The introduction of the report
 - (B) The content of the report (the paragraphs)
 - (C) The conclusion of the report
 - (D) The appendix of the report
332. Which part of the research report that holds the findings of the study and the discussion of each findings?
- (A) Introduction
 - (B) Methodology
 - (C) Results and Discussion
 - (D) Review of Related Literature
333. Contains all copies of the questionnaire, tables, certificates, checklist and all the essential and necessary materials that have been used to complete the research study
- (A) Recommendation
 - (B) Conclusion
 - (C) Discussion
 - (D) Acknowledgement
 - (E) Appendices
334. Why is it important to identify the limitations in a research report?
- (A) To demonstrate the potential biases of the researcher
 - (B) To highlight areas for further research
 - (C) To avoid addressing gaps in the study
 - (D) To narrow down the research scope

335. A key guideline when reporting results is to provide:
- (A) Unrelated information
 - (B) Clear and unbiased presentation of findings
 - (C) Explanations unrelated to the data
 - (D) None of these
336. Before you write anything, ask yourself these two questions:
- (A) 1. What do I need to say? 2. Who is my audience?
 - (B) 1. Who is my audience? 2. What reaction do I want?
 - (C) 1. What type of writing should I do? 2. Who is my audience?
 - (D) 1. What's for dinner? 2. Why is there a weird smell coming out of my book bag?
337. Which section is NOT typically included in a research report?
- (A) Results
 - (B) Personal Reflections
 - (C) Methods
 - (D) Introduction
338. When writing your background chapters, it is better to use the style and referencing that you intend to use in the final research report.
- (A) True
 - (B) False
339. The form of a thesis, dissertation or paper is the ___ research
- (A) Correction
 - (B) Submission
 - (C) Reporting
 - (D) Valuation
340. What is the recommended format for a research report?
- (A) One-size-fits-all
 - (B) Depends on relevant variables
 - (C) No specific format needed
 - (D) Long and complex
341. The ___ of the Report is referred to as the content
- (A) Title
 - (B) Footnote
 - (C) Header
 - (D) Body
342. Which of the following is a precaution to take when writing a research report?
- (A) Avoiding plagiarism
 - (B) Ensuring accuracy of data
 - (C) Providing proper citations
 - (D) All of the above
343. What is the suggestion for letting other people look over your paper?
- (A) Let multiple people read the first draft
 - (B) Let only one person read the final draft
 - (C) Don't let anyone read the first draft
 - (D) Let only one person read the first draft
344. What should be avoided in writing a literature review?
- (A) Listing sources without synthesis.
 - (B) Synthesizing key findings.
 - (C) Highlighting gaps.
 - (D) Comparing studies.
 - (E) Analyzing methods.
345. What should be included in the introduction?
- (A) Method
 - (B) Arguments
 - (C) Importance
 - (D) References
346. Which expression cannot be used in a formal e-mail.
- (A) Sincerely yours
 - (B) Yours faithfully
 - (C) Kisses
 - (D) Best regards

347. "Finally, I'd like to highlight one key issue". The above sentence is belong to ____ part:
(A) Body
(B) Introduction
(C) Conclusion
(D) None of above
348. Some general advice for preparing the written report includes all except
(A) Make sure the report represents you and your work
(B) Do not organize the report by stages of the research
(C) Do not write for your audience
(D) Do not discuss explanations report using statistics
349. The Results section should be organized
(A) Around Tables and/or Figures that should be sequenced to present your key findings in a logical order
(B) Around Methods
350. Always keep the ____ in mind as you write.
(A) Length
(B) Audience
(C) Logic
(D) Presentation
351. In a lab report, which section would you find graphs and tables summarizing the data collected?
(A) Introduction
(B) Results
(C) Methods
(D) DiscussionTagsDOK Level 2: Skill/Concept
352. Hey Kolten, what should you check to ensure your report has all the necessary parts?
(A) The title page
(B) The research report checklist
(C) The table of contents
(D) The introduction
353. A quantitative research report has many components, including all of the following except ____
(A) Discussion
(B) Results
(C) Speculation
(D) None of above
354. Choose true or falseA research report is a well-crafted document that outlines the processes, data, and findings of a systematic investigation.
(A) True
(B) False
(C) All the above
(D) None of the above
355. Which of the following method is used to make a research report?
(A) Scientific method.
(B) Ethical method.
(C) Attractive method.
(D) Personal method.
356. What is the standard spacing for the text in a research report?
(A) Quadruple spacing
(B) Single spacing
(C) Double spacing
(D) Triple spacing
357. The implications need to be substantiated by evidence and the study's parameters need to be explained and the limitations should be taken into account to avoid over-generalization of results.
(A) True
(B) False
358. How should the margins be set for a research report?
(A) 0.5 inch on all sides
(B) 1 inch on all sides
(C) 2 inches on all sides
(D) 1.5 inches on all sides

- 359.** The first step in writing a good research report is to:
- (A) Choose your topic
 - (B) Decide the main ideas
 - (C) Make note cards
 - (D) Write an outline
- 360.** Each body paragraph should include
- (A) A hook
 - (B) A thesis
 - (C) Topic sentence, explanation, evidence and a link
 - (D) No more than three sentences Edit
- 361.** The — provides detail about the collected sample and demonstrates how representative it is of the target market population.
- (A) Executive summary
 - (B) Respondent profile
 - (C) Methodology
 - (D) Detailed findings
- 362.** Why is it important to discuss the significance of the study?
- (A) To summarize the findings of the study.
 - (B) To provide a detailed methodology of the research.
 - (C) To list all the authors involved in the study.
 - (D) It is important to discuss the significance of the study to clarify its relevance and impact.
- 363.** A well-written research report must be:
- (A) Subjective and emotional
 - (B) Objective, clear, and concise
 - (C) Long and descriptive
 - (D) Full of technical jargon
- 364.** What should be considered when writing a research report?
- (A) Quotations and footnotes
 - (B) Physical appearance of the report
 - (C) All of the above
 - (D) Language of academic writing
- 365.** Research report serves as a reference material for future use in the same or related area.
- (A) True
 - (B) False
- 366.** When writing on speaking one always needs to consider this which refers to the individuals that will read the research paper or hear the given presentation.
- (A) Claim
 - (B) Audience
 - (C) Logos
 - (D) Ethos
- 367.** A research report is highly useful for policy formulators, practitioners, general public and others.
- (A) True
 - (B) False
- 368.** The part of research that communicates findings is:
- (A) Hypothesis
 - (B) Samples
 - (C) Report writing
 - (D) Experiment
- 369.** The front matter components of a formal report typically include: report cover, title page, letter of transmittal, table of contents, and —
- (A) Budget
 - (B) List of figures or tables
 - (C) Appendix
 - (D) Schedule
- 370.** After you have written some questions, the next step in writing your report is to
- (A) Do your research and gather evidence.
 - (B) Check that the sources you plan to use are reliable.
 - (C) Write the report.
 - (D) Develop an outline.
- 371.** Which one of the following is written communication?

- (A) Speech
 - (B) Discussion
 - (C) Action
 - (D) Report
- 372.** How to best present the summary of findings in a research?
- (A) Number the summarized findings to easy understand the ideas
 - (B) Write every single findings discuss in chapter 4
 - (C) Include statistical data to make the findings credible
 - (D) Write the summary in paragraph form
- 373.** This section of a research report often follows the flow of the survey, reporting out the aggregated data for each question using descriptive statistics.
- (A) Respondent profile
 - (B) Executive summary
 - (C) Detailed findings
 - (D) Methodology
- 374.** What are the key characteristics of a research report's introduction?
- (A) Clear and coherent
 - (B) Quantitative and linear
 - (C) Hypothetical and experimental
 - (D) Generalized and vague
- 375.** The function of the Introduction
- (A) Context of the work being reported
 - (B) References to other literature
 - (C) Basic design of the study
 - (D) The major aspects of the entire paper
 - (E) The contents of the paper
- 376.** In the Quantitative Research Report, this section summarizes the data that was collected ____
- (A) Discussion
 - (B) Results
 - (C) Method
 - (D) Introduction
 - (E) Abstract
- 377.** If there are phrases, terms or names in your methodology that might be unfamiliar to the reader, what should you do?
- (A) Include a link to a definition.
 - (B) Tell the reader to look it up.
 - (C) Explain them.
 - (D) Nothing. Edit
- 378.** How can headings and subheadings help organize a research report effectively?
- (A) By making the report harder to follow
 - (B) By confusing readers with unnecessary details
 - (C) By decreasing the overall word count
 - (D) By providing a clear structure, guiding readers through the content, highlighting key points, and improving readability.
- 379.** The bibliography of a research report belongs where?
- (A) Right after the front cover
 - (B) Nowhere in the final report
 - (C) At the end of the report
 - (D) Right after the table of contents
- 380.** Where do you present your main claim if you choose the "point-first structure" for your research report?
- (A) Introduction.
 - (B) Literature review.
 - (C) Methodology and data.
 - (D) Results.
- 381.** What should be included in the discussion section of a report?
- (A) A summary of the introduction
 - (B) Interpretation of findings and limitations
 - (C) Only the results
 - (D) A list of references
- 382.** In a research report, which part is primarily responsible for discussing the implications of the findings and suggesting areas for future research?
- (A) Introduction

- (B) Discussion
 - (C) Methodology
 - (D) Results
- 383.** What is typically included on the Title Page of a research report?
- (A) Research Questions
 - (B) Title of the Research
 - (C) Literature Review
 - (D) Data Analysis Methods
- 384.** Which type of digital communication is commonly used for providing detailed information and analysis on a specific topic?
- (A) Audio
 - (B) Collaboration Tools
 - (C) Reports
 - (D) Video
- 385.** What should be highlighted in the implications section?
- (A) Practical implications of the research
 - (B) Theoretical frameworks
 - (C) Personal opinions
 - (D) Historical context
- 386.** Which of the following brings your topic to a close?
- (A) Concluding paragraph
 - (B) Introductory paragraph
 - (C) Transitions
 - (D) Thesis statement
- 387.** Taking notes when writing a research paper is important.
- (A) True
 - (B) False
- 388.** While writing research report a researcher
- (A) Must arrange it in logical, topical and chronological order.
 - (B) Must not use the numerical figures in numbers in the beginning of sentences.
 - (C) Must compare his results with those of the other studies.
 - (D) All of the above.
- 389.** Which chapter of a research report contains the critical review of related literature?
- (A) Chapter 1
 - (B) Chapter 2
 - (C) Chapter 3
 - (D) Chapter 4
 - (E) Chapter 5
- 390.** A manuscript emphasizes elegant writing but omits methods details. What quality criterion is most compromised?
- (A) Accurate and ethical reporting
 - (B) Originality of the contribution
 - (C) Journal brand recognition
 - (D) Author seniority and awards
- 391.** Reviewing and editing for the effectiveness of word choice s ensures that the language used is:
- (A) Full of slang.
 - (B) Appropriate for the audience and accurately conveys the intended meaning.
 - (C) Always complex.
 - (D) Only declarative.
- 392.** A/An ____ is a multi-page document that usually contains several sub-topics of information related to one main topic.
- (A) Research Report
 - (B) Table of Contents
 - (C) Agenda
 - (D) Minutes
- 393.** Which element of the research report dictates the need for a “Formal Tone”?
- (A) The Audience
 - (B) The Abstract
 - (C) The Title Page
 - (D) The References
- 394.** A report has a introduction a body and a conclusion.
- (A) True
 - (B) False
 - (C) All the above
 - (D) None of the above

- 395.** A strong Discussion should:
- (A) Relate findings to research questions and engineering applications
 - (B) Avoid mentioning limitations
 - (C) Focus only on repeating numerical data
 - (D) Provide references without interpretation
- 396.** If an experiment had unexpected results, what should the report discuss?
- (A) Ignoring them and rewriting the data
 - (B) Describing possible sources of error or alternative explanations
 - (C) Declaring the experiment a failure
 - (D) Changing the hypothesis to fit the results
- 397.** Which of the following is the possible order for the reasons and evidence in the body of your research report?
- (A) Old to new
 - (B) Shorter & simpler to longer & more complex
 - (C) Uncontested to more contested
 - (D) Chronological order
 - (E) All these options are possible
- 398.** The basic purpose of the research and the specific objectives agreed upon in the research proposal should be included in which section of the research report?
- (A) TITLE PAGE
 - (B) INTRODUCTION
 - (C) METHODOLOGY
 - (D) APPENDIX
- 399.** Imagine Lily and Hannah are writing a research report about a fascinating place. The introduction would probably ____
- (A) Tell the name of the place and where it is located
 - (B) Try to convince the reader to visit the place
 - (C) All the above
 - (D) None of the above
- 400.** Which of the following forms the major portion of the report in terms of length of content:
- (A) Conclusions
 - (B) Abstract
 - (C) Results and Discussion
 - (D) Title
- 401.** Which of the following sections is optional in a research report?
- (A) Acknowledgment
 - (B) Findings
 - (C) Methodology
 - (D) Bibliography
- 402.** A well-organized written report requires:
- (A) Long words
 - (B) Logical Structure
 - (C) Fast delivery
 - (D) Loud voice
- 403.** In the introduction section: we must justify why this work is important?
- (A) True
 - (B) False
 - (C) None of the above
 - (D) None of above
- 404.** What is the final section of the report that summarizes the findings and discusses the results of the research?
- (A) Methodology
 - (B) Conclusion
 - (C) Thesis
 - (D) Citation
- 405.** What type of report outlines the process, data, findings of a systematic investigation?
- (A) Research Report
 - (B) Qualitative Research Report
 - (C) Quantitative Research Report
 - (D) Popular Research Report

- 406.** What is the significance of clarity in report writing?
- (A) To avoid feedback
 - (B) To make it longer
 - (C) To ensure understanding
 - (D) To confuse readers
- 407.** The final aim of every research is a
- (A) Ethical research
 - (B) Research report
 - (C) Sponsorship
 - (D) Future research
- 408.** In a research report, where would one discuss the significance of the problem?
- (A) Chapter 1: Introduction
 - (B) Chapter 2: Review of Related Literature
 - (C) Chapter 3: Design of the Study
 - (D) Chapter 4: Data Analysis and Interpretation
 - (E) Chapter 5: Summary and Conclusion
- 409.** Writing a research report is
- (A) The second to the last step in the research process
 - (B) Requires no Academic Conventions
 - (C) All of the above
 - (D) None of the above
- 410.** What question should you keep in mind when drafting your research report?
- (A) What must my readers know before they can understand what comes next?
 - (B) What are the main definitions I will use?
 - (C) When will I finish this thesis/dissertation?
 - (D) How do other people finish their research on time?
 - (E) How will I collect data for my research?
- 411.** The Appendices in a full research report usually contain:
- (A) The main findings
 - (B) Supporting materials such as raw data, questionnaires, or extended calculations
 - (C) The references
 - (D) Only the author's opinions
- 412.** It includes the descriptive statistics for the relevant variables (e.g mean, standard deviation). Then tell the reader what statistical test you used to test your hypothesis and what you found.
- (A) Results And Discussion
 - (B) Analysis of Data
 - (C) Design of the Study
 - (D) The Review of Related Literature
- 413.** Supplementary material is one of the divisions in research report.
- (A) True
 - (B) False
 - (C) All the above
 - (D) None of the above
- 414.** Beth is preparing a communication for her supervisor detailing a demographic research study that she has completed. Which written Business Communication should she use?
- (A) Letter
 - (B) Email
 - (C) Memo
 - (D) Report
- 415.** What is the purpose of providing a brief background in a research report?
- (A) To contextualize the study and establish its relevance.
 - (B) To list all the references used in the report.
 - (C) To provide a detailed methodology of the research.
 - (D) To summarize the findings of the study.
- 416.** Why is it important to mention limitations in the Discussion section?
- (A) To make the research look weaker
 - (B) To suggest areas for improvement and future work
 - (C) To reduce the credibility of results
 - (D) To shorten the paper

417. Which of the following reporting guideline provides a checklist of items to include when reporting a systematic review?
- (A) CONSORT
 - (B) PRISMA
 - (C) STROBE
 - (D) MOOSE
418. These are suggestions for the improvement of practices, policies, and implementing strategies relative to the topic under study which must be based on the conclusions drawn from the findings.
- (A) Recommendations
 - (B) Discussion
 - (C) Conclusion
 - (D) Background/Introduction
419. In the introduction of a research report, the researcher can do the following except ____
- (A) Explain the research design
 - (B) Describe the purpose of the research
 - (C) Give an overview of the research
 - (D) Cite relevant relevant research of the topic
420. The introduction should be the principal section of a formal report.
- (A) True
 - (B) False
421. APPENDICES IS NOT PART OF A RESEARCH REPORT
- (A) TRUE
 - (B) FALSE
 - (C) All the above
 - (D) None of the above
422. When summarizing a research study for your literature review, what elements should be included?
- (A) A full critique of the study's strengths and weaknesses
 - (B) A focus on the study's historical context and its impact on the field
 - (C) An emphasis on the researchers' theoretical background and potential biases
 - (D) A concise overview of the problem, purpose, sample, results, and any methodological flaws
423. The time of report writing should be planned later.
- (A) False
 - (B) True
424. Reports the findings from the data gathering process
- (A) Abstract
 - (B) Introduction
 - (C) Methodology
 - (D) Results
425. The first page of the research report is ____?
- (A) The Works Cited page
 - (B) The Body
 - (C) The Title
 - (D) The Title Page
426. What statement does review the major conclusions to each of the research questions?
- (A) Implication
 - (B) Summary
 - (C) Direction
 - (D) Limitation
427. The main purpose of a research report is to:
- (A) Entertain the reader
 - (B) Present research findings clearly and systematically
 - (C) Criticize other research
 - (D) Increase word count
428. What should be included in the report's introduction?
- (A) Presentation of the topic
 - (B) Summary of the information
 - (C) Personal opinions and conclusions
 - (D) List of sources consulted

429. Regarding limitations, it is:
- (A) Common to address each and every potential limitation in the study
 - (B) Common to find no limitations to the design and methodology of the study
 - (C) Customary for researchers to draw readers' attention to those limitations that are most likely to influence the results and implications drawn from findings
 - (D) Customary for the researcher to refrain from acknowledging and methodological limitations that may affect the results
430. Before you can submit your paper what order should you format your information
- (A) Introduction-Methods-Literature Review-Findings
 - (B) Introduction-Literature Review-Findings-Methods
 - (C) Introduction-Literature Review-Methods-Findings
 - (D) Literature Review-Methods-Findings-Introduction
431. If you want to know the flow before writing the research report, what should you do?
- (A) Look for sources online
 - (B) Write an outline
 - (C) Look for a problem
 - (D) Write a draft
432. The conclusion contains similar elements to the discussion, and sometimes these two sections are combined.
- (A) True
 - (B) False
 - (C) All the above
 - (D) None of the above
433. Discuss the importance of clarity and coherence in presenting arguments in analytical writing.
- (A) Inconsistency and ambiguity improve the overall impact of the argument
 - (B) Clarity and coherence are not necessary in analytical writing
 - (C) Using complex language and jargon enhances the quality of arguments
 - (D) Clarity and coherence are crucial in presenting arguments in analytical writing to enhance understanding and maintain logical consistency.
434. Which statement about the audience is the most accurate?
- (A) Your audience includes only the readers originally targeted by the report
 - (B) Even if readers support the project, persuasive strategies should still be used
 - (C) The intended audience influences writing style and vocabulary
 - (D) Regardless of audience, reports should include as much detail as possible
435. Which of the following considerations should be kept in mind by the researcher during writing a report?
- (A) Report should be written as using third person.
 - (B) Report should be prepared in Past Tense.
 - (C) Report should consisted of scientific language instead of literary or local dialects.
 - (D) All of the above.
436. Research report is a completed study that reports an investigation of a problem, identifies questions to be addressed, and includes data collected, analyzed, and interpreted by the researcher.
- (A) True
 - (B) False
 - (C) All the above
 - (D) None of the above
437. What application would you typed a Research Report in
- (A) Word
 - (B) Excel
 - (C) PowerPoint
 - (D) Access

438. Summary of Findings, Conclusions and Recommendations.
- (A) Chapter 1
 - (B) Chapter 2
 - (C) Chapter 3
 - (D) Chapter 4
 - (E) Chapter 5
439. This classification of text retells data, incident, or event.
- (A) Research
 - (B) Concept Paper
 - (C) Report
 - (D) Reaction Paper
440. In Research Participants/Subjects, this section in a research report describes the population or samples of the study.
- (A) TRUE
 - (B) FALSE
441. What is the role of the Discussion section?
- (A) To introduce the research topic
 - (B) To connect the results to existing literature and analyze their meaning
 - (C) To describe the methods used
 - (D) To list the sources cited in the research
442. The purpose of the study is often at the latter part of the introduction section.
- (A) TRUE
 - (B) FALSE
 - (C) All the above
 - (D) None of the above
443. What structure is a summary of all the information in the report?
- (A) Discussion
 - (B) Review of Literature
 - (C) Reference
 - (D) Conclusion
444. The final part of a research report is:
- (A) Introduction
 - (B) Results
 - (C) Discussion
 - (D) Conclusion
445. A permanent scholarly record primarily serves to
- (A) Archive methods and results for verification
 - (B) Increase short-term media attention to studies
 - (C) Limit access to only paying subscribers

- (A) Focus
 - (B) Thesis
 - (C) Revision
 - (D) None of the above
219. What is another name for a claim statement?
- (A) Theme
 - (B) Thesis
 - (C) Works Cited
 - (D) Heading

1.7 Research Ethics and ICT

1.7.1 Research Ethics

1. When does debriefing typically occur in a research study?
 - (A) At the beginning of the study
 - (B) During the data collection phase
 - (C) At the conclusion of the study
 - (D) Before the study is designed
2. Give an example of fabrication in a research study.
 - (A) A researcher claims to have conducted a clinical trial with 100 participants and reports fabricated positive outcomes that were never observed.
 - (B) A researcher publishes a paper based on peer-reviewed data without any alterations.
 - (C) A researcher conducts a survey and shares the findings honestly.
 - (D) A researcher accurately reports the results of a study with 100 participants.
3. Which of the following best describes data anonymity?
 - (A) The protection of the individual's data so that it cannot be linked back to any individual, even by the researcher.
 - (B) The requirement to publish all data.
 - (C) The sharing of data with all participants.
 - (D) The destruction of all data after the study.
4. An ethical research venture represents
 - (A) Scientific approaches.
 - (B) Honest processing.
 - (C) Consistent efforts.
 - (D) All of the above.
5. An ethical principle requiring that research participants be told enough about an experiment to enable them to choose whether they wish to participate.

- (A) Cross sectional study
 - (B) Protection of the participant
 - (C) Informed consent
 - (D) Beside manner
6. Quality fo being honest, trustworthy and having strong moral principles; involves doing the right thing, even when no one is watching
- (A) Competence
 - (B) Time management
 - (C) Integrity
 - (D) Loyalty
7. Voluntary participation means participants can decide whether they want to join the research study or not.
- (A) True
 - (B) False
8. This is required so potential participants can have enough information about a study; enables them to choose whether they wish to participate.
- (A) Bias
 - (B) Debriefing
 - (C) Informed consent
 - (D) Double-blind
9. To safeguard participants rights, prior to collecting any data, researchers are supposed to seek approval from
- (A) The American Psychological Association
 - (B) At least two licensed psychiatrist
 - (C) An Institutional Review Board
 - (D) At least one psychiatrist and one psychologist
10. Confidentiality requires that:
- (A) It be impossible to connect data to individuals
 - (B) All data be collected anonymously
 - (C) Access to collected data be limited to research staff
 - (D) Participants not be asked for personal information
11. Ethically, personal information about participants should be shared with other researchers.
- (A) True
 - (B) False
12. Which principle ensures that research follows moral and ethical standards?
- (A) Scientific method
 - (B) Research ethics
 - (C) Sampling
 - (D) Validity
13. Before participating in an experiment, individuals should read and sign the ___ form.
- (A) Informed consent
 - (B) Information
 - (C) Participation
 - (D) Release
14. Researchers might use ___ when providing participants with the full details of the experiment could skew their responses.
- (A) Full disclosure
 - (B) Transparency
 - (C) Informed consent
 - (D) Deception
15. In social science research, ___ may be used to withhold certain information or mislead participants about specific aspects of the study to ensure the validity of responses.
- (A) Deception
 - (B) Sampling
 - (C) Randomization
 - (D) Observation
16. Which of the following is not considered an ethical principle in research?
- (A) Confidentiality
 - (B) Privacy
 - (C) Coercion
 - (D) Autonomy

17. Bad experiments have ____
(A) Cherry picked results and ignore the rest of the data
(B) Use randomized trials for their groups
(C) Have peer reviews so results can be replicated
(D) Depend on a control group
18. How can institutions promote ethical research practices?
(A) By reducing funding for research projects.
(B) By encouraging researchers to prioritize speed over ethics.
(C) By limiting access to research data for accountability.
(D) By implementing training, guidelines, and accountability measures.
19. How does Turnitin assist educational institutions beyond detecting plagiarism?
(A) By fostering a culture of rigorous academic honesty
(B) By guaranteeing every student writes at an advanced level
(C) By replacing librarians and writing center staff fully
(D) By preventing students from accessing research databases
20. Ms NT, a final year student is doing a research project. She got an approval for the study from the local research ethics committee, the Director of Nursing of the faculty and obtained consent from participants. This is considered as ____
(A) Data collection
(B) Method of study
(C) Limitation of study
(D) Ethical consideration
21. It is wrong to be ____ when interviewing or writing an article about something or someone (do not choose sides)
(A) Sad
(B) Happy
(C) Sick
(D) Bias
22. ____ are rules of behavior based on a group's ideas about what is right and wrong
(A) Ethics
(B) Integrity
(C) Morals
(D) Trade Secrets
23. Why is honesty important when recording the results after an experiment?
(A) It allows you to generate new and original ideas.
(B) It enables you to ask questions and seek answers.
(C) It empowers you to give a truthful report of observations.
(D) It reminds everyone to show concern for living things and the environment.
24. Criteria for inclusion and exclusion of data and results should be:
(A) Clear and independent of what the data shows
(B) Such that the data and results support your hypotheses
(C) Arbitrary
(D) Complicated-because it's research after all!
25. In a research internship, maintaining confidentiality is most related to which principle?
(A) Flexibility
(B) Research ethics
(C) Career growth
(D) Workplace hierarchy
26. Maintaining the integrity of data in a way that satisfies the relevant alws, regulations, and standards that govern data management.
(A) Compliance
(B) Error Correction Time
(C) Entity
(D) Implement
(E) Consistency

27. What is informed consent in the context of psychology and human subject research?
- (A) A legal requirement for all types of research
 - (B) A process ensuring participants understand and voluntarily agree to participate
 - (C) A method to collect data from participants
 - (D) A way to ensure participants are paid for their involvement
28. What methods can researchers use to identify bias in online articles?
- (A) Analyzing the language used, checking for balanced viewpoints, and reviewing the author's background and affiliations.
 - (B) Ignoring the publication date
 - (C) Assuming all articles are unbiased
 - (D) Only reading the headlines
29. According to the ethical guidelines set by the American Psychological Association (APA), which of the following is true of psychological research in which animals are used as subjects?
- (A) It must not involve the use of surgical procedures.
 - (B) It is no longer permitted by the APA without special authorization.
 - (C) It should conform to all APA ethical guidelines for animal research
 - (D) It may not be conducted by psychologists who do not have a license
30. Sites like Wikipedia are not always valid because-
- (A) The information constantly changes because users can alter the info
 - (B) The website has too many distractions
 - (C) The website includes the original author
 - (D) The information can be viewed by anyone
31. Which of the following is NOT a reason the Triplets Study would be rejected by a modern IRB?
- (A) No informed consent from adoptive parents or children
 - (B) Deliberate deception about the study's purpose
 - (C) The study was conducted in a different country
 - (D) No therapeutic benefit to participants
32. Which of the following is NOT a key ethical principle in psychological research?
- (A) Informed consent
 - (B) Confidentiality
 - (C) Right to withdraw
 - (D) Manipulating data without disclosure
33. Research ethics do not include [2012-JUNE]
- (A) Honesty
 - (B) Subjectivity
 - (C) Integrity
 - (D) Objectivity
34. When a researcher's expectations or preferences about the outcome of a study influence the results, ____ bias has occurred.
- (A) Social desirability
 - (B) Self-serving
 - (C) Experimenter
 - (D) Hindsight
35. Ethical norms in research do not involve guidelines for:
- (A) Thesis Format
 - (B) Copyright
 - (C) Patenting Policy
 - (D) Data sharing Policy
36. Why is it necessary to obtain informed consent from research participants?
- (A) In order to provide them with information about the investigator's past research studies
 - (B) In order to forewarn them about any deception that will be used in the study
 - (C) In order to describe aspects of the study that many influence willingness to participate
 - (D) In order to share information about other participants in the study

37. Evaluating an education policy that does not involve stakeholders shows that the policy is —
(A) Efficient
(B) Innovative
(C) Ethically and democratically weak
(D) Structurally strong
(E) Result-oriented
38. The goal of Institutional Review Boards in research is to
(A) Make sure participants feel no unnecessary harm
(B) Collect data for researchers
(C) Analyze data for researchers
(D) Help researchers plan their studies
39. In education management, digitizing administration becomes an ethical dilemma when it —
(A) Runs the system automatically
(B) Reduces face-to-face interaction
(C) Neglects groups with low digital literacy
(D) Speeds up services
(E) Reduces paper use
40. In research terms, beneficence refers to the benefits of a study as opposed to its —
(A) Privacy
(B) Confidentiality
(C) Risks
(D) Benefits
41. A source is reliable if:
(A) It has lots of opinions
(B) It is written by someone who knows a lot about the topic
(C) It uses funny language
(D) It's popular on social media
42. When is informed consent collected during research?
(A) Just before participants take part in data collection
(B) Before your proposal has been signed off
(C) Before you conduct research
(D) After you have submitted your proposal and ethics form
(E) Once your proposal and ethics form have been cleared
43. What should you do if you find conflicting information from different sources?
(A) Trust the source with the most likes
(B) Ignore all sources
(C) Compare the information and check the credibility of each source
(D) Choose the information that you like the most
44. Characterized by honesty, fairness, and equity; Respecting the dignity, diversity and rights of others
(A) Ethics of care
(B) Integrity
(C) Ethics
(D) Ethical Behavior
45. Which option below is an ethical way to protect participants in psychological research?
(A) Publishing a participants name in your study
(B) Consent is optional for your study
(C) Debriefing your participants is only needed in special circumstances
(D) No long lasting psychological harm
46. According to the four types of Ethical practices for research by Carson et al.(1989), which practice refers to when the general welfare of both students and teachers are the prime consideration?
(A) Ethics of Responsibility
(B) Ethics of Caring
47. True or False: Researchers are typical people and may already have some previous bias.
(A) True
(B) False

48. Moral principles that govern a person's behavior; a set of beliefs about what is right and what is wrong
- (A) Ethical Behavior
 - (B) Honesty
 - (C) Ethics
 - (D) Ethics of Care
49. Which of the following is the foremost ethical question a researcher must address?
- (A) Can I keep the names of the participants confidential?
 - (B) Are participants protected from harm?
 - (C) Will other scientists be able to replicate my study?
 - (D) Is deception absolutely necessary?
50. Being committed to a strong code of moral values is called:
- (A) Honesty
 - (B) Loyalty
 - (C) Integrity
 - (D) Deception
51. It is important to do what while taking notes, so you don't copy?
- (A) Paraphrase (use your own words)
 - (B) Write every other word in the book
 - (C) Trace pictures
 - (D) Sing the information
52. Ethics in research ensures:
- (A) Data theft
 - (B) Misuse of findings
 - (C) Honesty and integrity
 - (D) Publication pressure
53. Protect confidential communications and personal information of your respondents.
- (A) Privacy
 - (B) Confidentiality
 - (C) Honesty
 - (D) Morality
54. Informed consent in research means:
- (A) Participants must pay for participation
 - (B) Participants fully understand the research before agreeing to take part
 - (C) Researchers can manipulate data without informing participants
 - (D) Ethical guidelines are unnecessary
55. Which is a possible cost of participating in a study?
- (A) Being distressed by researcher intrusiveness
 - (B) Becoming a vulnerable subject
 - (C) Being required to participate in meetings of an Institutional Review Board (IRB)
 - (D) Having to pay a stipend
56. Which ethical consideration is allowed only if there are absolutely no other alternative means of gathering quality data
- (A) Deception
 - (B) Informed Consent
 - (C) Professional relationship
 - (D) Right to withdraw
57. What does 'ethics' refer to in research practices?
- (A) Ethics refers to the financial aspects of conducting research.
 - (B) Ethics is the study of historical research methods.
 - (C) Ethics is a type of statistical analysis used in research.
 - (D) Ethics refers to the principles and guidelines that govern the conduct of research.
58. Which procedure can reduce problems associated with the use of deception by a researcher?
- (A) Debriefing
 - (B) Random sampling
 - (C) Random assignment
 - (D) Using only single-blind studies
 - (E) Using only double-blind studies

59. A source's qualifications or achievements that show its information is given by experts
(A) Credentials
(B) Works cited
(C) Summarize
(D) MLA
60. Any participants to any research activity must not be forced to take part in the study.
(A) Voluntary participation
(B) Informed consent
(C) Risk of harm
(D) Social responsibility
61. Participants should be protected from all physical and psychological harm.
(A) Valid Consent
(B) Right to Withdraw
(C) Minimizing Harm
(D) Lack of Deception
62. Is a set of moral principles held by a society, group, or individual; there are ethical principles that inform interpersonal communication
(A) Ethics
(B) Diversity
(C) Communication Competence
(D) Effective Messages
63. If a researcher violates the code of research ethics they may face ____
(A) A fine
(B) Loss of their license to research or practice psychology
(C) A written warning and loss of reputation
(D) All of the above
64. What ethical consideration is important when implementing AI in education?
(A) Ignoring student privacy concerns
(B) Promoting algorithmic bias
(C) Ensuring responsible and unbiased use of AI
(D) Avoiding discussions about ethics
65. To prevent identification of a participating human subject, you decide to anonymize the collected data by not disclosing the name, address and phone number. Does this always solve the problem?
(A) Yes
(B) No
66. Which of the following is NOT a way to demonstrate integrity in scientific reporting?
(A) Objectivity
(B) Clarity
(C) Fabrication of data
(D) Reproducibility
67. If participants are deceived, which other ethical issue does this automatically create?
(A) Lack of privacy
(B) Lack of informed consent
(C) Lack of right to withdraw
(D) Lack of confidentiality or anonymity
68. Research is not considered ethical if it
(A) Is not of a very high standard.
(B) Tries to prove a particular point.
(C) Does not ensure privacy and anonymity of the respondent.
(D) Does not investigate the data scientifically.
69. Why is it important to distinguish between exploratory and confirmatory research?
(A) To reduce p-hacking and HARKing
(B) To increase sample size
(C) To avoid using theory
(D) To ensure all studies are published
70. Upon asking the help of the Grade 11 HUMSS students to be her respondents, Sofia accepts their decision of not participating in her study. What principle did she observed?
(A) Non-maleficence
(B) Beneficence
(C) Autonomy
(D) Justice

71. The purpose of animal ethical guidelines are
- (A) To ensure animals experience minimal suffering possible to achieve the desired outcome for the study
 - (B) To ensure animals are not harmed at all during the study
 - (C) To ensure the study gets valid responses from the animals
 - (D) To ensure researchers are able to do what they like to the animals with no repercussions
72. Women interviewed in a study about mastectomy are told that the information they provide will not be individually divulged. This is called:
- (A) Freedom from harm or exploitation
 - (B) Informed consent
 - (C) Anonymity
 - (D) Confidentiality
73. When do research participants provide written consent?
- (A) Before the participant engages in the study
 - (B) After the participant engages in the study
 - (C) During the study a participant is involved in
 - (D) None of above
74. It is ethical to use a research method for which you don't have sufficient training.
- (A) True
 - (B) False
75. Having a high standard of ethics will ____
- (A) Cause others to trust you
 - (B) Cause you to fail in your career
 - (C) Create too much pressure on you
 - (D) Mean that you want to be perfect
76. Why is adherence to ethical guidelines important in experimental research?
- (A) It ensures the well-being of participants and upholds the integrity of research outcomes.
 - (B) It helps in faster publication of research papers.
 - (C) It reduces the cost of research.
 - (D) It guarantees the research will be cited by others.
77. What is each participant asked to do as a part of informed consent?
- (A) To sign a form stating agreement (yes or no) to participate in the research
 - (B) To waive legal rights to sue the researcher
 - (C) To identify an emergency contact
 - (D) None of above
78. The conduct of study should not pose any danger, embarrassment, hurt or any risk to research respondents/participants or anyone.
- (A) Clear
 - (B) Relevant
 - (C) Feasible
 - (D) Ethical
79. The issue of 'research ethics' may be considered pertinent at which stage of research?
- (A) At the stage of problem formulation and its definition
 - (B) At the stage of defining the population of research
 - (C) At the stage of data collection and interpretation
 - (D) At the stage of reporting the findings.
80. Multiple Choice: Read each question carefully and choose the BEST answer. Which practice best reflects academic honesty in research?
- (A) Changing data to support conclusions
 - (B) Omitting conflicting results
 - (C) Acknowledging all sources used
 - (D) Relying solely on personal opinions
81. Suppose one Experimenter (E) in psychology firmly believes that Brahman in children are inherently superior to the Harijan children.

- Naturally he would never think of home environment as an explanation. This is a very obvious example of
- (A) Stimulus Error.
 - (B) Response Error.
 - (C) Subject's Bias.
 - (D) Experimenter's Bias.
82. This refers to the ethical principle of giving credit to the original source of information or ideas.
- (A) Attribution
 - (B) Copyright
 - (C) Paraphrasing
 - (D) Plagiarism
83. A set of moral values that people consider acceptable.
- (A) Demand
 - (B) Ethics
 - (C) Economy
 - (D) None of above
84. What does FREC stand for?
- (A) Faculty Research Ethics Committee
 - (B) Foundation of Research Ethics
 - (C) Family Restricted Ethics
 - (D) Formation of Ethics Council
85. IRBs are committees of scientists and non-scientists at the local level that reviews research protocols and consent forms to ensure that the rights and the welfare of research subjects are protected.
- (A) True
 - (B) False
86. Ethically, students may not be coerced into research participation.
- (A) True
 - (B) False
87. All institutions that conduct ongoing research have an ____ that must meet to review any study to determine if the proposal is ethical or if it poses risks to those involved.(Research Methods and Statistics Part II)
- (A) Clinical Ethics Committee(CEC)
 - (B) Federal Bureau of Investigation (FBI)
 - (C) Coercion Task Force(CTF)
 - (D) Institutional Review Board (IRB)
88. What is the role of informed consent in communication research?
- (A) To manipulate independent variables
 - (B) To ensure that participants are fully aware of the study's purpose and give voluntary agreement to participate
 - (C) To analyze survey responses
 - (D) To conduct a literature review
89. In conducting her research, Alexis always take into consideration that all respondents must be treated equally and without bias. What principle is shown?
- (A) Non-maleficence
 - (B) Beneficence
 - (C) Autonomy
 - (D) Justice
90. Govern the standards of conduct scientific researchers (honesty, values, and justice)
- (A) Research ethics
 - (B) Dream continuity hypothesis
 - (C) Depth perception
 - (D) Somatic nervous system
91. How can you determine if a source is credible?
- (A) Consider the popularity or number of views of the source.
 - (B) Evaluate the authority, accuracy, objectivity, currency, and citations of the source.
 - (C) All the above
 - (D) None of the above
92. Rewriting someone else's ideas in your own words is called:
- (A) Quoting
 - (B) Paraphrasing
 - (C) Summarizing
 - (D) Plagiarizing

93. When can paraphrasing be used?
- (A) In a documentary
 - (B) On a news report
 - (C) In a formal essay
 - (D) All of the above
94. Permission from authorities and respondents is crucial in data collection because:
- (A) It ensures ethical and legal compliance during the data collection process.
 - (B) It allows researchers to skip data validation steps.
 - (C) It guarantees that all data collected will be accurate.
 - (D) It eliminates the need for data analysis.
95. Which of the following ethical principles requires the researcher to divulge any deception that may have occurred?
- (A) The right to be protected from harm and discomfort
 - (B) Informed consent
 - (C) Debriefing
 - (D) The right to confidentiality
96. Which of the following might you include in an introductory letter to respondents?
- (A) An explanation of who you are and who is funding your research.
 - (B) An overview of what the research is about and how the data will be collected.
 - (C) A statement of their ethical rights to anonymity, confidentiality, etc.
 - (D) All of the above.
97. Before a study can be conducted, researchers must ensure that the benefits of the study outweigh any potential costs
- (A) Cost-benefit analysis
 - (B) Informed consent
 - (C) Debriefing
 - (D) Institutional review boards
98. Since a study involves people, special care is taken into consideration to ensure that respondents are treated ethically in all aspects.
- (A) Open coding
 - (B) Ethical consideration
 - (C) Benchmarking
 - (D) Bracketing
99. What is the key ethical concern when researching with children?
- (A) Confidentiality only
 - (B) Deception
 - (C) Informed consent from both children and their guardians
 - (D) Consent from children only
100. Tristan upholds to the great extent professionally in the pursuit of the truth. What consideration is evident?
- (A) Privacy and Confidentiality
 - (B) Informed Consent
 - (C) Integrity
 - (D) Acknowledge sources of Information
101. Mr. X has coded his observations to hide the identity of each of the three participants in his study. He is ensuring;
- (A) Anonymity.
 - (B) Protection from harm.
 - (C) Informed consent.
 - (D) Confidentiality.
102. What should you check to ensure a source is credible when doing internet research?
- (A) If it has a lot of ads
 - (B) Its color scheme
 - (C) Who owns or sponsors the site
 - (D) If it uses modern web design
 - (E) Number of images used
103. Scientists should confirm the findings of a study by replicating it.
- (A) True
 - (B) False

- 104.** To prevent the ethical abuse in psychological research, the APA has suggested that
- (A) Psychologists must treat all subjects with respect and concern for the subject's dignity
 - (B) Psychologists must avoid deception when using human subjects
 - (C) All data collected from a person must be made public
 - (D) All psychological harm to subjects must be corrected by counseling
- 105.** A person's participation in a research project must be ____
- (A) Random
 - (B) Rewarded
 - (C) Voluntary
 - (D) Public
- 106.** What are some ethical considerations to keep in mind when conducting research online?
- (A) Obtaining informed consent, ensuring data privacy, avoiding deception, providing accurate information, being transparent
 - (B) Sharing personal data without consent
 - (C) Using biased sampling methods
 - (D) Ignoring potential harm to participants
- 107.** Which of these is a factor that affects ethical and unethical behaviour?
- (A) Ethical dilemma
 - (B) Diversity
 - (C) Teamwork
 - (D) Open communication
- 108.** Which ethical principle requires participants be told the purpose of the study after it is finished?
- (A) Informed consent
 - (B) Confidentiality
 - (C) Protection from harm
 - (D) Debriefing
- 109.** Stem cell research is controversial because it involves?
- (A) Social issues
 - (B) Ethical issues
 - (C) Educational issues
 - (D) Economical issues
- 110.** Making a generalized opinion about a class of people or events due to a given culture is called as
- (A) Halo effect
 - (B) Stereotyping
 - (C) Filtering
 - (D) Fear of critique
- 111.** The concept of "anonymity" means:
- (A) Participants are named
 - (B) Participants can be traced
 - (C) Participants cannot be identified
 - (D) Researchers are anonymous
- 112.** To uphold ethics in school action research, a principal should ____
- (A) Control the entire research process
 - (B) Separate managerial and researcher roles professionally
 - (C) Hand over the research entirely to teachers
 - (D) Determine the results in advance
 - (E) Avoid evaluation
- 113.** Which of the following is NOT true when conducting research?
- (A) Participants must finish any study they begin.
 - (B) Participants can leave a study at any time.
 - (C) Informed Consent forms provide details about participation.
 - (D) Participant data is confidential.
- 114.** What is the main concern when collecting data from people in research studies?
- (A) The cost of data collection
 - (B) The complexity of data analysis
 - (C) The ethical issues, especially when treatment is imposed on people
 - (D) The speed of data processing

115. Involves the fundamental ethical principles to planning, conducting and publishing of research
- (A) Fraud
 - (B) Research ethics
 - (C) Plagiarism
 - (D) Piracy
116. A radical perspective on ethics suggests that:
- (A) Researchers can do anything they want
 - (B) The use of checklists of ethical actions is essential
 - (C) The powers of Institutional Review Boards should be strengthened
 - (D) Ethics should be based on self-reflexivity
117. Which of the following is TRUE for writing a finding chapter?
- (A) Anonymity is not as important as confidentiality
 - (B) It is acceptable to reveal the identity of the research participants
 - (C) Simply changing the participant's name is always enough to maintain anonymity
 - (D) The researcher must keep his or her agreement about confidentiality and anonymity with participants
118. Which organization provides guidelines for psychologists to conduct research in an ethical way in the UK?
- (A) American Psychological Association (APA)
 - (B) British Psychological Society (BPS)
 - (C) European Federation of Psychologists' Associations (EFPA)
 - (D) International Association of Applied Psychology (IAAP)
119. Choose the term to match this definition: reasonable source to trust or believe
- (A) URL
 - (B) Credible
 - (C) Scholarly
 - (D) Paraphrase
120. Which practice addresses Integrity and Honesty in research?
- (A) Accurate reporting without fabrication
 - (B) Limiting public access to datasets
 - (C) Protecting trade secrets aggressively
 - (D) Avoiding recruitment from remote areas
121. Why is it important to evaluate sources for credibility?
- (A) To ensure that the information is reliable and accurate.
 - (B) To confuse people
 - (C) To waste time
 - (D) To make the sources feel important
122. A source that has been produced by a credible publisher and has been checked for accuracy
- (A) Primary
 - (B) Secondary
 - (C) Reliable
 - (D) Unreliable
123. When evaluating whether an educational study is ethical, the most important indicator is —
- (A) Number of respondents
 - (B) Policy impact
 - (C) Compliance with principles of honesty, justice, and responsibility
 - (D) Researcher reputation
 - (E) Number of citations
124. Which of the following options most appropriately explains 'Research Ethics'?
- (A) It states how to write a research report flawlessly.
 - (B) It gives the methodology of researching within social norms
 - (C) It governs the prevention of plagiarism
 - (D) It provides a common set of dos and don'ts of conducting an ethical research

125. Which of the following is a General Ethical Principle for the Researcher-
- (A) Integrity
 - (B) Honesty
 - (C) Responsibility
 - (D) All of the above
126. Which technique is used to protect the right of informants in qualitative research?
- (A) Tape recording
 - (B) Triangulation
 - (C) Consent form
 - (D) Anonymous
127. When did it become clear that social science research could also do harm to research participants?
- (A) After the publication of Stanley Milgram's study on obedience to authority
 - (B) After the publication of Walter Reed's study on the Yellow fever
 - (C) After the Nazi scientists' experiments
 - (D) After the coronavirus started to spread in Europe
 - (E) All answers are correct
128. An experienced researcher should impart knowledge to his or her students.
- (A) Responsible Publication
 - (B) Non-discrimination
 - (C) Respect to colleagues
 - (D) Social Responsibility
129. When a paper is already submitted to a publication, no submission to another should be done.
- (A) Objectivity
 - (B) Legality
 - (C) Care
 - (D) Responsible publication
130. When evaluating research ethics violations, the fairest approach is to ____
- (A) Punish as severely as possible
 - (B) Ignore minor violations
 - (C) Assess the context, impact, and degree of intent
 - (D) Hand the issue to public opinion
 - (E) Avoid conflict
131. Ethnographical researchers need to be reflective about ____
- (A) The impact on the site and the cultural group
 - (B) The laboratory data obtained
 - (C) Comparing different cases to give conclusions
 - (D) None of above
132. Informed consent is not always necessary in covert research.
- (A) True
 - (B) False
133. What are the special populations in research participants' ethics?
- (A) Both B and D
 - (B) Prison inmates, welfare recipients, children, developmentally disabled
 - (C) None of the above
 - (D) Students, employees, military personnel, homeless
134. Participants should be told what has happened, asked if they have concerns and given explanations at the end of the study.
- (A) Confidentiality
 - (B) Privacy
 - (C) Debriefing
 - (D) None of above
135. What is the role of peer-reviewed articles in assignments?
- (A) They are not necessary for academic assignments.
 - (B) They provide insights into personal experiences.
 - (C) They demonstrate the researcher's creativity.
 - (D) They contribute to the credibility of the assignment and are often required.

- 136.** When conducting market research, it's essential to:
- (A) Avoid participant interaction
 - (B) Analyze competitor data only
 - (C) Collect accurate and ethical data
 - (D) Ignore secondary data sources
- 137.** In President Obama's memorandum, how does he view the role of ethics in scientific research?
- (A) Ethics should not influence scientific research at all.
 - (B) Ethical considerations are essential and should guide research practices.
 - (C) Ethics are only important in medical research, not in other fields.
 - (D) Scientists should prioritize their personal beliefs over ethical standards.
- 138.** An educational researcher uses another researcher's instrument without permission and without clear citation. Based on research ethics, this action is a violation because —
- (A) It violates academic honesty and intellectual property rights
 - (B) It reduces the validity of the data
 - (C) It is not aligned with the research methodology
 - (D) It violates data analysis procedures
 - (E) It disrupts the researcher's objectivity
- 139.** This word means-information being withheld from participants and/or they are provided with false information.
- (A) Informed consent
 - (B) Deception
 - (C) Privacy
 - (D) None of above
- 140.** Protecting participants' personal data and ensuring it is not shared.
- (A) Confidentiality
 - (B) Openness
 - (C) Competence
 - (D) Social Responsibility
 - (E) Carefulness
- 141.** Recent Developments in Topic Modeling:- The responsible use of topic modeling and its potential ethical implications, such as privacy concerns and the unintended consequences of text analysis, are areas of ongoing research.
- (A) Bayesian topic modeling
 - (B) Interactive and visual topic modeling
 - (C) Multi-lingual and cross-lingual topic modeling
 - (D) Fairness and bias mitigation
 - (E) Ethical considerations
- 142.** Sometimes it's necessary to obtain permission to conduct an interview, for instance, when a source needs to know the questions in advance or the interviewee is a minor, acquiring this permission is known as
- (A) Informed consent.
 - (B) A signed permission slip.
 - (C) The interview agreement.
 - (D) None of these.
- 143.** Participants should be made aware they can withdraw from the study at any time during or after data collection.
- (A) Valid Consent
 - (B) Right to Withdraw
 - (C) Minimizing Harm
 - (D) Lack of Deception
- 144.** What principals must be followed to make a study ethical?
- (A) Clean research & data
 - (B) Honesty & deception
 - (C) Confidentiality & standard deviations
 - (D) Informed consent & confidentiality
- 145.** Respondents from a research project donate their time and insights for nothing or very little. It is therefore essential to respect their rights
- (A) The right to security
 - (B) The right to answer a low percentage of questions
 - (C) The right to privacy
 - (D) The right to be serious

- 146.** Falsification is defined as
- (A) Making up data or results and recording or reporting them
 - (B) Manipulating research materials or changing or omitting data or results such that the research is not accurately represented in the research record.
 - (C) The appropriation of another person's ideas, processes, results, or words without giving appropriate credit.
 - (D) None of the above
- 147.** Ethically, informed consent does not need to be given in psychological research.
- (A) True
 - (B) False
- 148.** What term refers to not sharing individual responses with anyone outside of the research team?
- (A) Anonymity
 - (B) Confidentiality
 - (C) Incentives
 - (D) Deliberate falsification
- 149.** Which of the following ethical issues in psychological testing that shows the release of results should only be made to another qualified professional after client's consent.
- (A) Test security
 - (B) Confidentiality
 - (C) Invasion of privacy
 - (D) Divided loyalties
- 150.** What does it mean for research to be confidential?
- (A) The researcher has no identifying information.
 - (B) The researcher has never met the participants.
 - (C) Only the researcher can link participants with their data.
 - (D) None of above
- 151.** What does the IRB NOT decide about a proposed study?
- (A) Whether the study will produce valuable information or is statistically sound.
 - (B) Whether the rights, welfare, and well-being of subjects are protected.
 - (C) If the study plan needs changes.
 - (D) If informed consent is properly obtained.
- 152.** The voluntary consent of the human subject is absolutely essential.
- (A) Autonomy
 - (B) Beneficence
 - (C) Integrity
 - (D) Non-maleficence
- 153.** What steps should be taken if research misconduct is suspected?
- (A) Report the suspicion to the appropriate authority or ethics committee.
 - (B) Conduct an internal investigation without notifying authorities.
 - (C) Discuss the suspicion with colleagues without reporting it.
 - (D) Ignore the suspicion and continue with the research.
- 154.** The committee within an organization that approves or denies research based on ethics.
- (A) Internal Affairs Committee
 - (B) American Psychology Association
 - (C) Ethical Dilemma Resolution Group
 - (D) Institutional Review Board
- 155.** What does confidentiality mean in the context of research studies?
- (A) Protecting private information of participants by not sharing personal details
 - (B) Publishing all participant data online
 - (C) Allowing anyone to access participant information
 - (D) Ignoring participant privacy
- 156.** The principle of "anonymity" in research ethics ensures that:
- (A) Participants' responses cannot be linked to their identity
 - (B) Researchers disclose participants' identities only to supervisors

- (C) All participants are treated equally, regardless of their social status
(D) Participants' responses are made public but without revealing their names
- 157.** Which digital literacy skill involves avoiding plagiarism?
(A) Ethical use of information
(B) Ignoring citations
(C) Blind copying
(D) Fake news sharing
- 158.** Which of the following acts like a set of rules in doing research?
(A) Conclusion
(B) Data Analysis
(C) Ethics
(D) Summary of Findings
- 159.** Confidentiality in research ensures:
(A) Participants' identities remain anonymous unless they provide consent
(B) Researchers share all data publicly
(C) Research is open to interpretation without ethical concerns
(D) Financial sponsors can manipulate results
- 160.** Which are the essential components of ethics?
(A) Integrity
(B) Commitment
(C) Truth
(D) All the above
- 161.** What is the purpose of ethics committees in research?
(A) To protect research participants
(B) To promote research misconduct
(C) To ignore ethical standards
(D) To fabricate data
- 162.** You should justify your stand and provide proof for the claims you make.
(A) TRUE
(B) FALSE
- 163.** Which of the following uses of secondary data requires IRB approval?
(A) Using data that meet the definition of human subject data
(B) Using publicly available data
(C) Using de-identified data
(D) Using data that does not contain private information, such as names
- 164.** What is done at the end of a study to assure that participants know all the information about the study (the truth) and leave in the same emotional state as they started?
(A) Informed consent
(B) Replication
(C) Debriefing
(D) Naturalistic observation
- 165.** A researcher is a member of a program committee which decides acceptance of papers submitted to a conference and one of her PhD student submits a paper. Can the researcher be one of the reviewers of the paper?
(A) Yes
(B) No
- 166.** Which of the following is a right of each participant according to the AERA?
(A) Participants have no rights
(B) Deception
(C) Freedom to withdraw
(D) Utilitarianism
- 167.** Ethics is known as the philosophy of what?
(A) Morality
(B) Society
(C) Justice
(D) None of the above
- 168.** Why might a research problem that is highly "significant" and "original" still be considered inappropriate for investigation?
(A) Because significant and original research problems are always appropriate.
(B) Because it might be ethically questionable or violate the rights of participants.

- (C) Because ethical considerations are irrelevant to research.
(D) Because researchers should only investigate insignificant and unoriginal problems.
- 169.** Ethical considerations in research aim to:
(A) Ignore participant consent
(B) Enhance researcher bias
(C) Maintain trust and accuracy
(D) Lower data reliability
- 170.** As a university, we strive to conserve, advance, and convey truth, according to the standards of ethical conduct in research.
(A) The Principle of Integrity and Honesty
(B) Competence in the conduct of research
(C) Introduction
(D) Preamble
- 171.** Which ethical consideration ensures a study asks a meaningful question and can improve health outcomes?
(A) Value through social and clinical benefit
(B) Scientific validity of study methods
(C) Respect for enrolled human subjects
(D) Independent review by external board
- 172.** The postexperimental explanation of a study.
(A) Validity
(B) Informed consent
(C) Debriefing
(D) Statistical significance
- 173.** Can this question be rigorously addressed in ethical manner?
(A) Substantive Issues
(B) Clinical Issues
(C) Ethical Issues
(D) Ethnic Issues
- 174.** When you copy ideas or text without giving permission to the author, you are ____
(A) Bibliography
(B) Plagiarizing
(C) Paraphrasing
(D) Copyright
- 175.** True or False: Shade A if the statement is TRUE; Shade B if the statement is FALSE. Evaluating the credibility of an author is important when selecting literature sources.
(A) True
(B) False
- 176.** In order to address ethical consideration of a thesis in an effective manner
(A) Considering Ethics in Research
(B) Determination of Research Design
(C) Developing Research Instrument
(D) Identifying Subjects of the Study
- 177.** Informed consent in psychological research primarily ensures that participants:
(A) Are paid for their participation
(B) Are guaranteed positive outcomes
(C) Understand the nature and purpose of the research
(D) Can withdraw at any time without penalty
- 178.** Maintaining participant confidentiality is not a significant concern in the data gathering procedure
(A) TRUE
(B) FALSE
- 179.** What is anonymity?
(A) Not telling someone you are researching them
(B) Keeping someone's identity secret.
(C) Not putting your name on your research
(D) Telling all of the names
- 180.** A lecturer lists a student as an author without any real contribution. Ethically, this action ____
(A) Can be justified as mentoring
(B) Violates authorship principles
(C) Is allowed if agreed upon
(D) Has no significant impact
(E) Is common practice

- 181.** When is it necessary to gain access and acceptance in a research setting?
- (A) Only when participants request it
 - (B) Always, before conducting research
 - (C) It is not necessary in covert research
 - (D) Only when it is convenient
- 182.** A teacher, labelled the head of a committee, as chairperson instead of chairman. It indicates that the teacher
- (A) Follows a more acceptable term
 - (B) Has a good command of language
 - (C) Is using a gender-free language
 - (D) Has gender bias
- 183.** What is considered unethical in a research about students' behaviors and class management
- (A) The research participants (given role of 'teachers') did not know the 'learners' were actors
 - (B) The participants responded to an advert
 - (C) The participants were all male
 - (D) None of above
- 184.** Recording the ideas of a source in one's own words. these must be documented in parenthesis and in the works cited page.
- (A) Plagiarism
 - (B) Quotation
 - (C) Paraphrase
 - (D) None of the above
- 185.** For participants younger than 18, a ___ must sign an informed consent form before the study begins.(Research Methods and Statistics Part II)
- (A) Doctor
 - (B) Friend
 - (C) Parent
 - (D) Teacher
- 186.** Which teacher action best aligns with promoting academic integrity in student work?
- (A) Allowing unacknowledged use of external words and thoughts
 - (B) Ignoring stylistic deviations to encourage creativity
 - (C) Certifying that submitted work reflects genuine student effort
 - (D) Discouraging questions about sources to save classroom time
- 187.** Who typically makes decisions and has the final say about research ethics issues?
- (A) Ethical Committees
 - (B) The APA or BPS
 - (C) Individual Researchers
 - (D) None of the above
- 188.** Quality of a good researcher who is trustful in the conduct of his research and declares valid results
- (A) Economical
 - (B) Religious
 - (C) Resourceful
 - (D) Honest
- 189.** Integrity in research means:
- (A) Fabrication of data
 - (B) Honesty in procedures
 - (C) Copying results
 - (D) Hiding errors
- 190.** What does "bias" refer to in research?
- (A) A neutral perspective
 - (B) A predisposition to a certain point of view that affects results
 - (C) A type of hypothesis
 - (D) A method of data collection
- 191.** The perception that the media is reporting the news in a partial or prejudiced manner.
- (A) Objectivity
 - (B) Bias
 - (C) Opinions
 - (D) Generalizations
- 192.** Which ethical issue might arise when conducting internet-based research?
- (A) Increased physical risk

- (B) Simplified data analysis
 - (C) Difficulty in maintaining anonymity
 - (D) Lack of compensation
- 193.** Which ethical safeguard is exemplified in the following? “Study participants in a qualitative study of the experience of living with chronic obstructive pulmonary disease renegotiate the terms of their participation each time they are interviewed.”
- (A) Anonymity
 - (B) Review by an Institutional Review Board (IRB)
 - (C) Informed consent
 - (D) Freedom from harm or exploitation
- 194.** Imagine that you have agreed to participate in psychological research. Prior to the study you will be given information about what you can expect & other details of the research & then asked to sign a form indicating your willingness to participate. You have just ____
- (A) Violated A.P.A. Rules
 - (B) Given Informed Consent
 - (C) Been Debriefed
 - (D) Been Intentionally Deceived
- 195.** Quality of being believable or trusted
- (A) Artifact
 - (B) Chronology
 - (C) Bias
 - (D) Credibility
- 196.** When designing a laboratory ‘true’ experiment to study how stress affects memory function, which of the following would be an ethical way to manipulate the independent variable?
- (A) Causing extreme psychological stress to participants.
 - (B) Using deception without intending to debrief the participants.
 - (C) Applying a standardized stress-inducing task that is considered safe.
 - (D) Exposing participants to harmful conditions without their consent.
- 197.** Identifying information will not be made available to anyone who is not directly involved in the study (principle of anonymity, guarantee of privacy).
- (A) Person’s right to service
 - (B) Voluntary participation
 - (C) Freedom from risk of harm
 - (D) Confidentiality
- 198.** Research misconduct includes:
- (A) Honest error
 - (B) Data fabrication, falsification, plagiarism
 - (C) Peer review
 - (D) Submitting references
- 199.** Informed consent ensures:
- (A) Forceful participation
 - (B) Voluntary participation
 - (C) Hidden identity
 - (D) Statistical accuracy
- 200.** When does the scientific community permit research that may cause participants harm?
- (A) When the participants are under the care of a legal guardian who signs a consent form.
 - (B) When the participants agree to participate in exchange for substantial remuneration.
 - (C) When the potential value of the study for humans is very high.
 - (D) The scientific community never permits research that may cause harm.
- 201.** A major ethical concern that involves confidentiality and knowledge that are being studied
- (A) Informed consent
 - (B) Privacy
 - (C) Relative risk
 - (D) Access to data
- 202.** What ethical principle states that all data must be kept anonymous.
- (A) Informed consent

- (B) Confidentiality
(C) Withdrawal
(D) None of above
- 203.** An educational institution uses a global digital platform that stores student data abroad. The primary ethical issue in this practice is —
(A) System efficiency
(B) Access speed
(C) Security and sovereignty of personal data
(D) Subscription costs
(E) Ease of integration
- 204.** After completing a research, I publish the results in the newspapers and go on TV to talk about my studies. I show photos of the people who took part. Which ethical research rule have I not respected?
(A) Informed consent
(B) Cause no harm
(C) Right to withdraw
(D) Confidentiality
(E) Non-deceptive practices
- 205.** Ethical issues in ethnography relate to field-work concerns.
(A) True
(B) False
- 206.** The researcher must also ensure that if vulnerable groups are to be used (elderly, disabled, children, etc.), they must receive special care. Which ethical guideline is this?
(A) Informed consent
(B) Protection of participants
(C) Deception
(D) Confidentiality
- 207.** You should be able to ___ a source a determine if it is good for your project.
(A) Evaluate
(B) Organize
(C) Substantiate
(D) Plagiarism
- 208.** Confidentiality. Voluntary participation. Withdrawal rights. Informed consent procedures. Deception. Debriefing. All these are part of
(A) Replication
(B) Morals
(C) Competency
(D) Ethics
- 209.** What is the main difference between data confidentiality and data anonymity?
(A) Confidentiality means researchers know the identity of subjects, while anonymity means they do not.
(B) Confidentiality means data is destroyed, while anonymity means data is published.
(C) Confidentiality means data is shared with all researchers, while anonymity means it is not.
(D) Confidentiality means subjects are paid, while anonymity means they are not.
- 210.** According to the International Centre for Academic Integrity, which of the following are central values that underpin academic integrity?
(A) Honor
(B) Fairness
(C) Respect
(D) Reconciliation
(E) Honesty
- 211.** Ideally, researchers not affiliated with those who produce the original findings conduct replication studies.
(A) True
(B) False
- 212.** Should you undertake any research without informed consent
(A) Yes
(B) No

- 213.** What is purposely misleading experiment participants in order to maintain the integrity of the experiment called?
(A) Deception
(B) Deductive reasoning
(C) Empirical
(D) None of above
- 214.** Which of the following is true about informed consent in research?
(A) People can be forced to participate in the study.
(B) Researchers can withhold information from participants.
(C) Participants can withdraw without penalty whenever they wish.
(D) Consent is only verbal and not required in writing.
- 215.** 'The research is an ethical process'. Here the meaning of ethics is
(A) The external beauty of the research.
(B) The quality of the research content.
(C) The fulfillment of research values in a investigation.
(D) None of the above.
- 216.** Ensuring no physical, financial, or psychological harm is caused.
(A) Responsible Mentoring
(B) Competence
(C) Risk of Harm
(D) Openness
(E) Carefulness
- 217.** I am conducting a research to test the effect of UV light on human skin. I test UV light on people. When I reach the end of the experiment, I go on to give an oral presentation about my studies. I show photos of the people who took part. Which ethical research rule have I not respected?
(A) Informed consent
(B) Cause no harm
(C) Right to withdraw
(D) Confidentiality
(E) Deceptive practices
- 218.** The quality of being trusted and believed in
(A) Wikipidea
(B) Credibility
(C) Glossary
(D) Final draft
- 219.** A scientist gives a truthful report of observations. He / She does not fabricate, trim, destroy, or misinterpret data. He / She also acknowledges the works of others.
(A) Curiosity.
(B) Creativity.
(C) Objectivity.
(D) Honesty.
- 220.** Humans participating in research studies must be participating by their own ____ (Research Methods and Statistics Part II)
(A) Doctor's Suggestion
(B) Free Choice
(C) Family's Approval
(D) Legal Sentencing
- 221.** If an article doesn't tell you where the information comes from, it is probably:
(A) Reliable
(B) Funny
(C) Non-reliable
(D) The best source
- 222.** What do we call the suggested rules for acting responsibly and morally when conducting research?
(A) Ethics
(B) Guidelines
(C) Rules
(D) None of above
- 223.** What is the principle of voluntary consent in research participants' ethics?
(A) Participants are not required to give consent
(B) Participants are informed and voluntarily give consent

- (C) Participants are coerced into giving consent
- (D) Participants are deceived into giving consent
- 224.** Why was the experiment considered unethical? (Choose the BEST answer)
- (A) The children and their adoptive families were not informed about the study or the separation
- (B) The experiment was too expensive
- (C) The children were given too much attention
- (D) The results were published without peer review
- 225.** “Private; not to be shared” can be the meaning of ____
- (A) Confidential
- (B) Collaborate
- (C) Commence
- (D) Comment
- 226.** An ethical principle which means avoiding bias
- (A) Subjectivity
- (B) Morality
- (C) Objectivity
- (D) Honesty
- 227.** Communication is ethical only when it is genuine, open, cooperative and sensitive to one’s cultural and social beliefs and practices.
- (A) TRUE
- (B) FALSE
- 228.** When conducting research involving human subjects, what is the significance of confidentiality?
- (A) It allows researchers to share participants’ personal information without consent
- (B) It ensures that participants’ information is kept private and not disclosed to unauthorized individuals
- (C) It helps researchers to selectively disclose study results based on participant characteristics
- (D) None of above
- 229.** Some argue that animal research is inherently flawed in terms of being ethical because unlike human participants, animals do not consent to be involved in research. What is a key reason for this perspective?
- (A) Animals can provide consent like humans.
- (B) Animals do not consent to be involved in research.
- (C) Animal research is always ethical.
- (D) Animals are not used in research. Tags 1.2.A
- 230.** As experimental research methods evolve, what aspect will remain crucial?
- (A) Reducing the importance of ethical considerations
- (B) Continued emphasis on ethical considerations
- (C) Phasing out experimental research
- (D) Focusing on single population studies
- 231.** How does following ethical guidelines in research contribute to the validity of your findings?
- (A) Ethical guidelines ensure your research is transparent and credible.
- (B) Ethical guidelines allow you to skip the review process.
- (C) Ethical guidelines make it easier to fabricate data.
- (D) Ethical guidelines prevent you from sharing your data with others.
- 232.** Which question should one ask himself/herself to determine whether one is facing a true ethical dilemma?
- (A) Is there money at stake?
- (B) Could someone be hurt by these actions?
- (C) Does the action make me look good to others?
- (D) Is my choice based on the most popular option?

233. What must participants receive to ensure informed consent?
- (A) Assurance of eventual direct benefit
 - (B) Full disclosure of purposes and risks
 - (C) Guaranteed authorship on results
 - (D) Free medical care during the study
234. A journalist must be ____ and moral by writing the truth.
- (A) Integral
 - (B) Subjective
 - (C) Fierce
 - (D) Ethical
235. One major issue with the Milgram obedience study and with Watson's early conditioning experiments is that ____ would not have been required because the APA Code of Ethics did not exist.
- (A) Informed consent
 - (B) Validity
 - (C) Reliability
 - (D) A double blind
236. What does the term "ethics" mean in psychology?
- (A) Correct rules of conduct necessary when carrying out research
 - (B) Experiments
 - (C) Opportunity sampling
 - (D) Publishing research findings
237. Ethical research requires:
- (A) Costly experiments
 - (B) Data manipulation
 - (C) Informed consent of participants
 - (D) Fabricated results
238. Because of unethical experiments in the past, psychologists now must inform the people involved in the experiment what the experiment is about and must obtain their agreement to participate. This is most closely associated with the research principle of:
- (A) Informed Consent
 - (B) Deformed Consent
 - (C) Contractual Agreements
 - (D) Just Say "Yes"
239. Results published in which type of publication are most respected in science due to a rigorous evaluation process involving feedback from multiple sources?
- (A) News magazines
 - (B) Web journals
 - (C) Peer-reviewed journals
 - (D) Weekly newspapers
240. What is the significance of the Helsinki Declaration?
- (A) It prioritizes human subject well-being
 - (B) It promotes scientific advancement
 - (C) It is a guideline for research ethics
 - (D) It is a historical document
241. How can you ensure that your synthesized information is accurate and reliable?
- (A) Cross-reference multiple credible sources, verify credibility, evaluate for bias, consult experts.
 - (B) Rely on unverified social media posts
 - (C) Ignore potential bias in sources
 - (D) Use only one source for information
242. You are researching the pros and cons of bottled water. Which resource would be most likely to include biased information about your topic?
- (A) Government website
 - (B) Magazine article about bottling
 - (C) Encyclopedia article about bottling
 - (D) Bottling company newsletter Edit
243. Why is informed consent important in scientific research?
- (A) To protect the rights and autonomy of participants and promote ethical conduct in research.
 - (B) To ensure that participants are compensated for their time and effort.

- (C) To prevent participants from dropping out of the study.
- (D) To increase the likelihood of obtaining statistically significant results.
- 244.** True or False: Shade A if the statement is TRUE; Shade B if the statement is FALSE. Informed consent requires that participation in research is voluntary and clearly explained to participants.
- (A) True
- (B) False
- 245.** What is active deception in psychological research?
- (A) Withholding some information about the study
- (B) Intentionally giving participants false information
- (C) Providing participants with all necessary information
- (D) Avoiding any form of deception
- 246.** Invasive/private questions should be avoided. Participants should be made aware of their right to ignore the questions they incur during the study.
- (A) Confidentiality
- (B) Privacy
- (C) Debriefing
- (D) None of above
- 247.** The act of unauthorized copying or downloading of a program from a network and making multiple copies of it is
- (A) Plagiarism.
- (B) Network piracy.
- (C) Software piracy.
- (D) Site-license piracy.
- (B) Allowing participants to withdraw any-time
- (C) Creating a comfortable interview environment
- (D) Forcing participants to continue participation
- 249.** When a researcher forces individuals to be the participant of his study who have refused, accordingly, it could be stated as the violation of ____
- (A) Research Sampling
- (B) Research Ethics
- (C) Research Site
- (D) Research Proposal
- (E) Research Problems
- 250.** When evaluating content, what should you be observant of?
- (A) The author's name and credentials and whether or not sources are cited
- (B) Spelling and grammatical errors
- (C) Whether the information is objective or designed with a purpose
- (D) All of the above
- 251.** Why is it important to check the publication date of a source?
- (A) To see if it's popular
- (B) To know if the information is current and accurate
- (C) To check if it's written in English
- (D) To find out if it's free to access
- 252.** Ethics committees often help improve the quality of research by ensuring ethical conduct.
- (A) True
- (B) False
- 253.** A research reports the results of an investigation no matter how good or bad he/she thinks the gathered data are. This characteristic of a research is ____
- (A) Analytical
- (B) Critical

- (C) Honest
 - (D) Research-oriented
- 254.** Committee that oversees ethics in research / required in institutions that receive federal money / evaluates the costs and benefits of research taking special consideration for participants' wellbeing
- (A) Cost-benefit analysis
 - (B) Informed consent
 - (C) Debriefing
 - (D) Institutional review boards
- 255.** If participants feel unhappy for any reason with the research after debriefing what must they be given?
- (A) Informed consent
 - (B) Anonymity
 - (C) The right to withdraw their data
 - (D) Additional payment
- 256.** Which of the following is not an ethical guideline created to safe guard human participants?
- (A) Informed consent
 - (B) Protection from a physical or emotional harm or discomfort
 - (C) Participants may not withdraw at any time
 - (D) Confidentiality
- 257.** To put an author's words into your own is
- (A) Summarizing
 - (B) Paraphrasing
 - (C) Plagiarizing
 - (D) Quoting
- 258.** Sam fills out a survey form on a computer game web page with email and address information, but checks the box to not let it be shared. In the following weeks, he receives several advertisements in the mail as well as dozens of e-mail messages about new computer games. How would you classify the use of his information?
- (A) Ethical
 - (B) Unethical
- 259.** The Ethics in research is not related to
- (A) Humanity.
 - (B) Reliability.
 - (C) Self-interest.
 - (D) Scientific method.
- 260.** Extent to which the researchers show a range of different realities in the analysis and interpretation of the data
- (A) Transferability
 - (B) Authenticity
- 261.** Symbolizing data is preserving their
- (A) Origin
 - (B) Source
 - (C) Confidentiality
 - (D) Significance
- 262.** Participants and the data gained from them must be kept anonymous unless they give their full consent. No names must be used in a lab report. Which ethical guideline is this?
- (A) Informed consent
 - (B) Protection of participants
 - (C) Deception
 - (D) Confidentiality
- 263.** What type of communication barrier might exist when a healthcare worker has thoughts and feelings about a patient without realizing it?
- (A) Physical barrier
 - (B) Bias
 - (C) Language barrier
 - (D) Developmental barrier
- 264.** Once human subjects sign an informed consent form, no special procedures must be put in place to researchers to protect the data they provide as research subjects.
- (A) Yes
 - (B) No

265. What is a major ethical issue in clinical trials?
- (A) Most of the benefits go to future patients, not to the patients in the trial.
 - (B) All patients in the trial receive the best treatment.
 - (C) Clinical trials never involve any risk.
 - (D) Clinical trials are always unethical.
266. A researcher practicing legality always ensures that local and institutional policies are obeyed.
- (A) True
 - (B) False
267. What is an example of passive deception?
- (A) Telling participants they are taking a test of reaction speed
 - (B) Not telling participants the study is testing background noise effects
 - (C) Informing participants about the study's true purpose
 - (D) Providing false information about the study's procedures
268. What is one ethical requirement in conducting research?
- (A) Copying previous studies without permission.
 - (B) Hiding errors in data collection.
 - (C) Obtaining informed consent from participants.
 - (D) Using sources without citations.
269. Why is it important for scientists to question the ethical implications of their work?
- (A) To avoid legal consequences
 - (B) To align with societal values
 - (C) To ensure they receive funding
 - (D) To increase their publication count
270. Which statement reflects ethical handling of personal data while using AI tools?
- (A) Protect sensitive information responsibly
 - (B) Upload classmates' data without consent
 - (C) Share credentials to speed up projects
 - (D) Store passwords inside prompt history
271. Which practice helps cultivate a community where integrity is ingrained?
- (A) Acknowledging contributions and proper referencing
 - (B) Prioritizing speed over accuracy in citations
 - (C) Replicating accessible content for efficiency
 - (D) Avoiding collaboration in research and communication
272. What do ethical considerations in business anthropology include?
- (A) Research ethics, cultural sensitivity, and the impact of business practices on local communities.
 - (B) Financial strategies for maximizing profits.
 - (C) Marketing techniques for global audiences.
 - (D) Technological advancements in product design.
273. Which additional area is often examined when researching people and nursing processes?
- (A) Tourism management principles
 - (B) Automotive engine design
 - (C) Fashion trends in uniforms
 - (D) Ethics in professional decision-making
274. What is a key factor in determining the credibility of a source?
- (A) The length of the source
 - (B) The number of advertisements on the webpage
 - (C) The qualifications and reputation of the author
 - (D) The number of images included in the source

275. Complete the strategy statement: Assess the author's credentials and ____
- (A) Accommodations
 - (B) Assertions
 - (C) Advances
 - (D) Applications
276. Fabrication is defined as
- (A) Making up data or results and recording or reporting them
 - (B) Manipulating research materials or changing or omitting data or results such that the research is not accurately represented in the research record.
 - (C) The appropriation of another person's ideas, processes, results, or words without giving appropriate credit.
 - (D) None of the above
277. What is the importance of documenting research findings?
- (A) Documenting research findings is important for transparency, reproducibility, and knowledge sharing.
 - (B) It prevents collaboration among researchers.
 - (C) It helps in reducing research costs.
 - (D) It is only necessary for academic publications.
278. Which of the following is an ethical issue that could arise when using observation as a research method?
- (A) Not being able to record conversations
 - (B) Observing people outside their natural setting
 - (C) Researchers not explaining the reason for their presence
 - (D) Persons altering their behaviour in the researcher's presence
279. It is deemed appropriate to use animals in experiments when
- (A) It would be too expensive to use human subjects.
 - (B) It would be a hassle to use humans.
 - (C) Researchers are looking at questions such as learning and memory.
 - (D) It would be unethical to conduct the experiment with humans.
280. Professor X has demanded that his class take part in his research. Non-participation will result in failure in the course. What ethical issue was breached by Professor X?
- (A) Risk of harm
 - (B) Confidentiality
 - (C) Informed consent
 - (D) Voluntary participation
281. What ethical considerations should be made with the study you proposed to ensure that your experiment would conform to the scientific community's expectations of ethical research?
- (A) Informed consent from participants
 - (B) Ensuring participant anonymity
 - (C) Avoiding harm to participants
 - (D) All of the above
282. Social researchers are often criticized for not adhering to ethical principles in research. Which of the following is NOT an ethical principle?
- (A) Right to privacy
 - (B) Consent of the participant
 - (C) Right to research
 - (D) Publication of the research findings
283. This ethical principle states that a psychologist should ensure that participants do not experience harm and that they are reminded of their right to withdraw
- (A) Competence
 - (B) Respect
 - (C) Responsibility
 - (D) Integrity
284. Which website or address (URL) would not be reliable?
- (A) NASA
 - (B) Britannica

- (C) Wikipedia
(D) .gov or .edu websites
- 285.** To avoid plagiarism, you must:
(A) Have Miss Grimmick check your paper!
(B) Do a cartwheel!
(C) Cite your sources!
(D) Use reliable sources!
- 286.** Identify the term that refers to a post study interview in which all aspects of the study are revealed, reasons for the use of deception are given, and the participants' questions are answered?
(A) Dehoaxing.
(B) Debriefing.
(C) Desensitizing.
(D) Deploying.
- 287.** Advocating for informed consent and respecting autonomy demonstrate which blended competency?
(A) Ethical/legal adherence to principles
(B) Cognitive application of algorithms
(C) Technical mastery of equipment
(D) Interpersonal use of small talk
- 288.** What is the importance of paraphrasing in research?
(A) To copy someone else's work
(B) To express the main ideas in your own words
(C) To avoid mentioning the original source
(D) To reduce the length of the text
- 289.** This is the mechanism by which a profession ensures that its members use their knowledge and skills for the benefit of society
(A) Certification
(B) Initial professional education
(C) Code of ethics
(D) None of above
- 290.** You have just completed your PhD and you receive a kind invitation from journal you never heard of before to become a member of their international editorial board. This is the first invitation you receive. Without any hesitation, you accept the invitation. Is this an acceptable practice?
(A) Yes
(B) No
- 291.** What approach do ethics committees use to determine if research is ethically acceptable?
(A) Pros and cons approach
(B) Cost-benefit approach
(C) Is the research going to make money
(D) Cognitive approach
- 292.** Which of the following principles is most important to ensure the ethical treatment of participants in psychological research?
(A) Replication
(B) Confidentiality
(C) Random Sampling
(D) Deception
- 293.** To prevent conflicts of interest in publication, researchers should ____
(A) Avoid collaboration
(B) Openly disclose potential conflicts
(C) Hide affiliations
(D) Reduce the number of authors
(E) Leave all decisions to the editor
- 294.** Which of the following is a sign of a biased source?
(A) It presents multiple viewpoints
(B) It uses emotional language to persuade
(C) It is peer-reviewed
(D) It includes a bibliography
- 295.** No procedure should cause physical or psychological harm or distress. For any procedure that might, a special project license is needed.
(A) Procedures
(B) Pain, suffering and distress
(C) Housing
(D) Reward, deprivation and aversive stimuli

- 296.** She instructed the interviewers not to tell the interviewees that the data gathering are for his own research project for publication. This teacher has violated the student's right to:
- (A) Disclosure
 - (B) Not be harmed
 - (C) Privacy
 - (D) Self determination
- 297.** This is when you change the words and phrasing of the original text, but keeps the original meaning of the text
- (A) Quoting
 - (B) Paraphrasing
 - (C) Summarizing
 - (D) None of the above
- 298.** You are asked to review a paper submitted for publication in a journal. Can you freely copy and circulate it to your students who are working on a project on the same topic?
- (A) Yes
 - (B) No
- 299.** Which of the following approaches can be used to help overcome ethical issues in focus groups?
- (A) Providing leading questions
 - (B) Explaining the interview format and topic sequence
 - (C) Using head nods or positive responses
 - (D) None of the above
- 300.** The word plagiarism comes from the Latin plagiarius meaning
- (A) Lending
 - (B) Borrowing
 - (C) Stealing
 - (D) Kidnapper
- 301.** A Dependable or trustworthy source of information
- (A) Relevance
 - (B) Paraphrase
 - (C) Irrelevant
 - (D) Credible source
- 302.** The belief that the privacy of others must always be maintained.
- (A) Advocacy
 - (B) Constituents
 - (C) Dress Codes
 - (D) Confidentiality
- 303.** What is the responsibility of a researcher in ethical social research?
- (A) To deceive participants
 - (B) To avoid coercion and humiliation
 - (C) To have personal gain
 - (D) To falsify data
- 304.** Ethics in research primarily deals with:
- (A) The design of the questionnaire
 - (B) The moral conduct of the researcher
 - (C) The sampling technique
 - (D) The length of the report
- 305.** It gives correct or accurate data, which the footnotes, notes, and bibliographical entries should honestly and appropriately document or acknowledge
- (A) CRITICAL
 - (B) TIMELY
 - (C) ACCURATE
 - (D) RELEVANT
- 306.** Using unverified sources in the review of related literature is acceptable if the study is exploratory.
- (A) TRUE
 - (B) FALSE
 - (C) All the above
 - (D) None of the above
- 307.** Which action best exemplifies academic integrity for teachers?
- (A) Focusing only on students' final outcomes
 - (B) Reusing worksheets from other sources secretly
 - (C) Avoiding any discussion of research methods
 - (D) Attributing collaborators' contributions consistently

- 308.** It is anchored on the moral standards that we follow.
(A) Morality
(B) RA No. 8485
(C) Ethics
(D) None of above
- 309.** When might it be appropriate to deceive participants in research? To prevent participant bias and obtain natural behavior
(A) To prevent participant bias and obtain natural behavior
(B) Never
(C) To avoid obtaining informed consent
(D) To speed up data collection
- 310.** Which of the following provides integrity to the results in a research project?
(A) Protecting the privacy of respondents
(B) Relying on both print and digital data
(C) Presenting the findings without change or modification
(D) Using two or more research methodologies to obtain data
- 311.** What is the analysis of whether the research is important enough to place a subject at risk
(A) Written consent
(B) Trusting
(C) Confidentiality
(D) Risk/benefit ratio
- 312.** The oversight committee that decides the risks vs benefits is also known as the
(A) Institutional Review Board
(B) International Review Board
(C) Informative review Board
(D) Insightful Review Board
- 313.** ___ refers to the protection of people's identity through not disclosing their name or not knowing it.
(A) Confidentiality
(B) Privacy
(C) Voluntary participation
(D) Anonymity
- 314.** What is the importance of considering ethical principles when formulating a research problem?
(A) To ensure the research does not harm participants or violate their rights.
(B) To make the research process more difficult.
(C) To avoid addressing important social issues.
(D) Ethical considerations are not relevant to research.
- 315.** Which of these is an ethical issue under action research?
(A) Data coercion
(B) Keeping the participants detail confidential.
(C) Being transparent with the result
(D) Carrying the participants along
- 316.** Which of the following is an example of integrity when conducting research?
(A) Reporting data accurately
(B) Ensuring voluntary participation
(C) Changing the names of the interviewees
(D) Surveying only people known to the researcher
- 317.** A source that cannot be trusted
(A) Domain
(B) Reliable source
(C) Bias
(D) Unreliable source
- 318.** Which approach focuses on the character and integrity of the researcher?
(A) Deontological ethics
(B) Consequentialist ethics
(C) Virtue ethics
(D) Situational ethics

- 319.** Which of the following best explains the importance of ethical oversight in research?
- (A) It increases the number of experiments conducted
 - (B) It ensures that past mistakes are not repeated
 - (C) It makes research more profitable
 - (D) It reduces the need for participant consent
- 320.** What are some ethical considerations in research communication?
- (A) Ensuring accurate and unbiased reporting of findings
 - (B) Avoiding plagiarism and ensuring proper attribution
 - (C) Disclosing conflicts of interest
 - (D) All of the above
- 321.** A nurse prepares a client for psychological testing. Which action aligns with the principles of sound assessment?
- (A) Encouraging the client to memorize test questions in advance
 - (B) Ensuring informed consent, maintaining confidentiality, and following standardized administration procedures
 - (C) Allowing family members to answer on the client's behalf
 - (D) Modifying test items mid-session based on the client's preferences
- 322.** Modifying data to fit a hypothesis violates:
- (A) Research ethics
 - (B) Sampling rules
 - (C) Peer review
 - (D) Publication norms
- 323.** What are some common forms of academic misconduct?
- (A) Plagiarism
 - (B) Fabrication of data
 - (C) Falsification of research findings
 - (D) All of the above
- 324.** This is an ethical concept where the respondents are not harmed in any way possible. (Act of doing no harm)
- (A) Beneficence
 - (B) Promise-keeping
 - (C) Non-maleficence
 - (D) Truth-telling and ethics of misrepresentation
- 325.** Sharing information with participants after their involvement in a study has ended, including the purpose of the study and deception used in it
- (A) Acknowledgement
 - (B) Informed consent
 - (C) Debriefing
 - (D) None of above
- 326.** What is the primary goal of ethical research?
- (A) To protect the rights of participants
 - (B) To manipulate data
 - (C) To avoid publishing results
 - (D) To achieve desired outcomes
- 327.** Ethical principles developed by the American Psychological Association (APA) help ensure that human participants in psychological research ____
- (A) Get paid for their time and trouble
 - (B) Have not participated in similar research in the past
 - (C) Are protected from physical and psychological harm
 - (D) Understand the hypotheses of the researcher before they take part
 - (E) Keep the purposes of the research project confidential
- 328.** Which of the following may happen if an engineer does not act ethically?
- (A) Engineers may be held personally and legally responsible for their professional actions.
 - (B) Engineers will be praised for making choices that benefit themselves at the cost of the public safety

- (C) Engineer will be sent to another country.
(D) Engineer will get to work from home so they will not talk to the other engineers.
- 329.** Which of the following was NOT a major ethical violation in the Tuskegee Syphilis Study?
(A) Providing free treatment to all participants
(B) Lack of Informed Consent
(C) Denial of Treatment
(D) Racial Exploitation
- 330.** When designing ethical educational research, researchers should integrate ____
(A) Publication and career interests
(B) Methodology, subject protection, and scientific integrity
(C) Research speed and cost efficiency
(D) Target outputs and institutional reputation
(E) Advisor preferences
- 331.** Which of the following is considered an ethical requirement in market research?
(A) Ignoring privacy laws
(B) Hiding research intentions
(C) Informed consent
(D) Public disclosure of all participant data
- 332.** Which of the following is an ethical issue that could be raised in Piliavin et al. (1969) study?
(A) Lack of informed consent
(B) Right to withdraw
(C) Use of deception
(D) Confidentiality breach
- 333.** The principle on beneficence relates to researchers obligation to protect the wellbeing of a persons who participate in a study.
(A) True
(B) False
- 334.** What should you be following when using people as sources of data?
(A) Research ethics.
(B) Research honesty.
(C) Elevator story.
(D) SDU regulations.
- 335.** What does a biased source do?
(A) Present information in a ways that unfairly shows favor for or against one thing, person, or group
(B) State only facts without any opinion or commentary included
(C) Provide a balance of opinions from various sides of an issue
(D) None of above
- 336.** Which of the following is required for a research organization to carry out a study involving human subjects?
(A) Approval from an Institutional Review Board (IRB)
(B) Approval from a funding agency
(C) Approval from a journal editor
(D) Approval from the general public
- 337.** The post-experimental explanation of a study, including its purpose and any deceptions, to is participants
(A) Debriefing
(B) Informed Consent
(C) Mean
(D) Range
- 338.** True or False: If they are pressured by authorities, researchers are ethically allowed to release confidential information.
(A) False
(B) True
- 339.** How do we know that researchers are conducting research that maintains ethical standards?
(A) Academic publishers will not publish research that is unethical.
(B) Researchers are all trained in ethics in their education.
(C) All research is peer reviewed.

- (D) Academic researchers are required to submit their research plans to a review board before conducting it.
- 340.** In the Baby Albert experiment, John Watson was not forth-coming with Albert's mother about his intentions, nor did he debrief the mother. This shows his experiment was not
- (A) Scientific
 - (B) About conditioning
 - (C) Ethical
 - (D) Psychological
- 341.** Participants provided w/ written information about what the study entails (consent form) before participating
- (A) Cost-benefit analysis
 - (B) Informed consent
 - (C) Debriefing
 - (D) Institutional review boards
- 342.** Informed consent requires participants to know enough about the study to decide whether they:
- (A) Want to participate.
 - (B) Can leave the study at any time.
 - (C) Are being observed.
 - (D) Will have their data kept confidential.
- 343.** Being ethical in communication involves:
- (A) Deceiving others
 - (B) Being honest and fair
 - (C) Ignoring ethical standards
 - (D) Prioritizing personal gain
- 344.** What is research fraud in social research?
- (A) Faking or inventing data
 - (B) Failing to report study conduct honestly
 - (C) Both A and B
 - (D) None of the above
- 345.** Ethical norms in research do not involve guidelines for: [2015-DECEMBER]
- (A) Thesis format
 - (B) Copyright
 - (C) Patenting policy
 - (D) Data sharing policies
- 346.** Which of the following is an ethical concern associated with some lab experiments?
- (A) The use of expensive laboratory equipment
 - (B) The publication of results in scientific journals
 - (C) Some lab experiments raise ethical issues, such as deception or psychological harm to participants
 - (D) The requirement for participants to sign consent forms
- 347.** Participants should be asked if they want to take part and be given relevant information about what is involved.
- (A) Valid Consent
 - (B) Right to Withdraw
 - (C) Minimizing Harm
 - (D) Lack of Deception
- 348.** Scientist's work should be guided by some moral codes.
- (A) Perseverance
 - (B) Open-mindedness
 - (C) Intellectual honesty
 - (D) Good ethics
- 349.** Researchers must obtain informed consent from legal guardian(s) of the participant in circumstance which involves participants who:
- (A) Are too young (minor)
 - (B) Are matured
 - (C) Have the intellectual ability to understand what they are being told
 - (D) Are above 18 years old
- 350.** What is one way ethical research on nature vs. nurture can be conducted today?
- (A) Observational studies that don't involve deception or harm
 - (B) Experiments without participant consent

- (C) Studies that hide results from participants
(D) Research that ignores genetic factors
351. When the researcher lets his/her personal beliefs influence the viability of research is called ____
(A) Professional
(B) Common Sense
(C) Researcher Bias
(D) None of above
352. When written informed consent is obtained, participants must be told ____ of the research
(A) The aim and hypothesis
(B) The method and pay rate
(C) The nature and purpose
(D) Method and outcome
353. What should you avoid in academic writing?
(A) Acronyms
(B) Formal terms
(C) Colloquial terms
(D) Punctuation
354. The principle that subjects in any study must know about the nature of the research project, any potential benefits or risks that they may face, and that they have the right to stop participating at any time, for any reason.
(A) Confidentiality
(B) Informed Consent
(C) Debriefing
(D) None of above
355. What makes a source trustworthy?
(A) It has a lot of opinions
(B) It's very popular on social media
(C) It provides clear evidence and sources
(D) It has a catchy headline
356. Integrity and transparency are fundamental:
(A) Issues in business.
(B) Requirements in research.
(C) Ethical principles in research.
(D) Methodologies in research.
357. In 1974, Congress passed the ____, which authorized federal agencies to develop regulations protecting human subjects. (Research Methods and Statistics Part II)
(A) National Research Act
(B) Free Will Act
(C) Anti-Coercion Bill
(D) Ethical Treatment of Humans and Animals Act
358. There are potential risks and harms in:
(A) Every stage of the research process.
(B) Some research projects.
(C) Some research projects that engage with human populations.
(D) Research projects that engage with human populations.
359. Ensuring participants are not forced to join the study.
(A) Competence
(B) Openness
(C) Carefulness
(D) Social Responsibility
(E) Voluntary Participation
360. Which of the following is an ethical issue in qualitative research?
(A) Use of laboratory settings
(B) Avoidance of subjective interpretations
(C) Informed consent and confidentiality
(D) Lack of statistical analysis
361. What demonstrates adherence to data privacy regulations in school projects?
(A) Relying on verbal promises from tools
(B) Ignoring consent to meet deadlines
(C) Following established privacy guidelines
(D) Disabling privacy settings for convenience

- 362.** What malpractice is highlighted alongside plagiarism in the PYP section?
- (A) Exam impersonation
 - (B) Data fabrication
 - (C) Unauthorized collaboration
 - (D) Contract cheating
- 363.** The Act of publishing the same data and results in more than one Journal or Publication refers to-
- (A) Partial Publication
 - (B) Duplicate Publication
 - (C) Deception
 - (D) Full Publication
- 364.** Informed consent refers to ____
- (A) Getting permission from Govt. Authority to do the research
 - (B) Analyzing the Data
 - (C) Collecting Data from the respondents
 - (D) Getting the willingness of the respondents
- 365.** It is important to publicize the results of our research to avoid duplication of researches and to exchange of information with fellow researchers.
- (A) True
 - (B) False
 - (C) Either true or false
 - (D) None of above
- 366.** Which action aligns with academic integrity when using AI?
- (A) Use AI to replace your understanding entirely
 - (B) Ignore course rules when AI is helpful
 - (C) Submit AI text without attribution to speed work
 - (D) Cite reputable sources that verify AI claims
- 367.** Nick and Taylor are researching for a school project. Which of the following is a reliable indicator of a source's accuracy?
- (A) The source has a professional-looking website.
 - (B) The source is published by a reputable organization.
 - (C) The source has a lot of advertisements.
 - (D) The source is frequently shared on social media.
- 368.** What is the importance of evaluating the author's credentials in online research?
- (A) It helps determine the credibility of the information.
 - (B) It is not necessary for online research.
 - (C) It ensures the information is entertaining.
 - (D) It guarantees the information is up-to-date.
- 369.** Imagine Eshaan, Divya, and Avni are planning a fun activity. What does 'informed consent' refer to in this scenario?
- (A) Getting permission from the local authorities to proceed with the activity
 - (B) Deciding on the best location for the activity
 - (C) Asking for everyone's opinion on the activity
 - (D) Ensuring everyone is willing to participate in the activity
- 370.** Calvin was asked to review a design that's not under his field of expertise, and he decided to take that responsibility. Is it ethical?
- (A) Yes
 - (B) No
- 371.** When you research something, it is OK for the information to be false?
- (A) Yes
 - (B) No
- 372.** Ethical quality of a researcher is
- (A) Truthfulness.
 - (B) Dignity of labor.
 - (C) Humanistic approach.
 - (D) All of the above.

373. Which practice helps avoid blind trust in AI results?
- (A) Use the most popular AI model
 - (B) Enable advanced prompting features
 - (C) Verify information using reputable sources
 - (D) Accept outputs without review
374. If you don't ____ the information from your ____, you will be accused of ____ and given a zero on the assignment. In some places, you can even get kicked out of school.
- (A) Synthesize, position, relevance
 - (B) Paraphrase, source, plagiarism
 - (C) Credible, source, research
 - (D) Summary, references, quantitative
375. When conducting research, what should you consider regarding the quality of sources?
- (A) The number of participants
 - (B) The color preferences of the audience
 - (C) Relevance, accuracy, reliability, and validity
 - (D) Conducting surveys
376. Participants' rights to remain anonymous fall under openness in research ethics.
- (A) True
 - (B) False
377. Improper use of a copyrighted work; the theft of intellectual property.
- (A) Copyright
 - (B) Copyright infringement
 - (C) Court-recognized privileges
 - (D) Defamation
378. In evaluating an institution's research policy, the most important ethical indicator is ____
- (A) Number of studies
 - (B) Funds absorbed
 - (C) Integrity of the process and protection of research subjects
 - (D) Speed of publication
 - (E) Popularity of the topic
379. What is one way scientists can demonstrate integrity in a scientific setting?
- (A) Ignoring organisational codes of practice
 - (B) Maintaining high quality ethical and professional standards
 - (C) Withholding negative results
 - (D) Prioritising speed over accuracy
380. When is consent required in research using internet?
- (A) When there is an expectation of privacy
 - (B) When there is no expectation of privacy
 - (C) All the time, there is no exception ever
 - (D) When the information used is private
381. Alternatives to using animals should be considered where possible (e.g. computer simulations or videos of previous studies).
- (A) Minimizing Harm and Maximizing Benefit
 - (B) Replacement
 - (C) Species
 - (D) Numbers
382. Which of the following is a misuse of survey results?
- (A) Accurate reporting
 - (B) Misleading the public
 - (C) Gathering information
 - (D) Educating respondents
383. A person's voluntary agreement to participate in a procedure on the basis of his or her understanding of its nature, its potential benefits and possible risks, and available alternatives
- (A) Hindsight Bias
 - (B) Placebo Effect
 - (C) Coercion
 - (D) Informed Consent
384. The synthesis of ethics and research management in education is reflected in ____
- (A) High output targets
 - (B) Administrative compliance

- (C) Ethical decision-making that is responsible and continuous
 - (D) Dominant leadership in research
 - (E) Competition among researchers
- 385.** What is Gilligan's Theory known for?
- (A) Ethics of the nation
 - (B) Ethics of justice
 - (C) Ethics of care
 - (D) Ethics of society
- 386.** Which method is most commonly associated with a lack of informed consent?
- (A) Qualitative content analysis
 - (B) In-depth interviewing
 - (C) Observation
 - (D) Structured interviewing
- 387.** Which of the following is an example of deception in business research?
- (A) The obtaining of company material without permission.
 - (B) The researcher wearing a disguise during an observation.
 - (C) The researcher failing to ask permission to interview someone.
 - (D) The researcher representing their research as being about a different topic.
- 388.** How can a sociologist minimize bias in their research?
- (A) By ignoring their personal values.
 - (B) By being transparent about their biases.
 - (C) By avoiding any form of data collection.
 - (D) By only using quantitative methods.
- 389.** What is meant by data confidentiality in the context of research studies?
- (A) The protection of information provided by subjects and assurance that individual information cannot be derived from the statistics reported.
 - (B) The process of sharing all data with the public.
 - (C) The requirement to destroy all data after the study.
 - (D) The obligation to publish individual responses.
- 390.** Which principle ensures ethical assessment practice?
- (A) Keeping test purposes hidden
 - (B) Providing equal access and fair scoring for all learners
 - (C) Prioritizing institutional reputation over fairness
 - (D) Ignoring cultural or linguistic differences
- 391.** You can publish what a source says and use their name.
- (A) On the Record
 - (B) Off the Record
 - (C) Deep background or Non-attributable
 - (D) On the Background
- 392.** How can professionals maintain integrity in their work?
- (A) By avoiding difficult decisions
 - (B) By strictly following all laws and regulations
 - (C) By aligning their actions with ethical principles and values
 - (D) By focusing solely on financial gains
- 393.** A researcher's promotion case is discussed in a department. Her partner in life is a senior member of the department. The two are not officially married. Should the senior member participate in the discussions and vote?
- (A) Yes
 - (B) No
- 394.** How do researchers assure that research participants are aware that their participation is voluntary?
- (A) It is apparent in the research design.
 - (B) They only do studies with participants who are in pools of research subjects.
 - (C) They get informed consent.
 - (D) None of the above

395. Refers to the moral behavior in the conduct of research and use of its outcomes.
- (A) Intellectual curiosity
 - (B) Prudence
 - (C) Intellectual honesty
 - (D) Ethics
396. An unfair inclination towards or against a person or group of people.
- (A) Asset log
 - (B) Backup
 - (C) Bias
 - (D) Biometric protection measure
 - (E) Blog
397. Privacy in research refers to:
- (A) The amount of light in the study environment.
 - (B) Participants' emotional and physical space being respected.
 - (C) Keeping participants' identities a secret.
 - (D) Observing participants without their knowledge.
398. Describe a framework for ethical reasoning in complex situations.
- (A) Following personal feelings without analysis
 - (B) Making decisions based solely on majority opinion
 - (C) Ignoring the situation entirely
 - (D) A framework for ethical reasoning includes identifying stakeholders, gathering facts, considering ethical principles, evaluating consequences, reflecting on values, making a justified decision, and reviewing outcomes.
399. If a researcher uses deception in their study, they must
- (A) Inform participants of this before participants agree to participate
 - (B) Allow participants to withdraw at any stage
 - (C) Debrief participants at the end if the study
 - (D) Debrief participants at the beginning of the study
400. Knowing enough about a study to decide whether you want to agree to participate
- (A) Right to withdraw
 - (B) Confidentiality
 - (C) Informed Consent
 - (D) Privacy
401. What is an ethical consideration?
- (A) Making sure your research does not cause harm or offence
 - (B) When people are different colours
 - (C) Making sure your research causes harm or offence
 - (D) When you are polite to people
402. What is researcher imposition?
- (A) The influence of the researcher's values on the research.
 - (B) The process of collecting data.
 - (C) The method of analyzing statistical data.
 - (D) The act of publishing research findings.
403. Which one is NOT an ethics?
- (A) People come first, research second
 - (B) Don't have to debrief at the end
 - (C) Confidentiality
 - (D) Informed Consent
404. To solve ethics prior to conducting the study, ensure that you do not:
- (A) Seek permission from the IRV
 - (B) Give credit for work done on the project
 - (C) Identify and go through local approvals for the site
 - (D) Select a site with a vested interest in the outcome of the study
405. How does adhering to ethical guidelines benefit academic publishing?
- (A) It reduces accountability.
 - (B) It promotes transparency and credibility.
 - (C) It discourages trust.
 - (D) It limits research integrity.

- 406.** Which vocab word means: “Not identified by name”
(A) Lede
(B) Source
(C) Caption
(D) Anonymous
- 407.** Making data accessible to only authorized users addresses which data storage problem associated with big data?
(A) Management.
(B) Redundancy.
(C) Access.
(D) Security.
- 408.** Names and data collected about participants can always be shared
(A) True
(B) False
- 409.** My research focuses on development of new technology. Shouldn't it be intrinsically insensitive to ethical concerns?
(A) Yes
(B) No
- 410.** What ethical principle ensures participants voluntarily agree to a study?
(A) Confidentiality
(B) Informed Consent
(C) Anonymity
(D) Beneficence
- 411.** The American Psychological Association's Code of Ethics governing research requires which of the following?
(A) All research participants must be over the age of 18.
(B) Drugs cannot be used in studies of psychological disorders.
(C) Informed consent must be documented.
(D) An equal number of males and females must be included.
- 412.** Research ethics primarily aim to:
(A) Ensure financial profitability
(B) Protect participants and ensure credibility
(C) Reduce research workload
(D) Increase the complexity of research
- 413.** Mrs. Teplicek is writing a paper about the most influential leaders of our time. While researching this topic, she finds several biographies in the library about leaders she is interested in discussing. The biographies she found are examples of a ____ source
(A) Unreliable
(B) Credible
(C) User Generated
(D) Copy
- 414.** I'm conducting an experiment, the experiment might cause physical injuries to the participants, which principle am I breaking?
(A) Providing the right to withdraw
(B) Protecting anonymity and confidentiality
(C) Minimizing the risk of harm
(D) None of above
- 415.** Your teammate suggests using Wikipedia as the main source. What is the BEST response?
(A) Agree completely
(B) Refuse and ban its use
(C) Accept it but cross-check the facts with other credible sources
(D) Copy and paste the whole article
- 416.** To check for accuracy in a source, you can find the author's sources of information.
(A) True
(B) False
- 417.** Why can't psychologists recreate Milgram's experiment?
(A) It's protected under copywrite law
(B) It's unethical
(C) It's not cost-effective
(D) The procedure has been destroyed Edit

- 418.** If the participants feel unhappy for any reason with the research after the de-briefing, what must they be given
- (A) Informed consent
 - (B) Anonymity
 - (C) The right to withdraw their data
 - (D) Payment
- 419.** Refers to a guideline to computer users based on moral standards.
- (A) Law
 - (B) Moral
 - (C) Ethics
 - (D) Standard
- 420.** Another word for plagiarizing is:
- (A) Biased
 - (B) Citing
 - (C) Copying
 - (D) Source
- 421.** What is the significance of using credible sources in academic writing?
- (A) It reduces the need for citations
 - (B) It allows for personal opinions to dominate
 - (C) It makes the writing more entertaining
 - (D) It enhances the reliability of the arguments presented
- 422.** Is it ethical to use client's assessment results for research purposes?
- (A) Yes, as long as it is included in the informed consent
 - (B) No, this is a breach of privacy and confidentiality
 - (C) Yes, as long as there will be no identify information
 - (D) Yes, because this is in line with our social and scientific responsibility
- 423.** Write T if the statement is true, and F if it is false. Ethical soundness is an internal criterion in selecting a topic.
- (A) True
 - (B) False
- 424.** During a research internship, a student is asked to co-author a paper but later realizes they contributed minimally compared to others. What is the most ethical and professional course of action?
- (A) Accept co-authorship to boost their CV
 - (B) Decline authorship or request acknowledgment instead
 - (C) Stay silent and let the team decide
 - (D) Rewrite the paper to add more of their own input
- 425.** What should be considered about the sources of an argument?
- (A) The length of the source material
 - (B) The credibility of the sources
 - (C) The entertainment value of the sources
 - (D) The anonymity of the sources
- 426.** Researchers need to be honest in recording, reporting and analyzing data. referring to ethics?
- (A) Openness
 - (B) Be careful
 - (C) Honesty
 - (D) Integrity
- 427.** Informed consent is taken:
- (A) After the study
 - (B) Before involving subjects
 - (C) Only from doctors
 - (D) Not necessary
- 428.** Which is a required student action to promote integrity?
- (A) Ignore misconduct repercussions
 - (B) Avoid learning citation methods
 - (C) Submit work without references
 - (D) Utilise the Internet appropriately
- 429.** Codes may have some differences, most share common elements including the principles of truthfulness, accuracy, objectivity, impartiality, fairness, and public accountability,

- as these apply to the acquisition of newsworthy information and its subsequent dissemination to the public.
- (A) Objectivity
 - (B) Bias
 - (C) Ethics
 - (D) Valor
- 430.** Proper preparations should be made and adequate facilities provided to protect the experimental subject against even remote possibilities of injury, disability, or death.
- (A) Justice
 - (B) Responsibility
 - (C) Competence
 - (D) Dignity
- 431.** Which of the following is NOT a requirement for ethical research according to modern standards?
- (A) Voluntary participation
 - (B) Full disclosure of the study's purpose
 - (C) Right to withdraw
 - (D) Deceiving participants for research purposes
- 432.** The experiment should be such as to yield fruitful results for the good of society, unprocurable by other methods or means of study, and not random and unnecessary in nature.
- (A) Autonomy
 - (B) Beneficence
 - (C) Non-maleficence
 - (D) Integrity
- 433.** Research is not considered ethical if it [2011-DECEMBER]
- (A) Tries to prove a particular point.
 - (B) Does not ensure privacy and anonymity of the respondent.
 - (C) Does not investigate the data scientifically.
 - (D) Is not of a very high standard.
- 434.** This ethics board, which reviews research proposals prior to the start of any study, must have at least 5 members with varying backgrounds in both scientific and non-scientific areas.
- (A) Board of Directors (BOD)
 - (B) Institutional Review Board (IRB)
 - (C) Research Study Board (RSB)
 - (D) Questioning Ethics Board (QEB)
- 435.** One of the principal differences between the ethical guidelines for human and animal research is
- (A) Animals can be placed at much greater physical risk than human participants can
 - (B) Human participants can be deceived for experimental purposes and animals can not.
 - (C) Human participants must be chosen much more carefully than animals subjects
 - (D) Environmental conditions for human studies must be monitored much more closely than they are in an animal study.
- 436.** As a practitioner, we are always concerned about the welfare of the client. any results/findings that may decrease the probability that they will receive financial help from the government or insurance policies must be altered to help them get what they deserve. is this ethical?
- (A) Ethical-competent caring
 - (B) Unethical-lack of integrity
 - (C) Ethical-social responsibility
 - (D) Unethical-lack of social responsibility
- 437.** The study of right and wrong in human endeavours is called ____
- (A) Motivation
 - (B) Self-awareness
 - (C) Ethics
 - (D) Goal
- 438.** Ethical experimentation requires that participants have all relevant information before volunteering for a study. This is called-
- (A) Debriefing.

- (B) Informed consent.
 - (C) Full disclosure.
 - (D) Right to withdraw.
- 439.** Writing information in your own words
- (A) Plagiarism.
 - (B) Label.
 - (C) Paraphrase.
 - (D) Diagram.
- 440.** Standards for proper and responsible behavior
- (A) Control group
 - (B) Hypothesis
 - (C) Ethics
 - (D) Independent variable
- 441.** If deception in research must be used, which must occur?
- (A) Participants must be debriefed as soon as the study concludes.
 - (B) Participants must be given no opportunity to withdraw from the study.
 - (C) Participants must be provided appropriate excuses.
 - (D) Participants must be offered additional compensation.
- 442.** Why should multiple submissions to different journals be avoided?
- (A) They ensure faster peer reviewer responses
 - (B) They violate ethical submission practices
 - (C) They increase novelty of the research
 - (D) They speed up editorial decisions widely
- 443.** When doing research, and taking notes, you should not copy word for word from any website. Plus you should write down which websites you used. (True or False)
- (A) True
 - (B) False
- 444.** Deception may be justified if ____
- (A) The participants may feel distress after the deception is revealed
 - (B) The deception is withheld until after the research is completed
 - (C) There is absolutely no other way to ensure participants will not change their natural behaviour
 - (D) They provide signed consent
- 445.** What is a common pitfall in forming scientific arguments?
- (A) Relying on peer-reviewed data
 - (B) Ignoring conflicting evidence
 - (C) Using statistical analysis
 - (D) Following the scientific method
- 446.** It requires an informed consent so that participants are fully informed about the procedures and risks involved in research and give their consent to participate. What ethical consideration is this?
- (A) Voluntary participation
 - (B) Freedom from risk of harm
 - (C) Confidentiality
 - (D) Person's right to service
- 447.** Why is it essential to verify the accuracy of information from sources?
- (A) To waste time and effort
 - (B) To confuse readers with conflicting information
 - (C) To ensure credibility, reliability, and validity of information.
 - (D) To make the information more interesting
- 448.** Making up results and reporting them as one's own data
- (A) Falsification
 - (B) Fabrication
 - (C) Plagiarism
 - (D) Photo manipulation
- 449.** Which of the following is a key principle of ethical research?

- (A) Plagiarism
 - (B) Rigour
 - (C) Secrecy
 - (D) Bias
450. ____ are the methods of conduct, or standards, for proper and responsible behavior.
- (A) Correlation
 - (B) Experiments
 - (C) Ethics
 - (D) Questionnaires
451. Any distortion of or withholding of fact with the purpose of misleading others. (Unit 1 Vocabulary)
- (A) Illusory Correlation
 - (B) Deception
 - (C) External Validity
 - (D) Coercion
452. A tendency to lean to one or the other side of an argument.
- (A) Bias
 - (B) MLA format
 - (C) Controversial
 - (D) None of the above
453. A researcher finds an error in their experiment. What should they do?
- (A) Report the error and repeat the experiment
 - (B) Ignore the mistake
 - (C) Change the results to hide the error
 - (D) Discard all data
454. Stability of the data over time and conditions
- (A) Trustworthiness
 - (B) Credibility
 - (C) Confirmability
 - (D) Dependability
455. Ethical research avoids:
- (A) Transparency
 - (B) Honesty
 - (C) Harm to participants
 - (D) Accuracy
456. All participants can leave an experiment at any time.
- (A) True
 - (B) False
457. Which of the following is NOT a recommended type of supporting evidence for a research-based argument?
- (A) Direct quotations with proper citation
 - (B) Statistics and data
 - (C) Personal anecdotes without sources
 - (D) Expert opinions
458. Informing research participants of what is involved in a study before asking them to participate
- (A) Informed consent
 - (B) Family study
 - (C) Glial cell
 - (D) Internal validity
459. Educational research involving elementary school students requires special ethical attention because ____
- (A) Data are difficult to collect
 - (B) Children are vulnerable subjects who require special protection
 - (C) The instruments must be simpler
 - (D) The data analysis process is longer
 - (E) External validity is low
460. Which ethical principle is focused on ensuring voluntary participation in research?
- (A) Confidentiality
 - (B) Beneficence
 - (C) Informed consent
 - (D) Justice
461. Which practice exemplifies duplication of work?
- (A) Expanding a project with additional analysis

- (B) Revising an essay to improve arguments
(C) Submitting the same task again for new credit
(D) Citing earlier research in a new paper
- 462.** Which action demonstrates honesty in public speaking?
(A) Avoiding eye contact
(B) Giving credit to original sources
(C) Reading from a stolen script
(D) Speaking loudly
- 463.** IRB stands for
(A) Institutional Review Board
(B) Intervening Responsibly Board
(C) Institutional Responsibility Board
(D) None of above
- 464.** This framework proposes that actions, rules, or policies should be ethically measured and evaluated by their consequences, not by the intentions or motives of the agent.
(A) Consequentialist Ethics
(B) Justice as Fairness
(C) Utilitarianism
(D) Rights Based Ethics
- 465.** What are some ethical principles used in Communication?
(A) Share Meanings, Meet Social Goals, Manage Personal Identity, Conduct Relationships
(B) Transactional, Irreversible, Situated, Relationship Qualities, Continuous
(C) Truthfulness, Honesty, Integrity, Fairness, Respect, Responsible, Empathy
(D) Interactivity, Temporal Structure, Social Cues, Storage and Replicability, Reach
- 466.** Which criterion ensures that the data or information comes from valid sources and has not been altered?
(A) Validity
(B) Authenticity
(C) Accuracy
(D) Reliability
- 467.** What criteria should be used to evaluate the credibility of a source?
(A) Number of pages
(B) Author popularity
(C) Font size
(D) Author expertise, Publication date, References, Bias, Reputation
- 468.** Warning signs for predatory journal
(A) Is not indexed in large, trusted databases of scholarly work
(B) The journal is indexed
(C) Journal is transparent
(D) Predatory journals number in the thousands
(E) No answer
- 469.** Is the following statement TRUE or FALSE? I should always review the sources (or author) of the website.
(A) TRUE
(B) FALSE
- 470.** Which of the following is a major human dignity issue for psychologists?
(A) Making sure researchers are given proper credit for their work
(B) Protecting pets from unnecessary harm
(C) Protecting the rights of vulnerable or mentally ill individuals
(D) Making sure therapists do not “steal” clients from other therapists
- 471.** You should explain in detail where the data you use comes from.
(A) True
(B) False
- 472.** Maintaining intellectual honesty in all times especially in reporting findings in investigation.
(A) Informed consent
(B) Honesty
(C) Openness
(D) None of above

473. Research Ethics committees are-
- (A) Committees of Researchers
 - (B) Convened by Organizations to monitor the Ethical Standards of research project carried out under their auspices or under their name
 - (C) Committees of Researcher concerned with ethics
 - (D) None of the above
474. Which represents appropriate (fair) use of copyrighted material?
- (A) Copying and pasting it into a school project without citing its creator
 - (B) News reporting/critiques
 - (C) Using it for t-shirts that you are selling for a fundraiser
 - (D) None of above
475. When obtaining “informed consent” which of the following would be least likely to be included:
- (A) Aims of the research
 - (B) Debriefing
 - (C) Explanation about the Right to withdraw
 - (D) Explanation about what the data will be used for
476. How must participant data be handled to ensure confidentiality?
- (A) Data must be kept confidential and personal information protected
 - (B) Data should be shared with all researchers
 - (C) Data can be published without consent
 - (D) Data should be stored on public websites
477. Why is sealing research records considered an ethical problem?
- (A) It makes research more expensive
 - (B) It prevents accountability and denies participants access to their own information
 - (C) It increases the number of participants
 - (D) It improves the accuracy of results
478. Why is it important to cross-check information from multiple sources when conducting online research?
- (A) Cross-checking information is unnecessary and time-consuming
 - (B) Multiple sources often provide conflicting information
 - (C) Relying on a single source ensures accuracy
 - (D) It is important to cross-check information from multiple sources when conducting online research to verify accuracy, reduce misinformation, and gain a comprehensive understanding.
479. ____ refers to the act of using another person's ideas, words, processes, and results without giving due credit.
- (A) Research ethics
 - (B) Interview
 - (C) Observation
 - (D) Plagiarism
480. Which policy best promotes responsible authorship regarding IP?
- (A) Encouraging transparency in managing conflicts
 - (B) Requiring anonymous reporting of results
 - (C) Restricting data sharing across institutions
 - (D) Eliminating citations in published articles
481. Before the APA Code of Ethics existed, psychology was often maligned because its results weren't always ____
- (A) Ethical
 - (B) Unethical
 - (C) Biased
 - (D) Probable
482. Does the existence of the deep web influence our view on whether some knowledge should remain secret or largely inaccessible?
- (A) Scope

- (B) Perspectives
 - (C) Methods and Tools
 - (D) Ethics
- 483.** Participants should not be deceived about the aims or misled about the study.
- (A) Valid Consent
 - (B) Right to Withdraw
 - (C) Minimizing Harm
 - (D) Lack of Deception
- 484.** What is the main reason for following regulatory guidance in scientific research?
- (A) To avoid paperwork
 - (B) To ensure compliance with laws and ethical standards
 - (C) To speed up experiments
 - (D) To reduce costs
- 485.** After conducting a psychological experiment that involved deceiving participants about its true purpose, Michael explained the real nature of the study to everyone once it was over. Which ethical principle requires this full explanation of deception after a study?
- (A) Informed consent
 - (B) Debriefing
 - (C) Confidentiality
 - (D) Right to withdraw
- 486.** A claim can be supported by all of the following EXCEPT:
- (A) Reasoning or warrants
 - (B) Evidence or observable events
 - (C) Subclaims
 - (D) Any blog, social media post, Tweet or website
- 487.** My research focuses on sentiment analysis. I try to identify and extract subjective information by monitoring online conversations in social media and help business to understand the social sentiment. May this raise ethical concerns?
- (A) Yes
 - (B) No
- 488.** Which of the following practices is considered unethical in research?
- (A) Properly citing sources
 - (B) Collaborating with peers
 - (C) Fabricating data
 - (D) Peer review
- 489.** Honest; not hiding anything from the reader
- (A) Bias
 - (B) Transparent
 - (C) Quotations
 - (D) Paraphrase
- 490.** The word “research” should be included in the script of a consent form.
- (A) True
 - (B) False
- 491.** A guarantee of confidentiality is:
- (A) Always required by proper ethical standards in research.
 - (B) Essential for every participant in a research project.
 - (C) A guarantee that some information will remain confidential and will not be disclosed.
 - (D) Only given under duress.
- 492.** Should you undertake any research without ethical approval
- (A) Yes
 - (B) No
- 493.** Which of the following is important when using technology?
- (A) Governance
 - (B) Credentialing
 - (C) Ethical conduct
 - (D) Preparation
- 494.** What are the consequences of research misconduct?
- (A) Consequences include loss of credibility, retraction of papers, legal issues, and damage to reputation.

- (B) Immediate promotion within the academic field
- (C) Increased funding for future research
- (D) Enhanced collaboration with other researchers
- 495.** In authorship ethics analysis, a person who provides funding but does not contribute scientifically should ____
- (A) Be listed as the lead author
- (B) Be listed as a supporting author
- (C) Not be listed as an author
- (D) Be listed as the corresponding author
- (E) Be listed without consent
- 496.** The results of the research should be scientific data that are real and not manipulated.
- (A) Specific.
- (B) Measurable.
- (C) Achievable.
- (D) Realistic.
- 497.** What is an essential branch of philosophy that deals with the rightness or wrongness of an act? This also plays a significant role in research writing.
- (A) Culture.
- (B) Ethics.
- (C) Theory.
- (D) Science.
- 498.** What ethical issue does the author raise in the “Yes” response?
- (A) Finding an alternative to cars
- (B) Cutting energy costs
- (C) Protecting the environment
- (D) Creating convenient energy sources
- 499.** Something that is not morally correct is known as ____
- (A) Biased
- (B) Prejudiced
- (C) Unethical
- (D) Discrimination
- 500.** One of the following behaviour does not conform to research ethics. Identify the behaviour
- (A) Copying passages from a book along with acknowledgement
- (B) Arriving at a generalisation which the researcher feels as truth even though data do not support it
- (C) Formulating hypothesis which is not confirmed by review of literature
- (D) Using statistical techniques in qualitative research
- 501.** According to ethical principles, which factor is critical in gaining informed consent?
- (A) Minimizing study duration
- (B) Providing participants with comprehensive study information
- (C) Offering financial incentives
- (D) Ensuring research objectives remain hidden
- 502.** What are ethics?
- (A) Ethics are moral principles that govern a person's behavior or the conducting of an activity.
- (B) Ethics are mathematical equations
- (C) Ethics are fictional stories
- (D) Ethics are scientific theories
- 503.** An ethical obligation of authors when reporting the results of their studies.
- (A) To paraphrase ideas from other authors without giving credit
- (B) To reuse their own previously published text without adhering to standard scholarly conventions
- (C) To avoid reporting all aspects of the study that may impact the independent replicability of their research
- (D) To report evidence that contradicts their point of view
- 504.** Participants' time/effort, physical and mental wellbeing, privacy and confidentiality, and researchers' money/resources

- (A) Potential benefits
 - (B) Potential costs
- 505.** Avoiding biases and opinions in research work.
- (A) Carefulness
 - (B) Social Responsibility
 - (C) Competence
 - (D) Openness
 - (E) Objectivity
- 506.** It is either the production of fake data or modifying the collected data
- (A) Fraud
 - (B) Research ethics
 - (C) Plagiarism
 - (D) Piracy
- 507.** What is the purpose of a collaboration agreement in research?
- (A) To outline the terms and conditions of the collaboration
 - (B) To define intellectual property rights and ownership
 - (C) To establish clear communication channels and decision-making processes
 - (D) All of the above
- 508.** Doing what you have been asked or ordered to do and abiding by all ethics requirements
- (A) Confidential
 - (B) Compliance
 - (C) Non-compliance
 - (D) Professional Conduct
- 509.** “If it’s not right, don’t type.” When you choose not to publish information because you know can hurt the victim, you are following this principle ____
- (A) Invasion of privacy
 - (B) Accuracy/Factual Reporting
 - (C) Harm Limitation
 - (D) Slander
- 510.** The ethical guideline for research in which participants must agree to be a part of the study is known as
- (A) Informed consent
 - (B) Confidentiality
 - (C) Free from harm
 - (D) Debriefing
- 511.** The Stanford Prison Experiment, conducted by Philip Zimbardo, raised significant ethical concerns primarily related to:
- (A) Informed consent and debriefing.
 - (B) Confidentiality and anonymity.
 - (C) The use of deception and harm to participants.
 - (D) The lack of a control group.
- 512.** What other ethical principle is applied the no harm ethical principle?
- (A) Anonymity
 - (B) Informed consent
 - (C) Nothing
 - (D) Deception
- 513.** An 85-year-old client in a nursing home tells a nurse, “Because the doctor was so insistent, I signed the papers for that research study. Also, I was afraid he would not continue taking care of me.” Which client right is being violated.
- (A) Right not to be harmed
 - (B) Right to full disclosure
 - (C) Right to privacy and confidentiality
 - (D) Right to self-determination
- 514.** The teacher-researcher met a student who was experiencing depression due to a family problem. During the break time, he shared with his colleagues of the session he had with the student and the family issue the student was facing. Which of the following research ethics the teacher-researcher had breached?
- (A) Confidentiality
 - (B) Informed Consent
 - (C) Intellectual Property
 - (D) Social Responsibility

515. Which organizations provide ethical guidelines for conducting psychological research?
- (A) World Health Organization (WHO)
 - (B) American Psychological Association (APA) and British Psychological Society (BPS)
 - (C) United Nations (UN)
 - (D) Food and Drug Administration (FDA)
516. An agreement by an individual to participate in research after receiving information about the purpose of the study and the nature of the treatment
- (A) Ethics
 - (B) Informed consent
 - (C) Target population
 - (D) Volunteer bias
517. This ethical issue is to be avoided, but is sometimes permitted if necessary for the study to work.
- (A) Deception
 - (B) Informed consent
 - (C) Psychological harm
 - (D) Right to withdraw
518. A code of ethics is most like ____
- (A) A guide for what to consider or do before carrying out research
 - (B) A list of things that should be avoided
 - (C) A list of steps that must be taken after research is done
 - (D) A guide for what to consider or do before, during and after research
519. Which of the following BEST helps you evaluate a source?
- (A) An author's academic credentials
 - (B) An author's age
 - (C) An author's sense of humor
 - (D) An author's use of charts, graphs, and other images
520. Carlos wants to make sure that any information from participant surveys is not shared with the shelter's administration to avoid potential consequences. This issue relates most strongly to ____
- (A) Deception
 - (B) Beneficence
 - (C) Justice
 - (D) Confidentiality
521. How should you view the Internet when using information in research?
- (A) That it is primarily trustworthy, so I'm ok
 - (B) Lots of shared content that I can share with others
 - (C) That most of it is chunk, so why bother
 - (D) With healthy skepticism applying the evaluating websites techniques
522. When a researcher forms a hypothesis or belief and uses respondents' information to support that belief, it is
- (A) Confirmation Bias
 - (B) The Hawthorn Effect
 - (C) Social Desirability Bias
 - (D) The Halo Effect
523. Moral principles that govern a person's or group's behavior
- (A) Personal Morals
 - (B) Ethics
 - (C) Professional
 - (D) Community
524. What is meant by de-briefing
- (A) Giving participants information about the study before it starts
 - (B) Giving participants information about the study after it is complete
 - (C) Giving participants the right to leave the study
 - (D) Giving participants money for taking part
525. ____ means that the participant's identity, although known to the researcher, is not revealed to anyone outside of the researcher and his or her staff.

- (A) Anonymity.
 - (B) Confidentiality.
 - (C) Both A and B.
 - (D) None of the above.
- 526.** What is a key ethical limitation of quasi-experimental designs?
- (A) Cannot operationalize or randomize all possible variables
 - (B) Cannot measure outcomes
 - (C) Cannot use control groups
 - (D) Cannot analyze data
- 527.** An adult is a subject in a nursing study and asks to withdraw from the study. The appropriate response for the nurse researcher will be to ____
- (A) Allow the person to withdraw
 - (B) Encourage the person to remain in the study
 - (C) Cite the benefits of being part of the research study
 - (D) Explain that the permission form he signed requires him to continue with the study
- 528.** Darius participated in a study examining the effects of alcohol on long-term memory. Six months after his participation ended, he received a newsletter detailing the results of the study. The researchers were following the ethical guideline that mandates:
- (A) Knowledge of results
 - (B) Informed consent
 - (C) Full disclosure
 - (D) Protection against harm
- 529.** How can researchers avoid falsification?
- (A) By manipulating data to fit desired outcomes.
 - (B) By following ethical guidelines and ensuring transparency in research.
 - (C) By prioritizing personal gain over research integrity.
 - (D) By conducting research without any oversight.
- 530.** Groups of people responsible for reviewing proposed research to ensure standards are met for human participants
- (A) IRB
 - (B) IACUC
 - (C) BRB
 - (D) NSYNC
- 531.** I want to carry out research on chemical weapons but I have problems finding volunteers to test the chemicals on. So I just invent the data and pretend I did the experiments. Which ethical research rule have I not respected?
- (A) Informed consent
 - (B) Cause no harm
 - (C) Right to withdraw
 - (D) Confidentiality
 - (E) Deceptive practices
- 532.** What are the ethical implications of conducting research on a problem that is not "open to investigation"?
- (A) The research will be highly ethical and beneficial to society.
 - (B) The research may lead to inaccurate or misleading findings, potentially causing harm or misinforming policy decisions.
 - (C) The research will be easy to conduct and require minimal effort.
 - (D) The research will automatically be unethical.
- 533.** A source that has reliable information that we trust is true or accurate
- (A) Citation
 - (B) Cite
 - (C) Claim
 - (D) Credible
- 534.** Researchers must adhere to ethical guidelines when conducting studies.
- (A) TRUE
 - (B) FALSE
 - (C) All the above
 - (D) None of the above

535. Ethical steps should be outlined before administering your questionnaire in school.
- (A) Obtain informed consent from participants and school authorities.
 - (B) Skip ethical approval if the questionnaire is short.
 - (C) Collect data without informing participants.
 - (D) Ignore privacy and confidentiality concerns.
536. Right vs. wrong may be a moral temptation, but right vs. right is:
- (A) The best of both worlds
 - (B) An ethical dilemma
 - (C) A chance for correct action
 - (D) A political brawl
537. The best place to start learning about ethical consideration of research is the ____ created by the World Medical Association.
- (A) Declaration of Helsinki
 - (B) Declaration of Handa
 - (C) Declaration of Hekinan
 - (D) Declaration of Hamina
538. When conducting a research, the initial acceptance of the conditions and requirements of the research taken from the participants is called
- (A) Consent form
 - (B) Anonymity
 - (C) Confidentiality
 - (D) None of above
539. It is important to leave opinions and bias of the researcher out of the research project.
- (A) True
 - (B) False
540. Plagiarism is “Taking over the ideas, methods, or written words of an author, without acknowledgment and with the intention that they be taken as the work of the deceiver.”
- (A) True
 - (B) False
 - (C) All the above
 - (D) None of the above
541. What are the ethical considerations when using ICT for social change?
- (A) Excluding certain groups from digital access
 - (B) Ignoring privacy and data protection
 - (C) Being secretive and unaccountable in the use of technology
 - (D) Some ethical considerations when using ICT for social change include ensuring privacy and data protection, promoting digital inclusion and accessibility, and being transparent and accountable in the use of technology for social impact.
542. True or False You should check more than one source.
- (A) True
 - (B) False
 - (C) All the above
 - (D) None of the above
543. Is it ok to tell people ‘who’ is taking part in your study
- (A) Yes
 - (B) No
544. Should we hold people responsible for the applications of technologies they develop/create?
- (A) Scope
 - (B) Perspectives
 - (C) Methods and Tools
 - (D) Ethics
545. According to Meighan and Harber (2007), why might research in schools be viewed negatively?
- (A) It improves classroom relationships.
 - (B) It enhances discipline.
 - (C) It is dangerous to involve pupils in commenting on their teachers.
 - (D) It makes children more competent to judge teachers.

546. Keeping all data and information contained in research.
- (A) Confidentiality
 - (B) Integrity
 - (C) Objectivity
 - (D) None of above
547. Which statement best reflects ethical responsibility in research writing?
- (A) Paraphrasing without citation
 - (B) Copying sources word-for-word
 - (C) Properly citing all referenced materials
 - (D) Using only one reference
548. What source isn't credible?
- (A) A webpage with an unidentified author or affiliation
 - (B) A webpage from a college or university
 - (C) A government webpage
 - (D) A peer reviewed article
549. The ____ publishes the principles that psychological experiments must abide by.
- (A) FBI
 - (B) ABA
 - (C) APA
 - (D) CIA
550. Kirk a grade 8 student conducting his research study on the emotional disposition of Grade 7 students weighs the benefits and consequences of the his study. What principle is he trying to follow?
- (A) Non-maleficence
 - (B) Beneficence
 - (C) Autonomy
 - (D) Justice
551. Biased research refers to-
- (A) Drawing conclusion by introducing one's vested interest
 - (B) No deliberate attempt to either conceal or highlight something
 - (C) Repeatability and accuracy are provided for the quality of measurement procedures used
 - (D) Each step of the research is valid and objective
552. A researcher believes in a stereotype of a specific population. This stereotype determines the patterns the researcher looks for in research data. Which behavior is the researcher demonstrating?
- (A) Selective observation
 - (B) Ethnomethodology
 - (C) Epistemology
 - (D) None of above
553. When is deception permissible in educational research?
- (A) When it is for the public good and minimizes bias
 - (B) Never
 - (C) When participants request it
 - (D) When it saves time
554. Under the guidelines of ____, researchers must design studies in which the participants will share equally the costs and benefits of participating in the study.
- (A) Justice
 - (B) Respect for persons
 - (C) Anonymity
 - (D) Confidentiality
555. Ethical issues occur in all except:
- (A) The beginning of research
 - (B) Prior to conducting the research
 - (C) In reporting the data
 - (D) When doing the literature research
556. A group of teachers implements password-protected accounts for online submissions. Which principle is applied?
- (A) Accessibility
 - (B) Data security
 - (C) Netiquette
 - (D) Collaboration

557. Ethically, information about the study must be provided to participants, who should be debriefed.
- (A) True
 - (B) False
558. The data collected from human subjects must be anonymized prior to disclosure.
- (A) Yes
 - (B) No
559. Which of the following is an example of minimizing harm in research?
- (A) Providing appropriate treatment or referrals if harm occurs
 - (B) Ignoring participant complaints
 - (C) Withholding information from participants
 - (D) Increasing psychological risks for better results
560. Ethics in writing related literature:
- (A) Promotes intellectual property, accountability, and mutual respect
 - (B) Reduces the time needed for citation
 - (C) Enhances the researcher's confidence
 - (D) Is required exclusively for research papers in graduate school
561. Which of the following needs to be obtained when doing research with children?
- (A) Informed consent from the parent or guardian
 - (B) Informed consent from the child
562. What is informed consent?
- (A) When people involved in your research are told
 - (B) When people involved in your research are not told
 - (C) When people involved in your research are paid
 - (D) When people involved in your research are not paid
563. Why is it essential to evaluate the credibility of sources when integrating information?
- (A) All sources are equally credible
 - (B) It is essential to evaluate the credibility of sources when integrating information to ensure reliability, accuracy, and trustworthiness.
 - (C) Evaluating sources is a waste of time
 - (D) Credibility doesn't matter in information integration
564. What is a common reason for ethical breaches in scientific research?
- (A) Lack of interest in the subject
 - (B) Pressure from funding bodies
 - (C) Excessive peer review
 - (D) Overabundance of resources
565. How can you ensure your research is reliable?
- (A) Using any website
 - (B) Using trusted sources
 - (C) Asking friends for answers
 - (D) Guessing
566. When assumptions about motivations and influences are based on our cultural lens, we may experience
- (A) Confirmation Bias
 - (B) Habituation
 - (C) Leading Questions & Wording Bias
 - (D) Cultural Bias
567. TRUE or FALSE Ethical communicators do not lie and deceive other people.
- (A) TRUE
 - (B) FALSE
568. How can bias be identified in sources during the research process?
- (A) Only consider the language used in the source
 - (B) Assume all sources are unbiased
 - (C) Check author affiliations, funding sources, language, tone, and conflicts of interest.
 - (D) Ignore author affiliations and funding sources

569. To avoid plagiarism, John Carl make sure that he give recognition to the authors of the literature he get from the world wide web. What consideration is this?
- (A) Privacy and Confidentiality
 - (B) Informed Consent
 - (C) Integrity
 - (D) Acknowledge Sources of Information
570. Which principle emphasizes the need to do good and prevent harm in research?
- (A) Confidentiality
 - (B) Beneficence
 - (C) Autonomy
 - (D) Justice
571. Which of the following is a potential ethical issue in research?
- (A) Using a large sample size
 - (B) Failing to obtain informed consent
 - (C) Using advanced statistical techniques
 - (D) Publishing in peer-reviewed journals
572. After the research is over the participant should be able to discuss the procedure and the findings with the psychologist. This is called
- (A) Briefing
 - (B) Debriefing
573. What does Verification mean?
- (A) Worshipping another person
 - (B) Checking that your source of information is factual
 - (C) Reading the newspaper everyday
 - (D) None of above
574. Always consider the welfare of people, animals, or whosoever are involved in your study. This refers to which characteristic of a good research question?
- (A) Feasible
 - (B) Clear
 - (C) Significant
 - (D) Ethical
575. Lacking moral principles, unwillingness to adhere to rules of conduct; Not in accord with the standards of professions
- (A) Confidential
 - (B) Integrity
 - (C) Unethical Behavior
 - (D) Remunerative Conduct
576. Researchers need to be open in accepting any constructive criticism given. referring to ethics?
- (A) Be careful
 - (B) Openness
 - (C) Honesty
 - (D) Integrity
577. An ethical principle which means sharing you findings.
- (A) Openness
 - (B) Honesty
 - (C) Loyalty
 - (D) Integrity
578. Openness to accept new evidence and admit when we were wrong
- (A) Skepticism
 - (B) Curiosity
 - (C) Humility
 - (D) None of above
579. Ethics in research and scientific publication is crucial in Educational Management because it ____
- (A) Raises the institution's ranking
 - (B) Ensures scientific credibility and public trust
 - (C) Speeds up academic careers
 - (D) Fulfills administrative demands
 - (E) Reduces teachers' workload
580. Melvin got some unfavorable results from his experiment and decided to light them up in fire, keeping only the favorable ones. What has he committed?
- (A) Scientific fraud.

- (B) An objective investigation.
 - (C) Nothing.
 - (D) None of the above
- 581.** Why is informed consent important in business anthropology research?
- (A) It ensures participants are aware of the purpose, risks, and benefits of the research
 - (B) It helps researchers analyze consumer choices
 - (C) It promotes equitable business practices
 - (D) It identifies sources of conflict within organizations
- 582.** What is the primary ethical guideline for using AI like ChatGPT in your research?
- (A) It should replace your thinking to save time.
 - (B) It should support your thinking, not replace it.
 - (C) It is best used for generating new data.
 - (D) It should only be used for coding.
- 583.** One of the most important procedures designed to implement the principle of respect for persons involved in psychological research is
- (A) Random assignment
 - (B) Informed consent
 - (C) Confidential data collection
 - (D) Subject dialogue
- 584.** Participants' data should not be passed to others who are not involved in the research and it should not be published in a way that would reveal their identity.
- (A) Confidentiality
 - (B) Privacy
 - (C) Debriefing
 - (D) None of above
- 585.** Should you be ethical when conducting a research?
- (A) No
 - (B) Yes
- 586.** Which safeguard is essential when researching vulnerable populations?
- (A) Additional protections for autonomy
 - (B) Stricter data retention timelines
 - (C) Mandatory open-access publication
 - (D) Exclusive use of randomized trials
- 587.** What is a right to withdrawal?
- (A) Participants are allowed to keep their identity secret
 - (B) Participants don't know that a study is being conducted
 - (C) Participants should be able to end their involvement at any stage
 - (D) Participants are allowed to discuss how they found the experiment
- 588.** A set of principles to guide and assist researchers in deciding which goals are most important and in reconciling conflicting values when conducting research is called ____
- (A) Research ethics.
 - (B) Deontological approach.
 - (C) Utilitarianism.
 - (D) None of the above.
- 589.** ____ is the study of moral choices and values and involves choosing between right and wrong.
- (A) Social responsibility
 - (B) Code of ethics
 - (C) Ethics
 - (D) None of above
- 590.** Which of the following practices helps prevent ethical violations in technical writing?
- (A) Relying solely on secondary sources
 - (B) Ignoring minor data discrepancies for simplicity
 - (C) Encouraging competition among researchers to publish first
 - (D) Conducting rigorous peer reviews before publication

591. Which act was passed by the US Congress shortly after the Tuskegee Syphilis Study ended?
- (A) National Research Act
 - (B) Civil Rights Act
 - (C) Affordable Care Act
 - (D) Health Insurance Portability and Accountability Act
592. Respecting the autonomy and dignity of participants.
- (A) Social Responsibility
 - (B) Carefulness
 - (C) Human Subject Protection
 - (D) Openness
 - (E) Competence
593. The document signed by participants agreeing to join the research is:
- (A) Informed Consent Form
 - (B) Approval Form (1B)
 - (C) Risk Assessment Form (3)
 - (D) Continuation Form (7)
594. Working with your own sources can help you expand on what people have already learned and add considerable ____ to your work.
- (A) Domain
 - (B) Style
 - (C) Currency
 - (D) Credibility
595. In her research, Rochelle reviews her methodology to avoid harming any respondents when she carry out her research. What principle did she observed?
- (A) Non-maleficence
 - (B) Beneficence
 - (C) Autonomy
 - (D) Justice
596. Which is most likely the best solution to an ethical problem?
- (A) The option that benefits you the most
 - (B) The option that benefits the most people
 - (C) The option that punishes bad people severely
 - (D) The option that benefits the people you like the most
597. Which of the following is unethical communication?
- (A) Using inclusive language
 - (B) Respecting confidentiality
 - (C) Spreading false information
 - (D) Citing sources
598. What is observer bias?
- (A) Consciously or unconsciously altering results to fit expected results
 - (B) Observer bias is the intentional manipulation of data by the researcher.
 - (C) Observer bias is when the researcher's personal experiences impact the study results.
 - (D) Observer bias refers to the tendency of participants to alter their behavior when being observed.
599. What is the significance of ensuring the "conformity of the problem to ethical principles"?
- (A) It is an optional consideration in the research process.
 - (B) It protects the rights and well-being of research participants and promotes responsible research conduct.
 - (C) It guarantees the research will be successful and impactful.
 - (D) It hinders the research process by imposing unnecessary restrictions.
600. In a study of concept learning in first-graders, all of the following should happen, except;
- (A) To help make the experience enjoyable, children should be given substantial incentives to participate.
 - (B) Teachers of the children in their classes should give informed consent.
 - (C) The children should be asked if they want to participate.
 - (D) Parents must give consent.

- 601.** To present someone's work as your own without giving that person credit
- (A) Plagiarism
 - (B) Bias
 - (C) Evidence
 - (D) Era
- 602.** What regulation must researchers follow when accessing sampling frames?
- (A) GDPR (General Data Protection Regulation)
 - (B) ISO 9001
 - (C) HIPAA
 - (D) OSHA
- 603.** What ethical considerations must be taken into account in scientific research?
- (A) Informed consent, confidentiality, minimizing harm, integrity, societal impact.
 - (B) Number of researchers involved
 - (C) Publication frequency of studies
 - (D) Funding sources for research
- 604.** The ethical consideration of 'informed consent' ensures that:
- (A) Participants are randomly selected
 - (B) Participants agree voluntarily and understand the study's details
 - (C) The researcher can change the study purpose at any time
 - (D) Participants remain anonymous
- 605.** Acting ethically when using technology means:
- (A) Respecting copyright and using reliable information sources
 - (B) Ignoring privacy policies if you trust the website
 - (C) Using others' work if it is found online
 - (D) Posting any content freely as long as it is true
- 606.** What does integrity primarily involve?
- (A) Achieving personal success
 - (B) Gaining wealth and fame
 - (C) Competing with others
 - (D) Being truthful and honest in all actions
- 607.** Which method is NOT listed as an ethical way to study nature vs. nurture?
- (A) Twin studies where twins are raised together
 - (B) Adoption studies with informed consent
 - (C) Deceptive experiments without consent
 - (D) Modern genetic research
- 608.** Why must researchers adhere to ethical guidelines in experimental research?
- (A) To ensure the experiment is conducted in natural settings.
 - (B) To limit the scope or type of experiments that can be conducted.
 - (C) To guarantee the publication of their results.
 - (D) To increase the number of participants in their study.
- 609.** The goal of removing any personal views from the research process.
- (A) Peer-review process
 - (B) Bias
 - (C) Value-neutrality
 - (D) None of above
- 610.** What is the role of review boards in educational research ethics?
- (A) To finalize research findings
 - (B) To assess the technical validity of research instruments
 - (C) To protect participants' rights and safety
 - (D) To ensure stakeholder satisfaction
- 611.** Which term refers to reducing bias in research?
- (A) Data customization
 - (B) Ethical transparency
 - (C) Elimination of control groups
 - (D) Objectivity

612. When a researcher said, "there is no need to inform the parents of the pupils that we are changing the lunch schedule for few minutes, anyway what they don't know won't hurt them".
- (A) Informed consent
 - (B) Non-maleficence and beneficence
 - (C) Justice and fairness
 - (D) Right to full disclosure
613. Which of these is NOT a recommended source for writing background of research?
- (A) Peer-reviewed journals
 - (B) Reliable encyclopedias
 - (C) Personal gossip
 - (D) Research databases
614. Respondents must participate ____ in surveys, without coercion.
- (A) Voluntarily
 - (B) Involuntarily
 - (C) Compulsorily
 - (D) Forcefully
615. Which action best demonstrates fair subject selection in clinical research?
- (A) Recruiting only easily accessible patients
 - (B) Prioritizing volunteers who donate funds
 - (C) Sampling based on scientific relevance
 - (D) Excluding high-risk groups categorically
616. Ethical principles in research ensure:
- (A) Honesty and integrity in data handling
 - (B) Hiding results
 - (C) Publishing false data
 - (D) Copying others' work
617. What ancient concept does ethical concern relate to?
- (A) "Do no harm" attributed to Hippocrates.
 - (B) "Have fun" attributed to Zeus.
 - (C) "Do harm" attributed to Aides.
 - (D) "Do no harm" attributed to the US scientists.
618. It is vital to safeguard the dignity and autonomy of individuals and take extra precautions when dealing with study participants, such as children, who are less likely to understand their participation is voluntary. This guideline of psychological research is known as
- (A) Informed consent.
 - (B) Justice.
 - (C) Respect for persons.
 - (D) Beneficence.
619. What is meant by "debriefing"?
- (A) Giving participants information about the study before it starts
 - (B) Giving participants information about the study after it is complete
 - (C) Giving participants the right to leave the study
 - (D) Making sure all participants are paid for their role in the study
620. Which of the following is NOT one of the key aims of ethical scientific practices as outlined in 'Rigour, Respect, Responsibility: a Universal Ethical Code for Scientists 2007'?
- (A) To foster ethical research
 - (B) To encourage active reflection among scientists
 - (C) To maximise financial profit from research
 - (D) To support communication between scientists and the public
621. When a researcher identifies so completely with the group being studied that he or she can no longer remain objective you have what is called ____
- (A) Cultural relativism.
 - (B) Culture shock.
 - (C) Regression.
 - (D) Going native.

- 622.** What can be concluded from early intelligence testing in the United States?
- (A) Most European immigrants were "feeble-minded"
 - (B) Army recruits of other than West European heritage were intellectually deficient
 - (C) Tests were biased against people who did not share the culture assumed by the test
 - (D) None of these things can be concluded
- 623.** What is the importance of ethical considerations in Literature Discovery?
- (A) To avoid plagiarism and ensure proper attribution
 - (B) To respect intellectual property rights
 - (C) To maintain the integrity of the research process
 - (D) All of the above
- 624.** What is the role of ethics in research?
- (A) To ensure the research is entertaining
 - (B) To complicate the research process
 - (C) To protect the rights and welfare of participants
 - (D) To validate the researcher's personal beliefs
- 625.** A process in which representatives of an organization read and react to research proposals, applying guidelines for the ethical conduct of research and approving, modifying, or rejecting proposals based on these guidelines.
- (A) Institutional review
 - (B) Peer review
 - (C) Inquiry
 - (D) Theory evaluation
- 626.** What is the significance of ethical considerations in educational research?
- (A) To ensure the study has enough statistical power to detect meaningful effects
 - (B) To obtain informed consent from participants
 - (C) To analyze data collected over time to identify patterns, trends, or seasonality
 - (D) To cultivate a culture of inquiry, innovation, and continuous improvement
- 627.** The basic research ethics principles outlined in the Belmont report are:
- (A) Respect to person, beneficence, justice
 - (B) Honesty, trust, respect
 - (C) Informed consent, vulnerable, respect to person
 - (D) Plagiarism, informed consent, benefit
- 628.** Human research requires:
- (A) Informed consent
 - (B) Compulsory participation
 - (C) Hidden goals
 - (D) Paid subjects only
- 629.** When conducting educational research, which factor is most important for ethical approval?
- (A) Participant protection and informed consent
 - (B) Methodology used
 - (C) Data analysis techniques
 - (D) Theoretical framework
- 630.** What is the purpose of an institutional review board in research ethics?
- (A) To detect and remove negative consequences
 - (B) To honor confidentiality and anonymity
 - (C) To ensure transparency in sponsorship
 - (D) To mandate protections for research participants
- 631.** What was the main reason Dr. Potti falsified data in his research at Duke University?
- (A) To justify clinical trials and attain further funding
 - (B) To win a Nobel Prize
 - (C) To avoid being fired
 - (D) To help a friend
- 632.** What is the name given to the problem in research where the researcher excludes data which does not go with their expected results?
- (A) Self-Fulfilling Prophecy

- (B) Confirmation Bias
(C) Social Desirability Response
(D) Participant Bias
- 633.** Replace, reduce & refine are alternative scientific methods researchers use to:
- (A) Examine cellular tissues
(B) Design experiments that do not use animals
- 634.** The requirement that researchers explain how they collected and analyzed their evidence and how they reached their conclusions.
- (A) Transparency
(B) Replication
(C) Validity
(D) None of above
- 635.** What should happen if deception is used in a research study?
- (A) Participants must be debriefed afterward
(B) Participants should be paid more
(C) The study should be canceled
(D) Deception should never be used
- 636.** Ongoing monitoring by IRBs primarily aims to:
- (A) Expand project budgets for safety
(B) Increase publication acceptance rates
(C) Train researchers in statistics
(D) Ensure continued compliance with ethics
- 637.** Research Ethics refers to
- (A) Any system or theory of moral values or principles.
(B) The discipline concerned with what is morally good and bad, right and wrong.
(C) The moral principles that govern a person's behavior in conducting of an activity
(D) The standards of conduct for researchers.
- 638.** The Milgram obedience experiments were controversial because the
- (A) "teachers" were deceived and frequently subjected to severe stress
(B) "teachers" actually seemed to enjoy shocking the "learners"
(C) "learners received painful electric shocks even if they had heart problems
(D) Experiments were performed despite mass student protests against the research
- 639.** What does the standard for evaluating a research outline 'objective' mean?
- (A) Ensures that the outline does not overlap with previous studies.
(B) Ensures that the outline is written using precise and persuasive language.
(C) Ensures that the outline is not influenced by the author's personal views, avoiding assumptions, and avoiding unsubstantiated statements.
(D) Ensures that the outline is organized and presented logically and clearly.
- 640.** Which of the following is an ethical issue in psychological research?
- (A) Sampling methods
(B) Experimental designs
(C) Informed consent
(D) Quantitative methods
- 641.** Scientists are trained to carefully observe and record any research outcomes that are inconsistent with their hypotheses. This practice most directly serves to reduce
- (A) Data misinterpretation
(B) Hypothesis confirmation
(C) Confirmation bias
(D) Cognitive dissonance
- 642.** Technology no longer protected by copyright, available to everyone
- (A) Proprietary.
(B) Open.
(C) Private.
(D) Either A or B.

- 643.** Confidentiality means:
- (A) Sharing data publicly
 - (B) Hiding data from all
 - (C) Protecting participant info
 - (D) Sending emails
- 644.** Ethics in report writing ensures:
- (A) Fabrication
 - (B) Transparency and honesty
 - (C) Data hiding
 - (D) Bias
- 645.** Which of the following is an ethical question related to informed consent?
- (A) Who can give informed consent in special populations such as children or patients in a coma?
 - (B) How to increase the number of study participants
 - (C) How to reduce the cost of the study
 - (D) How to speed up the publication process
- 646.** A researcher uses old data without permission for a new publication. The ethical decision that should be taken is to ____
- (A) Still publish
 - (B) Change the title
 - (C) Obtain permission and clearly acknowledge the source
 - (D) Reduce the data
 - (E) Hide the method
- 647.** What is the ethical principle of keeping participant data private?
- (A) Anonymity
 - (B) Confidentiality
 - (C) Beneficence
 - (D) Voluntary Participation
- 648.** Educational researchers should ____ helpful or relevant information resulting from studies conducted in their professional community.
- (A) Share
 - (B) Suppress
 - (C) Conceal
 - (D) None of above
- 649.** How can data falsification be detected in scientific research?
- (A) By conducting surveys and interviews with the researchers involved.
 - (B) By checking the number of citations the research paper has received.
 - (C) Through replication studies, data audits, statistical analysis, peer review, and cross-validation with other studies.
 - (D) By analyzing the font and formatting inconsistencies in the research paper.
- 650.** To maintain research ethics in higher education, the most comprehensive policy that should be developed is ____
- (A) Thesis writing guidelines
 - (B) A code of ethics for research and scientific publication that is socialized and enforced
 - (C) Technical rules for data collection
 - (D) Journal accreditation guidelines
 - (E) Faculty evaluation standards
- 651.** Acknowledgement by study participants that they will understand what their participation will entail
- (A) Debriefing
 - (B) Informed consent
 - (C) Contract
 - (D) None of above
- 652.** Ethics in communication means respecting cultural differences.
- (A) TRUE
 - (B) FALSE
- 653.** Basing conclusions without any bias and value judgment is ____
- (A) Objectivity
 - (B) Factual
- 654.** What is the ethical principle called that allows research participants to stop participating at any time without penalty?
- (A) Informed consent
 - (B) Debriefing

- (C) Right to withdraw
(D) Noble cause corruption
- 655.** Miss McCarthy, a high school teacher, left all the addresses of her students sitting out on her desk. A student saw them and took a picture of one of the student's addresses. Which of the following was the problem?
(A) Liability
(B) Morals
(C) Confidentiality
(D) Communication
- 656.** Which of the following is a feature of confidentiality?
(A) Participant awareness of the study's purpose
(B) No lasting harm resulting from participating in a study
(C) No identifying information is revealed about a participant
(D) The right to withdraw from the study at any time is provided
- 657.** What is ASSENT
(A) Something we had to spell on the exam
(B) The child agreeing to participate in the study
(C) The only thing you need for a child to participate in research
(D) None of above
- 658.** Why is cultural awareness important in international scientific collaborations?
(A) To respect diverse perspectives
(B) To improve experimental methods
(C) To enhance data collection
(D) To refine hypotheses
- 659.** What is the purpose of evaluating internet sources?
(A) To avoid plagiarism
(B) To ensure the information is credible and reliable
(C) To find the most recent information
(D) To complete the research quickly
- 660.** Which choice is not a factor that contributes to why ethics are created, change, and evolve?
(A) Significant historic events that create a reckoning
(B) Ethical lapses that lead researchers to create new safeguards
(C) Scientific advancements that lead to new fields of research
(D) Changes in cultural values and behavioral norms that evolve over time
(E) This is a trick question — all of the above answers are correct
- 661.** What type of research may qualify for expedited review?
(A) Research involving minors as subjects
(B) Research involving significant risks to subjects
(C) Research involving non-invasive procedures and minimal risk
(D) Research involving X-rays or sedation
- 662.** Which ethical challenge involves manipulating data to misrepresent findings?
(A) Weak data privacy safeguards
(B) Fabrication and falsification
(C) Plagiarism of ideas and words
(D) Conflicts of interest in funding
- 663.** The anonymity that participants promised so that they feel comfortable answering questions honestly?
(A) Written consent
(B) Debriefing
(C) Confidence
(D) Confidentiality
- 664.** Which pair of goals most directly contributes to the scientific community?
(A) Publishing without peer feedback
(B) Protecting all data from reuse
(C) Focusing on sensational headlines
(D) Sharing replicable data and insights

- 665.** The explanations of research aims being given and agreed to by the participant is known as what?
- (A) Terms and Conditions
 - (B) Agreed consent
 - (C) Contractual obligation
 - (D) Informed Consent
- 666.** What does the term 'non-maleficence' mean in research ethics?
- (A) To avoid informed consent
 - (B) To provide all benefits to participants
 - (C) To share data publicly
 - (D) To minimize harm to participants
- 667.** The main purpose of ethical guidelines for research in Psychology is to
- (A) Minimise the problems that participants cause for researchers.
 - (B) Guarantee that the experimentation runs without problems.
 - (C) Ensure that any results published will not be challenged.
 - (D) Protect the welfare and rights of the participants.
- 668.** Research ethics, Ethics Committee for Research, Plagiarism software and Research advisory committee are four requirements for research Code of ethics
- (A) True
 - (B) False
- 669.** Scientific Research ethics provides guidelines for the responsible conduct of research.
- (A) True
 - (B) False
- 670.** Which ethical factor ensures that research subjects have the right to anonymity?
- (A) Informed consent
 - (B) Confidentiality
 - (C) Deception
 - (D) Voluntary participation
- 671.** If a collaborative study involves many institutions, the best ethical strategy for determining authorship is ____
- (A) Based on the highest rank
 - (B) Based on the institutional order
 - (C) Based on actual scientific contributions
 - (D) Based on informal agreement
 - (E) Based on the amount of funding
- 672.** In your research, you shared the contact details of some of your participants without their prior approval, Which rule are you breaking?
- (A) Protecting Anonymity and Confidentiality
 - (B) Obtaining Consent Form
 - (C) Avoiding Deceptive Practices
 - (D) None of above
- 673.** When may deception be used as part of a study?
- (A) When the benefits of the deception outweigh the costs
 - (B) When there is no risk at all associated with the deception
 - (C) Deception may never be used
 - (D) None of above
- 674.** Once human subjects sign an informed consent form, all personal data collected by researchers about participating human subjects can be transferred without any additional constraint only to other researchers. Any other kind of disclosure is not permitted.
- (A) Yes
 - (B) No
- 675.** Ethical considerations are not necessary if the data is gathered anonymously.
- (A) TRUE
 - (B) FALSE
 - (C) All the above
 - (D) None of the above
- 676.** How does the inclusion of ethical considerations affect the overall quality of a research proposal?
- (A) It lengthens the proposal unnecessarily

- (B) It ensures that the research adheres to established ethical guidelines and protects participants' rights
(C) It simplifies the data collection process
(D) It limits the scope of the research
- 677.** A research participant is allowed to withdraw from a study:
(A) For any reason as long as it is explained to the researcher
(B) For any reason as long as the researcher gives permission to withdraw
(C) For any reason without any explanation.
(D) None
- 678.** What ensures research participants understand study risks before joining?
(A) Informed Consent
(B) Voluntary Participation
(C) Confidentiality
(D) Anonymity
- 679.** Which of the following is a key ethical requirement for research participants, as described in the article?
(A) They must be paid for their participation
(B) They must be fully informed about the study's purpose, procedures, and risks before agreeing to participate
(C) They must be related to the researchers
(D) They must complete the study without withdrawing
- 680.** The degree of risk to be taken should never exceed that determined by the humanitarian importance of the problem to be solved by the experiment.
(A) Justice
(B) Responsibility
(C) Competence
(D) Dignity
- 681.** Which action best promotes ethical data usage among peers?
(A) Focus solely on personal compliance
(B) Only promote ethics during exams week
(C) Avoid talking about data practices
(D) Report unethical data behavior promptly
- 682.** What is the most crucial consideration to do when content is not your original work?
(A) Duplicate the original
(B) Do not tell anyone about it
(C) Claim it
(D) Make sure to acquire your resources through legal ways
- 683.** A common ethical challenge in research is:
(A) Fabrication or falsification of data
(B) Collecting large samples
(C) Using statistical tools
(D) Writing references properly
- 684.** What is the ethical consideration when collecting user data in financial transactions?
(A) User consent and transparency
(B) Ignoring user preferences
(C) Collecting data without limitations
(D) Selling user data to third parties
- 685.** Samaiya, Jade and Jada, are working on a school project about news reporting. They come across a term that refers to a personal or organizational inclination or prejudice that can influence how news is reported. What is this term?
(A) Relevant
(B) Extraneous
(C) Ethics
(D) Bias
- 686.** Ideally, the research participant's identity is not known to the researcher. This is called:
(A) Confidentiality
(B) Deception
(C) Anonymity
(D) Desensitizing

- 687.** Enumerates the ethical principles maintained throughout the study, this includes the consent form, the Institutional Ethics Review Committee approval and permission to conduct human and animal study.
- (A) Data analysis
 - (B) Research ethics
 - (C) Data collection
 - (D) Research instruments
- 688.** Words should be carefully chosen in consideration of the gender, roles, ethnicity, preferences, and status of the person or people you are talking to.
- (A) Clarity
 - (B) Ethics
 - (C) Vividness
 - (D) Brevity
- 689.** Excessive self-citation without clear relevance can be categorized as an ethics violation because it ____
- (A) Lowers the quality of the article
 - (B) Manipulates citations and scientific impact
 - (C) Violates language rules
 - (D) Is academically inefficient
 - (E) Reduces research novelty
- 690.** You can't publish the information or the name of the source.
- (A) On the Record
 - (B) Off the Record
 - (C) Deep background or Non-attributable
 - (D) On the Background
- 691.** Which action best aligns with Justice in participant selection?
- (A) Choosing participants with higher literacy
 - (B) Ensuring equitable treatment and access
 - (C) Prioritizing high-risk populations
 - (D) Recruiting only easily available groups
- 692.** The basic principles used to judge the ethics of research include:
- (A) Experimental group, control group, hypothesis, and replication
 - (B) Independent variable, dependent variable, placebo, and double-blind
 - (C) Scientific validity, expertise of the researcher, cost, and time involved
 - (D) Informed consent, protection from harm, confidentiality, and debriefing
- 693.** Which of the following practices violates the ethical principle of justice?
- (A) Selecting participants solely based on research needs
 - (B) Including women and minorities in clinical trials
 - (C) Recruiting only prisoners for a risky drug trial
 - (D) Ensuring all participants have equal treatment opportunities
 - (E) Protecting privacy of participants during data reporting
- 694.** Within the context of social media, ____ refers to a sense of openness, of giving all participants access to the information they need to understand the messages they are receiving.
- (A) Transformation
 - (B) Transcendence
 - (C) Transparency
 - (D) Translucency
- 695.** Manipulating by changing, omitting, or adding data
- (A) Falsification
 - (B) Fabrication
 - (C) Plagiarism
 - (D) Photo manipulation
- 696.** Obeying the laws and policies related to research.
- (A) Competence
 - (B) Legality
 - (C) Openness
 - (D) Social Responsibility
 - (E) Carefulness

- 697.** Confidentiality in research means that:
- (A) Data can be shared openly with other researchers.
 - (B) Participants' results and personal information are kept safe and not disclosed.
 - (C) Participants can see their own results.
 - (D) Researchers can publish participants' names.
- 698.** Based on Psychological Experimental Research and Ethics, when should the experimenter inform the subject(s) of the experiment the true nature of the experiment.
- (A) Always at the very beginning.
 - (B) As soon as is possible.
 - (C) Only at the very end of the experiment, during the debriefing.
 - (D) Never.
- 699.** Ethics is not important in doing social research.
- (A) True
 - (B) False
- 700.** What are the ethical considerations of data collection for climate action in the project led by Valeria and Franco?
- (A) Data collection should prioritize profit over ethics.
 - (B) All data should be collected without any consent.
 - (C) Transparency is not necessary for climate action data.
 - (D) Ethical considerations include informed consent, data privacy, avoiding harm, equitable access, transparency, and bias mitigation.
- 701.** In your research you use your students as subjects for a research experiment. Participation in the experiment is a mandatory requirement for students to pass the exam. There is nothing wrong in what you do.
- (A) Yes
 - (B) No
- 702.** What is one of the key issues that arise in the process of collecting, analyzing, and telling individual stories in narrative research?
- (A) How to measure the length of the story
 - (B) Who owns the story?
 - (C) The financial cost of storytelling
 - (D) The number of characters in the story
- 703.** On what criteria could we decide whether activities such as "hacktivism" are morally justifiable? To what extent have technological developments led to an increase in data being collected without people's consent or when they are unaware that it is being collected?
- (A) Scope
 - (B) Perspectives
 - (C) Methods and Tools
 - (D) Ethics
- 704.** This happens when researchers reflect on the possibility that their own biases might have interfered with the observations or interpretations.
- (A) Reflexivity
 - (B) Iterativity
 - (C) Researcher bias
 - (D) Triangulation
- 705.** Which of the following is not a potential ethical concern with using ICT in research?
- (A) Informed consent
 - (B) Confidentiality
 - (C) Data security
 - (D) Participant recruitment
- 706.** What is the term for a committee of administrators, scientists, and community members that reviews proposals for research involving human participants?
- (A) Institutional Review Board (IRB)
 - (B) Ethical Review Committee (ERC)
 - (C) Research Oversight Panel (ROP)
 - (D) Human Studies Committee (HSC)

- 707.** Which of the following is an example of a potential ethical issue related to the use of ICT in research?
- (A) Privacy concerns related to the collection of personal data
 - (B) Technological issues that may affect the validity of the research findings
 - (C) The cost of ICT tools and access to them for all individuals or populations
 - (D) All of the above
- 708.** Fabrication in research refers to:
- (A) Making up data or results and recording or reporting them.
 - (B) Using someone else's work without credit.
 - (C) Changing data to fit a hypothesis.
 - (D) Repeating experiments for accuracy.
- 709.** Any distortion of or withholding of fact with the purpose of misleading others is known as ____
- (A) Confirmation Bias
 - (B) Replication
 - (C) Deception
 - (D) Negative Correlation
- 710.** You are a member of the program committee of a conference and participate in the discussions about acceptance of submitted papers. Later you chat with an author of an accepted paper. Can you disclose the names of the reviewers of the papers?
- (A) Yes
 - (B) No
- 711.** An ethical communicator should always consider:
- (A) Only the senders intent
 - (B) The audiences rights and dignity
 - (C) The fastest way to deliver the message
 - (D) The most popular opinion
- 712.** Why is it important to evaluate the source of evidence in an argument?
- (A) To ensure that the summary is accurate
 - (B) To assess the reliability and authority of the evidence
 - (C) To make the argument longer and more detailed
 - (D) To align the evidence with the writer's personal opinion
- 713.** Debriefing is the process of
- (A) Informing and explaining the exact purposes of a study following data collection.
 - (B) Distributing the benefits and costs of a study equally among participants.
 - (C) Informing participants about the costs and benefits of participation.
 - (D) Protecting the privacy of participants.
- 714.** The discipline dealing with what is good and bad and with moral duty and obligation is called
- (A) Quantitative data collection
 - (B) Research plan
 - (C) Research ethics
 - (D) Plagiarism
- 715.** The modern history of human-subject protections began at ____
- (A) Tuskegee
 - (B) Nuremburg
 - (C) Stanford
 - (D) Belmont
- 716.** Which action best fosters a culture of integrity in student group work?
- (A) Allow free sharing of all drafts
 - (B) Set vague expectations for roles
 - (C) Focus only on grades, not process
 - (D) Ensure clarity in guidelines for collaboration
- 717.** The research considers the protection of research participants by obtaining approval from participants through voluntary written consents.
- (A) Validation
 - (B) Informed consent
 - (C) Reliability
 - (D) Interview

718. The only item that you must document in a report is a quotation of another person's actual spoken or written words
(A) True
(B) False
719. In research ethics, data privacy refers to:
(A) Allowing unrestricted data access
(B) Securing personal information
(C) Full transparency in all research
(D) Ignoring participant requests
720. This must be obtained from all those who participate in an experiment
(A) Informed Consent
(B) Debriefing
(C) Right to confidentiality
(D) Right to withdraw
721. Which of the following is NOT considered an ethical obligation for authors when reporting the results of their studies?
(A) To indicate the nature of previous dissemination if the data has been disseminated before
(B) To acknowledge the contributors of others and the source of their ideas
(C) To report the results according to their priority plans
(D) To report all aspects of the study that may impact replicability
722. What are ethical dilemmas?
(A) Situations in which individuals face conflicting moral principles, making it challenging to determine the right course of action.
(B) Clear choices between right and wrong actions.
(C) Situations where laws and regulations are not applicable.
(D) Decisions made without any moral consideration.
723. How can a researcher balance the need for "originality" with the ethical obligation to build upon existing research?
(A) By plagiarizing previous research and presenting it as their own.
(B) By clearly acknowledging and citing previous work while offering a unique contribution or perspective.
(C) By dismissing all previous research as irrelevant.
(D) By assuming that originality requires completely ignoring existing knowledge.
724. Which of the following was NOT a reason the experiment was considered unethical?
(A) Lack of informed consent
(B) Psychological harm to the children
(C) Families were paid large sums of money
(D) Violation of children's rights
725. Particular attitude or point of view a creator takes towards a subject by not accurately covering all sides of the issue
(A) Bias
(B) Objectivity
(C) Credibility
(D) Chronology
726. Researchers might use (a) when providing participants with the full details of the experiment could skew their responses.
(A) Informed consent
(B) Deception
(C) Ethics
(D) Debriefing
727. Is it acceptable to make a copy of alert papers for online testing?
(A) Yes, it is acceptable for both online and paper testing.
(B) No, it is not acceptable for online testing.
(C) Yes, but only if the alert papers are shredded immediately after.
(D) No, it is not acceptable under any circumstances.
728. What should you do if you notice bias in your research?
(A) Ignore it

- (B) Try to eliminate or reduce it
 - (C) Add more bias
 - (D) Only report biased results
729. Which of the following is NOT a prerequisite for IRB approval of a human research study?
- (A) The risks to study participants are maximized
 - (B) The selection of study participants is equitable
 - (C) Informed consent is obtained and documented
 - (D) The privacy and confidentiality of data are protected
730. Is it ethical to use photocopied tests?
- (A) Yes, as long there's no one who will be hurt
 - (B) Yes, as long as it will help your paying client to overcome their situation
 - (C) Yes, if there's consent of the original author and the assessment is noncommercial
 - (D) Yes, as everyone is doing already
731. Researchers are responsible for acknowledging prior work and citing sources appropriately.
- (A) TRUE
 - (B) FALSE
 - (C) All the above
 - (D) None of the above
732. Which of the following is a disadvantage of having a close relationship with the group being studied?
- (A) It enhances the richness of data.
 - (B) It may lead to loss of objectivity.
 - (C) It ensures natural behavior.
 - (D) It increases generalizability.
733. Which of these is NOT a reliable source?
- (A) An article from a government website
 - (B) A research paper by a scientist
 - (C) A video by a celebrity talking about health
 - (D) A news report from a trusted newspaper
734. During a multicultural seminar, the speaker avoids offensive jokes. This reflects:
- (A) Brevity
 - (B) Ethics in communication
 - (C) Noise reduction
 - (D) Passive style
735. What is a challenge in designing online research studies?
- (A) Limited internet access
 - (B) Ethical concerns about privacy
 - (C) High cost
 - (D) Lack of participants
736. In educational scientific publication, data transparency can be achieved by ____
- (A) Keeping data privately
 - (B) Providing ethically accessible supporting data
 - (C) Deleting raw data
 - (D) Simplifying results
 - (E) Delaying publication
737. Why is data quality a governance issue?
- (A) Because governance defines the rules that ensure data accuracy and consistency
 - (B) Because only technology determines quality
 - (C) Because data quality checks are optional
 - (D) Because quality does not affect decision-making
738. David B. Resnik, J.D., Ph. D. (2015) highlighted that ethical norms in research help build public support for research. People are more likely to fund a research project if they can trust the quality and integrity of research. What ethical consideration is being shown above?
- (A) It promotes truthfulness
 - (B) It protects the study participants.
 - (C) It helps build trust among peers as well as public support.
 - (D) None of the above

739. Which of the following is NOT an ethical guideline for conducting research with humans?
- (A) Getting informed consent of the participant
 - (B) Telling participants they must continue until the study has been completed
 - (C) Keeping participants' identity anonymous
 - (D) Telling participants they are free to withdraw at any time
740. Bias is
- (A) Something you find in the cafeteria for lunch
 - (B) A prejudice about a person or event which affects a person's point of view on a particular subject.
 - (C) A primary source
 - (D) A town in the state of Delaware
741. To put someone else's facts or research from a resource into your own words, is called ____?
- (A) Record
 - (B) Paraphrase
 - (C) Brief description
 - (D) Simplify
742. An example of unethical research mentioned in the book was the Tuskegee study.
- (A) Schizophrenia
 - (B) Parkinson
 - (C) Twin
 - (D) Syphilis
743. Ethical issues arise when the interests of the stakeholders are in conflict and when one or more of the stakeholders are lacking in their responsibilities.
- (A) TRUE
 - (B) FALSE
744. Why are reliable sources important when doing research?
- (A) So you can copy and paste it
 - (B) So you can check if the information is biased or not.
 - (C) So you can make sure the information is accurate to use.
 - (D) None of above
745. What is the primary purpose of an Institutional Review Board (IRB)?
- (A) To manage data collection and publication
 - (B) To ensure ethical protection of study participants
 - (C) To analyze statistical significance in research findings
 - (D) None of the above
746. When information about ethical procedures in a journal article is limited, which single statement would provide readers with some assurance that human subjects were protected?
- (A) A statement that a Certificate of Confidentiality was obtained
 - (B) A statement that informed consent was obtained
 - (C) A statement that data were collected anonymously
 - (D) A statement that the study was approved by an IRB or similar committee
747. What is meant by 'informed consent'? Please indicate the best answer
- (A) Telling people who you are and what you are studying
 - (B) The ethics committee is informed about the research
 - (C) Participants are given a clear indication what the research is about and what their involvement would entail
 - (D) Participants are informed about the findings of the research at the end of the project
748. Model (2). Complete the missing parts using the words: Opinions-flash memory-Copyrights-password manager-Public domains. ____ protect both printed and digital content.

- (A) Opinions
 - (B) Flash memory
 - (C) Copyrights
 - (D) Password manager
 - (E) Public domains
749. Which ethical principle requires that at the end of the study participants be told about the true purpose of the research?
- (A) Institutional Review Board approval
 - (B) Confidentiality
 - (C) Debriefing
 - (D) Protection from physical harm
750. Sociologists must always consider the ethical implications of the research methods
- (A) True
 - (B) False
751. What do researchers using the scientific method try to prevent?
- (A) Their own notions, values, and biases from interfering with their research
 - (B) The use of technology in their research
 - (C) The involvement of other researchers
 - (D) The publication of their findings
752. Which right of a research participant refers to their right to decide voluntarily whether to participate in the study or not?
- (A) Right to self determination
 - (B) Right to full disclosure
753. Paraphrasing is ____
- (A) Copying the text
 - (B) Saying whatever I want after reading
 - (C) Putting information I read into my own words
 - (D) A water activity
754. How does a topic need to be chosen ethically?
- (A) To satisfy the academic endeavours
 - (B) To satisfy the literary taste
 - (C) To satisfy the well-being of the individuals
 - (D) To satisfy the finances of the government
755. Researchers should not put participants in a situation where they might be at risk as a result of their participation (physical and psychological)
- (A) Voluntary participation
 - (B) Freedom from risk of harm
 - (C) Confidentiality
 - (D) Person's right to service
756. How can academic honesty be effectively integrated into syllabi and assignments?
- (A) By omitting any mention of plagiarism to reduce anxiety
 - (B) Including a clear honor code, citation policies, and consequences for misconduct
 - (C) Providing opportunities for students to self-report misconduct
 - (D) By using a variety of assessment methods to reduce pressure
757. What is a Human Participants Form (4)?
- (A) A Human Participants Form (4) is a form required for research involving human subjects to ensure ethical standards are met.
 - (B) A Human Participants Form (4) is a form used to record animal testing results.
 - (C) A Human Participants Form (4) is a document for financial disclosures in research.
 - (D) A Human Participants Form (4) is a form for equipment maintenance logs.
758. In order to conduct a study, you often must get approval from the ____ of your college or university.
- (A) Institutional Review Board (IRB)
 - (B) American Psychological Association (APA)
 - (C) Psi Chi
 - (D) Judicial Board
759. Why should ethics be considered in conducting research?

- (A) Ethics keeps the researcher from committing misconduct while seeking knowledge and the truth, and respecting and protecting the rights of the respondents.
- (B) Ethics promotes essential values that help researchers to have a common understanding and work on a topic harmoniously.
- (C) Consideration of ethical principles also draws out public trust.
- (D) All of the above
- 760.** What does the term "research ethics" refer to?
- (A) Finding clever ways to manipulate research data
- (B) Following a strict writing style for research papers
- (C) Ignoring the rights and consent of research participants
- (D) Ensuring that research is conducted ethically and responsibly
- 761.** What is the main goal of pre-registration in psychological research?
- (A) To record study plans in advance and prevent data-driven hypothesis changes
- (B) To ensure research is published only in high-impact journals
- (C) To allow other researchers to collect data for the same project
- (D) To verify that participants provide accurate self-reports
- 762.** A source that is always good in quality, truthful; able to be trusted
- (A) Domain
- (B) Reliable source
- (C) Bias
- (D) Unreliable source
- 763.** Any researcher should weigh the expected ___ for society with the potential ___
- (A) Benefits, harm
- (B) Risks, costs
- (C) Anonymity, confidentiality
- (D) None of above
- 764.** Plagiarism is a ____
- (A) Legal
- (B) Habit
- (C) Bad
- (D) Crime
- 765.** Which of the following is an example of unethical research?
- (A) Research subjects agreeing to try untested products after they are told of possible dangers.
- (B) Students participating in a psychological study after signing a confidentiality agreement.
- (C) Medical experiments conducted on prisoners who are not informed of potential side effects.
- (D) Surveys conducted in low-income neighborhoods with a guarantee of confidentiality.
- 766.** Ethics refers to the principles of right and wrong that guide an individual in making decisions.
- (A) True
- (B) False
- 767.** Which of the following is not an ethical consideration regarding market research?
- (A) Protecting the confidentiality of market researchers
- (B) Unbiased approach used by market researchers
- (C) Objective approach used by market researchers
- (D) Distorting market research to misinterpret numerical data
- 768.** The slanting of context and facts in reporting is considered what?
- (A) Objectivity
- (B) Bias
- (C) Fake News
- (D) Hard news

769. In Haney, Banks, and Zimbardo (1973), what right might the participants have felt they did not have?
- (A) Right to privacy
 - (B) Right to withdraw
 - (C) Right to compensation
 - (D) Right to be informed
770. When the topics of research are very sensitive, which of the following rights of individual must be ensured when the respondents refused to be identified as the source of the information?
- (A) Confidentiality
 - (B) Anonymity
 - (C) Validity
 - (D) Reliability
771. Whatever agreed upon with the participants must be actualized
- (A) Integrity
 - (B) Legality
 - (C) Social Responsibility
 - (D) Responsible Publication
772. Which of the following is susceptible to the issue of research ethics?
- (A) Inaccurate application of statistical techniques
 - (B) Faculty research design
 - (C) Choice of sampling techniques
 - (D) Reporting of research findings
773. What is the IRB?
- (A) Internal Review Board
 - (B) Institutional Review Bureau
 - (C) Investigative Review Board
 - (D) Committee of administrators, scientists, and community members that reviews proposals for research involving human participants
774. While collecting sensitive customer data, market researchers should adhere to all of the following guidelines EXCEPT ____
- (A) Asking only for the information needed
 - (B) Using information responsibly to provide value
 - (C) Providing respondents with the research firm's contact information
 - (D) Sharing information without the customer's authorization
 - (E) Explaining to respondents how the information will be used
775. Why must researchers avoid coercion in participant recruitment?
- (A) To increase sample size
 - (B) To ensure voluntary participation
 - (C) To simplify data collection
 - (D) To guarantee positive outcomes
776. When finding a reliable source, which of these is important to do:
- (A) Verify the date on the website
 - (B) Look at all the advertisements
 - (C) Change all the information on the website
 - (D) Copy all the text word for word and say it's your own
777. What should you NOT do when researching?
- (A) Use key words & phrases
 - (B) Come up with focus questions
 - (C) Use reliable sources
 - (D) Use an editable source
778. How can ethical decision making contribute to a positive society?
- (A) By encouraging corruption and dishonesty
 - (B) By promoting inequality and discrimination
 - (C) By creating chaos and conflict
 - (D) By promoting fairness and justice
779. What part of the methodology contains the ffg: Data privacy, reservation of information, confidentiality, and anonymity, have the right to back out.
- (A) Research design

- (B) Data collection procedure
(C) Ethics
(D) Research instrument
- 780.** When should participants of a study be told of an experiment's true intention?(Research Methods and Statistics Part II)
(A) As soon as reasonably possible
(B) Results do not need to be disclosed to participants
(C) There is a legal limit of 10 business days to discuss results with participants
(D) Within 24 hours
- 781.** Human subjects can only be the subjects of research in life sciences and social sciences.
(A) Yes
(B) No
- 782.** Sergey is lagging behind his research schedule. Desperate to demonstrate that he is making good use of federal grant money, he makes up data to present in a progress report. What behavior is Sergey demonstrating?
(A) Plagiarism
(B) Falsification
(C) Fabrication
(D) Deception
- 783.** What should you consider when evaluating sources in a literature review?
(A) The author's taste in literature
(B) The author's favorite color
(C) The author's expertise in the field and the support for their arguments
(D) The author's favorite food
- 784.** When searching online, you must ensure that the sources you use are responsible and —
(A) Irresponsible
(B) Unrelated
(C) Questionable
(D) Valid
- 785.** Which of the following is considered an ethical responsibility for authors when borrowing heavily from a source?
(A) To indicate which ideas are their own and which are from the source
(B) To avoid reporting evidence that contradicts their point of view
(C) To use verbatim text from the source without quotation marks
(D) To paraphrase the ideas from the source without giving credit
- 786.** What is the significance of "academic integrity"?
(A) Cheating is acceptable.
(B) Honesty in scholarship is essential.
(C) Collaboration is discouraged.
(D) Grades are the only focus.
- 787.** Sidewalk Science, from the video talk by Fine & Torre on CPAR, refers to:
(A) Science experiments for kids done in public that get kids engaged in thinking about science and research.
(B) Efforts to share back findings from research and engage in further conversation with those most impacted by the issues being researched.
(C) Doing surveys or interviews in the places that people are most likely to be out in public.
(D) None of above
- 788.** You submit a paper to conference which adopts a double-blind review process. Is your identity confidential information that the conference organizers cannot disclose to reviewers?
(A) Yes
(B) No
- 789.** Your classmate, Jarod, states that he does not need to be concerned about ethical standards for his observational study because he will not be manipulating any variables. You disagree. Considering what you have learned in this chapter, your reply is,

- (A) You are right. Ethical guidelines do not apply to observational studies.
- (B) You're wrong. All psychological research is subject to ethical guidelines.
- 790.** What is the difference between privacy and anonymity in research participants' ethics?
- (A) Privacy means participants remain nameless, while anonymity is the freedom to do things without others watching
- (B) Privacy is the freedom to do things without others watching, while anonymity means participants remain nameless
- (C) Both are the same
- (D) None of the above
- 791.** In educational research, why is ethical consideration important when working with students?
- (A) To ensure the research is published in top journals
- (B) To protect participants' rights, privacy, and well-being during the research process
- (C) To avoid complex data analysis
- (D) To make data collection faster and more efficient
- 792.** What is source of information is trustworthy and reliable, indicating that the information provided is accurate, well-supported by evidence, and comes from a reputable author or institution with relevant expertise in the field; essentially, it is a source you can confidently rely on for your research.
- (A) Credible
- (B) Information
- (C) Resources
- (D) Citation
- 793.** Protection of the research participant is more important than the pursuit of new knowledge.
- (A) True
- (B) False
- 794.** What are some potential risks and benefits of involving human subjects in scientific research?
- (A) Invasion of privacy, and improved understanding of human behavior.
- (B) Increased knowledge and understanding of human physiology and psychology
- (C) Ethical concerns and potential for exploitation of vulnerable populations
- (D) Inaccurate or biased results due to participant bias
- 795.** How should students handle sources used in research projects?
- (A) Communicate sources transparently to teachers
- (B) Keep sources private to maintain originality
- (C) Only list sources if directly quoted
- (D) Use sources freely without attribution
- 796.** What is confidentiality
- (A) Not publishing personal details of participants
- (B) Telling participants they are being studied
- (C) Not putting your name on your research
- (D) Putting all personal details of participants in your research
- 797.** What is an ethics committee?
- (A) People who like to talk a lot
- (B) A group of people who think about hypothetical research
- (C) A group of experienced people who will consider a research proposal and the degree to which ethical issues have been considered appropriately
- (D) A group of experienced people who are useful to draw on when writing a proposal as an optional extra
- 798.** Which ethical principle ensures that participants know they are part of a study and agree to participate?
- (A) Anonymity

- (B) Informed Consent
 - (C) Confidentiality
 - (D) Voluntary Withdrawal
- 799.** Why are many psychology experiments from the 1950s-60s considered unethical by today's standards?
- (A) They often prioritized scientific findings over participant welfare
 - (B) They were always conducted with informed consent
 - (C) They only involved animal subjects
 - (D) They followed strict modern ethical guidelines
- 800.** Ethical considerations are important in the design and implementation of ___ research.
- (A) Psychological
 - (B) Mechanical
 - (C) Astronomical
 - (D) Culinary
- 801.** The following are the characteristics of the literature and studies to be acknowledged in the present studies EXCEPT:
- (A) Materials must be relevant to the research topic.
 - (B) Materials must be as objective as possible.
 - (C) Materials must be as recent as possible.
 - (D) Materials must be as biased as possible.
- 802.** It is considered to deal with beliefs about what is right and wrong, proper and improper.
- (A) Research
 - (B) Ethics
 - (C) Respondents
 - (D) None of above
- 803.** Which of the following ideas is a fallacy of stereotyping that is unfair to student-learners?
- (A) All students have rights to be respected.
 - (B) All students require quality interruption.
 - (C) All students can best learn at their own pace.
 - (D) All students from present communities are dull.
- 804.** Why is it important to use credible sources in research?
- (A) To confuse readers
 - (B) To ensure accuracy, reliability, and validity of information.
 - (C) All the above
 - (D) None of the above
- 805.** Who should merit authorship in a paper according to ethical standards?
- (A) Only the lead author of the paper
 - (B) Anyone who has contributed in any way to the project
 - (C) Only those individuals who have made substantive contributions to a project
 - (D) Only those individuals who have a high academic reputation
- 806.** What is the purpose of the National Research Act (1974) in research ethics?
- (A) To ensure transparency of results
 - (B) To honor confidentiality and anonymity
 - (C) To anticipate repercussions
 - (D) To mandate protections for research participants
- 807.** Research ethics do not include
- (A) Integrity
 - (B) Honesty
 - (C) Objectivity
 - (D) Subjectivity
- 808.** What is meant by 'Ethics'?
- (A) Moral Values
 - (B) Being Religious
 - (C) Deceiving People
 - (D) Pleasant Personality
- 809.** Experimental designs that require the researcher to obtain informed consent from participants do not have other potential ethical concerns.
- (A) F
 - (B) T

- 810.** A scientist says that she has made an important discovery about sound waves. What needs to happen for most other scientists to accept her results?
- (A) The scientist has to explain her results to other scientists.
 - (B) Many scientists need to review the results.
 - (C) The scientist needs to publish her results in a journals.
 - (D) Other scientists need to be able to get the same results.
- 811.** Concern over how well study findings replicate across scientific fields
- (A) Validity (accuracy)
 - (B) Reliability (consistency)
 - (C) Replication crisis
 - (D) None of above
- 812.** This most common bias occurs when a researcher interprets the data to support his or her hypothesis.
- (A) Confirmation bias
 - (B) Question-order bias
 - (C) Leading questions and wording bias
 - (D) None of above
- 813.** Whose permission or consent is needed?
- (A) Students
 - (B) Colleagues
 - (C) Parents
 - (D) School authorities
 - (E) All the stakeholders
- 814.** Why is write protection essential during the process of data acquisition?
- (A) To make the data more readable
 - (B) To improve data encryption
 - (C) To speed up the acquisition process
 - (D) To prevent alteration of evidence
- 815.** Which one is a “don’t” in interview etiquette?
- (A) Be confident
 - (B) Dress appropriately
 - (C) Proper eye contact
 - (D) Lie about your abilities to get job
- 816.** What does the ethical principle of honesty entail?
- (A) Data should never be fabricated
 - (B) Data can be altered for better results
 - (C) Data should be kept secret
 - (D) Data can be misrepresented
- 817.** What is the importance of evaluating the validity of claims?
- (A) To understand the author’s personal life
 - (B) To assess the soundness of the argument
 - (C) To evaluate the length of the text
 - (D) To analyze the complexity of the language.
- 818.** What was a major ethical violation in the Tuskegee Syphilis Study?
- (A) Participants were paid too much
 - (B) Black men with syphilis were studied without treatment, even after penicillin became available
 - (C) The study was conducted in another country
 - (D) Only women were included in the study
- 819.** Why is Wikipedia not a strong research source?
- (A) Wikipedia authors try to trick people with incorrect information.
 - (B) Anyone can edit a Wikipedia entry, so information can be wrong or incomplete.
 - (C) Wikipedia never contains citations.
 - (D) Wikipedia contains too many details and doesn’t give a good overview.
- 820.** Why is it important to evaluate the reliability of online sources when conducting research?
- (A) To confuse readers with conflicting information
 - (B) To waste time checking unnecessary details

- (C) To support unreliable claims without verification
- (D) To ensure accuracy, credibility, and trustworthiness of information.
- 821.** IRSME is the acronyms of the characteristics of Good Topics, What acronym and its meaning means does Not embarrass or harm participants.
- (A) M-Manageable
- (B) S-Significant
- (C) E-Ethical
- (D) I-Interesting
- 822.** What is the role of "reflexivity" in ensuring the ethical conduct of qualitative research?
- (A) Researchers should avoid reflecting on their own biases and assumptions.
- (B) Researchers should critically examine how their own perspectives and experiences might influence the research process and findings.
- (C) Reflexivity is only relevant for quantitative research.
- (D) Reflexivity guarantees that the research will be free from bias.
- 823.** When searching the web for research, what is crucial for obtaining reliable information?
- (A) Using any available website
- (B) Focusing only on popular blogs
- (C) Evaluating the credibility of sources
- (D) Relying solely on social media posts
- 824.** Gaining permission from a person to take part in a study and telling them what is involved is referred to as ____
- (A) Withdrawal
- (B) Confidentiality
- (C) Informed consent
- (D) Debriefing
- 825.** Kiyana is conducting a research study and collects sensitive information from participants. When publishing her findings, she ensures that no specific piece of information can be associated with any particular participant. This is a central part of which aspect of research ethics?
- (A) Informed consent
- (B) Protection from harm
- (C) Confidentiality
- (D) Deception
- 826.** Why is it important to submit a research proposal to an IRB before conducting research with human participants?
- (A) To ensure ethical treatment of participants.
- (B) To obtain funding for the research.
- (C) To get feedback from committee members.
- (D) To ensure the validity of the research.
- 827.** Editors and journalists play a role in:
- (A) Advertising products
- (B) Spreading propaganda
- (C) Maintaining ethical standards
- (D) Creating laws
- 828.** Manipulating research materials
- (A) Plagiarisms
- (B) Fabrication
- (C) Falsification
- (D) None of above
- 829.** A reviewer rejects a manuscript because of personal differences in viewpoint. This violates ethics because the reviewer ____
- (A) Did not follow the blind review system
- (B) Acted subjectively and unprofessionally
- (C) Did not understand the methodology
- (D) Ignored the journal format
- (E) Was overly strict in assessment
- 830.** What is 'Deception' in research?
- (A) A method of collecting data through interviews
- (B) A technique where participants are misled or not fully informed about the true purpose of the research

- (C) A process of obtaining informed consent from participants
(D) A way of analyzing data using statistical tools
- 831.** When a source has been tested and it is accurate, recent, unbiased, and trustworthy.
(A) Scholarly
(B) Credible
(C) Claim
(D) Plagiarism
- 832.** If an ethical violation is committed by a senior researcher, the most ethical decision is to ____
(A) Ignore it
(B) Cover it up for reputation
(C) Handle it professionally and proportionally
(D) None of above
- 833.** When written informed consent is obtained, participants must be told ____ of the experiment
(A) The aim and hypothesis
(B) The method and pay rate
(C) The nature and purpose
(D) Method and outcome
- 834.** What are the potential consequences of using unreliable sources in academic research?
(A) It can lead to misinformation, damage credibility, and result in poor academic performance.
(B) It has no impact on research quality
(C) It can enhance the research by providing diverse perspectives
(D) It is only a concern for professional researchers
- 835.** When you look for sources on your topic you must check to make sure the sources are ____ so that you get the most accurate facts to answer your research questions.
(A) Online
(B) Print
(C) Credible
(D) New
- 836.** The goals of ethical standards are to ____
(A) Foster human welfare
(B) Promote dignity of the individual
(C) Maintain scientific integrity
(D) All of the above
- 837.** Why should you not automatically trust everything in a refereed paper, even if it is peer-reviewed?
(A) Peer review guarantees the accuracy of all claims
(B) A paper reflects only the knowledge of the researchers at the time of submission
(C) All refereed papers are free of errors
(D) The research is always up-to-date and accurate
- 838.** Treating research peers with fairness.
(A) Respect for Colleagues
(B) Social Responsibility
(C) Openness
(D) Competence
(E) Carefulness
- 839.** When is it necessary to get permission and approval from research ethics committees?
(A) For humans
(B) For animals
(C) For human, but not for animals
(D) For both animal and human
- 840.** The research should ensure that a study will enhance the well-being and improve the situation of the populations under study, rather than undermine or endanger them in any way.
(A) Accountability
(B) Beneficence
(C) Justice
(D) Respect
- 841.** Which of the following is NOT a common ethical consideration in qualitative research?

- (A) Informed Consent
 - (B) Confidentiality
 - (C) Anonymity
 - (D) Deception
- 842.** Which of the following is a characteristic of a reliable source?
- (A) Biased opinion
 - (B) Lack of evidence
 - (C) Peer-reviewed
 - (D) Anonymous author
- 843.** In the field of educational research, deception can happen anytime. What characteristic of a human being can lead him to temptations?
- (A) Narrow-mindedness
 - (B) Human frailty
 - (C) Critical Thinker
 - (D) Decision Maker
- 844.** A trial proposes invasive procedures with minimal expected benefit. Which ethical criterion is most at risk?
- (A) Informed consent documentation
 - (B) Value for communities and patients
 - (C) Favorable risk-benefit assessment
 - (D) Independent external review process
- 845.** Which practice best demonstrates Respect for Persons in a study?
- (A) Transparent reporting of methods
 - (B) Periodic compliance monitoring
 - (C) Fair selection of participants
 - (D) Voluntary informed consent process
- 846.** Along with informed consent, what other ethical obligation do sociologists have regarding their professional responsibilities and conduct?
- (A) They must disclose their epistemological orientations.
 - (B) They must disclose their identity as researchers.
 - (C) They must disclose their theoretical traditions.
 - (D) They must disclose the true identities of their subjects.
- 847.** What is deception?
- (A) Deception is the act of telling the truth
 - (B) Deception is the act of being honest
 - (C) Purposely misleading experiment participants in order to maintain the integrity of the experiment
 - (D) Deception is the act of clarifying information
- 848.** Ethical clearance is required for:
- (A) Animal studies
 - (B) Human studies
 - (C) Both a and b
 - (D) Neither
- 849.** Hey there! Imagine you are planning a fun research project with your friends Dia, Kiara, and Rohan. Informed consent in this context refers to ____
- (A) Asking for permission from the government to start the project
 - (B) Reviewing and understanding the collected data
 - (C) Gathering information from Dia, Kiara, and Rohan
 - (D) Ensuring Dia, Kiara, and Rohan are willing to participate
- 850.** After an experiment, participants always must be told information about the experiment
- (A) True
 - (B) False
- 851.** People who cannot give their own consent to participate in an experiment
- (A) Minors and cognitively disabled
 - (B) Women
 - (C) Men
 - (D) White men

- 852.** Multiple Choice: Read each question carefully and choose the BEST answer. When research participants are minors, the researcher should do all of the following EXCEPT:
- (A) Obtain consent from parents or guardians
 - (B) Explain the study in age-appropriate language
 - (C) Allow the child to decide without adult consent
 - (D) Secure proper documentation of consent
- 853.** Why is it important for research to be replicable?
- (A) To increase the length of research papers
 - (B) To validate the findings by allowing other researchers to conduct the same study and compare results
 - (C) To make the research seem more complicated
 - (D) To ensure that the researcher gets credit for the work
- 854.** IRB is the acronym for
- (A) Informed Rights Board
 - (B) Interactive Relativism Board
 - (C) Institutional Review Board
 - (D) International Review Board
- 855.** Give an example of a situation where ethical decision making is crucial.
- (A) Deciding what to wear to a party
 - (B) Choosing a restaurant for dinner
 - (C) Picking a movie to watch
 - (D) Business, healthcare, or environmental issues
- 856.** To counter deception we must.
- (A) Inform participants prior to the beginning of the experiment
 - (B) Wait until the end of the study to inform participants
 - (C) Immediately debrief participants after each aspect
 - (D) Provide resources for the well-being of participants
- 857.** What is the function of Ethics in engineering?
- (A) Maintain personal integrity
 - (B) Maintain public respect and trust
 - (C) Avoid legal problems (criminal and civil rights)
 - (D) All three options
- 858.** ____ is provided before the study begins, in the form of a signature on a detailed form explaining the study the participant will take part in
- (A) Code of ethics
 - (B) Right to withdraw
 - (C) Debriefing
 - (D) Informed consent
- 859.** How can professional development in science enhance teachers' understanding of scientific ethics?
- (A) By providing training on ethical considerations in scientific research and education.
 - (B) By ignoring ethical issues.
 - (C) By focusing only on technical skills.
 - (D) By reducing the emphasis on ethics.
- 860.** What is the importance of learning about scientific ethics in CTE programs?
- (A) To ignore ethical considerations
 - (B) To ensure responsible and ethical scientific practices
 - (C) To focus only on unethical practices
 - (D) To avoid discussing ethics
- 861.** How can scientific journals help prevent ethical breaches?
- (A) By reducing the number of reviewers
 - (B) By limiting access to research
 - (C) By implementing stringent guidelines
 - (D) By increasing publication fees
- 862.** Ethics refers to ____
- (A) Someone who only cares about themselves.
 - (B) The set of moral principles or personal priorities that guide the person's conduct.

- (C) A belief that no matter what decisions one makes, it will not change the type of person that they are.
- (D) A and C
- 863.** ____ is to animal research as ____ is to human research.
- (A) Informed consent; deception
- (B) IACUC; IRB
- (C) IRB; IACUC
- (D) Deception; debriefing
- 864.** If you're only looking at information from a certain viewpoint, what might this be called?
- (A) Bias
- (B) Misinterpretation
- (C) Lying
- (D) Lazy research Edit
- 865.** In your research period, some participants wanted to withdraw within half the period, you didn't agree. Which rule are you breaking?
- (A) Obtaining consent form
- (B) Protect the right to withdraw
- (C) Avoiding deceptive practices
- (D) None of above
- 866.** This is an ethical concept of retaining the anonymity of the participants in the research.
- (A) Autonomy
- (B) Exploitation
- (C) Misrepresentation
- (D) Confidentiality
- 867.** The following is an evaluation of the Schachter and Singer Experiment
- (A) Small Sample-Not representative
- (B) -sample only had right handed healthy females, results cannot be generalized to anyone else, reducing the validity
- (C) The researchers injected adrenaline into the participants which represents an ethical issue
- (D) None of above
- 868.** Which is an example of respecting confidentiality?
- (A) Using participant codes instead of real names
- (B) Posting all data online
- (C) Sharing identities without permission
- (D) Publishing private details
- 869.** A study whose publication may harm a particular group should ____
- (A) Be published without changes
- (B) Be canceled entirely
- (C) Be reexamined with ethical considerations and with impact mitigation
- (D) Be handed to the sponsor
- (E) Be shortened
- 870.** Professional standards are
- (A) An employee's ability to work well with others; listening and effective speaking.
- (B) A set of practices, ethics, and behaviors that a particular profession must follow
- (C) The quality of being trustworthy and reliable
- (D) An obligation or willingness to accept responsibility or to account for one's actions
- 871.** Which of the following definition does not entail falsification-
- (A) The researcher deliberately conceals research result that do not fit the research hypothesis.
- (B) The researcher fabricates the data that does not exist.
- (C) The researcher over beautifies existing pictures in the research.
- (D) The researcher unreasonably manipulates the research data.
- 872.** When a researcher report the results in such a way that data appears more interesting it can be said to have-
- (A) Publication of Data in Research
- (B) Data reporting in Research
- (C) Selective Data reporting in Research
- (D) None of the above

873. I decided not to use that source because it didn't seem very ____
(A) Organized
(B) Credible
(C) Quantitative
(D) Relevance
874. What US agency might not have ever been formed if Rachel Carson had not written *Silent Spring*?
(A) USDEA
(B) USEPA
(C) USCDC
(D) USFDA
875. This occurs when some findings of the study are not equally represented in the research report.
(A) Confirmation bias
(B) Leading question bias
(C) Question order bias
(D) Biased reporting
876. When you do ____, you should ____ your sources so that you can show others where you got your information.
(A) Research, cite
(B) Compile, include
(C) Substantiate, inquire
(D) Summary, evaluate
877. What is the biggest conflict of using embryonic stem cells?
(A) Cell source
(B) Price and outcome
(C) Ethic
(D) Market
878. According to the Belmont Report, which principle emphasizes treating people as autonomous agents?
(A) Respect for persons
(B) Beneficence
(C) Justice
(D) Confidentiality
879. It is about directing human conduct using the standards of right and wrong that tell people what must be done based on rights, obligations, benefits to society, fairness, or specific virtues.
(A) Morals
(B) Values
(C) Ethics
(D) Manners
(E) Etiquette
880. Domonique works as an accountant for a large company. She is asked by a competitor to share financial information about her employer. Domonique does not share the information. Is she acting ethically?
(A) Yes
(B) No
881. What is the purpose of an Institutional Review Board (IRB) in communication research?
(A) To analyze data
(B) To design research studies
(C) To ensure ethical treatment of research participants
(D) To conduct a literature review
882. What ethical concern is mentioned regarding the marijuana and driving performance study?
(A) Giving doses that impair judgment
(B) Recruiting only male participants
(C) Testing only one type of drug
(D) Not compensating participants
883. What does UREC stand for?
(A) University Research Ethics Committee
(B) University Research Ethics Council
(C) Universal Research Ethics Committee
(D) Universal Research Ethics Council

- 884.** Which of the following terms is a strategy where the researcher actively engages in critical self-reflection about his or her potential biases and predispositions.
- (A) Investigator triangulation.
 - (B) Reactivity.
 - (C) Experimenter effect.
 - (D) Reflexivity.
- 885.** If a journal requires high publication fees without a clear peer-review process, ethically the journal is ____
- (A) High quality
 - (B) Suitable as a reference
 - (C) Potentially a predatory journal
 - (D) In line with international standards
 - (E) Supportive of open access
- 886.** What is a major ethical issue in e-research?
- (A) Data privacy and confidentiality
 - (B) Publishing without citations
 - (C) Avoiding hypothesis testing
 - (D) Using outdated research methods
- 887.** A student manipulates data so that the results fit the hypothesis. When analyzed ethically, the most serious impact of this action is ____
- (A) A decline in the student's academic grade
 - (B) Loss of trust in research findings and scientific integrity
 - (C) Errors in statistical techniques
 - (D) Delayed publication
 - (E) Increased workload for the advisor
- 888.** Which of the following captures the essence of informed consent?
- (A) Having members sign a contract before joining a group.
 - (B) Telling members in some detail about the nature and purpose of the group.
 - (C) Having members decide upon all the activities of the group.
 - (D) Making sure that groups will always be composed of voluntary members.
- 889.** I carry out research on chemicals. I test some chemicals on people. It burns their skin and leaves permanent scarring. Which ethical research rule have I not respected?
- (A) Informed consent
 - (B) Cause no harm
 - (C) Right to withdraw
 - (D) Confidentiality
 - (E) Deceptive practices
- 890.** Avoiding Bias involves ensuring ____ in data collection and analysis.
- (A) Neutrality
 - (B) Accuracy
 - (C) Consistency
 - (D) Transparency
- 891.** An ethical communicator gives ____ to the source of information.
- (A) Money
 - (B) Problems
 - (C) Credit
 - (D) None of above
- 892.** The most effective plagiarism prevention strategy at the program level is ____
- (A) Increasing academic sanctions
 - (B) Using plagiarism-detection software
 - (C) Academic ethics education from the start and ongoing mentoring
 - (D) Restricting journal access
 - (E) Reducing writing assignments
- 893.** Each ethical principle applies to the scientific inquiry, the conduct and behaviors of researchers, or the ethical treatment of research participants.
- (A) True
 - (B) False
 - (C) All the above
 - (D) None of the above

- 894.** It is a type of fraud where one modifies the data gathered to fit to what is needed in the hypothesis
(A) Falsification
(B) Fabrication
(C) Plagiarism
(D) Piracy
- 895.** What best describes the purpose of the IRB?
(A) To ensure that every research proposal has a clear and falsifiable hypothesis.
(B) To review operational definitions in experiments.
(C) To review proposals for research that involves human participants.
(D) To ensure that new research meaningfully adds to the scientific literature.
- 896.** Teachers avoiding plagiarism and maintaining integrity exemplifies:
(A) Professional competence
(B) Ethical behavior
(C) Curriculum planning
(D) Learning facilitation
- 897.** Who provided ethical approval for the study conducted by Aarav and Priya?
(A) The university and NHS research ethics committees
(B) The local government
(C) The participants themselves
(D) The health visitors
- 898.** When is it okay to share someone else's personal info online?
(A) When they are not looking
(B) After asking for permission
(C) Always
(D) If it's fun
- 899.** Which ethics in communication refers to understanding the need of the communicator and the receiver?
(A) Audience
(B) Mutuality
(C) Ends vs means
(D) Access to information
- 900.** In community-based educational research, the primary ethical principle to emphasize in synthesis is ____
(A) Efficiency and effectiveness
(B) Participation, justice, and respect for the local context
(C) Innovation and novelty
(D) Replication and generalization
(E) Instrument standardization
- 901.** What does "bias" mean in academic writing?
(A) Prejudice or favoritism that affects objectivity in research or writing
(B) A statistical method
(C) A type of citation
(D) The conclusion of a paper
(E) A research methodology
- 902.** Statement:1 At the same time, we should keep in mind that the data which we collect is open-sourced and not someone's property. Statement 2: Extracting private data can be an offence.
(A) Statement 1 is True
(B) Statement 2 is True
(C) Statement 1 and 2 both are True
(D) None of these statements are True
- 903.** When must informed consent be obtained from participants?
(A) Before they participate
(B) Sometime after they begin participating
(C) After the study is complete
(D) None of above
- 904.** Do you need to get permission before you use a person's name as a reference?
(A) Yes
(B) NO

- 905.** Why should business anthropologists respect intellectual property rights and ownership of cultural heritage?
- (A) To avoid seeking permission from stakeholders
 - (B) To ensure equitable benefits for research participants and collaborators
 - (C) To prioritize proprietary information over ethical considerations
 - (D) To minimize transparency in research practices
- 906.** As a researcher, we should avoid letting private beliefs and expectations influence observations or conclusions.
- (A) True
 - (B) False
 - (C) Either true or false
 - (D) None of above
- 907.** Informed and uncoerced consent are required preconditions for participation of human subjects in research.
- (A) Yes
 - (B) No
- 908.** What are participants promised so that they feel comfortable answering questions honestly?
- (A) Written consent
 - (B) Debriefing
 - (C) Confidence
 - (D) Confidentiality
- 909.** Means telling readers where the information in a news story comes from.
- (A) Citation
 - (B) Attribution
 - (C) Report
 - (D) Truthfulness
- 910.** A teacher was reported for consistently accepting gifts from students in exchange for higher grades. Which professional element is violated?
- (A) Accreditation
 - (B) Licensing
 - (C) Professional Development
 - (D) Code of Ethics
- 911.** Which of the following is the first internationally known code for research ethics?
- (A) The Nurenberg code
 - (B) The Belmont report
 - (C) The Coleman report
 - (D) The FDA report
 - (E) All of the answers are correct
- 912.** How would you classify information about the company's current projects that is not intended for the general public, can be accessed only by a specific group of employees and could affect the company's reputation in case of a leak?
- (A) Public
 - (B) Internal
 - (C) Private
 - (D) Personal
 - (E) Confidential
- 913.** What is a key requirement for the composition of an Institutional Review Board (IRB)?
- (A) Multiple members with relevant expertise
 - (B) Only one member with expertise
 - (C) Only scientists as members
 - (D) Only members from the same cultural background
- 914.** When looking at the reliability of a source, what question should you NOT ask yourself?
- (A) Is this current?
 - (B) Who is the author?
 - (C) Is this published?
 - (D) Does it look nice?
- 915.** Why is it important for researchers to be open about their biases?
- (A) To confuse the readers.
 - (B) To allow readers to assess the validity and reliability of the findings.
 - (C) To hide the true purpose of the research.
 - (D) To ensure the research is not published.

- 916.** The names of the participants in a research experiment must be kept secret is an ethical guideline known as
- (A) Debriefing
 - (B) Free from harm
 - (C) Informed Consent
 - (D) Confidentiality
- 917.** What is scientific misconduct in social research?
- (A) All of the above
 - (B) Falsifying data
 - (C) Plagiarizing the work of others
 - (D) Distorting methods of data collection
- 918.** Any risks and/or benefits of the study to the participants should not be mentioned in a consent form.
- (A) True
 - (B) False
- 919.** Which principle focuses on maximizing benefits and minimizing harms in human research?
- (A) Justice and fair treatment for participants
 - (B) Beneficence through risk-benefit balance
 - (C) Respect for persons and autonomy
 - (D) Integrity with accurate data reporting
- 920.** Cultural bias
- (A) Attempts to discover a person's talents
 - (B) Favors one group over another
 - (C) Attempts to assess an individual's characteristics
 - (D) Measures the quality of a test
- 921.** A researcher who decides to deceive participants in a study should:
- (A) Determine that the study cannot be done without deception
 - (B) Argue convincingly that the importance of the study justifies deception
 - (C) Undeceive participants as soon as possible
 - (D) All of the above
- 922.** I am conducting a research to test the effect of UV light on human skin. I test UV light on people. I don't tell them that the light irritates their skin. Which ethical research principle have I not respected?
- (A) Informed consent
 - (B) Cause no harm
 - (C) Right to withdraw
 - (D) Confidentiality
 - (E) Deceptive practices
- 923.** Paraphrasing means to do what?
- (A) Rewritten in a writer's own words, without changing the meaning of what was said
 - (B) Shortening something while using the same words
 - (C) Rewritten in a writer's own words, but changes the meaning of what was said
 - (D) Making what was said even longer, so readers really know what the person mean.
- 924.** When you are testing to find out if the website you are using has the most up to date information, you are testing for:
- (A) Purpose
 - (B) Authority
 - (C) Currency
 - (D) Relevancy
- 925.** The ____, passed in 1974 represents one of the first serious attempts to build a comprehensive system of research ethics in the U.S.
- (A) National Research Act
 - (B) Declaration of Helsinki
 - (C) Tuskegee Code
 - (D) Kefauver-Harris Amendments
- 926.** Suppose a participant in an experiment feels pressured by researchers to continue, despite wishing to withdraw after the experiment begins. Which of the following is the most likely consequence of this situation?
- (A) The participant will intentionally bias the results.

- (B) The participant will demand extra compensation.
- (C) The participant will suffer psychological distress.
- (D) Nothing. Participants are not allowed to withdraw once they commit to participate.
- 927.** Ethically, personal information must remain confidential.
- (A) True
- (B) False
- 928.** Ethical standards are essential because they:
- (A) Protect participants and ensure research integrity
- (B) Increase the number of pages in a paper
- (C) Guarantee higher grades
- (D) Eliminate the need for citations
- 929.** Which of these enhances the quality of a qualitative research?
- (A) Collecting one source of data
- (B) Using informed consent form for participants
- (C) Repeating data
- (D) Ignoring research limitations
- 930.** Which of the following refers to the standards on what is morally right or wrong?
- (A) Ethics
- (B) Informants
- (C) Respondents
- (D) Survey
- 931.** What is required for children to participate in research studies?
- (A) Parental consent and child assent
- (B) Only the child's consent
- (C) Only the parent's consent
- (D) No consent is needed
- 932.** The biggest concern about research posted on the Internet is that ____
- (A) It takes a long time to download.
- (B) There is little quality control in the form of peer review or experts.
- (C) ERIC is not available online.
- (D) None of above
- 933.** Which of the following examples would NOT be criteria for an article being reliable?
- (A) The author being an expert in the field
- (B) The article authored by a scientific organization
- (C) The author by an intelligent individual
- (D) The author sites the experimental process used and data
- 934.** Deception in psychology studies
- (A) Should never be done
- (B) Is unethical
- (C) Must be followed with a debriefing
- (D) None of above
- 935.** You collected personal stories from participants. How will you present them ethically?
- (A) Use pseudonyms and remove identifying details
- (B) Share their names publicly
- (C) Post interviews on social media
- (D) Skip consent
- 936.** Imagine you're a detective like Brinley or Brennan, and you find conflicting information during your research. What should you do?
- (A) Ignore the conflicting information
- (B) Include both pieces of information and discuss the differences
- (C) Choose the information that supports your argument
- (D) Ask your friends which one to use
- 937.** Adhere to ethical principles and guidelines
- (A) External evidence
- (B) Reliance on human cooperation
- (C) Ethical constraints
- (D) Fallibility

- 938.** Standards for responsible behavior for researchers in any field, but especially during experiments.
- (A) Intelligence
 - (B) Ethics
 - (C) Hypothesis
 - (D) Alfred Binet
 - (E) Survey
- 939.** My research focuses on the use of humanoid robots as a possible aid to support interaction with autistic children. May this raise ethical concerns?
- (A) Yes
 - (B) No
- 940.** Which of the following would be a key aspect of trustworthiness
- (A) Triangulation
 - (B) Reliability
 - (C) Credibility
 - (D) Validity
- 941.** Which of the following is not an example of deception?
- (A) To observe code of ethics.
 - (B) To create bias between respondents before the survey.
 - (C) To leak out information regarding any confidential matter.
 - (D) A part of the truth is not communicated to the respondent.
- 942.** What ethical question is raised by the idea that science sees an individual as the sum total of all prior events and actors in their life?
- (A) Who is ultimately responsible for the individual's actions?
 - (B) How much does a lawyer get paid?
 - (C) What is the cost of genetic testing?
 - (D) Who can become a judge?
- 943.** 'The research should not be carried out with blind-folded eyes'-the meaning of this phrase is
- (A) The research should be free from all personal biases.
 - (B) The research should be free from personal limitations.
 - (C) The research should be separated from personal ideology.
 - (D) All of the above.
- 944.** What must researchers obtain from participants before beginning a study?
- (A) None of the above
 - (B) Informed consent
 - (C) Payment
 - (D) Anonymity agreement
- 945.** In order to make the research unbiased, it requires that
- (A) There is no deliberate attempt to either to conceal or highlight something.
 - (B) Quantitative and qualitative methods are to be used.
 - (C) Repeatability and accuracy are provided for the quality of measurement procedures used.
 - (D) The solution to the research problem is known in advance.
- 946.** What's the best way to quote online resources without plagiarizing?
- (A) Paraphrasing every paragraph that you read
 - (B) Using only print versions of online documents
 - (C) Explaining to your teacher that you did your research on the internet
 - (D) Citing all of your online resources with proper attribution
- 947.** Ethics is the set of principles and guidelines that help us to uphold the things we value
- (A) True.
 - (B) False.
 - (C) Neither True nor False just a statement.
 - (D) None of the above.

948. Researchers should minimize harm, discomfort and suffering to the animals and maximize the benefit of the research (e.g. applying findings to help other animals or humans).
- (A) Minimizing Harm and Maximizing Benefit
 - (B) Replacement
 - (C) Species
 - (D) Numbers
949. A code of ethics does not specify rules of conduct to which members must adhere to remain in good standing within a professional organization.
- (A) True
 - (B) False.
950. Failing to protect participants' privacy violates the principle of anonymity.
- (A) True
 - (B) False
951. A process where the scientists performing the research influence the results, in order to portray a certain outcome.
- (A) Triangulation
 - (B) Hawthorne effect
 - (C) Bias
 - (D) Sampling error
952. What are the ethical implications of plagiarism in scientific research?
- (A) Plagiarism in scientific research has no ethical implications.
 - (B) Plagiarism in scientific research is a common practice.
 - (C) Ethical implications of plagiarism in scientific research are subjective.
 - (D) Plagiarism in scientific research has serious ethical implications.
953. Which of the following was established as a result of Nazi medical experiments during WWII?
- (A) The Belmont Report
 - (B) The Nuremberg Code (1947)
 - (C) The Milgram Experiment
 - (D) The Stanford Prison Study
954. How does MIT ADT address professional ethics in its curriculum?
- (A) Offering mandatory courses in research ethics
 - (B) Assigning case studies on global practices only
 - (C) Excluding ethics from technical programs
 - (D) Providing lectures on request
955. Which of these is a stipulation of the APA ethical code for conducting research?
- (A) Researchers can never use participant deception
 - (B) Research studies must be approved by the APA
 - (C) Research participants data must always be held confidential
 - (D) There are no ethical requirements for the care and use of animals in research
956. How does adherence to academic integrity affect the quality of student work?
- (A) It limits depth of reading and research
 - (B) It discourages recognition of key ideas and facts
 - (C) It ensures depth of research and analytical skills
 - (D) It prioritizes speed over accuracy in assignments
957. 'Informed consent' in Sociology forms part of
- (A) Research strategy
 - (B) Ethical considerations
 - (C) Interpreting data
 - (D) Facts and Values
958. What should researchers do when obtaining informed consent is challenging?
- (A) Avoid conducting research in such situations

- (B) Ensure participants are aware of their presence and the purpose of the research
 - (C) Focus on analyzing consumer behavior
 - (D) Conduct research without informing participants
- 959.** The reasoning behind debriefing is so participants do not leave with a ____ about being lied to.
- (A) Positive effect
 - (B) Negative effect
 - (C) Eliminate
 - (D) Reassurance
- 960.** How does the Canadian government ensure ethical standards in scientific research?
- (A) By establishing research ethics boards
 - (B) By ignoring ethical considerations
 - (C) By allowing unrestricted research
 - (D) By focusing only on economic outcomes
- 961.** The researcher should ensure that the participants will not be adversely affected by the research and its results.
- (A) Care
 - (B) Human Subjects Protection
 - (C) Respect for Colleagues
 - (D) Social Responsibility
- 962.** What is an example of unethical behavior in clinical trials mentioned in the text?
- (A) The Tuskegee syphilis study
 - (B) The Salk polio vaccine trial
 - (C) The Framingham Heart Study
 - (D) The Human Genome Project
- 963.** Which behavior reflects fabrication or falsification?
- (A) Correctly reporting methods and limitations
 - (B) Accidentally misplacing a bibliography page
 - (C) Inventing data or distorting original sources
 - (D) Editing grammar while keeping facts unchanged
- 964.** What is the main challenge of using internet resources for research?
- (A) Accessing the internet
 - (B) Evaluating the quality and reliability of information
 - (C) Finding relevant information
 - (D) Citing internet sources correctly
- 965.** 'Data protection' is found under what ethical sub-heading
- (A) Informed consent
 - (B) Right to withdraw
 - (C) Protection from harm
 - (D) Confidentiality
- 966.** Which of the following is NOT a safeguard business anthropologists should implement to minimize risks in research?
- (A) Providing support services
 - (B) Consulting with ethics committees
 - (C) Ignoring psychological harm
 - (D) Assessing physical risks
- 967.** Researchers must ensure that their studies do not cause harm to participants. This includes harm that is:
- (A) Physical only
 - (B) Psychological only
 - (C) Both physical and psychological
 - (D) Financial only
- 968.** Why is it important to address conflicts of interest in scientific research?
- (A) To improve the accuracy of research findings
 - (B) To promote collaboration among researchers
 - (C) To increase funding for scientific research
 - (D) To ensure the integrity and credibility of the research

- 969.** Why is informed consent important in educational research?
- (A) To ensure accurate data collection.
 - (B) To increase the validity of the research findings.
 - (C) To minimize potential harm to participants.
 - (D) To protect participants' rights and privacy.
- 970.** All but one is NOT the right of research participants.
- (A) Voluntary participation
 - (B) Risk of harm
 - (C) Informed consent
 - (D) Principal investigators
- 971.** What ethical principle in research refers to being open to criticism and new ideas?
- (A) Integrity
 - (B) Honesty
 - (C) Objectivity
 - (D) Openness
- 972.** What does the right to withdraw allow participants to do?
- (A) Change their answers during the study.
 - (B) Remove themselves and their data from the study at any time.
 - (C) Refuse to provide informed consent.
 - (D) Change the study's conditions.
- 973.** What ethical consideration did Jeron violated when she endorsed a product despite knowing of the negative effects it can deal to the participants?
- (A) Avoidance of Deception
 - (B) Acknowledge Sources of Information
 - (C) Writing an Informed Consent
 - (D) Maintaining Confidentiality
- 974.** Which ethical issue is most relevant to John Watson's experiment with "Little Albert"?
- (A) Failure to debrief the participant.
 - (B) Use of deception without justification.
 - (C) Causing psychological distress to the participant.
 - (D) Lack of confidentiality.
- 975.** What is fabrication in research ethics?
- (A) Manufacturing information or data
 - (B) Changing data to fit a hypothesis
 - (C) Ignoring ethical principles
 - (D) Copying another's work
- 976.** Which of the following is not ethical practice in research with humans?
- (A) Gaining informed consent
 - (B) Informing participants that they are free to withdraw at any time
 - (C) Maintaining participants' anonymity
 - (D) Requiring participants to continue until the study has been completed
- 977.** A researcher should:
- (A) Be constrained by the research of others
 - (B) Use even anonymous sources if they appear relevant
 - (C) Use only sources that appear credible
 - (D) None of above
- 978.** What is Research Misconduct?
- (A) Fabrication
 - (B) Falsification
 - (C) Plagiarism
 - (D) All of The Above
- 979.** During the course of the experiment, the human subject should be at liberty to bring the experiment to an end, if he has reached the physical or mental state, where continuation of the experiment seemed to him to be impossible.
- (A) Justice
 - (B) Responsibility
 - (C) Competence
 - (D) Dignity
- 980.** The purpose of ethical guidelines in research is to

- (A) Ensure that the participants are safe
 - (B) Enable ethical deception
 - (C) To ensure participants are paid for their time
 - (D) Ensure the study get valid results
- 981.** What is the process called when participants are told complete and truthful information about the experiment at its conclusion?
- (A) Debriefing
 - (B) Informed consent
 - (C) Inductive reasoning
 - (D) None of above
- 982.** When was the first known consent form used in research?
- (A) 1900 for the Yellow fever experiments by Walter Reed
 - (B) 1950 for the Red fever experiments by Angus Deaton
 - (C) 1999 for the Purple fever experiments by Milton Friedman
 - (D) 1790 for the Yellow fever experiments by Adam Smith
 - (E) All answers are correct
- 983.** What should candidates consider when evaluating studies?
- (A) Validity, reliability, generalisability, ethics
 - (B) Validity, reliability, sample size, cost
 - (C) Validity, ethics, time, location
 - (D) Reliability, generalisability, sample size, location
- 984.** Which of the three ethics approaches says research ethics should be a matter of the individual's conscience?
- (A) Ontological skepticism.
 - (B) Ethical skepticism.
 - (C) Deontological approach.
 - (D) Utilitarianism.
- 985.** This federal agency has the major responsibility for establishing the guidelines for research involving human subjects.
- (A) Environmental Protection Agency
 - (B) Food and Drug Administration
 - (C) Department of Education
 - (D) Health and Human Services
- 986.** Professor Garcia would like to study parental spanking and aggressive behavior in children. Which of the following research methods would NOT be feasible due to ethical problems associated with trying to manipulate the spanking variable?
- (A) Naturalistic observation
 - (B) Case study
 - (C) Experimental method
 - (D) Correlational study
- 987.** What are you doing if you are making the mistake of over-reliance when writing a research paper?
- (A) You are relying too heavily on only one source for your researched information.
 - (B) You are using technology too much.
 - (C) You are using the same words over and over again.
 - (D) You have not written enough about your topic.
- 988.** These are sets of guidelines observed by the researcher to ensure that data will not be falsified nor fabricated and that the respondents will not be harmed in any way.
- (A) Data Analysis
 - (B) Data Collection
 - (C) Research Ethics
 - (D) None of above
- 989.** In an action research, there's no need to cite literature that validates the strategy to be used.
- (A) True
 - (B) False
- 990.** Which value is NOT specifically mentioned as a consideration in data ethics?
- (A) Privacy
 - (B) Fairness

- (C) Transparency
(D) Profitability
- 991.** Ethical Promise (everyday promise)
(A) Components of Competency
(B) Informed Consent
(C) Confidentiality
(D) Privilege
(E) Privileged information.
- 992.** Academic integrity in simulation and peer learning ensures:
(A) Valid assessment and authentic demonstration of skills
(B) Copying of peer outputs
(C) Performance faking
(D) Instructor favoritism
- 993.** What should the researcher do if they have achieved a low response rate?
(A) Copy responses and paste them again.
(B) Abandon the research project entirely.
(C) Recognize and accept the possible limitations of a low response rate.
(D) Fill in some more questionnaires themselves.
- 994.** True or False: you MUST evaluate EVERY source credibility and relevance before assuming that it's useful for your research.
(A) True
(B) False
- 995.** Need humans to cooperate and participate
(A) External evidence
(B) Reliance on human cooperation
(C) Ethical constraints
(D) Fallibility
- 996.** Ethical publishing requires:
(A) Data fabrication
(B) Plagiarism
(C) Originality and honesty
(D) Duplicate submission
- 997.** Choose the correct goal of ethnographers:
(A) Study people and places with a respect toward causing them no harm, preserving their dignity, and ensuring privacy
(B) Potential Ethical Issues in Ethnographic Research
(C) When doing fieldwork
(D) Study people and places with a respect toward causing them harm, no preserving their dignity, and no ensuring privacy
- 998.** True or False: It is ok to use opinions as evidence in your argument.
(A) True
(B) False
- 999.** Conflict of interests can arise due to which of the following?
(A) Espionage
(B) Financial investments, bribes
(C) Confidentiality
(D) Whistle blowing
- 1000.** The purpose of ethical guidelines are
(A) To ensure participants are safe
(B) To ensure participants are paid for their time
(C) To ensure the study gets valid responses
(D) To ensure researchers do what they like
- 1001.** What should be avoided in data analysis according to research ethics?
(A) Bias
(B) Transparency
(C) Collaboration
(D) Criticism
- 1002.** Which risk is explicitly managed using sustainability accounting metrics?
(A) Currency depreciation risk in exports
(B) Climate change and resource shortages
(C) Patent expiration timelines
(D) Interest rate fluctuations on debt

- 1003.** A synthesis between publication demands and scientific ethics can be achieved by —
(A) Increasing the number of articles
(B) Choosing reputable journals
(C) Prioritizing quality, honesty, and scientific contribution
(D) Following research trends
(E) Using third-party services
- 1004.** Researchers must ensure that all participant data and personal information is not revealed, even after the experiment has finished and the results are reported. What is the name of this ethical consideration?
(A) Deception
(B) Confidentiality/anonymity
(C) Protection from harm
(D) None of these answers are correct
- 1005.** What does citing sources in research indicate?
(A) The researcher's ability to write lengthy papers.
(B) The researcher's proficiency in using citations.
(C) The researcher's ability to memorize information.
(D) Giving credit to the original authors and avoiding plagiarism.
- 1006.** What are some common ethical considerations in academic publishing?
(A) Avoiding plagiarism and ensuring proper attribution
(B) Maintaining data integrity and transparency
(C) Disclosing conflicts of interest
(D) All of the above
- 1007.** This is a way of showing the appreciation by the researcher. The beginning portion of the work that identifies individuals who have contributed something for the completion of the study.
(A) Acknowledgement
(B) Citation
(C) Bibliography
(D) References
- 1008.** What is the best way to substantiate your arguments?
(A) Present relevant examples or case studies
(B) Include statistical data or surveys
(C) Refer to credible sources or research studies
(D) Adhere to the steps outlined in the explanation.
- 1009.** Which is not a component of ethical behaviour
(A) Respect
(B) Integrity
(C) Bias
(D) Hypothesis
- 1010.** To maintain validity and honesty of responses when administering your survey online, you should:
(A) Ensure anonymity and confidentiality of respondents.
(B) Collect personal information for follow-up.
(C) Share responses publicly to increase transparency.
(D) Encourage respondents to discuss answers with others.
- 1011.** What is the primary function of an ethics review board?
(A) To recruit participants
(B) To ensure ethical standards are met
(C) To publish research findings
(D) To approve the research hypothesis
- 1012.** A writer's claim in his or her text
(A) Must be supported with evidence
(B) Can be an opinion
(C) Must not be cited
(D) Only appears in an essay

- 1013.** Which of the following is a key element of informed consent?
- (A) Participants must be paid
 - (B) Participants must be deceived
 - (C) Participants must be told they can withdraw at any time
 - (D) Participants must be psychology students
- 1014.** What is the first thing that you can do if you want to know a RELIABLE SOURCE?
- (A) Download the information from the internet and share it to your friends.
 - (B) Look for the name of the author or the website and search it in the internet or ask a teacher or a trusted adult.
- 1015.** According to the slide 'Ethical Use of AI,' what should you do to tackle misinformation?
- (A) Trust the AI's output
 - (B) Always verify information
 - (C) Only use AI for non-critical tasks
 - (D) Generate references using AI
- 1016.** Study participants should always be told of their right to
- (A) Withdraw from participation in the study.
 - (B) Report suspicious research practices to the institutional review board.
 - (C) Compare the data they provide with other data collected in the study.
 - (D) Footnote their dissatisfaction with the study in the final research report.
- 1017.** A research ethics principles that allows research investigations must be free from any forms of bias.
- (A) Honesty
 - (B) Objectivity
 - (C) Carefulness
 - (D) Integrity
- 1018.** There are three basic approaches that people tend to adopt when considering ethical issues in research. Which one of the following is not one of the approaches?
- (A) Ethical skepticism.
 - (B) Utilitarianism.
 - (C) Ontology.
 - (D) Deontology.
- 1019.** All of the following are unethical issues, EXCEPT;
- (A) Seeking permission for entry.
 - (B) Misrepresenting results.
 - (C) Avoiding legal liability.
 - (D) Invoicing irregularities.
- 1020.** What is the difference between privacy and confidentiality in research participants' ethics?
- (A) Privacy means participants remain anonymous, while confidentiality means the freedom to do things without others watching
 - (B) None of the above
 - (C) Privacy is the freedom to do things without others watching, while confidentiality means information with participant names attached but kept secret
 - (D) Both are the same
- 1021.** Procedure: Asch put a naive participant in a room with seven confederates. Each person in the room had to state aloud which comparison line (A, B or C) was most like the target line. Which ethical guidelines were breached in this study?
- (A) Informed consent
 - (B) Deception
 - (C) Protection from psychological harm
 - (D) Protection from physiological harm
- 1022.** Informed consent means clearly explaining all of the following EXCEPT
- (A) Explaining the hypothesis to the participants.
 - (B) Letting participants know that participation is voluntary.
 - (C) Ensuring that data is confidential.
 - (D) What compensation the participant will receive and what tasks they will perform.

- 1023.** Which of the following is a method to ensure data privacy?
- (A) Public release of participant information
 - (B) Keeping data secure and confidential
 - (C) Ignoring participant requests
 - (D) Collecting excessive data
- 1024.** When researchers meet with participants at a study's conclusion to reveal information and ensure their well-being.
- (A) Confidentiality
 - (B) Informed Consent
 - (C) Debriefing
 - (D) Revelation
- 1025.** Establishes moral integrity of the researches which is crucial as it ensures that the research findings are valid and trustworthy.
- (A) Research Ethics
 - (B) Research Conduct
 - (C) Research Norms
 - (D) Research Morality
- 1026.** Respect for intellectual property requires researchers to acknowledge the contributions of others.
- (A) True
 - (B) False
- 1027.** Which of the following is an example of maintaining professional standards in scientific reporting?
- (A) Reporting only positive results
 - (B) Ensuring clarity and reproducibility
 - (C) Withholding data
 - (D) Ignoring peer review
- 1028.** True or False. Consent is not required for public observations where there is reasonable expectation of privacy.
- (A) True
 - (B) False
- 1029.** You should always ask for permission before recording a web conference.
- (A) TRUE
 - (B) FALSE
- 1030.** ____ is to shut out or ignore opinions and beliefs that are different from their own.
- (A) Placating
 - (B) Prejudice
 - (C) Closed mind
 - (D) None of above
- 1031.** Which of the following is not a form of research misconduct?
- (A) Literature with proper attribution
 - (B) Falsification
 - (C) Fabrication
 - (D) Manipulation of Data
- 1032.** Regardless of the method of communication, the information shared must be genuine and truthful, according to which principle?
- (A) No Assumptions
 - (B) Value Difference
 - (C) Authenticity
 - (D) Trustworthiness
- 1033.** Informed consent is not required when collecting data for a thesis if the information is anonymized
- (A) TRUE
 - (B) FALSE
- 1034.** What is the ethical consideration when a researcher asks first-graders sensitive questions?
- (A) It is allowed if the children are comfortable
 - (B) It is not necessary to inform parents
 - (C) It requires parental consent
 - (D) It must be covert to protect privacy
- 1035.** If a researcher does not disclose the source of research funding, ethically this is problematic because ____

- (A) It reduces the value of the publication
 - (B) It makes the review process harder
 - (C) It can hide conflicts of interest
 - (D) It violates the journal's style
 - (E) It hinders dissemination of findings
- 1036.** What is the meaning of objectivity in the politics of research?
- (A) Falsifying data
 - (B) Coercing participants
 - (C) Having personal gain
 - (D) Being unbiased
- 1037.** Being truthful in your words and actions
- (A) Compliance
 - (B) Honesty
 - (C) Ethics
 - (D) Impropriety
- 1038.** Why is acknowledgement of others' contributions emphasized in academic integrity?
- (A) It upholds integrity and respects intellectual property
 - (B) It replaces the need for accurate citation formats
 - (C) It allows unrestricted use of published ideas
 - (D) It primarily improves assignment length
- 1039.** What is a Vertebrate Animal Form (5A)?
- (A) A Vertebrate Animal Form (5A) is a form required for research involving vertebrate animals to ensure ethical treatment and compliance with regulations.
 - (B) A Vertebrate Animal Form (5A) is a permit for importing exotic plants.
 - (C) A Vertebrate Animal Form (5A) is a document for registering marine vehicles.
 - (D) A Vertebrate Animal Form (5A) is a license for conducting human clinical trials.
- 1040.** What does the APA ethical principles say about the use of deception in research
- (A) Deception may never be used
 - (B) As long as no participants are harmed, deception can be used whenever the researcher wishes
 - (C) Participants must be full informed about any deception before the research begins
 - (D) Deception should be used only if no better alternative is available
- 1041.** Which report established the ethical framework for research that is still used today?
- (A) The Nuremberg Code
 - (B) The Belmont Report (1979)
 - (C) The Milgram Report
 - (D) The Stanford Report
- 1042.** Principle of beneficence means
- (A) No benefits
 - (B) Benefit to researcher
 - (C) Benefit to organisation
 - (D) Benefits to participants
- 1043.** In IT refers to data and information privacy. In general, data include texts, numbers, sounds, images and video. This is described as the rights of individuals and companies to deny or restrict the collection and use of information about them.
- (A) Computer Ethics
 - (B) Intellectual Property
 - (C) Privacy
 - (D) Cyber Law
- 1044.** The key to fair use of any material relies on the extent to which you have ___ the original work for your purposes.
- (A) "reproduced"
 - (B) "copied"
 - (C) "manufactured"
 - (D) "transformed"
- 1045.** Why should a researcher not accept a claim just because it was published?
- (A) Published works are always based on the latest data
 - (B) Published works are always reliable

- (C) The researcher has the responsibility to evaluate the validity of claims
(D) All published works are definitive
- 1046.** What do we mean by ethics?
(A) Moral judgements
(B) Determinants of what is right or wrong
(C) Rules or standards governing a profession
(D) Elements of all the above
- 1047.** Avoiding bias in research at all times.
(A) Objectivity
(B) Honesty
(C) Confidentiality
(D) None of above
- 1048.** What is a key ethical issue in surveys related to privacy?
(A) Informed consent
(B) Data accuracy
(C) Survey length
(D) Question clarity
- 1049.** How can researchers manage and disclose conflicts of interest in educational research?
(A) By relying on self-reporting without any verification process
(B) By implementing transparent and rigorous disclosure policies
(C) By keeping conflicts of interest hidden from the public
(D) By ignoring conflicts of interest and focusing solely on the research findings
- 1050.** Informed consent to participate in a psychological study means that the
(A) Institution in which the study will be conducted has approved the study.
(B) Researcher carefully selects and approves each participant for the study.
(C) The consent cannot be omitted even for completely anonymous surveys.
(D) Participant knows his or her role in the study and understands its risks and benefits.
- 1051.** Rewording the ideas of an author or source is a ____
(A) Citation
(B) Paraphrase
(C) Plagiarization
(D) Quote
- 1052.** Which of the following is not a special feature of Research Ethics-
(A) Keeping data secure
(B) Making procedures transparent
(C) Remaining unaware of guidelines of the Research
(D) Consulting code of conduct of the Research
- 1053.** What is the significance of transparency in sponsorship in ethical social research?
(A) To coerce participants into giving consent
(B) To mandate protections for research participants
(C) To ensure no personal gain for the researcher
(D) To anticipate repercussions
- 1054.** What is bias?
(A) A predisposition to a certain point of view despite what the facts suggest
(B) Believing the facts, despite one's opinion
(C) Listening to opinions of politicians
(D) Believing in childhood myths
- 1055.** A code adopted by a profession to help them understand what behaviors are considered ethical, moral, correct, or right in the circumstances of that profession.
(A) Professional code of ethical conduct
(B) Personal code of ethical conduct
(C) Personal preferences
(D) Professional preferences
- 1056.** A 'consent' form is ____
(A) A special concert ticket.
(B) An official permission.
(C) Researcher's guidelines.
(D) None of above

- 1057.** Which is not an ethical issue in Psychology
(A) Informed consent
(B) Deception
(C) Confidentiality
(D) Fit for purpose
- 1058.** What major ethical violation involved not telling participants they had syphilis?
(A) Lack of Informed Consent
(B) Denial of Treatment
(C) Deception & Coercion
(D) Racial Exploitation
- 1059.** Which ethical principle ensures that participants have full knowledge of the study's purpose and procedures before consenting?
(A) Informed consent
(B) Assent consent
(C) Stratified sampling
(D) Population
- 1060.** How do psychologists deal with issues relating to protection from psychological harm?
(A) They can be offered counselling
(B) They are reminded how brave they are
(C) They can be offered a cup of tea during the experiment
(D) They are reminded of their right to withdraw
- 1061.** Why are special protections required for vulnerable populations in research?
(A) They are more likely to benefit from research
(B) They require additional justification and safeguards due to increased risk
(C) They are easier to recruit
(D) They have more research experience
- 1062.** If researchers do not reveal the true aims of a study to the participants or that actively lie to them, this is known as
(A) Lying
(B) Deception
(C) Psychological harm
(D) None of these answers are correct
- 1063.** Ethical approval is optional for all types of research.
(A) TRUE
(B) FALSE
(C) All the above
(D) None of the above
- 1064.** In Britain, ethical guidelines for research are published by the ____
(A) Scottish Government
(B) SQA
(C) British Psychological Society
(D) American Psychological Association
- 1065.** An educational psychology student who conducts dissertation research using human participants must obtain formal approval that the research meets ethical guidelines from
(A) The dissertation committee.
(B) An institutional, college, or department review board.
(C) The Department of Health and Human Services.
(D) The American Psychological Association Committee on Scientific and Professional Ethics.
- 1066.** Ethical communication is
(A) Is the same thing as legal communication
(B) Costs more because there are so many rules to consider
(C) Is important only for companies that sell to consumers rather than to other businesses
(D) Includes all relevant information, is true in every sense, and is not deceptive in any way
- 1067.** What is "debriefing"?
(A) Explaining the true purpose of the study after participation
(B) Selecting participants
(C) Analyzing data
(D) Writing a hypothesis

- 1068.** Why is ethical research important?
- (A) Promotes trust that data will be respected and kept confidential
 - (B) It improves the research findings
 - (C) Makes analysis and synthesis of findings more successful
 - (D) Helps in the development of new theories
- 1069.** In school-based action research, a principal acts as both researcher and evaluator. The main ethical dilemma in this situation is ____
- (A) Time limitations for research
 - (B) Potential conflicts of interest and assessment bias
 - (C) Difficulty in developing instruments
 - (D) Mismatch of research design
 - (E) Lack of teacher support
- 1070.** Ethics is about doing the ____ thing.
- (A) Profit
 - (B) Right
 - (C) Good
 - (D) Newcastle Utd
- 1071.** Independent review of the scientific merit and implications of a study regarding the dignity, rights, safety, and wellbeing of research participants
- (A) Ethical approval
 - (B) Research design
 - (C) Research motivation
 - (D) Empirical data
- 1072.** Research participants do NOT need to be aware of and agree to how the data collection procedures will be carried out and how the information generated will be used, stored and reported.
- (A) True
 - (B) False
- 1073.** To uphold academic integrity, what should students do when using AI-generated content?
- (A) Submit AI work under their own name
 - (B) Paraphrase lightly without attribution
 - (C) Hide the use of AI to seem original
 - (D) Acknowledge and properly cite the content
- 1074.** The use of animals in scientific tests raises difficult ____ questions.
- (A) Aptitude
 - (B) Alleviate
 - (C) Carefree
 - (D) Ethical
- 1075.** What is an ethical issue related to stem cell research?
- (A) The high cost of stem cell treatments
 - (B) The use of embryonic stem cells raises moral concerns
 - (C) Stem cells are difficult to obtain
 - (D) Stem cells are only used in veterinary medicine
- 1076.** Why is it important for researchers to address and minimize any potential conflicts of interest?
- (A) To maximize financial gains from the research findings
 - (B) To maintain the credibility and integrity of the research process and results
 - (C) To promote competition among researchers
 - (D) None of above
- 1077.** In the context of research ethics, the primary function of informed consent is to ____
- (A) Meet administrative requirements
 - (B) Ensure the confidentiality of data
 - (C) Ensure voluntary participation and understanding by research subjects
 - (D) Speed up data collection
 - (E) Avoid researcher bias
- 1078.** Retraction of a paper happens due to:
- (A) High quality
 - (B) Strong methodology
 - (C) Serious ethical violations or errors
 - (D) Abstract formatting

- 1079.** A scientist seeks data and information to validate observations and explanations with fairness.
- (A) Curiosity.
 - (B) Creativity.
 - (C) Objectivity.
 - (D) Honesty.
- 1080.** Which of the following is not considered a significant enough contribution to be an author on a paper as defined by the APA (Graf et al., 2007)?
- (A) Suggesting an implication of the results
 - (B) Coming up with the research question that motivated the study
 - (C) Writing up the methods and results sections
 - (D) Collecting all the data reported in the paper
- 1081.** Which ethical principle applies to the scientific inquiry by asking whether the research benefits society?
- (A) Integrity
 - (B) Nonexploitation
 - (C) Duty to Society
 - (D) Conflict of interest
- 1082.** The ethics of research, not merely the results, ___ what the review board focuses on. (CO 1; BL 1, 2)
- (A) Are
 - (B) Were
 - (C) Is
 - (D) Have
- 1083.** Two questions you can ask about the reliability of an internet source are:
- (A) Who is the author?
 - (B) Does the website have a URL?
 - (C) What are the author's credentials?
 - (D) Can the website be cited?
- 1084.** The practice of salami publication is considered unethical because ___
- (A) It reduces the number of citations
 - (B) It splits one set of findings into several publications without proper justification
 - (C) It lowers the language quality of the article
 - (D) It makes reading difficult
 - (E) It violates the IMRaD structure
- 1085.** The principle that researchers should do no harm to research subjects is known as:
- (A) Natural justice
 - (B) Common sense
 - (C) Morgan's Canon
 - (D) Beneficence
- 1086.** In the context of science, what is a key aspect of ethical research?
- (A) Maximizing financial profit
 - (B) Ensuring informed consent
 - (C) Increasing publication frequency
 - (D) Reducing research costs
- 1087.** IRB is an acronym for which of the following?
- (A) Internal Review Board
 - (B) Institutional Review Board
 - (C) Institutional Rating Board
 - (D) Internal Request Board
- 1088.** What does fabrication mean in the context of research?
- (A) Analyzing data to draw conclusions.
 - (B) Collecting data from reliable sources.
 - (C) Fabrication in research means making up data or results and reporting them as real.
 - (D) Creating a hypothesis based on existing data.
- 1089.** Researchers must ensure ethical standards in animal research by:
- (A) Obtaining proper approvals from ethics committees
 - (B) Ignoring the welfare of animals
 - (C) Conducting research without any oversight
 - (D) Using animals without any justification

- 1090.** RDM supports ethical and legal compliance by:
- (A) Respecting data ownership and privacy.
 - (B) Ensuring data accuracy and completeness.
 - (C) Providing secure storage solutions.
 - (D) None of above
- 1091.** Ethics are
- (A) Moral principles that governs a person's behavior or the conducting of an activity; respecting what is right and wrong
 - (B) The quality of being trustworthy and reliable
 - (C) Anyone who earns a living performing an activity that requires a certain level of education, skill, or training. Being professional also means following codes of conduct and ethical standards.
 - (D) Smelling good
- 1092.** Any communication related to research activities that has been classified as confidential, referring to ethics?
- (A) Honesty
 - (B) Integrity
 - (C) Be careful
 - (D) Confidentiality
- 1093.** A researcher is acting department chair. She is a member of a national committee which decides about funding. A member of her department submits a proposal. Can she participate in discussions that involve the proposal?
- (A) Yes
 - (B) No
- 1094.** An ethical principle which means reporting findings honestly. Do not falsify or fabricate results.
- (A) Carelessness
 - (B) Empirical
 - (C) Honesty
 - (D) Integrity
- 1095.** The word "Ethics" comes from
- (A) Ethos
 - (B) Eternity
 - (C) Elementary
 - (D) Essentiality
- 1096.** Concerning "authorship" in educational research, intellectual ownership is predominantly a function of
- (A) Professional position.
 - (B) Effort expended.
 - (C) Level of higher education.
 - (D) Creative contribution.
- 1097.** It is important to understand the implications of applying psychological concepts or theories inappropriately or discriminatorily because:
- (A) It can lead to harm, bias, and unethical outcomes.
 - (B) It always guarantees better results.
 - (C) It ensures everyone is treated the same regardless of context.
 - (D) It has no real impact on individuals or groups.
- 1098.** No experiment should be conducted, where there is an a priori reason to believe that death or disabling injury will occur; except, perhaps, in those experiments where the experimental physicians also serve as subjects.
- (A) Autonomy
 - (B) Beneficence
 - (C) Non-maleficence
 - (D) Integrity
- 1099.** Give one example of an ethical issue social researchers need to consider when conducting social research.
- (A) Take regular tea breaks
 - (B) Being able to get a large sample size
 - (C) Gain informed consent
 - (D) Make sure the study is reliable

- 1100.** What is the purpose of informed consent?
- (A) To make sure that participants know exactly what to expect from the research and to communicate their right to withdraw at any stage
 - (B) To ensure that participants have limited knowledge about the time commitment involved in their participation
- 1101.** How might technology exacerbate or mitigate unequal access, and divides in our access, to knowledge?
- (A) Scope
 - (B) Perspectives
 - (C) Methods and Tools
 - (D) Ethics
- 1102.** Basic ethical principles include respecting a persons ability to make their own choice s and decisions.
- (A) True
 - (B) False
- 1103.** When sociologists carry out research they must take into account ____: problems that relate to the morality of your research or research method. ____ It includes the issue of whether the research could cause any discomfort or harm, or indeed whether it includes any illegal activity.
- (A) Financial issues
 - (B) Legal issues
 - (C) Ethical issues
 - (D) Religious issues
- 1104.** Future Prospects and Challenges of Topic Modeling:Developing techniques to address ethical considerations and fairness in text analysis is an important avenue of research.
- (A) Cross-modal and multimodal analysis
 - (B) Ethical and fair topic modeling
 - (C) Advanced interpretability
 - (D) Real-time and streaming data
 - (E) Personalized topic modeling
- 1105.** What is the primary purpose of using peer-reviewed articles in research?
- (A) To limit the credibility of the research
 - (B) To provide personal opinions on the topic
 - (C) To contribute to the credibility of the research and provide reliable information
 - (D) To avoid using credible sources
- 1106.** It refers to refusing to share important information or relevant data with coworkers is an unethical act especially if it would jeopardize the success of an ongoing project.
- (A) Suppression of Information
 - (B) Selective Misquoting
 - (C) Withholding Information
 - (D) Subjective Wording
- 1107.** Nick finds a source that contradicts other information he has read. What is the best course of action?
- (A) Disregard the source immediately.
 - (B) Investigate further to understand why there is a contradiction.
 - (C) Assume the other information is wrong.
 - (D) Use the source because it is different.
- 1108.** The ethical guideline that requires the names of research participants to be kept secret is known as
- (A) Debriefing
 - (B) Protection from harm
 - (C) Informed Consent
 - (D) Confidentiality
- 1109.** How can educators help promote academic honesty?
- (A) By emphasizing pressure to succeed.
 - (B) By providing clear guidelines and fostering integrity.
 - (C) By encouraging plagiarism.
 - (D) By avoiding discussions about ethics.
- 1110.** Moral principles that guide people's actions are called ____
- (A) Compass

- (B) Ethics
 - (C) Instincts
 - (D) None of above
- 1111.** Which ethical practice is essential for research with human participants?
- (A) IRB approval and informed consent procedures
 - (B) Skipping risk minimization for feasibility
 - (C) Only anonymizing data after publication
 - (D) Allowing investigators to self-certify ethics
- 1112.** What treatment was withheld from participants even after it became standard in the 1940s?
- (A) Penicillin
 - (B) Aspirin
 - (C) Insulin
 - (D) Morphine
- 1113.** Which of the following is not an ethical consideration of Psychological research?
- (A) Informed Consent
 - (B) Voluntary participation
 - (C) Confidentiality
 - (D) Suppression
- 1114.** The purpose of Informed Consent in ethical considerations of action research is to:
- (A) Ensure participants are fully aware of the research and its potential impacts
 - (B) Allow researchers to conduct studies without any restrictions
 - (C) Enable participants to withdraw from the study at any time
 - (D) Provide financial compensation to participants
- 1115.** Universities that use animals in research must have a committee that evaluates the proposed studies. That committee is called the ____ (Research Methods and Statistics Part II)
- (A) The Humane Society
 - (B) Animal Care and Use Committee (ACUC)
 - (C) Human and Animal Care Unit
 - (D) Psychological Ethics Review Board
- 1116.** I carry out research on chemical weapons. I test some chemicals on people who are in prison. Some want to withdraw from the experiments but I don't let them. They're prisoners so I can do what I want to them. Which ethical research rule have I not respected?
- (A) Informed consent
 - (B) Cause no harm
 - (C) Right to withdraw
 - (D) Confidentiality
 - (E) Deceptive practices
- 1117.** Which type of research requires extra caution to maintain anonymity and confidentiality?
- (A) Internet-based research
 - (B) Field experiments
 - (C) Historical research
 - (D) Observational studies
- 1118.** When is it best to remind participants of their 'right to withdraw'?
- (A) Before the study has started
 - (B) After the study is complete
 - (C) During the study
 - (D) Before, during and after the study has taken place
- 1119.** The principle of informed consent is:
- (A) Of little use in business research.
 - (B) Essential to the relationship between the researcher and the research project.
 - (C) A key ethical concern.
 - (D) A key data gathering method.
- 1120.** Which ethical concern may field experiments encounter?
- (A) Participants are always fully aware of the interventions.
 - (B) Interventions do not impact participants in any way.

- (C) Interventions may impact participants without their consent.
- (D) Ethical dilemmas are less likely in field experiments.
- 1121.** What should scientists prioritize when conducting experiments involving human subjects?
- (A) The cost-effectiveness of the study
- (B) The speed of the research
- (C) The welfare of the subjects
- (D) The interests of science
- 1122.** Mr. Rico carefully studies the materials he acquired from the internet. He always examines if the author is qualified to present the material. This practice is?
- (A) Necessary to ensure that the materials are reliable.
- (B) Unethical because he does not trust the author.
- (C) Unnecessary because all resources from the internet are dependable.
- (D) Just a waste of time.
- 1123.** Match the term: Veracity
- (A) The truthfulness or accuracy of statements or information
- (B) The ability to understand and manage one's own emotions, as well as those of others
- (C) The skills and knowledge needed to perform a specific job or task
- (D) Capable of producing the desired results without causing financial strain
- 1124.** Providing participants w/ an explanation of the study's purpose after they have participated
- (A) Cost-benefit analysis
- (B) Informed consent
- (C) Debriefing
- (D) Institutional review boards
- 1125.** What should business anthropologists consider when assessing the long-term impact of their research and interventions?
- (A) The financial profitability of the business
- (B) The long-term ethical implications and social impacts on stakeholders
- (C) The technological advancements in the industry
- (D) The competitive advantage of the organization
- 1126.** What is the best way to ensure the credibility of a source?
- (A) Check the author's credentials
- (B) Use sources from the internet
- (C) Rely on popular opinion
- (D) Use only recent publications
- 1127.** Law trying to prevent brownfields
- (A) PCB
- (B) RCRA
- (C) CDR
- (D) DDT
- 1128.** Cross-referencing with other sources is a good way to determine a site's accuracy.
- (A) True
- (B) False
- (C) All the above
- (D) None of the above
- 1129.** Why should scientists aspire to excel, not just meet the minimum standards?
- (A) To gain personal fame
- (B) To ensure the highest quality and integrity in research
- (C) To reduce workload
- (D) To avoid collaboration
- 1130.** What is a potential consequence of the power imbalance between pupils and researchers?
- (A) Increased creativity in responses
- (B) Compliance or social desirability bias
- (C) Improved academic performance
- (D) Enhanced communication skills

- 1131.** What is the primary reason researchers should anonymize data and avoid disclosing personally identifiable information?
- (A) To enhance the accuracy of research findings
 - (B) To protect the privacy and confidentiality of individuals and organizations
 - (C) To ensure cultural sensitivity in research
 - (D) To minimize potential risks associated with research
- 1132.** Which of the following are essential for research to be considered ethical?
- (A) Voluntary informed consent
 - (B) Subjects should be permitted to withdraw at any time
 - (C) Unnecessary mental and physical suffering should be prevented
 - (D) A study should be conducted by scientifically qualified professionals
 - (E) All of the answers are correct
- 1133.** In research, what is a 'gatekeeper'?
- (A) A nursery manager
 - (B) A parent
 - (C) The person who opens the gate to a nursery each morning
 - (D) Anyone whose permission must be sought before undertaking research
- 1134.** When you find sources agreeing on a major claim, you should check whether they also agree on interpretations and how they support that claim.
- (A) True
 - (B) False
- 1135.** In Psychological research, Ethics are about ensuring
- (A) The protection of all participants
 - (B) All ethnic groups are considered
 - (C) Experiments are well planned
 - (D) The results are clear
- 1136.** Ensuring research methods are ethical, respecting privacy, and confidentiality, and avoiding bias in data collection and analysis.
- (A) Ethical Considerations:
 - (B) Data Analysis:
- 1137.** If you find information, you need to ____
- (A) Check if it is true
 - (B) Pay for it
 - (C) Believe it and celebrate Edit
 - (D) None of above
- 1138.** Which of the following best relates to ethical issues when researching with babies?
- (A) Asking for adults' permission to research because babies are incapable of showing a degree of consent
 - (B) Getting babies to make a hand print to stand for a signature on a consent form
 - (C) Seeing consent and withdrawal of consent as an ongoing issue and responding to the cues of the baby
 - (D) Babies don't remember so if they are upset you don't need to worry about it
- 1139.** Which of the following is an ethical consideration in research?
- (A) Maximising sample size
 - (B) Ensuring participant confidentiality
 - (C) Using complex statistical methods
 - (D) Publishing all results
- 1140.** A researcher is a member of a program committee which decides acceptance of papers submitted to a conference and one of her PhD student submits a paper. Can the researcher be present in the discussion about acceptance of the paper?
- (A) Yes
 - (B) No
- 1141.** Research participants must give what before they can participate in a study?
- (A) Guidelines.
 - (B) Private information.

- (C) A commitment.
- (D) Informed consent.

1142. Why is it important for a researcher to be aware of their own biases when selecting and evaluating a research problem?

- (A) Biases are essential for conducting objective research.
- (B) Biases can influence the research process and potentially distort the findings.
- (C) Researchers should only investigate top-

ics that align with their biases.

- (D) Biases have no impact on the research process.

1143. Prejudice in favor of or against one thing, person, or group compared with another, usually in a way considered to be unfair.

- (A) Objectivity
- (B) Transcript
- (C) Ethics
- (D) Bias

1.7.2 Publication Ethics

1. Which of the following is NOT a common strategy for increasing the chances of getting a manuscript published in a reputable journal?

- (A) Conducting a thorough literature review
- (B) Tailoring the manuscript to the journal's scope and audience
- (C) Ensuring the manuscript is well-written and free of errors
- (D) Submitting the manuscript to multiple journals simultaneously

2. What is the purpose of a blind review?

- (A) To ensure fair and unbiased evaluation of research
- (B) To protect the anonymity of reviewers
- (C) To prevent plagiarism
- (D) To speed up the publication process

3. What is the importance of engaging with the peer review process?

- (A) To improve the quality and rigor of the research
- (B) To gain valuable feedback from experts in the field
- (C) To increase the chances of publication
- (D) All of the above

4. Peer Review is defined as:

- (A) A process where experts evaluate the quality of work of their peers
- (B) A method of self-assessment

(C) A type of group discussion

- (D) A way to publish articles without evaluation

5. Publish in order to advance research and scholarships, not to advance careers.

- (A) Responsible publication
- (B) Responsible mentoring
- (C) Competence
- (D) None of above

6. Define: Retracted Paper

- (A) A paper that has been withdrawn from publication due to errors or ethical issues.
- (B) A paper that has been published recently.

(C) A paper that is highly cited.

- (D) A paper that is under review.

7. Why should you not automatically trust everything in a peer-reviewed article?

- (A) Peer review ensures all information is accurate
- (B) All peer-reviewed articles are error-free
- (C) An article only reflects the author's knowledge at the time of submission
- (D) Research is always up-to-date and accurate

8. Peer review is an important process in research to ensure quality and validity.

- (A) TRUE

- (B) FALSE
(C) All the above
(D) None of the above
9. What is the role of peer review in scientific literature?
(A) Peer review ensures the quality and credibility of scientific literature.
(B) Peer review guarantees that all research findings are correct.
(C) Peer review is a method for publishing articles without evaluation.
(D) Peer review is only necessary for medical research papers.
10. During peer review, it is usually the case that the peer doing the reviewing remains:
(A) Anomalous
(B) Anonymous
(C) Analogous
(D) Ubiquitous Edit
11. Which term refers to publishing several articles from the data collected in one large study?
(A) Duplicate publication.
(B) Partial publication.
(C) Triplicate publication.
(D) None of these.
12. Full form of COPE is-
(A) Commission of Publication Ethics
(B) Committee of Publication Ethics
(C) Committee on Publication Ethics
(D) Committee for Publication Ethics
13. What is the significance of peer review in research?
(A) To ensure the research is published quickly
(B) To validate the research quality and credibility
(C) To increase the length of the research paper
(D) To provide a platform for personal opinions
14. Peer-Review in the context of research methods and design refers to:
(A) The evaluation of research by experts in the same field before publication.
(B) The process of collecting data from participants.
(C) The act of publishing research without any review.
(D) The use of statistical methods to analyze data.
15. Which of the following best describes "publication bias"?
(A) Journals only publish studies with non-significant results
(B) Researchers only submit studies with positive results
(C) Studies with significant results are more likely to be published
(D) All studies are published regardless of outcome
16. Peer Review of a piece of new psychological research should be conducted by
(A) A specially appointed government minister
(B) Another researcher working in a different field of psychology
(C) Another researcher working in the same field of psychology
(D) The head of department in the university where the research was conducted
17. You are asked to review a paper submitted for publication in a journal. The paper is an identical copy of a paper you previously reviewed for another journal. The paper was rejected for several serious concerns raised by the reviewers. Can your review, which recommends rejection, mention that the paper has been resubmitted with no change, completely ignoring the careful reviews received previously?
(A) Yes
(B) No

18. Peer review helps in:
- (A) Reducing content
 - (B) Improving paper quality through expert feedback
 - (C) Increasing page count
 - (D) Getting funding
19. What is the “file drawer problem”?
- (A) Researchers lose their data
 - (B) Non-significant studies are not published
 - (C) All studies are published
 - (D) Journals reject all submissions
20. What is a blind review in academic publishing?
- (A) A review where the author’s identity is hidden from the reviewers
 - (B) A review where the reviewers’ identities are hidden from the author
 - (C) A review where both the author’s and reviewers’ identities are hidden
 - (D) A review where the editor does not know the author’s identity
21. Scientific writing should not be ____
- (A) Concise
 - (B) Precise
 - (C) Focused
 - (D) Biased
22. Which bias involves a preference for publishing positive results over null or negative findings?
- (A) Reporting Bias
 - (B) Publication Bias
 - (C) Experimenter Bias
 - (D) Instrumentation Bias
23. What is a peer review in the context of scientific research?
- (A) A process of evaluating research by experts in the field
 - (B) A method of collecting data
 - (C) A type of scientific experiment
 - (D) A way to publish research findings
24. Which of the following letter is received by the publication that consist the readers concerns about the editors article?
- (A) Letter of intent
 - (B) Letter of appreciation
 - (C) Letter to the editor
 - (D) None of above
25. We can send the same research work to two different journals to speed up the publication process.
- (A) True
 - (B) False
 - (C) None of the above
 - (D) None of above
26. Which committee promotes ethics in publishing?
- (A) UGC
 - (B) COPE (Committee on Publication Ethics)
 - (C) AICTE
 - (D) IEEE Board
27. Directions: Each statement below describes a situation involving one of the CHAMPS research biases. Select the most appropriate bias for each example: Only studies that report statistically significant improvements in memory from a supplement appear in journals.
- (A) Attrition Bias
 - (B) Publication Bias
 - (C) Selection Bias
 - (D) Measurement Bias
 - (E) Confounding
28. What is the purpose of a “peer-reviewed article”?
- (A) To present personal opinions
 - (B) To ensure research quality through expert evaluation
 - (C) To entertain readers
 - (D) To summarize previous studies

29. What is the purpose of a peer review?
- (A) To evaluate and improve the quality of something before publication
 - (B) To criticize a peer's work so they can sell their article
 - (C) To allow someone to plagiarize something without getting in trouble
 - (D) To make doing research easier by relying on the work of your peers
30. The role of ____ review and scientific processes is important in advancing psychological knowledge.
- (A) Peer
 - (B) Casual
 - (C) Random
 - (D) Biased
31. What is an article read by several other scientists with expertise in the subject matter, who provide feedback regarding the quality of the manuscript before it is accepted for publication?
- (A) Peer-reviewed journal article
 - (B) Blog post
 - (C) Magazine article
 - (D) Newspaper editorial
32. What is the role of "peer review" in academic publishing?
- (A) To promote the author's work
 - (B) To ensure quality and credibility
 - (C) To provide marketing support
 - (D) To summarize the findings

1.7.3 Plagiarism

1. Plagiarism is okay as long as I'm not caught because it only affects me.
- (A) True
 - (B) False
2. What are some strategies to avoid plagiarism when using online sources for research?
- (A) Paraphrase, cite sources, use quotation marks for direct quotes, double-check with plagiarism detection tools
 - (B) Copy-paste directly from online sources
 - (C) Ignore citing sources
 - (D) Use outdated information without verification
3. In order to avoid plagiarism, you should always ____
- (A) Give credit to the person who created the material you are using
 - (B) Write the exact words the author used
 - (C) Hope nobody checks to find out it isn't your own original work
 - (D) None of above
4. What law prohibits plagiarism?
- (A) Avoid copying and pasting
 - (B) Confidentiality
 - (C) Politeness
 - (D) Copyright
5. You take a passage from one of your sources, rework the ideas into your own words, and you don't give the original source credit. Is this plagiarism?
- (A) YES
 - (B) NO
6. A student uses information from a source but does not cite it. What academic consequence might they face?
- (A) They will receive extra credit
 - (B) They will be praised for originality
 - (C) They may face serious academic consequences for plagiarism
 - (D) They will be asked to write more sources
7. What is the best way to ensure your report is free from plagiarism?
- (A) Paraphrase and cite all sources properly
 - (B) Copy and paste from the internet
 - (C) Avoid using any references
 - (D) Use only your own ideas without research

8. What is the primary purpose of plagiarism detection software in an English writing course?
- (A) Grammar check
 - (B) Ensuring academic honesty
 - (C) Storing documents
 - (D) Video editing
9. You can avoid plagiarism by using the grammatical structure of the original source and replacing select words with synonyms.
- (A) True
 - (B) False
10. Ashley decided to ___ her paper for class by copying and pasting from Wikipedia and saying she wrote it.
- (A) Plagiarize
 - (B) Sell
 - (C) Ignore
 - (D) Re-write
11. It is the act of presenting someone else's work without giving proper credit.
- (A) Citation
 - (B) Plagiarism
 - (C) References
 - (D) None of above
12. Copying words and ideas from a source and presenting them as your own is?
- (A) Quoting
 - (B) Paraphrasing
 - (C) Summarizing
 - (D) Plagiarism
13. What is plagiarism in ICT?
- (A) Copying someone's work without giving credit
 - (B) Writing original content
 - (C) Downloading copyrighted software legally
 - (D) Protecting your own work
14. Copying some or all of someone else's work and claiming it as your own.
- (A) Mid terms
 - (B) Plagiarism
 - (C) Accredited
 - (D) Financial Aid
15. It's OK not to give credit as long as you put a source's information into your own words.
- (A) True
 - (B) False
16. To avoid plagiarism, which of the following should you do? Check all that apply.
- (A) Use quotations on all borrowed phrases and sentences.
 - (B) Cite the source for any borrowed words or ideas.
 - (C) Use quotations on all paraphrased phrases and sentences.
 - (D) None of above
17. "The appropriation of another person's ideas, processes, results, or words WITHOUT giving appropriate credit, including those obtained through confidential review of others' research proposals and manuscripts"
- (A) Intellectual Property
 - (B) Plagiarism
 - (C) Fair Use
 - (D) Copyright
18. How can you avoid plagiarism when taking notes for your research paper?
- (A) By only using your own ideas and avoiding all sources
 - (B) By paraphrasing all your sources without citation
 - (C) By not taking any notes at all
 - (D) By indicating where your ideas end and someone else's begin, and quoting or paraphrasing correctly
19. It is the utilization of different information from different resources without citation of the author
- (A) Fraud
 - (B) Research ethics

- (C) Plagiarism
(D) Piracy
20. Explain plagiarism and its implications.
(A) Plagiarism is the act of creating original work without any influence.
(B) Plagiarism is a minor issue that does not affect academic integrity.
(C) Plagiarism is the unauthorized use of someone else's work, leading to academic and legal repercussions.
(D) Plagiarism only applies to written texts and not to images or music.
21. Accidental plagiarism.
(A) Not knowing that you had to reference someone's work.
(B) You knew you were copying someone's work but thought nobody would notice.
(C) All the above
(D) None of the above
22. Which of the following is NOT a form of plagiarism?
(A) Copying text directly from a source without using quotation marks or citing the source
(B) Paraphrasing text from a source without citing the source
(C) Using someone else's ideas without attribution
(D) Quoting a source accurately and citing it correctly
23. Which step best helps avoid plagiarism while maintaining academic integrity?
(A) Attribute paraphrased content accurately
(B) Omit sources if widely known facts
(C) Rearrange source sentences slightly
(D) Rely on a single comprehensive source
(E) Quote extensively without citations
24. The unattributed use of a source of information that is not considered common knowledge. In general, the following acts are considered plagiarism: (1) failing to cite quotations or borrowed ideas, (2) failing to enclose borrowed language in quotation marks, (3) failing to put summaries or paraphrases in your own words, and (4) submitting someone else's work as your own.
(A) Plagiarism
(B) MLA Style
(C) Paraphrasing
(D) Researching
25. Using the ideas or words of someone else and claiming they are your own is:
(A) Plagiarism
(B) Borrowing
(C) Not a big deal
(D) Fun and games
26. Acceptable similarity index is usually:
(A) Below 10-20% depending on guidelines
(B) Above 90%
(C) Not applicable to students
(D) 100%
27. You copy a paragraph directly from an article you found. You cite the source but don't use quotation marks. This is ____
(A) Not plagiarism
(B) Academic honesty
(C) Plagiarism
(D) Careless
28. A student is caught copy-pasting entire Wikipedia articles for a digital report. As a responsible teacher, the BEST action is:
(A) Give a failing grade immediately
(B) Guide them on plagiarism and require proper referencing
(C) Remove ICT-based tasks
(D) Ignore since it's common practice
29. Which of the following is a breach of research ethics?
(A) Informed consent from participants
(B) Providing detailed explanations of risks to participants

- (C) Plagiarizing sections of existing research without proper citation
(D) Disclosing funding sources in the study
30. If I forget to cite one of my sources, it is considered plagiarism
(A) TRUE
(B) FALSE
31. In research writing, what does the term 'plagiarism' refer to?
(A) The use of complex vocabulary
(B) The act of paraphrasing
(C) The unauthorized use of someone else's work
(D) The inclusion of personal anecdotes
32. You quote a line from a very popular song in your essay and don't cite it because everyone knows who sings it. This is ____
(A) Plagiarism.
(B) Not plagiarism.
(C) Academic honesty.
(D) Musical.
33. Why is plagiarism considered unethical?
(A) Plagiarism is considered unethical because it involves taking someone else's work or ideas without giving them proper credit.
(B) Plagiarism is not considered unethical because it helps spread knowledge.
(C) All the above
(D) None of the above
34. Plagiarism is a serious offence and universities may use plagiarism detecting software to expose students who cheat with their work.
(A) TRUE
(B) FALSE
(C) All the above
(D) None of the above
35. Which of the following is an example of unethical but legal behavior in social research?
(A) Thesis plagiarism with NO copyright
(B) Falsifying data
(C) Plagiarizing the work of others
(D) Distorting methods of data collection
36. You find a chart that will really strengthen one of the major points of your essay. You don't cite it because it's just a chart and they do not need to be documented. This is ____
(A) Providing credibility to the person who created the chart.
(B) Academic honesty.
(C) Plagiarism.
(D) Using facts.
37. Owning someone else's work without giving appropriate credit.
(A) Falsification
(B) Fabrication
(C) Plagiarism
(D) Photo manipulation Edit
38. Which statement best describes the primary purpose of Turnitin in schools and universities?
(A) To teach paraphrasing skills through interactive modules
(B) To store all student papers for administrative records
(C) To detect potential plagiarism and citation inadequacies
(D) To grade writing quality automatically for teachers
39. Which sentences are not considered plagiarism?
(A) Turning in someone else's work as your own
(B) Copying words or ideas from someone else without giving credit
(C) Failing to put a quotation in quotation marks
(D) Giving correct information about the source of a quotation
40. When you use someone else's words or information and do not give them credit, you are:

- (A) Paraphrasing.
 - (B) Summarizing.
 - (C) Copying.
 - (D) Plagiarizing.
41. Plagiarism is the ____ of someone else's words or ideas and presenting them as your own.
- (A) Remixing
 - (B) Borrowing
 - (C) Rewording
 - (D) Stealing
42. Plagiarism includes all of the following except ____
- (A) Keeping any of the same vocabulary without quotations, even if cited.
 - (B) Copying a sentence word-for-word, putting it in quotation marks, and citing the information.
 - (C) Not using any of your own ideas.
 - (D) Inaccurately misrepresenting the author's intentions.
43. Which best defines plagiarism?
- (A) A group of people who represent a larger population.
 - (B) Research that involves the pursuit of knowledge in a systematic way
 - (C) The stealing of someone else's work
 - (D) The people a researcher wants to study
 - (E) A measure of how things are related to one another
44. If I paraphrase or summarize information from a work, I do NOT have to use a citation.
- (A) True
 - (B) False Edit
45. Avoiding plagiarism can be achieved by:
- (A) Copying without citation
 - (B) Using paraphrasing and proper referencing
 - (C) Deleting original sources
 - (D) Changing only keywords
46. Stealing another person's intellectual property without giving them credit for their ideas
- (A) Intellectual theft.
 - (B) Improper citation.
 - (C) Plagiarism.
 - (D) Academic disloyalty.
47. You want to directly copy the words of the author from one of your sources, what must you do?
- (A) Use quotation marks around it and cite it properly
 - (B) Go ahead and include it on your paper, no one will know the difference
 - (C) Just rearrange the words and hope no one will find out
 - (D) None of the above
48. Define plagiarism in the context of scientific research.
- (A) Using data from another researcher's study without permission or acknowledgment.
 - (B) Using someone else's ideas, words, or work without giving them proper credit or citation.
 - (C) Paraphrasing someone else's work without citing them.
 - (D) Copying and pasting information from a website without acknowledging the source.
49. You copy images from a website into your Google Slides presentation without citing the website. Is this plagiarism?
- (A) Yes
 - (B) No
50. Gabby, a graduating student, claimed the research work of his classmate. He erased the name of the researcher and placed his own.
- (A) Fabrication
 - (B) Falsification
 - (C) Plagiarism
 - (D) None of above

51. Which of the following is a consequence of plagiarism?
(A) Academic recognition
(B) Ethical certification
(C) Disciplinary action
(D) Better results
52. What is one of the key points to remember to avoid plagiarism?
(A) Always use a mixture of quoting and paraphrasing
(B) Only use sources that are widely recognized
(C) Document your use of sources, whether quoting, paraphrasing, or summarizing
(D) Summarize everything instead of quoting
53. Copying or using someone else's words without citing your source
(A) Plagiarism
(B) Paraphrase
(C) Thesis statement
(D) Research
54. True or False: To use others' ideas and say that it is your work is stealing.
(A) True
(B) False
(C) All the above
(D) None of the above
55. Plagiarism is when, intentionally or not, you use someone else's words or ideas but fail to credit that person, leading your readers to think that those words are yours
(A) True
(B) False
56. Which of these is NOT plagiarism?
(A) Turning in a Wikipedia article as your own work.
(B) Quoting a sentence from an article and giving credit to the author.
(C) Copying a paragraph but moving the sentences around.
(D) Using parts of an article without telling who the author is.
57. You can take other people's work and write your name on it.
(A) True
(B) False
58. Putting all pertinent information into your own words
(A) Summarize
(B) Paraphrase
(C) Plagiarize
(D) Recap
59. Identify which one of the following is a Plagiarism software
(A) IBM SPSS
(B) Turnitin
(C) D-Space
(D) Joomla
60. Use of another person's ideas, words, or opinions as if they were your own. Any undocumented information from a source is included in this.
(A) Plagiarism
(B) Quotation
(C) Paraphrase
(D) None of the above
61. Plagiarism is defined as
(A) Making up data or results and recording or reporting them
(B) Manipulating research materials or changing or omitting data or results such that the research is not accurately represented in the research record.
(C) The appropriation of another person's ideas, processes, results, or words without giving appropriate credit.
(D) None of the above
62. Plagiarism includes using another person's ideas without giving proper credit.
(A) True
(B) False

63. Plagiarism is to
- (A) Use inappropriate statistical techniques in order to obtain favorable results and enhance the significance of one's research.
 - (B) Present someone else's ideas or work as your own.
 - (C) Publish the same paper in two different journals without informing the editor.
 - (D) Discuss with your colleagues data from the paper that you are reviewing for a journal.
64. To present the words, creative material, or ideas of someone else as your own, without giving credit.
- (A) Common Knowledge
 - (B) Plagiarism
 - (C) Paraphrase
 - (D) Quote
 - (E) Summary
65. Copying words from an author without giving them credit
- (A) Direct quote
 - (B) Plagiarize
 - (C) Paraphrase
 - (D) Citation
66. With regard to using information from sources, when in doubt about whether something is common knowledge or not —
- (A) Use it without citing anything
 - (B) Cite your sources
 - (C) Avoid using it
 - (D) None of these
67. What is the unethical practice of using another person's work without credit?
- (A) Sampling
 - (B) Plagiarism
 - (C) Paraphrasing
 - (D) Citation
68. Taking and passing off someone else's work whether intentional or unintentional.
- (A) Internal Citation
 - (B) Plagiarism
 - (C) Paraphrase
 - (D) Direct Quote
69. The act of identifying the source of information is
- (A) Attribution.
 - (B) Identification.
 - (C) Sourcing.
 - (D) Confirmation.
70. Which software is commonly used to detect plagiarism in academic work?
- (A) Microsoft Word
 - (B) EndNote
 - (C) Turnitin
 - (D) Google Scholar
71. You gather a lot of research for your paper, but when it comes time to write your Works Cited page, you realize you can't find the source of one of your quotes. You use the quote anyway and make up a fake source for the Works Cited page. Is this plagiarism?
- (A) Yes
 - (B) No
72. Describe a procedure you should follow to avoid plagiarism when using citation tools.
- (A) Use citation tools and always double-check for accuracy
 - (B) Use citation tools without reviewing the results
 - (C) Only use manual citation methods
 - (D) Ignore citation tools completely
73. Failure to acknowledge the borrowed material is called (Take and use of others as one's own)
- (A) Foot note.
 - (B) Index.
 - (C) Plagiarism.
 - (D) Acknowledgement.
74. Which of the following is not a Tip to avoid Plagiarism?

- (A) Paraphrasing
 - (B) Improper citation
 - (C) Planning ahead
 - (D) Quotations
75. Translate text into your own words
- (A) Summarize
 - (B) Quote
 - (C) Paraphrase
 - (D) Plagiarize
76. What is it called when the author uses someone else's work/idea and passes it off as his/her own?
- (A) Citation
 - (B) Plagiarism
 - (C) Support
 - (D) Okay Edit
77. The following are paraphrasing techniques except,
- (A) Copy the exact words of the author.
 - (B) Concentrate on the meaning, not on words.
 - (C) Avoid using abstract words-they come as weak words.
 - (D) Verbs and adjectives have counterparts that are interchangeable with the authors' original words.
78. The theft or misrepresentation of intellectual property (someone's ideas, beliefs or theories) or the substantial unattributed copying of another's work
- (A) Plagiarism
 - (B) Research Process
 - (C) Citing
 - (D) Wiki
79. To steal and pass off the ideas or words of another as one's own or to use another's production without crediting the source.
- (A) Phonorecords
 - (B) Fair Use Doctrine
 - (C) Intellectual Permission
 - (D) Plagiarism
80. Plagiarism applies to-
- (A) Research Publication, term Papers etc.
 - (B) Photographs and Songs
 - (C) Ideas
 - (D) All of the above
81. Submitting work written by another student, parent, or professional and claiming it is your own work
- (A) Paraphrasing.
 - (B) Plagiarism.
 - (C) Cheating.
 - (D) Stratagem.
82. Marco failed his essay because it was copied; he broke the school's ___ rules.
- (A) Annotation
 - (B) Summarizing
 - (C) Plagiarism
 - (D) Credible
83. You go to a tutor for editing assistance, and he drastically re-writes your paper. You hand this into your teacher. This is ___
- (A) Money well spent.
 - (B) Efficient.
 - (C) Academic honesty.
 - (D) Plagiarism.
84. Plagiarism in research means:
- (A) Proper citation
 - (B) Using others' work without credit
 - (C) Writing bibliography
 - (D) Data analysis
85. Student A had cut and paste the statement in another empirical study into his own study without citing the author's name. This action is called ___
- (A) Invalid
 - (B) Ethical
 - (C) Cheating
 - (D) Plagiarism

86. What does plagiarism most accurately involve in academic work?
(A) Using complex vocabulary without proper training
(B) Submitting original ideas after peer review approval
(C) Using someone else's work or ideas without acknowledgement
(D) Citing sources in multiple formats to impress readers
87. Which is not anti plagiarism software
(A) Turnitin
(B) Urkund
(C) Ithenticate
(D) Avoidplagaria
88. Plagiarizing someone's work is ____
(A) Not cheating
(B) Acceptable in Science and Social Studies but not English
(C) Cheating or stealing from someone
(D) Acceptable in all subjects
89. Copying information and text from the Internet (copy and paste) is not considered plagiarism.
(A) True
(B) False
(C) All the above
(D) None of the above
90. Failing to cite words and ideas used by other authors is plagiarism.
(A) True
(B) False
91. What can be the consequences of plagiarizing
(A) Get a zero on the assignment
(B) Make you go to jail
(C) Fines between \$1, 000, 000 and \$2, 000, 000
(D) Can get you expelled from high-school or college
(E) Get extra credit (ex. 110%) on the assignment you are doing
92. You can use any image you want from Google images without giving credit.
(A) True
(B) False
93. Which example illustrates infringement in academic work?
(A) Submitting original analysis with references
(B) Citing a source but failing to mark a quotation
(C) Quoting a source with clear quotation marks
(D) Paraphrasing and properly acknowledging sources
94. All of the following are examples of plagiarism EXCEPT
(A) Using an author's ideas without citing them.
(B) Copying word-for-word without mentioning the source.
(C) In text citations. Ex:(Smartfutures)
(D) Copying & pasting
95. Which term refers to the practice of using someone else's work or ideas without proper attribution?
(A) Plagiarism
(B) Citation
(C) Paraphrasing
(D) Summarizing
96. Which action most clearly violates academic integrity?
(A) Citing sources in a research essay
(B) Asking for clarification before an exam
(C) Submitting another person's work as your own
(D) Collaborating as directed by the teacher
97. True or false? You do not need to cite someone else's work if you used a scholarly research article, you found it on the internet, or a parent wrote it.
(A) False

- (B) True
(C) All the above
(D) None of the above
98. When you steal the words or ideas from another person without giving them credit
(A) Paraphrasing
(B) Cheating
(C) Texting
(D) Plagiarizing
99. Avoiding plagiarism is known to be law of?
(A) Avoiding copy and paste
(B) Confidentiality
(C) Courtesy
(D) Copyright
100. Plagiarism can be defined as
(A) Paraphrasing another's ideas with explicit attribution to the author
(B) Encryption
(C) Writing your own concept
(D) Representing another person's work ___ their words and/or ideas ___ as your own
101. Copying someone's work without giving them credit
(A) Label.
(B) Visual aid.
(C) Plagiarism.
(D) Paraphrase.
102. What is the term for the process of copying someone else's work or ideas and passing them off as one's own?
(A) Paraphrase
(B) Plagiarism
(C) Fact-check
(D) Research
103. Which example illustrates plagiarism in school work?
(A) Summarizing research with accurate references
(B) Quoting sources with proper citation style
(C) Paraphrasing and listing the original author
(D) Using another's ideas without clear acknowledgment
104. What is an example of plagiarism?
(A) Including facts in your paper and not giving the source
(B) Including facts in your paper with a web link
(C) Including a photo in your paper with the photographer's name
(D) Including a quote in your paper and giving the source
105. You find an excellent idea in an article and you use it in your paper. You don't bother to cite the source because it is completely in your own words. This is ____
(A) Great research.
(B) Academic honesty.
(C) Lazy.
(D) Plagiarism.
106. Lee changed a few words in the sentence he copied for his report on bats. He decided he did not have to give credit to the original author. OKAY or NO WAY?
(A) Okay
(B) No Way
107. Without full references, your tutor may be led into thinking you are trying to take credit for someone else's work.
(A) True
(B) False
(C) All the above
(D) None of the above
108. The unattributed use of a source of information that is not considered common knowledge
(A) Search Engine
(B) Summarize

- (C) Plagiarism
(D) Thesis
- 109.** Is it acceptable to use pictures from the internet in student assignments without the owner's acknowledgment?
(A) YES
(B) NO
- 110.** Which of the following terms refers to the act of using someone else's work as your own without giving proper credit?
(A) Plagiarism
(B) Paraphrasing
(C) Citing
(D) Referencing
- 111.** In a policy context, what does plagiarism typically involve?
(A) Reusing your own past notes with citation
(B) Paraphrasing with proper acknowledgment
(C) Copying ideas or words without attribution
(D) Summarizing and linking the original source
- 112.** The purpose of a literature review does NOT include:
(A) Identifying research gaps
(B) Establishing theoretical background
(C) Supporting the research focus
(D) Copying previous studies without citation
- 113.** Government of India initiative e-Shodh-Shuddi Provides students and researchers access to
(A) Theses
(B) E-Journals
(C) Plagiarism Software
(D) E-books
- 114.** Using someone else's work to help you without their permission is:
(A) Plagiarism
(B) Periodical
(C) Research
(D) Sight
- 115.** Void plagiarism?
(A) Presenting someone else's findings with appropriate citations
(B) Repeating one's own previously published findings without a citation
(C) Presenting someone else's findings without a citation
(D) Copying a substantial amount of text from past publications without using quotation marks
- 116.** Borrowing someone else's ideas and passing them off as your own.
(A) Research
(B) Plagiarism
(C) Paraphrase
(D) Synthesize
- 117.** Plagiarism occurs when:
(A) Someone uses another's work without proper credit
(B) Someone summarizes in their own words
(C) Sources are cited properly
(D) The work is original
- 118.** It is defined as the act of claiming the words or ideas of another person as your own.
(A) Fair Use
(B) Research
(C) Plagiarism
(D) Copyright
- 119.** When giving his speech on the Civil War, Carl quoted a section of President Lincoln's "Gettysburg Address" without crediting Mr. Lincoln. Carl is guilty of ____
(A) Dialogue
(B) Plagiarism
(C) Oral citation
(D) Copyright infringement

120. If you do not intend to plagiarize a source, it is not considered plagiarism.
(A) True
(B) False
121. If you summarize or paraphrase unique ideas or opinions from a source, you still must cite the source.
(A) True
(B) False
122. Which action most directly helps avoid plagiarism with AI tools?
(A) Change a few words to appear unique
(B) Provide clear attribution for AI outputs
(C) Use multiple AI tools for variation
(D) Delete metadata before submission
123. What must you never do in your research report?
(A) Cite your sources
(B) Plagiarise
(C) Look at different perspectives
(D) Use evidence
124. A professional educator does not cite data or materials from published sources.
(A) True
(B) False
125. Jacob breached copyright in his research project. Which of the following best describes Jacob's research project?
(A) His research was biased.
(B) His research lacked integrity.
(C) His research provided unreliable results.
(D) His primary research data was negatively affected.
126. It is the night before a research paper is due and you don't have any work done. You buy a paper on-line. This is ____
(A) Efficient.
(B) Plagiarism.
(C) A good way to spend your money.
(D) Academic honesty.
127. When you put the words of others into your own words, you are doing what?
(A) Plagiarizing
(B) Writing
(C) Citing
(D) Paraphrasing
128. ____ is using someone else's ideas, thoughts, or explanations without showing where the information was found.
(A) Research
(B) Textual evidence
(C) Thesis
(D) Plagiarism
129. To use and pass the ideas or writings of another as one's own, results in a FAILING GRADE
(A) Paraphrase
(B) Plagiarism
(C) MLA format
(D) Direct quotation
130. Rewording someone else's ideas, which is called paraphrasing, can also be plagiarism if you do not give them credit for these ideas.
(A) True
(B) False
(C) Neither
(D) Both
131. What is the most appropriate action when a student commits plagiarism?
(A) Give a failing grade immediately
(B) Teach the student about proper citation and allow revision
(C) Suspend the student
(D) Ignore the incident
132. Taking credit for someone else's writing or ideas
(A) Plagiarism.
(B) Reliability.
(C) Field Note.
(D) Case Study.

- 133.** True or False: You can use other people's words without giving credits to the author.
(A) True
(B) False
(C) All the above
(D) None of the above
- 134.** Information used during the teaching and learning process that is not original yet been used as one's own work and where credit is not given to its creator is best described as ____
(A) Copyright
(B) Trademarked
(C) Plagiarism
(D) Illegally obtained
- 135.** What is not true about plagiarism?
(A) You can paraphrase or summarize to avoid plagiarism.
(B) It happens when someone tries to take credit the work of another.
(C) It is regarded as low act and illegal.
(D) Citing every source is not necessary.
- 136.** Why is it important to keep track of references?
(A) To avoid plagiarism
(B) To collect data
(C) To analyse results
(D) To write the conclusion
- 137.** When proposing your teaching model, what is not correct?
(A) Avoiding plagiarism
(B) Being original
(C) Being accurate
(D) Copying other researchers
- 138.** Why is it important to give credit to image or video creators?
(A) So you can copy freely
(B) To complete work faster
(C) To respect their work and avoid plagiarism
(D) To delete the original
- 139.** What are the three strategies to avoid plagiarism?
(A) Copy, Pasting, Quote
(B) Citing, Exaggerating, Predicting
(C) Summary, Paraphrasing and Quote
(D) Avoiding, Denying and Paraphrasing
- 140.** ____ is using or putting in one's own words to restate the author's ideas, and acknowledging the source to give credit to the original author (de Belen, 2015)
(A) Hypothesis
(B) Synthesis
(C) Paraphrasing
(D) Plagiarism
- 141.** Submitting a research report that someone else wrote. Is this plagiarism?
(A) True
(B) False
- 142.** This is an ethical responsibility of responsible writers when borrowing from others.
(A) Respect others' ideas and words, credit those from whom they borrow, and use their own words when paraphrasing
(B) Use others' ideas and words without giving credit
(C) Change others' ideas and words without indicating it
(D) Paraphrase others' work without giving credit
- 143.** The practice of taking someone else's work or ideas and passing them off as one's own.
(A) Citation
(B) Bibliography
(C) Plagiarism
(D) Newton's Law
- 144.** Why is it important to avoid plagiarism in a research report?
(A) To maintain academic integrity
(B) To collect data
(C) To analyse data
(D) To present data

- 145.** The primary reason to cite your sources is to avoid what?
- (A) A lawsuit
 - (B) Plagiarism
 - (C) A failing grade
 - (D) Confusion
- 146.** To steal a person's ideas or writings and say they are yours.
- (A) Argument
 - (B) Bias
 - (C) Plagiarize
 - (D) None of the above
- 147.** True or False? It's ok to borrow some ideas from an outside source as long as you don't copy the exact words in your own essay.
- (A) True
 - (B) False
- 148.** Taking someone else's work and passing it off as your own
- (A) Plagiarism
 - (B) Paraphrase
 - (C) Research
 - (D) Accomplishment
- 149.** Plagiarism is acceptable in a research paper.
- (A) TRUE
 - (B) FALSE
 - (C) All the above
 - (D) None of the above
- 150.** Samantha copies a webpage into her book report and adds her own first sentence. OKAY or NO WAY?
- (A) Okay
 - (B) No Way
- 151.** Plagiarizing others prevents you from developing your own skills, knowledge, and creativity.
- (A) True
 - (B) False
 - (C) All the above
 - (D) None of the above
- 152.** Is it RIGHT to copy paste something from the internet for your homework?
- (A) No
 - (B) Yes
- 153.** What is plagiarism?
- (A) Stealing someone else's ideas or words and using them as your own
 - (B) A condition where there is a lot of plaque buildup on your teeth
 - (C) Something you should do in your writing
 - (D) None of the above
- 154.** While preparing a research report, a student uses previously published findings without paraphrasing or citation, assuming the information is 'common knowledge'. What two major ethical issues are being violated?
- (A) Fabrication and falsification
 - (B) Misrepresentation and bias
 - (C) Plagiarism and lack of academic integrity
 - (D) Poor sampling and citation style
- 155.** A tool to detect unoriginal content in written work (e.g., Turnitin) is called a:
- (A) Grammar Checker
 - (B) Plagiarism Detector
 - (C) Spell Checker
 - (D) Citation Manager
- 156.** Which of these tools is used for plagiarism checking?
- (A) Excel
 - (B) Turnitin, iThenticate, Grammarly
 - (C) Photoshop
 - (D) Firefox
- 157.** Paraphrasing properly is to:
- (A) Summarize the text in your own words and cite it
 - (B) Use only the idea without citing it
 - (C) Put quotation marks around the text and cite it
 - (D) Change a few words to make it your own and cite it

- 158.** Choose the correct definition of the term:plagiarism
(A) A statement that states the purpose of a paper or presentation

- 159.** Repeating someone else's phrasings UNINTENTIONALLY is still considered plagiarism.
(A) True
(B) False
- 160.** Plagiarism is wrong because it deprives someone else of due credit for their work.
(A) TRUE
(B) FALSE
- 161.** This refers to the act of taking and using ideas, information, concepts, and arguments intentionally or unintentionally without proper citations.
(A) Literary Theft
(B) Plagiarism
(C) Inadvertent use of words
(D) Stealing
- 162.** True or False:Plagiarism is not against the law.
(A) True
(B) False
- 163.** Why is it important to copy and paste the URL when researching for your project?
(A) To accurately cite sources and avoid plagiarism
(B) To make the project look longer
(C) To avoid using any websites
(D) To replace the need for writing content
- 164.** Plagiarism refers to:
(A) Proper citation of sources
(B) Using another's ideas without giving credit
(C) Paraphrasing with acknowledgment
(D) Writing original work
- 165.** To steal information and pass it off as your own work and/or ideas
(A) Stealing
(B) Crediting
(C) Playwright
(D) Plagiarize
- 166.** Can you use someone else's work without telling the author and title of the source?
(A) Yes
(B) No
(C) All the above
(D) None of the above
- 167.** A student copies text intentionally without citing. Which term applies?
(A) Proper academic collaboration
(B) Plagiarism under IB definition
(C) Permissible fair use policy
(D) Acceptable paraphrasing practice
- 168.** Illegal use of someone's work without proper citations.
(A) Plagiarising
(B) Cheating
(C) Citing
(D) Referencing
- 169.** Cheating or using information without giving the original owner credit
(A) MLA Works Cited
(B) Plagiarism
(C) Source
(D) None of the above
- 170.** Which of the following constitutes an ethical violation in writing related literature?
(A) Citing all sources used
(B) Paraphrasing without appropriate citation

- (C) Using well-reviewed academic articles
(D) Paraphrasing with citation
171. What does "plagiarism" mean in academic research?
(A) Using others' work without citation
(B) Writing original ideas
(C) Paraphrasing correctly
(D) Using authentic data
(E) Summarizing sources
172. Turnitin generates a report after submission. What is the main function of this report?
(A) Provide feedback on grammar and style quality
(B) Recommend books that match the paper's topic focus
(C) Assign a numerical score for creativity and originality
(D) Pinpoint potential instances of plagiarism or weak citations
173. What are some consequences of plagiarism?
(A) Decreased grades, suspension, expulsion
(B) Academic penalties, damage to reputation, legal consequences, loss of credibility
(C) All the above
(D) None of the above
174. Which of the following is an unethical Practice?
(A) Plagiarism by copying text from other sources when original work is expected
(B) Don't send messages you wouldn't want others to read.
(C) Don't type in all capital letters.
(D) Promptly respond to messages.
175. Plagiarism constitutes claiming another person's idea or intellectual property as one's own.
(A) True
(B) False
176. To avoid plagiarism you can do 3 things:
(A) Write everything verbatim, say you are sorry, write why you plagiarized.
(B) Use quotation marks if you write something verbatim, paraphrase, write an in-text citation.
(C) Write the source, but not the year, write the exact words, tell your teacher you'll never do it again.
(D) None of above
177. What do we call the act of copying another person's work, ideas, or words without appropriate acknowledgment of the original source?
(A) Falsification
(B) Citation
(C) Plagiarism
(D) Fabrication
178. What should authors do when describing others' work?
(A) Paraphrase the work without giving credit
(B) Only use direct quotes from the work
(C) Do not rely on a secondary summary of that work
(D) Rely on a secondary summary of that work
179. What does the word plagiarism mean?
(A) Illegally downloading songs.
(B) Copying someone else's work and presenting it as your own.
(C) Using copyright free images.
(D) None of the above
180. Copying information and text from the internet without giving proper credit to the author is considered plagiarism.
(A) True
(B) False
181. Which is NOT an ethical practice in writing RRL?
(A) Plagiarism

- (B) Proper citation
 - (C) Quoting relevant studies
 - (D) Acknowledging authors
- 182.** Best way to avoid Plagiarism is-
- (A) Read something and put it as yours
 - (B) To give credit to author
 - (C) Use quotations
 - (D) All of the above
- 183.** Putting a sentence completely into one's own words is called ____
- (A) Quoting
 - (B) Paraphrasing
 - (C) Neither
 - (D) None of above
- 184.** Kelly, John Michael, Brix, Lloyd and Noel are drafting their research. They copied and pasted all the information that they gathered from the internet without even paraphrasing and citing the sources.
- (A) Skimming
 - (B) Plagiarism
 - (C) Bribery
 - (D) Duplicating
- 185.** Plagiarism is using the ideas and/or words of someone else as your own without citing the original work.
- (A) True
 - (B) False
- 186.** What distinguishes self-plagiarism from plagiarism?
- (A) Reusing your own work to gain credit
 - (B) Copying a classmate's submitted project
 - (C) Borrowing ideas with full attribution
 - (D) Quoting from a published article verbatim
- 187.** What can you do to avoid plagiarism?
- (A) Cite your source at the end of a sentence
 - (B) Reference and rephrase others work
 - (C) Use quotation marks
 - (D) All of the above
- 188.** To take the ideas or words of someone else and pass them off as your own is to ____
- (A) Paraphrase
 - (B) Quote
 - (C) Have bias
 - (D) Plagiarize
- 189.** If you plagiarize you can be:
- (A) Expelled from school.
 - (B) Lose your job.
 - (C) Be sued by the person whose work you used.
 - (D) All of the above
- 190.** It is not plagiarism if I use someone's ideas without giving them credit.
- (A) True
 - (B) False
 - (C) All the above
 - (D) None of the above
- 191.** Why do you need a bibliography/works cited at the end of your research project?
- (A) So I don't plagiarize.
 - (B) Because my teacher says so.
 - (C) To share my information.
 - (D) To be correct.
- 192.** It involves presenting someone else's ideas or work as your own, with or without that person's permission, and doing so by incorporating it into your work without giving it due credit.
- (A) Libel
 - (B) Forgery
 - (C) Plagiarism
 - (D) Fraud
- 193.** Copying, "lifting", or making slight changes to some or all of someone else's work and saying you created it
- (A) Piracy.
 - (B) Plagiarize.
 - (C) Public Domain.
 - (D) License.

- 194.** You decide to cut and paste some information from a website into your school report. What is this called?
- (A) Copyright violation
 - (B) Plagiarism
 - (C) Being smart
 - (D) Breaking the law
- 195.** Plagiarism in research refers to:
- (A) Proper citation of references
 - (B) Presenting someone else's work as one's own without credit
 - (C) Publishing research in multiple journals
 - (D) Conducting research without ethical approval
- 196.** Plagiarism is a theft of ____ rather than of a physical thing.
- (A) Ideas
 - (B) Points
 - (C) Scores
 - (D) Love
- 197.** You read a source for your research paper, set the source aside to write about the ideas you just learned in your own words, and you put an in-text citation at the end of the paraphrased ideas. Is this plagiarism?
- (A) Yes
 - (B) No
- 198.** You must use the work of others on the web responsibly or you could be stealing.
- (A) True
 - (B) False
- 199.** Using someone else's work without giving due credit.
- (A) Carefulness
 - (B) Social Responsibility
 - (C) Competence
 - (D) Openness
 - (E) Plagiarism
- 200.** How to avoid plagiarism?
- (A) Present others' findings with appropriate citations
 - (B) Repeat your own published work without citation
 - (C) Present others' findings without citation
 - (D) Copy large amounts of content without using quotation marks
- 201.** Plagiarism means:
- (A) Giving credit
 - (B) Using own ideas
 - (C) Copying without credit
 - (D) Referencing properly
- 202.** Why is it necessary to cite sources properly?
- (A) It helps with paraphrasing
 - (B) It indicates the source of the idea and helps avoid plagiarism
 - (C) It adds authority to the paper
 - (D) It makes the paper more creative
- 203.** Plagiarism is checked by:
- (A) Turnitin
 - (B) MS Excel
 - (C) ChemDraw
 - (D) WhatsApp
- 204.** Using someone else's original words or ideas without giving that person credit.
- (A) Acceptable use policy
 - (B) Copying
 - (C) Plagiarism
 - (D) Distance learning
- 205.** Copying exact words from a source and presenting them as your own is called
- (A) Plagiarism
 - (B) Being practical
 - (C) An easy way to finish homework early
 - (D) None of the above
- 206.** If you use information from a source, but you fail to give ____ then you will be guilty of plagiarism which is a serious offense.

- (A) Secondary source
 - (B) Testimony
 - (C) Citations
 - (D) Claims
- 207.** The knowing or unknowing representation of another person's ideas, words or work in your own without acknowledging their contribution is called
- (A) Stealing
 - (B) Theft
 - (C) Plagiarism
 - (D) Copyright
- 208.** What is it called if you steal another person's words or ideas?
- (A) Botulism
 - (B) Plagiarism
 - (C) Legionnaires disease
 - (D) None of above
- 209.** You copy and paste a sentence from a professional journal and reorder some of it, keeping the meaning and most of the phrases intact. You do not cite your source. Is this plagiarism?
- (A) YES
 - (B) NO
- 210.** Which of the following statements is true regarding plagiarism in research?
- (A) Plagiarism is acceptable if the original source is not widely known.
 - (B) Paraphrasing without proper citation is not considered plagiarism.
 - (C) Self-plagiarism is permissible in research publications.
 - (D) Plagiarism can result in serious academic consequences.
- 211.** ____ is when students copy from or do not acknowledge their sources when writing an essay.
- (A) Journal
 - (B) Degree
 - (C) Seminar
 - (D) Plagiarism
 - (E) Tutor
- 212.** You must still acknowledge your source when you ____
- (A) Use exact quotations from the source
 - (B) Paraphrase the source
 - (C) Summarize the source
 - (D) All of these
- 213.** Copying media (especially images) from other websites to paste them into your own papers or websites is count as plagiarism.
- (A) True
 - (B) False
- 214.** Which of the following describes what plagiarism is?
- (A) Plagiarism involves using good data from reputable sources to increase your credibility and to enhance the logic of your reasoning.
 - (B) Plagiarism only happens in academic settings.
 - (C) Plagiarism is the act of using others' ideas without proper documentation or by paraphrasing poorly.
 - (D) Plagiarism occurs when writers acknowledge the sources of their researched information.
- 215.** Which action is considered plagiarism?
- (A) Creating your own work
 - (B) Copying someone else's work
 - (C) Saving files with your name
 - (D) Writing a document
- 216.** The practice of taking someone else's work or ideas and using them as your own without giving credit to that person. It is illegal.
- (A) Plagiarism
 - (B) Copyright
 - (C) MLA
 - (D) Primary source

217. Something that is word for word of another author
- (A) Paraphrase
 - (B) Objective
 - (C) Quotations
 - (D) Subjective
218. Why is Turnitin considered instrumental in maintaining academic integrity?
- (A) It blocks access to external sources completely
 - (B) It replaces teachers in checking student understanding
 - (C) It helps avert submission of plagiarised content by students
 - (D) It trains students to memorize citation rules perfectly
219. It is acceptable to copy and paste a photo from a webpage without citing where it came from.
- (A) True
 - (B) False
220. Changing the words of an original source is sufficient to prevent plagiarism
- (A) TRUE
 - (B) FALSE
 - (C) All the above
 - (D) None of the above
221. What does plagiarize mean?
- (A) To steal
 - (B) To see
 - (C) All of these
 - (D) None of these
222. Which of the following refers to the unauthorized use of someone else's work without proper citation?
- (A) Copyright
 - (B) Plagiarism
 - (C) Acknowledgment
 - (D) Paraphrasing
223. Your friend completed a course last year and gives you his paper. You re-type the whole thing, changing a few words here and there and adding in a few of your own thoughts. This is ____
- (A) Efficient.
 - (B) Clever.
 - (C) Academic honesty.
 - (D) Academic dishonesty.
224. Copying the work of someone else & passing it on as your own (it's illegal & you can go to jail)
- (A) Plagiarize
 - (B) Brainstorm
 - (C) Topic
 - (D) Data
225. It refers to an act of presenting someone else's works or ideas without seeking permission or acknowledgment.
- (A) Copy-paste method
 - (B) Cybercrime
 - (C) Plagiarism
 - (D) None of above
226. Thou shalt not ____ other people's intellectual output.
- (A) "inappropriate"
 - (B) "discuss"
 - (C) "appropriate"
 - (D) "utilize"
227. Which of the following is a well-known plagiarism checker tool?
- (A) Grammarly
 - (B) Turnitin
 - (C) Google Scholar
 - (D) Canva
228. It is an act of copying words or ideas of another person without giving credit to that person.
- (A) Imitation
 - (B) Plagiarism
 - (C) Creating
 - (D) Faking

229. According to the UGC guidelines on plagiarism, up to what percentage of similarity of text does not invite penalty?
- (A) 10 percent
 - (B) 16 percent
 - (C) 25 percent
 - (D) 40 percent
230. You copy and paste text from a website into your paper and don't put quotation marks around it, but you do put an in-text citation after the passage. Is this plagiarism?
- (A) YES
 - (B) NO
231. What practices undermine trust in research?
- (A) Adhering to guidelines.
 - (B) Plagiarism and data manipulation.
 - (C) Transparency and accountability.
 - (D) Ethical compliance.
232. Which plagiarism tool offers a similarity index report widely used in academic institutions?
- (A) Turnitin
 - (B) MS Word Editor
 - (C) Adobe Acrobat
 - (D) ChatGPT
233. What is the danger of not citing sources properly?
- (A) Plagiarism
 - (B) Clear writing
 - (C) Ethical research
 - (D) Originality
234. When you plagiarize you ____
- (A) Write information in your own words
 - (B) Do research
 - (C) Use words or ideas of another person as if they were your own
 - (D) When you plagiarize you ____
235. What is the term used for stealing information and passing it off as your own?
- (A) Plagiarism
 - (B) Paraphrasing
 - (C) Researching
 - (D) Summarizing
236. In our literature review, we can copy and paste what an author has said in their work.
- (A) True
 - (B) False
237. Illegal use of someone's work.
- (A) Bookmark
 - (B) Hyperlink
 - (C) Source
 - (D) Plagiarism
238. ____ is copying someone else's work and saying it is yours, which is not nice.
- (A) Plagiarism
 - (B) Research
 - (C) Editing
 - (D) Summarizing
239. What does 'plagiarism' mean in academic writing?
- (A) Citing sources correctly
 - (B) Using original ideas
 - (C) Copying someone else's work
 - (D) Writing creatively
240. Taking someone's words or ideas as if they were your own is ____, and it's against the law.
- (A) Parallelism
 - (B) Plagiarism
 - (C) Pro
 - (D) Con

- (A) Plagiarism
 - (B) Fabrication

242. Using author's language word for word, showing your reader it was not your own words
- (A) Paraphrase
 - (B) Plagiarize
 - (C) Citation
 - (D) Direct quote
243. Why is plagiarism similar to fraud?
- (A) Because plagiarism wastes valuable time
 - (B) Because you're making money off of a source's ideas or words
 - (C) Because you're not paying to use a source's ideas or words
 - (D) Because you're passing off a source's ideas or words as your own
244. To present the ideas or words of another as one's own without crediting the source is to —
- (A) Plagiarize
 - (B) Summarize
 - (C) Paraphrase
 - (D) Analyze
245. In the policy, what practice is strongly discouraged for students?
- (A) Actively listening to others' ideas for relevance
 - (B) Sharing sources with teachers transparently
 - (C) Replicating others' work regardless of accessibility
 - (D) Accurate referencing and proper citation
246. Running out of time and forgetting to put all of your citations in the bibliography or works cited page is an acceptable excuse for plagiarism.
- (A) TRUE
 - (B) FALSE
247. What is self-plagiarism?
- (A) When a person lifts material that they have previously written and pass it off as their own work
 - (B) Taking about yourself too much
 - (C) Using somebody else's work and passing it off as your own
 - (D) An epistemological stance
248. Using someone else's words or unique ideas and passing them off as your own is
- (A) Plagiarism
 - (B) Periodical
 - (C) Research
 - (D) Sight
249. Claiming authorship of a worksheet obtained from another source primarily constitutes what?
- (A) An acceptable classroom shortcut
 - (B) A minor procedural oversight
 - (C) A recommended collaboration practice
 - (D) A breach of academic integrity
250. Which of the following is an example of plagiarism?
- (A) Paraphrasing a paragraph and citing the source
 - (B) Quoting a sentence and providing a reference
 - (C) Copying text without attribution
 - (D) Summarizing an article with a citation
251. When you do not give credit to your sources properly, you are guilty of —
- (A) Plagiarism
 - (B) Cheating
 - (C) Sloppy work
 - (D) Failing
252. Plagiarism is —
- (A) A delicious dessert
 - (B) Copying someone else's work and calling it my own.
 - (C) Citing resources
 - (D) Creating a list of Web sites
253. Writing bibliographies help students avoid — by crediting all the sources they used

- (A) Plagiarism
 - (B) Quotations
 - (C) Guidelines
 - (D) None of the above
254. Which action best exemplifies misuse of AI in coursework?
- (A) Using AI to brainstorm outline ideas
 - (B) Submitting AI-generated writing as your own
 - (C) Checking grammar with an AI tool
 - (D) Comparing sources using an AI assistant
255. Using someone else's work without proper attribution is called:
- (A) Plagiarism
 - (B) Citation
 - (C) Paraphrasing
 - (D) Referencing
256. Plagiarism occurs when a writer uses someone else's language, ideas, or other original material without correctly acknowledging its source.
- (A) True
 - (B) False
 - (C) Neither
 - (D) Both
257. To avoid plagiarism, you want to make sure you ___ your sources and not copy them verbatim.
- (A) Plagiarize
 - (B) Summarize
 - (C) Justify
 - (D) Claim

1.7.4 Citation and Referencing

1. What is the significance of a bibliography in research?
 - (A) To list sources used
 - (B) To confuse the reader
 - (C) To summarize the research
 - (D) To entertain the audience
2. What is works cited?
 - (A) Only information about the author
 - (B) A summary of a text
 - (C) A list of all your sources at the end of your writing
 - (D) None of the above
3. When a citation includes more than ___ authors, only the surname of the first author is cited followed by et al?
 - (A) 3
 - (B) 4
 - (C) Purpose
 - (D) Use of Mechanics
4. Which of the following is NOT common among all types of citation guide?
 - (A) Format
 - (B) Content
5. A page that give all of the sources used in a research project is a ___ page.
 - (A) Works Consulted
 - (B) Bibliography
 - (C) Works Cited
 - (D) Plagiarism
6. A semi-colon is used to separate the names of the authors. "(Duncan, 2009; Harrison, 2015)"
 - (A) Two or more works in one parenthesis
 - (B) Authors with the same last name
 - (C) Indirect sources
 - (D) Organization as an author
 - (E) Same works of one author in the same year
7. Which of the following is the MOST appropriate source for engineering references?
 - (A) Peer-reviewed journals and conference proceedings

- (B) Personal blogs and social media posts
(C) Wikipedia articles without citation
(D) Newspaper advertisements
8. In a list of references, what information is typically included for each source?
(A) Author's name, title, and page number
(B) Date of publication, title, and publisher
(C) Author's name, title, and publication venue
(D) Author's affiliation, page number, and publication year
9. Look at this reference. What kind of material is being referenced? Schirm, V. (2013). Quality of life. In I. M. Lubkin & P. D. Larsen (Eds.), *Chronic illness: impact and interventions* (8th ed., pp. 183-206). Burlington, MA: Jones & Bartlett Learning.
(A) Book
(B) Book chapter
(C) Web page
(D) Journal article
10. Why does APA 7th edition recommend the use of DOIs in journal references?
(A) To enhance readability
(B) To provide a permanent link to the source, ensuring long-term access
(C) To eliminate the need for page numbers
(D) To shorten the reference list
11. A page at the end of a research paper that lists all the sources used in the paper is the ____
(A) Quote
(B) Works Cited
(C) Plagiarization
(D) Thesis
12. If you are not directly pulling exact information from a source, you only need to include:
(A) Author's name
(B) Year of publication
(C) Author's name and page number
(D) Author's name and year of publication
13. Works Cited should be ____ at the top of the page.
(A) Left aligned
(B) Centered
(C) Right aligned
(D) None of above
14. What were the first citation indices called?
(A) Science Citation Index
(B) Social Sciences Citation Index
(C) Shepard's Citations
(D) Permuterm Subject Index
15. What element lets the reader know a citation or quotation is coming?
(A) Signal phrase
(B) Lead
(C) Clincher
(D) Follow-up
16. Which of these would come first in a citation?
(A) The title of the source
(B) The name of the publishing company
(C) The author's first name
(D) The date the information was accessed
(E) The author's last name
17. These appear following evidence within a research essay. These are citations to original sources right after the evidence that typically includes the page number and author's last name.
(A) Parenthetical Citations
(B) Citations
(C) Works Cited Page
(D) MLA formatting
18. The key pieces of information from a source recorded in a specific format
(A) Bibliography
(B) Plagiarism
(C) Source
(D) Citation

19. A doi number should be used in the citation on the reference page when referencing a ____
(A) Source found in the electronic databases
(B) Newspaper or magazine article
(C) Book
(D) Website
20. Which in-text citation is correct in APA?
(A) He writes, "We forgive for ourselves" (Tutu, 2014, p. 16).
(B) He writes, "We forgive for ourselves" (Tutu 16).
(C) Tutu writes, "We forgive for ourselves" (16).
(D) The author writes (2014), "We forgive for ourselves" (p. 16).
21. The researcher can use the author's name and write "n.d".
(A) Six or more authors
(B) No authors
(C) No date
(D) Organization as an author
(E) Same works of one author in the same year
22. It is important to offer oral citations of your sources in your speech.
(A) True
(B) False
23. Which of these is a sign of a reliable source?
(A) It has a lot of advertisements
(B) It provides references and citations
(C) It has a flashy design
(D) It is written by an anonymous author
24. A phrase that introduces a quote, paraphrase, or summary and which identifies the source of the information or quote
(A) Signal phrase
(B) Annotation
(C) Quotation
(D) Lead-in
25. ____ is the author's attempt to quote sentences from other authors that he wants to convey to the reader.
(A) Bibliography
(B) Citation
(C) Reference Manager
(D) Study
26. A bibliography
(A) Is a type of in-text citation
(B) Is a list of all the sources you used
(C) Contains any graphs and charts you referred to
(D) Is a complete list of your footnotes
27. Contains the bibliographical information for every source used by the student.
(A) Works Cited Page
(B) MLA style
(C) Bibliographic information
(D) None of the above
28. If your source of information has two authors, how many do you include in your bibliography?
(A) One
(B) Two
(C) None
(D) Three
29. Which of these reference formatting is not used in UTHM
(A) IEEE
(B) Author, Date
(C) Date, Author
(D) None of above
30. How will you use related studies to support or refute the findings in the body of your research?
(A) By using pictures, drawings and illustrations of data and information.
(B) By incorporating the notes (summary, quote, and paraphrase) gathered in the research.

- (C) By evaluating the results first of previous research before presenting the data or information.
- (D) By referring the research to further studies stated in the recommendation.
31. Which one has a correct Idea Heading Format?
- (A) According to Tabiola (2016), government should value teachers by providing them benefits and security.
- (B) Government should value teachers by providing them benefits and security (Tabiola, 2016).
- (C) Tabiola (2016) claims that government should value teachers by providing them benefits and security.
- (D) Tabiola claims that government should value teachers by providing them benefits and security (2016).
32. Which word means writing the source of your information?
- (A) Paraphrase
- (B) Quote
- (C) Summarize
- (D) Cite
33. Why should students use MLA Format?
- (A) To avoid plagiarism
- (B) Because teachers say they should
- (C) To make a paper harder
- (D) Students shouldn't use it
34. The sequence of sources on a Works Cited or a Bibliography page should be arranged in what order?
- (A) Alphabetically by author's last name.
- (B) Alphabetically by author's first name.
- (C) Chronologically by date of publication.
- (D) Chronologically by date you read or discovered each source.
- (E) The order doesn't matter so long as you include all the sources.
35. This belongs at the end of your research paper. It is a list of the references and resources you used to write your paper.
- (A) Satire
- (B) Photo credit
- (C) Tabloid
- (D) Works cited
36. Which group lists elements commonly placed at the end of an APA paper?
- (A) Abstract, keywords, title
- (B) Methods, results, appendix
- (C) Title page, running head note
- (D) References, tables, figures
- (E) Introduction, hypothesis, aims
37. Academic work depends on the research and ideas of others, so it is vital to show which sources you have used in your work.
- (A) True
- (B) False
- (C) All the above
- (D) None of the above
38. Gives the source (the name(s) of the authors where the information was taken and the year of publication) in the body of the text
- (A) References
- (B) Citation
- (C) Footnote
- (D) Caption
39. What is the term for 'a list of all sources used in the research, whether cited in the research project/paper or not'?
- (A) Bibliography
- (B) Footnote
- (C) Index
- (D) Appendix
40. The researcher should use the name of the organization. "(American Psychological Association, 2015)"
- (A) Six or more authors
- (B) No authors

- (C) No date
 - (D) Organization as an author
 - (E) Same works of one author in the same year
41. An alphabetized list of sources, which appears at the end of your research paper
- (A) Secondary Source
 - (B) Subjective
 - (C) Supporting Detail
 - (D) Works Cited Page
42. The first page of an MLA document includes:
- (A) Student nameTeacher NameDate.
 - (B) Student NameDate.
 - (C) Student NameTitle of paperDate.
 - (D) Student nameTeacher nameCourseDate.
43. True or false:If I included the author's last name in my lead-in sentence, then I do not need to include it in the parenthetical citation.
- (A) True
 - (B) False
 - (C) All the above
 - (D) None of the above
44. What is the significance of including a bibliography in a research report?
- (A) To add length to the report
 - (B) To credit the sources used in the research
 - (C) To confuse the reader
 - (D) To provide personal opinions
45. Where are in-text citations placed in an APA Style essay?
- (A) At the bottom of each page
 - (B) In round brackets after quotations or paraphrases
 - (C) In the reference list
 - (D) After the closing punctuation mark at the end of a sentence
46. When referencing past researcher in a Scientific Investigation report you should always?
- (A) Include first name, surname and year of publication only
 - (B) Include first initial, surname and year of publication only
 - (C) Include surname and year of publication only
 - (D) Include first name, surname, star sign, year of publication only
47. A list of all sources used in a research paper is called a ____
- (A) Table of Sources
 - (B) Footnote
 - (C) Bibliography
 - (D) Table of Contents
48. Match the following definition to the correct concept:A brief mention within the text of an academic work that acknowledge the source of a particular piece of information or a quotation.
- (A) Quotation
 - (B) Citation
 - (C) Reference
 - (D) None of the above
49. How do different citation styles help with academic writing?
- (A) They standardize the process of citing sources
 - (B) They add creative formatting to your paper
 - (C) They help avoid using any external sources
 - (D) They eliminate the need for footnotes
50. References support your arguments with the opinion of acknowledged experts. This can make your own arguments more convincing.
- (A) True
 - (B) False
 - (C) All the above
 - (D) None of the above
51. If you include an image that is not your own in your research paper, you must cite it.

- (A) True
(B) False
52. For all quoted material, the in-text citation must include:
(A) The author's last name, title of source, and page number
(B) The author's last name, year, and page number
(C) The author's last name, year, and the title of the source
(D) None of above
53. To tell where a piece of information is from
(A) Analyze
(B) Bibliography
(C) Cite
(D) Evidence
54. An in-text citation looks like:
(A) (Manton, 2008)
(B) Richard Manton, 2008)
(C) (Manton, R. 2008)
(D) None of above
55. When you give your source information, you are:
(A) Giving credit.
(B) Plagiarism.
(C) Citing your sources.
(D) Sourcing.
56. Who should you ask to help you with APA citation questions on campus?
(A) Dr. Netland
(B) Buster
(C) Librarians
(D) Coach Campbell
57. In-text citations can be seen in the study itself, while the reference list citations can be seen after the recommendations and before the appendices. Both should have the same quantity
(A) True
(B) False
58. Which of the following is not a good reference.
(A) Google Scholar
(B) Wikipedia
(C) JSTOR
(D) ArXiv
59. This contains and lists all of your citations for information you used in your research:
(A) Research paper format
(B) Works cited
(C) Parenthetical citation (in-line citation)
(D) Publisher Edit
60. Plagiarism can be avoided by just ___ sources.
(A) Thinking
(B) Removing
(C) Citing
(D) Listing
61. When writing an in-text citation, what is the first option when referencing the source?
(A) Title of the article.
(B) Title of the website.
(C) Author's name.
(D) Name of publisher.
62. Regardless of the documentation format used, sources should be alphabetized in the bibliographic section of a report
(A) True
(B) False
63. Which word means: Sources that provide trustworthy or believable information to support an argument?
(A) Wikipedia
(B) TikTok
(C) Credible Sources
(D) None of the above
64. References give credit to the sources used.
(A) TRUE
(B) FALSE
(C) All the above
(D) None of the above

65. Which is the correct in-text citation for an organization as author?
(A) (Department of Education, 2020)
(B) (DepEd, 2020)
(C) (Department of Education DepEd, 2020)
(D) (Department Education, 2020)
66. How can a citation index be useful for researchers?
(A) It helps them identify the most popular journals in their field.
(B) It allows them to search for articles by author.
(C) It helps them find related articles that cite a specific work.
(D) It provides them with the full text of articles.
67. To 'Cite JSTOR' means:
(A) To reference sources from JSTOR in your work
(B) To download articles from JSTOR
(C) To subscribe to JSTOR's newsletter
(D) To create an account on JSTOR
68. If you quote directly from a source, what do you need to do
(A) Put quotes around the copied text
(B) Put the copied text in italics
(C) Make the quote bold
(D) Start a new paragraph
69. What reminders or criteria should be considered when selecting and citing proper literature when a researcher makes sure that the sites and sources are all recognisable?
(A) Appropriateness of the literature
(B) Reliability of the literature
(C) Identifiability of the literature
(D) The recency of the literature
70. What is a Works Cited page?
(A) A page that lists info about you.
(B) A page at the end of your paper that lists all of your sources.
(C) A page where you list your favorite quotes or songs.
(D) The assignment rubric.
71. Procedures and requirements for scholarly research according to the Modern Language Association.
(A) Format
(B) MLA style
(C) Drafting
(D) None of the above
72. Choose the correct in-text citation for paraphrasing
(A) (sara, 2021)
(B) (Al Shamsi, 2021)
(C) (Al Shamsi, 2021, p.45)
(D) Al Shamsi, 2021
(E) Al Shamsi, Sara, 2021
73. What is a source?
(A) Quoting a text word for word
(B) Where you get your info-book, website
(C) Taking someone's ideas and passing them off as your own
(D) Main points only; written like a list
74. HERE IS A REFERENCE: Brown, T.M. (1982) Prevention of pest resistance to synthetic pyrethroid insecticides. Chemical Times and Trends 5, 33-36. WHAT WOULD AN IN-TEXT CITATION LOOK LIKE FOR THIS ARTICLE?
(A) Brown, T.M., 1982
(B) (Brown, T.M., 1982)
(C) (Brown, 1982)
(D) Brown, 1982
75. Why is it important to assess the credibility of sources when reviewing literature?
(A) To make the review appear longer
(B) To ensure sources are from reputable, academic sources
(C) To align with the researcher's opinions
(D) To find the most recent sources

76. What is the purpose of citing sources in a literature review?
- (A) To give credit to the original authors
 - (B) To provide evidence for the claims made
 - (C) To allow readers to find the original sources
 - (D) All of the above
77. All of the following are part of a source citation except:
- (A) Author
 - (B) URL address
 - (C) Date
 - (D) Address of publisher
78. A list of books or writings about a subject is a —
- (A) Conclusion
 - (B) Reference
 - (C) Bibliography
 - (D) Outline
79. How many in-text citations should you have?
- (A) 10
 - (B) As many as you need to in order to avoid plagiarism
 - (C) 5
 - (D) None
80. Google's Research tool has the ability to create a citation for the information.
- (A) True
 - (B) False
 - (C) All the above
 - (D) None of the above
81. Citations are used to:
- (A) Increase the page count
 - (B) Support arguments and avoid plagiarism
 - (C) Confuse readers
 - (D) Replace the conclusion
82. You do not need to include in-text citations when summarizing or paraphrasing information from an outside source.
- (A) True
 - (B) False
83. Which of the following is an example of ethical ICT use in class?
- (A) Students post memes insulting their teacher
 - (B) Students create a blog citing all references properly
 - (C) Students hack school wifi to access restricted sites
 - (D) Students copy online projects from classmates
84. Which is the correct way to cite an online source without an author?
- (A) (unknown author 1)
 - (B) ("Title of the Article")
 - (C) (your last name 1)
 - (D) None of above
85. The information about a source and usually includes the author's name, title and the copy-right date
- (A) Citation
 - (B) Source
 - (C) Research
 - (D) Direct quote
86. After the author, the next element to be included in works-cited list is.
- (A) Publication details
 - (B) Date of publication
 - (C) Medium of publication
 - (D) Title of the source
87. Which section of a research paper includes a comprehensive list of all reading materials used?
- (A) Acknowledgment
 - (B) Abstract
 - (C) Introduction
 - (D) References or Bibliography

88. The page that should be included at the end of any research paper or project is called a ____
- (A) End note
 - (B) Epilogue
 - (C) Works cited
 - (D) None of above
89. A ____ refers to acquiring evidence and other information for your essay from books, newspaper articles, websites, experiments etc.
- (A) Source
 - (B) Evidence
 - (C) Resources
 - (D) References
90. What is the importance of citations in a research paper?
- (A) To show off the number of books read
 - (B) To give credit to original authors and avoid plagiarism
 - (C) To make the paper longer
 - (D) To confuse the reader
91. What should not be included when citing a book source in MLA format?
- (A) The total number of pages in the book.
 - (B) The medium the book was published in.
 - (C) The year the book was published.
 - (D) The author(s) of the book.
92. What information do citations typically include?
- (A) Essential information about the source, such as the author's name, title of the work, publication date, and, depending on the source type, additional specifics like page numbers or URLs.
 - (B) Only the title of the work and the publisher's address.
 - (C) A summary of the source's content and the author's opinion.
 - (D) The price of the book and the number of copies sold.
93. How do you cite a 'Book' in academic writing?
- (A) By mentioning the author's name, book title, publisher, and year of publication.
 - (B) By only mentioning the book title.
 - (C) By only mentioning the publisher.
 - (D) By only mentioning the year of publication.
94. Which of the following terms refers to a list of citations at the end of the literature review?
- (A) Bibliography
 - (B) Theoretical framework
 - (C) Research instrument
 - (D) Conceptual model
95. In the reference list, "n.d" means.
- (A) The article has no publication date.
 - (B) The writer does not have a degree from a college or university.
 - (C) New data is included since the article was first published.
 - (D) There is no DOI.
96. When referencing other works you have cited within the text of your report, you should ____
- (A) State the first and last name of the author
 - (B) Use the author, date citation method
97. Footnotes are used to:
- (A) Add short explanations
 - (B) Collect samples
 - (C) Analyze data
 - (D) Frame hypotheses
98. To cite something is to ____
- (A) Put it in quotation marks
 - (B) Quote as evidence giving credit to someone else
 - (C) Give it a ticket
 - (D) Yell out a name
99. You put your in-text citation inside of ____
- (A) "quotation marks"
 - (B) (parentheses)
 - (C) [brackets]
 - (D) \$dollar signs\$

- 100.** Paraphrasing in the RRL means:
- (A) Copying text exactly
 - (B) Restating information in your own words while crediting the source
 - (C) Ignoring the source
 - (D) Making up new data
- 101.** Is this in-text citation formatted correctly (author's name: Richard Beeman)? John Smith played a crucial role in the creation of the Jamestown settlement. (Richard Beeman)
- (A) YES.
 - (B) NO.
 - (C) Either (A) or (B).
 - (D) Neither (A) nor (B).
- 102.** A research report must be referenced using an acceptable academic style.
- (A) True
 - (B) False
 - (C) All the above
 - (D) None of the above
- 103.** An article, book, website, etc., where you got your information from.
- (A) Source
 - (B) Support
 - (C) Authorities
 - (D) Revision
- 104.** Importance of citing all types of media: Why is it important to cite sources like music, videos, and podcasts in your research?
- (A) Only books need to be cited.
 - (B) Citing these sources shows their relevance to your topic.
 - (C) It makes your paper more entertaining.
 - (D) It makes your paper longer.
 - (E) People only trust papers with music citations.
- 105.** What is needed to cite a direct quote (fewer than 40 words) correctly?
- (A) Page or paragraph number of the source quoted in parentheses
 - (B) Author's last name and year of publication without quotation marks but in parentheses
 - (C) Author's name, year of publication, page or paragraph number of the source quoted and the direct quote is enclosed in double quotation marks
 - (D) None of above
- 106.** According to APA, how large should the hanging indent be from the left margin?
- (A) 12 inches (approximately)
 - (B) 1/2 inch (approximately)
 - (C) 1/4 inch (approximately)
 - (D) 1/76th of an inch (approximately)
- 107.** If I research with a partner and use their notes I must include them in my bibliography.
- (A) True
 - (B) False
 - (C) Depends on the partner
 - (D) Depends if the notes are good or not
- 108.** Gathering of references is not needed.
- (A) True
 - (B) False
 - (C) All the above
 - (D) None of the above
- 109.** A page that appears at the end of a research paper that lists all sources referenced in the body of the paper is called a ___?
- (A) Works cited page
 - (B) Title page
 - (C) Abstract
 - (D) Appendix
- 110.** RDM increases the visibility and impact of research by:

- (A) Website
 - (B) Library
 - (C) Bibliography
 - (D) Journal
140. The citation should clearly state who the source of the information is. "Potter (2016), as he supported the idea of Cunning (2006)"
- (A) Two or more works in one parenthesis
 - (B) Authors with the same last name
 - (C) Indirect sources
 - (D) Organization as an author
 - (E) Same works of one author in the same year
141. What is a key principle when citing sources in your work?
- (A) Cite only direct quotes
 - (B) Cite all borrowed ideas, not just direct quotes
 - (C) Cite only sources you agree with
 - (D) Cite only sources from books
142. Works Cited for a book with one author: If you are citing a book by John Green, what details must you include in the entry?
- (A) Just the book title
 - (B) Just the author's name
 - (C) Author's name, book title, publisher, year published
 - (D) The page you found the information on
 - (E) The city it was published in

- 143.** What is the best way to cite sources in a research paper?
- (A) Use a different citation style for each source
 - (B) Just list the sources at the end of the paper with no specific format
 - (C) Don't bother citing sources, just use the information without giving credit
 - (D) Use MLA citations for your Works Cited and in-text citations
- 144.** What do citations in academic writing help establish?
- (A) A reference list
 - (B) Foundational knowledge on the topic
 - (C) The background of the research paper
 - (D) The theory behind the research
- 145.** What information do you include if there is no known author of a source?
- (A) Publication date
 - (B) Title of the source
 - (C) Publisher name
 - (D) You do not need to cite this source
- 146.** Say you found two papers about the same research: Paper A is the original finding; Paper B is an analysis that references Paper A. You use a section of the analysis from Paper B. Which paper do you cite?
- (A) Paper A
 - (B) Paper B
 - (C) Both
 - (D) None of above
- 147.** Which section lists all cited sources?
- (A) TITLE
 - (B) INTRODUCTION
 - (C) DISCUSSION
 - (D) REFERENCES
- 148.** A complete list of all sources used within a research project. All sources for quotes and paraphrases are included on this list.
- (A) Plagiarism
 - (B) MLA format
 - (C) Works Cited list / Bibliography
 - (D) In-text citation
 - (E) Citation
- 149.** The last page of the research report for Science contained all of the sources the student used to compile her research. What is this page called?
- (A) Source
 - (B) Bibliography
 - (C) Conclusion
 - (D) The preface
- 150.** Where does the bibliography go?
- (A) At the end of a document, usually on a separate page.
 - (B) At the beginning of a document, usually on a separate page.
 - (C) Wherever you want.
 - (D) ALL of them Edit
- 151.** You are referencing a website, which part of the reference goes first?
- (A) Author/sponsor/organisation
 - (B) Title of website
 - (C) Website address
 - (D) Year
- 152.** An incomplete reference list may affect the credibility of a research proposal.
- (A) TRUE
 - (B) FALSE
 - (C) All the above
 - (D) None of the above
- 153.** What is important to do when attributing information to ensure the audience can assess its value?
- (A) Use as many anonymous sources as possible
 - (B) Identify where the information came from
 - (C) Guess the source of the information

- 154.** True or false: When paraphrasing or putting information in your own words, you must include an in-text citation.
- (A) True
 - (B) False
 - (C) All the above
 - (D) None of the above
- 155.** N.D. in a source citation means:
- (A) No Date
 - (B) No Direction
 - (C) Not Duplicated
 - (D) Nerd Domain
- 156.** Which word means writing someone's exact words?
- (A) Paraphrase
 - (B) Quote
 - (C) Summarize
 - (D) Cite
- 157.** You can attribute your research paper by using
- (A) Footnotes
 - (B) Endnotes
 - (C) None
 - (D) Both Footnotes and Endnotes
- 158.** Citations to original sources that appear in the text of a paper
- (A) Primary Source
 - (B) Parenthetical Citation
 - (C) Paraphrase
 - (D) Index
- 159.** Why is it important to include references in a scientific report?
- (A) To show off how many books were read
 - (B) To give credit to sources used for research
 - (C) To make the report look longer
 - (D) To avoid writing a conclusion
- 160.** A list of full MLA citations for sources that you PLAN to use while writing a research paper.
- (A) Source list
 - (B) Works Cited page
 - (C) In-text citation
 - (D) Working Bibliography
- 161.** Reference
- (A) Used to inform a reader about the main idea
 - (B) Used to tell where information can be found
 - (C) Reference means to run fast to English class
 - (D) None of the above
- 162.** An alphabetized list of sources that been used to compile data.
- (A) Table of Content
 - (B) References
 - (C) Bibliography
 - (D) Appendices
- 163.** What is the main difference between References and Bibliography?
- (A) References list only cited works; a bibliography may include background readings not cited
 - (B) References are optional, bibliography is mandatory

(B) Include author's name, title of the source, publication year, and other relevant details
(C) Only author's first initial in the reference list
(D) Double-spaced with a hanging indent in APA style
- 176.** When you list your references at the end of your work, you should ____
(A) Have separate lists for journals, books, websites
(B) Have one long list arranged alphabetically by author, and thereafter chronologically, starting with the earliest date

- (C) Have one long list for all your references arranged alphabetically by author
(D) All of the answer options
- 177.** — is a list of all the sources you used while researching your topic.
(A) Works Cited.
(B) Source Page.
(C) Bibliography.
(D) Citation Page.
- 178.** What should I check when using a source?
(A) Relevance: Does the information RELATE to your topic?
(B) Currency: When was the source published or last updated?
(C) Authority: Who authored the information? What are his or her qualifications?
(D) Bias: Was the information written to be informative, persuasive, or entertaining? Is it trying to sell me something? Does it focus only on one side of a particular issue?
(E) All of the above
- 179.** A Work Cited page includes
(A) Citations for any in-text citations in my essay
(B) Only author/title information for my sources.
(C) Citations for all sources used in the writing of my essay.
(D) Web addresses for all citations.
- 180.** The process of documenting where an idea or information is from is called
(A) Citing
(B) Bookmarking
(C) Researching
(D) Blogging
- 181.** What is an example of a credible source?
(A) Social media posts
(B) Academic journals, books, and official websites.
(C) Personal blogs
(D) Online forums
- 182.** Understanding Works Cited layout. What's important about the layout of your Works Cited page?
(A) It should be colorful.
(B) It should have a picture of each source.
(C) It should be in alphabetical order.
(D) It should list the most important source first.
(E) It should be at the beginning of your document.
- 183.** A page that lists the sources used in a COMPLETED research paper.
(A) Source list
(B) Works Cited page
(C) In-text citation
(D) Working Bibliography
- 184.** References gives credibility to the information you present in assignments
(A) True
(B) False
(C) All the above
(D) None of the above
- 185.** Giving credit to the source from which the ideas, quotes, or information came.
(A) Documentation
(B) Quotation
(C) Concrete detail
(D) None of the above
- 186.** The American Psychological Association (APA) style guide is the most commonly used in what specific disciplines?
(A) Natural and Health Sciences
(B) Education, Psychology, Business, Economics
(C) Literature, Liberal Arts
(D) Medicine, Journals, Newspaper
- 187.** In-text citations appear where in the paper?
(A) At the end
(B) Throughout
(C) At the beginning
(D) Nowhere

- 188.** How does citation help in writing academic papers?
- (A) It helps develop better writing skills
 - (B) It makes the paper more interesting
 - (C) Proper citation practices contribute to academic integrity
 - (D) It makes the paper longer
- 189.** In what order should sources in a bibliography be arranged?
- (A) Alphabetically by author's last name.
 - (B) Alphabetically by author's first name.
 - (C) Chronologically by date of publication.
 - (D) Chronologically by date of access.
- 190.** What is the correct parenthetical citation to use in the paper if the easybib citation is: Creech, Sharon. "How to Write an Essay." How to Write. Learn.com, 2015. 5 January 2017.
- (A) ("Creech").
 - (B) (Creech, Sharon).
 - (C) (Creech).
 - (D) ("How to Write an Essay").
- 191.** Which citation is correct?
- (A) (Manton, 2008)
 - (B) Richard Manton, 2008)
 - (C) (Manton, R. 2008)
 - (D) None of above
- 192.** What is an organizational method for recording research information and its sources?
- (A) Pro-con chart
 - (B) Electronic or written notecards
 - (C) All the above
 - (D) None of the above
- 193.** What is the meaning of word "citation"?
- (A) To sing a Taylor Swift Song
 - (B) Where a building is located
 - (C) To write down from where you got the information.
 - (D) None of above
- 194.** Information that is common knowledge requires no documentation
- (A) True
 - (B) False
- 195.** The page that lists the copyright (publishing year) of a source
- (A) Cite
 - (B) Bibliography
 - (C) Index
 - (D) Copyright page
- 196.** What is NOT required in a bibliography for a book?
- (A) Author
 - (B) Title
 - (C) Page numbers
 - (D) Publisher
- 197.** A list of the sources that are referenced, paraphrased and quoted in the body of the paper.
- (A) Works Cited Page
 - (B) Quote
 - (C) In-Text Citation
 - (D) None of the above
- 198.** What is "DOI" stands for?
- (A) Daily Operating Instruction
 - (B) Digital Object Identifier
 - (C) Document Oriented Interface
 - (D) Digital Opportunity Initiative
- 199.** How is the Works Cited page arranged?
- (A) Alphabetically, by title of the work
 - (B) Alphabetically, by the author's first name
 - (C) Alphabetically, by the author's last name
 - (D) By publication year
- 200.** DOI stands for:
- (A) Data of India
 - (B) Digital Object Identifier
 - (C) Document of Internet
 - (D) Draft Object Information

- 201.** What is the purpose of a bibliography
- (A) Provide additional readings on a report
 - (B) Provide all publications related to a report topics
 - (C) Provide a list of references cited in a report
 - (D) Provide a list of all sources related to a report
- 202.** Which of the following in-text citations is correct for a source with 3 or more authors?
- (A) (Smith, John, & Sloan, 2006)
 - (B) (Smith, John, Sloan, Brown, Lee, Simmons, & Morth, 2006)
 - (C) (Smith et al., 2006)
 - (D) None of above
- 203.** Your works cited page (bibliography) should be in ____ order.
- (A) Alphabetical
 - (B) Chronological
 - (C) Random
 - (D) Numerical
- 204.** What is a common feature of a bibliography?
- (A) It includes personal opinions
 - (B) It lists all sources used
 - (C) It contains fictional stories
 - (D) It provides a summary
- 205.** When should you cite a source on your bibliography?
- (A) Each time you write an idea that is your own
 - (B) Each time you write a fact or idea that is NOT your own
 - (C) Each time you write a word that the reader may not know.
 - (D) None of above
- 206.** Helps the reader find the sources. ()
- (A) Hook
 - (B) In text citation
 - (C) Paraphrase
 - (D) None of the above
- 207.** Which of the following is an example of a relevant source for a research paper on climate change?
- (A) A blog post about a personal vacation.
 - (B) A peer-reviewed journal article on global warming.
 - (C) A novel set in a dystopian future.
 - (D) A cooking recipe for vegan meals.
- 208.** Sources themselves can also lead the way to more sources. If an article, for instance, seems particularly helpful or in tune with your claims, examine its ____ or references list. Chances are, the author has already made some connections or used sources that are directly relevant to your topic and position.
- (A) Related
 - (B) Resource
 - (C) Websites
 - (D) Adjacent
 - (E) Works cited
- 209.** Demonstrating knowledge of proper citation and acknowledgement methods helps students to:
- (A) Give credit accurately
 - (B) Avoid reading sources
 - (C) Reduce their workload
 - (D) Circumvent originality checks
- 210.** What is the purpose of incorporating quotations into your text according to the learning material?
- (A) To present another's views in an unclear manner
 - (B) To provide your own views only
 - (C) To present another's views in a striking, clear, and succinct manner
 - (D) To make the text longer without adding value
- 211.** The ____ list includes documentation for all of the other works used to help the authors write the article.
- (A) Introduction
 - (B) Abstract

- (C) Results
(D) References
(E) Methods (or methodology)
- 212.** When copying something word for word, use ____
(A) Exclamation marks
(B) Commas
(C) Quotation marks
(D) Parentheses
- 213.** Explain why allowing readers to locate your sources is an important aspect of citation.
(A) It helps readers verify information and further explore the topic
(B) It makes your paper longer
(C) It impresses your teacher
(D) It is only required for published books
- 214.** Refer to the list of sources that only includes those items you cite in your writing.
(A) Table of contents
(B) References
(C) Bibliography
(D) Appendices
- 215.** A works cited helps your readers by
(A) Explaining why you wrote the paper.
(B) Restating the thesis of your paper.
(C) Allowing them to use your sources to do their own research.
(D) Allowing them to plagiarize your sources in their own papers.
- 216.** When using someone's exact words,
(A) Put them in quotes
(B) Give credit with in-text citations
(C) Both of these
(D) None of above
- 217.** Which of the following is NOT a synonym for "cite"?
(A) Refer to
(B) Mention
(C) Ignore
(D) Quote
- 218.** When you are quoting directly from a source, what information do you need to include in the text?
(A) Author's name
(B) Author's name and date of publication
(C) Author's name, date of publication and page number.
(D) Your name
- 219.** Aanya is preparing a research paper for her class. She needs to list the sources she used on her research.
(A) Sources
(B) References
(C) Literature
(D) Results
- 220.** If your source of information has three authors, how many do you include in your reference page?
(A) One
(B) Two
(C) Three
(D) None of the above
- 221.** At the beginning of the research report, sources are listed on the "Cited Works" page.
(A) True
(B) False
- 222.** What paragraph format is used for works cited?
(A) Border
(B) Indent
(C) Block
(D) Hanging Indent
- 223.** Definition: To quote from a source or sources, requiring proper formatting with quotation marks for academic integrity.
(A) Cite
(B) Sight
(C) Site
(D) Evidence

224. If you are citing a source with no known author in your in-text citation, what should you use instead?
- (A) The title of the source
 - (B) The publication date
 - (C) The publisher's name
 - (D) The URL of the source
 - (C) The name of the website
 - (D) The URL
 - (E) No author
225. When writing a scientific research paper —
- (A) Be as descriptive as possible
 - (B) Include your own opinion
 - (C) Include parenthetical citations
 - (D) Start every sentence with "I think"

- (A) A list of sources that were referenced in a piece of writing. It provides details about each source.
 - (B) A summary of the main ideas in a piece of writing.
 - (C) A collection of quotes from various authors.
 - (D) A bibliography of books used in research.
227. How should the references be organized in a bibliography
- (A) Alphabetically by title
 - (B) Alphabetically by publisher
 - (C) Alphabetically by the authors' last name
 - (D) Numerically
228. Which type of citation corresponds to the definition: "The cited text is identical to the original"?
- (A) Direct citation (verbatim)
 - (B) Indirect citation (paraphrase)
 - (C) Summary without reference
 - (D) Secondary citation
229. Citing a website without an author: If you use information from a website and it doesn't list an author, what do you list first in your citation?
- (A) Anonymous
 - (B) The title of the webpage
230. A list of sources on a selected topic.
- (A) Indicative
 - (B) Biography
 - (C) Bibliography
 - (D) Annotation
231. What does the bibliographic entry begin with when the work does not have an author?
- (A) The title of the work
 - (B) The publisher of the work
 - (C) The year the work was published in
 - (D) The edition number ed. of the work
232. An article, book, video, website, or other media from which information is obtained
- (A) Citation
 - (B) Research
 - (C) Source
 - (D) Plagiarism
233. Match the definition to the term. A list of sources
- (A) Bibliography
 - (B) Autobiography
 - (C) Index
 - (D) None of the above
234. A list of sources at the end of an article
- (A) Footnotes
 - (B) Source
 - (C) References
 - (D) Measures
235. When using APA format, follow the author-date method of in-text citation. Which is the correct way of doing it?
- (A) (Apa, 2019)
 - (B) (Apa 2019)
 - (C) (M. Apa 2019)
 - (D) (Marie Apa, 2019)

- 236.** Match Column (A) with (B): Citations—choose the correct match.
- (A) May be words or pictures that you click to access the site
- (B) Is the international symbol for copyrights
- (C) Sites contain fake situations to steal your data
- (D) Should be included at the end of your research
- (E) Is the abbreviation of "Uniform Resource Locator"
- 237.** Why should you make a record of the website where the source is?
- (A) Website can change and data moved
- (B) So you can find it again and check back on the information
- (C) I do not need to record the source as I can remember where it came from
- (D) The source is not reliable and does not need to be recorded
- 238.** When should I use a bibliography page
- (A) Always
- (B) When I only have one citation
- (C) More than 1 citation
- (D) Doesn't matter
- 239.** What determines the order that sources are placed in the bibliography/works cited?
- (A) Their alphabetical order.
- (B) The order they are used in the given essay.
- (C) The source number.
- (D) They are organized by topic, subject, and stance.
- 240.** When developing a bibliographic list of sources for a formal report, the writer should —
- (A) Include only published sources within your bibliographic list
- (B) Label the page "Works Cited" when using either the APA or MLA format
- (C) List the sources in alphabetical order

- 241.** When using AI for Specified Task Completion, which requirement applies to AI-created content?
- (A) Must be cited using proper MLA citation
- (B) Can remain uncited if teacher approves
- (C) Requires only verbal acknowledgment
- (D) Needs no evaluation by the student
- 242.** With respect to the bibliography, choose the correct statement.
- (A) The reference list may include works not cited in the text
- (B) All items in the bibliography must be cited in the text and vice versa
- (C) Only sources consulted but not cited should be listed
- (D) Only primary sources should appear in the bibliography
- 243.** You must cite your source when you do which of the following —
- (A) Quoting
- (B) Summarizing
- (C) Paraphrasing
- (D) All of these
- 244.** Used to add reference and commentary sparingly and only if necessary in MLA Report
- (A) Paragraph heading
- (B) Endnotes/footnotes
- (C) Tab
- (D) Indent
- 245.** Set of guidelines on how to format a research paper
- (A) To edit
- (B) Encyclopedia
- (C) Article
- (D) To summarize
- (E) MLA format

246. Used to give credit to someone else's words/research in a paper
(A) In-text citation
(B) Keyword
(C) MLA format
(D) Rough draft
247. Is used by the researcher to assure readers that the quotation is accurate even though the spelling or logic might make them confusing.
(A) Ellipsis.
(B) Sic.
(C) DOI.
(D) Slash.
248. What provides a list of each author and paper cited?
(A) References
(B) Abstract
(C) Introduction
(D) Results
249. A separate page at the end of a research paper that includes a list of the sources that you used is?
(A) Primary source
(B) Quote
(C) Secondary source
(D) Works cited
250. For all paraphrased or summarized content, the in-text citation must include
(A) The author's last name and the page or paragraph number
(B) The author's last name and the date of publication
(C) The title of the document and the author's last name
(D) None of above
251. If you do not know the year of publication of your text, you:
(A) Don't need to do anything
(B) Should include n.d. instead of the year of publication
(C) Should include unk. instead of the year of publication
(D) None of above
252. What are tools like Zotero and Mendeley primarily used for?
(A) Data Analysis
(B) Referencing
(C) Visual
(D) AI Writing
253. Which word means: Use evidence from a credible source to support an argument?
(A) Credibility
(B) Trustworthy
(C) Cite
(D) None of the above
254. A DOI (digital object identifier) number should be used in the citation on the reference page when referencing a ____
(A) Source found in the electronic databases
(B) Newspaper or magazine article
(C) Book
(D) Website
255. Do you need to cite charts, graphs, photos, videos, or sound files?
(A) Yes
(B) No
(C) All the above
(D) None of the above
256. Should your "Works Cited" page be at the end of your essay, or on its own page at the very end?
(A) It should follow the last line after your essay body.
(B) It should be on its own page at the very end.
257. Others' writings can be used after paraphrasing.
(A) True
(B) False

258. Which of these pieces of information do we NOT need when citing a book?
- (A) Author
 - (B) Publisher
 - (C) Number of Pages
 - (D) Date of Publication
259. Which of the following is properly cited?
- (A) Researchers discovered graduate students dislike writing.
 - (B) Graduate students dislike writing (Trujillo, 2012).
 - (C) Graduate students dislike writing, according to Ed Jones.
 - (D) None of above
260. What happens if your source does not have a page number? Most websites do not after all!
- (A) Make up a page number
 - (B) Put "NO PAGE NUMBER"
 - (C) Leave it off
 - (D) Make it Page 1
261. What is the significance of "citations" in academic work?
- (A) They add length to the document.
 - (B) They give credit to original sources.
 - (C) They are optional.
 - (D) They are used only in research papers.
262. How should the citations on your Works Cited page be organized?
- (A) Numerically by the order they appear in the paper
 - (B) Alphabetically by the first word in each citation
 - (C) Chronologically by the date of publication
 - (D) Frequency of use-in order of most to least quoted
263. What are two parts of APA style?
- (A) Citation and the reference list
 - (B) Direct quote and paraphrasing
 - (C) Author names and year of publication
 - (D) Given Name and Surname of authors
264. You use direct quotes and paraphrases to
- (A) Support ideas
 - (B) To explain ideas
 - (C) Both of the above
 - (D) None of the above
265. What is the purpose of paraphrasing in a research paper?
- (A) To record the ideas found from a source in one's own words
 - (B) To express specific opinions about each concrete detail
 - (C) To categorize research note cards
 - (D) To provide the bibliographic information for a source

 - (B) Have the title "Works Cited" listed at the top of the page.
 - (C) Include all the citations of the sources you used to write your paper.
 - (D) All of the above.

- 270.** What is the basic format for the reference page?
- (A) Title. (Publication Date). Author.
 - (B) Author. (Publication Date). Title.
 - (C) Author. Title. (Publication Date).
 - (D) None of above
- 271.** A list of citations from a research project
- (A) Bibliography
 - (B) Plagiarism
 - (C) Source
 - (D) Citation
- 272.** If we are citing a website with an author but no specific publication date, it should be cited as ____
- (A) Author, N. Name of the website. URL
 - (B) Author, Name. (access date). Name of the website. URL
 - (C) Author, N. (n.d.). Name of the website. URL
 - (D) Author, N. (No date). Name of the website. URL
- 273.** Citing the book of a single author.
- (A) Author's Last Name, Author's First Name. Title. Edition Number ed. City:Publisher, Year.
 - (B) Title. Edition Number ed. City:Publisher, Year.
 - (C) Editor's name:Last Name, First Name, ed. Title. Edition Number ed. City:Publisher, Year.
 - (D) Author's last name, first name. "Title of Article." Name of Journal volume number, issue number (year):page range, DOI or URL.
- 274.** Literature review or survey is offering a right to the researcher to utilize previous study results and figures as such
- (A) True
 - (B) False
- 275.** Which of the following should be included in the references section of a research report?
- (A) All sources cited in the report
 - (B) Only primary sources
 - (C) Only secondary sources
 - (D) Only books
- 276.** A citation is-
- (A) The way you tell your readers about a topic
 - (B) The way you tell your readers certain material in your work comes from another source
 - (C) A personal view or attitude about something
 - (D) A subject
- 277.** An in-text citation is ____
- (A) A reference to the source citation on the works cited; must include the 1st word of the citation in (____).
 - (B) A reference to the source citation on the works cited using the full citation.
 - (C) A reference to the source citation on the works cited using any word from the citation in (____).
 - (D) None of the above
- 278.** In this case, the addition of "a" and "b" after the date of publication is used to indicate that two sources from the same author were used. "(Feliciano, 2005 a; 2005 b)"
- (A) Six or more authors
 - (B) No authors
 - (C) No date
 - (D) Organization as an author
 - (E) Same works of one author in the same year
- 279.** Definition: The address of a World Wide Web page, used for citing online sources.
- (A) BROWSER
 - (B) URL
 - (C) APA
 - (D) HTML
- 280.** Which of the following is the correct reference list entry for a court decision? (App. 7.1)
- (A) Brown v. Board of Education, 347 U.S. 483 (1954).

- (B) Brown vs. Board of Education. 347 U.S. 483 (1954).
(C) Brown v. Board of Educ., 347 U.S. 483 (1954).
(D) A and C would both be acceptable in a reference list.
- 281.** When should you use in-text citations within your paper?
(A) At the end of each page
(B) At the end of each paragraph
(C) Whenever information has come from another source
(D) None of above
- 282.** It is the way you tell your readers that certain material in your work came from another source.
(A) Citation
(B) Bibliography
(C) Quotation
(D) Fair Use
- 283.** If you believe you will use the information from a source, what should you do?
(A) Make note of the information I think I will use.
(B) Add the information about the book to my reference list.

(D) All of the above
- 284.** The first item listed in any citation if available.
(A) Credentials
(B) Author's Name
(C) Date of Publication
(D) Bibliography
- 285.** Match the following characteristics to the correct column: either annotated bibliography or APA literature review. Concentrated on the explicit research query
(A) Annotated bibliography
(B) APA literature review
- 286.** To quote a text or authority
(A) Claim
(B) Compare
(C) Cite
(D) Contrast
- 287.** What is the importance of citing sources in research?
(A) To give credit to original authors
(B) To make the paper longer
(C) To confuse the reader
(D) To avoid writing a conclusion
- 288.** When directly quoting a full sentence, the first word must be capitalized.
(A) True
(B) False
- 289.** Writing that is repeated word for word, surrounded by quotation marks “ ”
(A) Editor
(B) Quote
(C) Dateline
(D) Hard news
- 290.** Which example of a book citation is correctly formatted?
(A) Henley, Patricia. The Hummingbird House. pg 29-32. Denver:MacMurray, 1999. Print.
(B) Henley. The Hummingbird House. 1999
(C) Henley, Patricia. The Hummingbird House. Denver:MacMurray, 1999. Print.
(D) The Hummingbird House. Henley, Patricia. Denver:MacMurray, 1999.
- 291.** An endnote is a citation that is placed at the end of the document.
(A) True
(B) False
(C) All the above
(D) None of the above

- 292.** When documenting sources in your bibliography you need to list the author's last name and then their first initial NOT full first name when using MLA STYLE.
- (A) True
 - (B) False
 - (A) To prove the author's expertise on the topic
 - (B) To increase the word count of the paper
 - (C) To acknowledge and give credit to the original authors' work
 - (D) To make the paper look more professional
- 293.** What happens if there are more than two author for the source?
- (A) Mention all their last names
 - (B) Mention only the first author
 - (C) Only the author whose last name is the earliest in alphabetical order
 - (D) Mention the first author, followed by "et al."
- 294.** A quotation from or reference to a book paper or author that provided evidence in your writing
- (A) Concluding statement
 - (B) Quote
 - (C) Cite
 - (D) Research
- 295.** One purpose of including a bibliography in your report is to:
- (A) Credit people who helped shape your arguments
 - (B) Convince the reader to agree with your conclusions
 - (C) List sources that you plan to consult in the future
 - (D) Prove that no outside sources were consulted
- 296.** In displaying bibliographic information for a journal article, which datum is not included in an electronic database entry?
- (A) Year study was conducted
 - (B) Title of the report
 - (C) Author(s)
 - (D) Year study was published
- 297.** What is the purpose of including citations in academic writing?
- 298.** Why is a reference list important in a research paper?
- (A) It acknowledges sources and avoids plagiarism.
 - (B) It adds credibility to opinions.

307. Which sources should your Works Cited include?
(A) Any of the sources you used in the paper and only those sources
(B) All of the sources you looked at during the research process
(C) Sources readers might consult for additional information but are not used in the paper
(D) Only the sources you used but didn't cite in the body of the paper Edit
308. Which sentence demonstrates correct use of a citation in research writing?
(A) According to Smith (2020), the results were inconclusive.
(B) Smith 2020 said the results were inconclusive.
(C) The results were inconclusive, said Smith 2020.
(D) Smith said the results were inconclusive (2020).
309. Hanging indent should be used when writing a works cited entry that is
(A) More than two lines
(B) Longer than one word
(C) Longer than two words
(D) More than one line
310. What is the purpose of the Reference List in a research report?
(A) To list all sources cited in the text
(B) To present visual elements such as tables and figures
(C) To provide additional information not included in the report
(D) To summarize the key findings of the study
311. The author of an Internet article is not an important detail to notice when you evaluate a source.
(A) True
(B) False
(C) All the above
(D) None of the above
312. List of alphabetical sources that will lead readers to new info
(A) References
(B) Appendices
(C) Literature review
(D) In-text citation

- 313.** What should be included for citing a book source in MLA format?
- (A) All answer choice s.
 - (B) The point of view of the book.
 - (C) The number of pages in the book.
 - (D) The city the book was published in.
- 314.** Which term refers to a reference to a source used in the report?
- (A) Abstract
 - (B) Citation
 - (C) Conclusion
 - (D) Hypothesis
- 315.** A reference made within the body of text. It alerts the reader to the source of the information, evidence or quotation.
- (A) Evidence
 - (B) In-Text Citation
 - (C) Works Cited Page
 - (D) None of the above
- 316.** The time a source was researched or published. This is strongly connected to the topic being researched.
- (A) Source
 - (B) Date
 - (C) Reliability
 - (D) Relevance
- 317.** When a thesis cites the same source in both a footnote and the bibliography, how is it counted in this methodology?
- (A) As one unified citation
 - (B) As a weighted duplicate
 - (C) As two separate citations
 - (D) As a conditional citation
- 318.** Which of the following best describes currency of sources in academic writing?
- (A) Source published in a reputable journal.
 - (B) Sources published in the 90's.
 - (C) Sources published on the internet.
 - (D) Sources within the last five years.
- 319.** Where is a works cited page located in an essay?
- (A) Beginning, the first page.
 - (B) Middle, to break up body paragraphs.
 - (C) End, the last page.
 - (D) None of above
- 320.** If you're considering making multiple references to a book, you should check the author's — in a source such as Contemporary Authors or Current Biography Illustrated.
- (A) Articles
 - (B) Essentials
 - (C) Credentials
 - (D) None of above
- 321.** A reference to the source of information is called:
- (A) Citation
 - (B) Annotation
 - (C) Footnote
 - (D) Index
- 322.** Which scenario requires proper citation to maintain integrity?
- (A) Quoting a paragraph from an article
 - (B) Describing personal laboratory observations
 - (C) Writing a reflection on your study habits
 - (D) Solving a math problem independently

- (A) Library circulation desk tutorials
 - (B) Homeroom attendance procedures
 - (C) Student council leadership training
 - (D) PYP Teacher-Librarian orientation support
- 324.** What does a citation primarily serve as in academic work?
- (A) A way of giving credit for sourced material
 - (B) A method to shorten lengthy descriptions
 - (C) All the above
 - (D) None of the above

- 325. Bibliography Means**
(A) Footnote
(B) Quotations
(C) List of books referred
(D) None of the above
- 326. — refers to the complete bibliographic entries or list used by the writer.**
(A) Intext Citation
(B) IEEE Citation
(C) Reference Citation
(D) Chicago Style
- 327. Copying and citing an important phrase, sentence or paragraph word for word from a text is?**
(A) Summarize
(B) Direct quote
(C) Reliable
(D) Source
- 328. Which of the following is an acceptable website to PRE-research a topic but not acceptable as a cited source in the paper?**
(A) NewYorkTimes.com
(B) WashingtonPost.com
(C) Wikipedia.org
(D) WhiteHouse.gov
- 329. Recording where you get your information from**
(A) Citing
(B) Plagiarism
(C) Source
(D) Bibliography
- 330. At the end of your working outline, you should list the references for your speech-the sources of all the supporting material you included.**
(A) True
(B) False
- 331. Secondary referencing is not recommended for academic writing UNLESS When the original work is out of print**
(A) Unavailable through usual sources
(B) Not available in English
(C) When the original work is out of print
(D) All of above
- 332. Citing sources in APA style includes:**
(A) Author, year, and source details
(B) Author's address
(C) Page color
(D) Researcher's opinion
- 333. What is included in the References section of a research report?**
(A) List of authors and papers cited
(B) Data and analysis
(C) Interpretation of results
(D) Key question and literature review
- 334. Which part of a report can bibliography be found? It can be found in the —**
(A) Middle of a research
(B) Last page of a research
(C) Beginning of a research
(D) Introduction part of a research
- 335. Kraizer, S. (2011). Safety on the Internet. Retrieved from <http://safechild.org/categoryparents/safety-on-the-internet/> For this source, the in-text citation is —**
(A) (Kraizer, Safety on the internet, 2011)
(B) (Kraizer, S, 2011)
(C) Kraizer, S, 2011
(D) (Kraizer, 2011)
- 336. Key-word from the works cited page that connects the evidence used to the source it came from; gives credit to the owner/source; first word of the cited source**
(A) Thesis statement
(B) In-text citation
(C) Source
(D) None of the above

337. A direct citation is ____
- (A) When you rewrite the author's words in your own words
 - (B) When you cite word for word from a source
 - (C) All the above
 - (D) None of the above
338. What is required in a bibliography for a magazine?
- (A) Author
 - (B) Page numbers
 - (C) Title
 - (D) All answers are correct
339. A bibliography contains:
- (A) Research findings
 - (B) List of sources used
 - (C) Hypothesis
 - (D) Tools
340. It's important to cite sources you used in your research to be a responsible scholar by giving credit to other researchers and acknowledging their ideas.
- (A) True
 - (B) False
341. Which of the following is an example of an academic reference?
- (A) "According to the latest research by Smith (2023) ____"
 - (B) "Some people say the findings are significant."
 - (C) "You can read about it in this article."
 - (D) "In my opinion, this study proves that ____"
342. Your citation of a piece of evidence should be ____
- (A) ____ at the start of the sentence
 - (B) ____ at the end of the sentence
 - (C) ____ in the middle of the sentence
 - (D) ____ at the end of the report
343. It is a list of all the sources used in the paper
- (A) In-text Citation
 - (B) Summary
 - (C) Reference List
 - (D) Thesis
344. In APA referencing what does the abbreviation pp. stand for?
- (A) Page
 - (B) Pages
 - (C) Paragraph
 - (D) Paper
345. When citing a work by multiple authors (two or more) in your in-text citation, how should you list the authors?
- (A) Use only the first author's last name followed by "et al."
 - (B) Include all authors' last names, separated by commas
 - (C) List the authors' names in alphabetical order
 - (D) Use the first author's last name followed by "and others"
346. If one of your sources has no author listed, you should ____
- (A) Invent a name for the author.
 - (B) Just list the title and all other information.
 - (C) Call the publisher to get the author's name.
 - (D) Just leave that source out of your bibliography.
347. What are sources and why are authors who don't cite their sources less reliable?
- (A) Sources tell us the domain so we can see if that is reliable.
 - (B) Sources tell us the author's biography so we can tell if they have experience.

 - (D) Sources tell us the URL which we need to know.

348. A way to reference a source by giving immediate source information and authority without interrupting the flow of the project. These citations may use parentheses () or be part of the sentence.
- (A) MLA format
 - (B) Works cited list / Bibliography
 - (C) In-text citation
 - (D) Paraphrase
 - (E) Citation
349. Who introduced the first citation index for academic journal articles?
- (A) Eugene Garfield
 - (B) Shepard
 - (C) Wasserman-O'Brien
 - (D) The U.S. Department of Education
350. It is possible to cut and past relevant quotations, as long as you use ___ in your report and reference the work carefully and correctly
- (A) Quotation mark
 - (B) Colons
 - (C) Semicolons
 - (D) None of the above
351. What is a references page?
- (A) A list of every source that is used in a paper
 - (B) It is the same as an in-text citation.
 - (C) The title page.
 - (D) It is another name for the appendix.
352. What is the function of a "bibliography"?
- (A) To summarize the main points of the text
 - (B) To list sources used in research
 - (C) To provide personal opinions
 - (D) To outline the course content
353. Citing a source with no known author: How do you cite a source if you don't know the author's name?
- (A) Invent an author name.
 - (B) Use "Anonymous."
 - (C) Start the citation with the title of the work.
 - (D) Skip the citation.
 - (E) Use "Author unknown."
354. Works Cited page goes at the end of the paper or presentation.
- (A) True
 - (B) False
355. True or False: If you have citations in your essay, you don't have to have a works cited page.
- (A) True
 - (B) False
 - (C) All the above
 - (D) None of the above
356. What is used to add reference and commentary at the end of a report?
- (A) Endnote
 - (B) Report
 - (C) Header
 - (D) None of the above
357. The following are the guidelines in direct quoting EXCEPT:
- (A) Copy exactly the part of the text that you want to use.
 - (B) Use quotation marks to show the beginning and ending of the quote
 - (C) Format your quotation properly

358. What is the role of a bibliography in a research paper?
- (A) To provide a summary of the research
 - (B) To list all the sources referenced in the paper
 - (C) To introduce the topic
 - (D) To present the author's opinion
359. Which is an example of a correct parenthetical citation from a book source?
- (A) (Doe, pg.40)

- (B) (Doe on page 40)
(C) (Doe 40)
(D) (I got this from the book by that Doe guy, and it was on the 40th page of the book; O'Connor Baseball Rules!!!)
- 360.** Alphabetical list of all the resources used in a research paper
(A) Bibliography
(B) Cite
(C) Biography
(D) Encyclopedia
- 361.** The references at the end of your paper should appear
(A) In alphabetical order by authors' surname or by title (if there is no author), regardless of type of reference (book, film journal article, website, etc.).
(B) Under separate subheadings according to type of source.
(C) First under those with authors, then those without.
(D) Numbered in the order in which they appear.
- 362.** It provides the reader with all the information needed to seek out and obtain all original sources used in the research. it is written in alphabetical order.
(A) Discussion section
(B) Reference Section References/ Bibliography
(C) Summary and Conclusions
(D) Appendices
- 363.** Citation indexes are useful for:
(A) Listing books alphabetically
(B) Tracking how often a work is cited
(C) Determining author's income
(D) Providing access to raw data
- 364.** To repeat words from a book, an author, a website, etc.
(A) Quote
(B) Revise
(C) Source material
(D) Text evidence
- 365.** A citation in a document placed at the bottom of the page in the document
(A) Endnote
(B) Footnote
(C) All the above
(D) None of the above
- 366.** What is the purpose of summarizing key ideas with quotes and paraphrases during background research?
(A) To make your report longer.
(B) To demonstrate your writing skills.
(C) To incorporate and credit information from your sources.
(D) None of the above
- 367.** This section should be an alphabetized list of all the academic sources of information utilized in the paper.
(A) Conclusion
(B) References/Bibliography
(C) Methods
(D) None of the above
- 368.** What is the term for 'a reference to the author's name, title of work, date published, publisher, and/or page numbers of quoted or paraphrased text'?
(A) Citation
(B) Summary
(C) Annotation
(D) Footnote
- 369.** What does the term 'peer-reviewed' mean in the context of research sources?
(A) Reviewed by friends
(B) Reviewed by experts in the field
(C) Reviewed by the general public
(D) Reviewed by the author

370. Chavez. (2020) Counselling in the Modern World. Makati Philippines. What is this way of the researcher in expressing appreciation to her research paper?
- (A) Acknowledgement
 - (B) In-Text Citation
 - (C) References
 - (D) Table of Contents
371. If the name of the article is really long, are you allowed to shorten it for an in-text citation?
- (A) Yes
 - (B) No
 - (C) All the above
 - (D) None of the above
372. Where can you find the list of references in a research report?
- (A) At the beginning
 - (B) At the end
 - (C) In the methodology
 - (D) In the introduction
373. What information tells you that a citation refers to a journal article instead of a book?
- (A) Year
 - (B) Author
 - (C) Title
 - (D) Volume and issue numbers
374. Both the author's name and the date are placed in an open and close parenthesis. "___ (Johannson, 2017)
- (A) Narrative in-text citation
 - (B) Parenthetical in-text citation
 - (C) One author
 - (D) Two authors
 - (E) Three to five authors
375. The VERY LAST PAGE of your paper where all of the sources YOU CITED/USED in your paper are listed in ABC order, and must follow a specific format (MLA)
- (A) MLA format
 - (B) Works cited page
 - (C) Parenthetical citation
 - (D) Thesis statement
376. The researchers need to cite the shreds of evidence coming from the different sources effectively.
- (A) TRUE
 - (B) FALSE
 - (C) SOMETIMES
 - (D) None of above
377. A list of all references used in report. This allows the writer to give credit to the author of the material used in the report.
- (A) Works cited
 - (B) Unbound report
 - (C) Title Page
 - (D) Bound Report
378. Choose the correct parenthetical citation for the following citation: Miller, John. "Friends of the Lorax." National Review, Biography in Context, 2012, p. 25.
- (A) (John Miller).
 - (B) ("Friends of the Lorax").
 - (C) (Biography in Context).
 - (D) (Miller).
379. When you quote a quote, you must identify its source and the reason for using it.
- (A) True
 - (B) False
380. It will reflect all kinds of special interests, even biases, so you need to position them within your paper as reliable sources.
- (A) Sources
 - (B) Research
 - (C) Citation
 - (D) Quotation
381. The sixth edition of the Publication Manual of the American Psychological Association provides information on

- (A) Organization of content.
 (B) How to format your paper.
 (C) Writing style.
 (D) All of the above.
- 382.** What is the correct reference format for a web document?
 (A) What is holistic medicine? 2012. Retrieved from <http://www.holisticmed.com/whatis.html>
 (B) Gold, M. (2012). What is holistic medicine? <http://www.holisticmed.com/whatis.html>
 (C) Martin Gold. (2012). What is holistic medicine? <http://www.holisticmed.com/whatis.html>
 (D) Gold, M 2012, What is holistic medicine?, viewed 30 July 2014, <http://www.holisticmed.com/whatis.html>.
- 383.** Lists all the sources used in the research
 (A) Data
 (B) Literature Review
 (C) Methodology
 (D) References
- 384.** An exact copy from a source or author; using the exact words with quotation marks and a citation is called a ____
 (A) Works Cited
 (B) Paraphrase
 (C) Quote
 (D) Publisher
- 385.** What citations are required to cite classical works (i.e. the Bible and the Qur'an) and personal communications?
 (A) Both in-text citations and reference list entries
 (B) Only in-text citations
 (C) Only reference list entry
 (D) Neither in-text citations or reference list entries are required
- 386.** Kate is working on her RRL, she has three authors. What she do with the authors' names?
 (A) Do not write all the names of the authors
 (B) Write the well-known author only

- 399.** Which of the following best describes the role of citations in academic writing?
- (A) To make the text longer.
- (B) To express personal opinions.
- (C) To provide evidence and support for claims.
- (D) To confuse the reader.
- 400.** What is the list of sources that the author uses when writing an article?
- (A) References
- (B) Abstract
- (C) Literature
- (D) Footnote
- 401.** What information do you put when you can't find the author of your source?
- (A) Just the year of publication
- (B) Page number
- (C) Leave it blank
- (D) Title of the article

- 402.** The Works Cited page tells the reader
- (A) Where the writer found all of the information that has been cited in the paper
 - (B) All of the things the writer has ever read on the topic
 - (C) Only the sources the writer has directly quoted in the paper
 - (D) None of the above
- 403.** An in text citation
- (A) Is at the bottom of a page
 - (B) Is at the end of a report
 - (C) Contains author's last name and page number inside parentheses
 - (D) None of these
- 404.** Stating of another piece of writing in your own words is?
- (A) Glossary
 - (B) Source
 - (C) Paraphrase
 - (D) Quote
- 405.** Which of the following is a citation for the quote, "You don't forget the face of the person who was your last hope." from page 104 *The Hunger Games* by Suzanne Collins?
- (A) ("The Hunger Games").
 - (B) (104).
 - (C) (Collins 104).
 - (D) (Collins pg. 104).
- 406.** In-text citations are marked in your text using:
- (A) ()
 - (B) []
 - (C) ‘ ‘
 - (D) “ “
- 407.** If you quote anything word for word, you must identify it with
- (A) A question mark
 - (B) Parenthesis
 - (C) Quotation marks
 - (D) None of the above
- 408.** If you were using EasyBib to help you create a Works Cited entry for a YouTube video, and EasyBib gave you the results below, what additional information would you have to provide?
- (A) The author of the video and publication date
 - (B) The title and author of the video
 - (C) The author of the video and date accessed
 - (D) The title and date accessed Edit
- 409.** Acknowledgement of the authors and/or sources of the article, journal, or any literature that was reviewed
- (A) Citations/Reference
 - (B) Citation Style
 - (C) Literature Review
 - (D) Framework
- 410.** When citing an article that has both a Digital Object Identifier (DOI) and a Uniform Resource Locator (URL), which should be used?
- (A) Use the URL
 - (B) Use the author's name
 - (C) Use both DOI and URL
 - (D) Use the DOI
- 411.** If the article or book doesn't have an author, what will be the format?
- (A) Book/article's title. (Date). Source
 - (B) — (Date). Book/Article's title. Source
 - (C) (Date). Book/Article's title. Source
 - (D) None of the above
- 412.** To give the source of one's information
- (A) Claim
 - (B) Cite
 - (C) Covert
 - (D) Analysis
- 413.** A citation in a document placed at the end of the document.
- (A) Endnote
 - (B) Footnote
 - (C) All the above
 - (D) None of the above

414. Which of the following is NOT a credible source?
- (A) A news article.
 - (B) A interview with an expert.
 - (C) A Facebook post made by your Aunt.
 - (D) A documentary on the topic.
415. Citations of sources used in research.
- (A) REFERENCES
 - (B) PROPONENT'S PROFILE
416. What is citing?
- (A) Giving credit for a resource used
 - (B) Touring a city
 - (C) Using someone else work as your own
 - (D) Using a database for research
417. Gathering references can be done recursively.
- (A) True
 - (B) False
 - (C) All the above
 - (D) None of the above
418. The EXACT words of someone else, must ALWAYS be put into quotation marks (” “) and cited
- (A) Works cited page
 - (B) MLA format
 - (C) Parenthetical citation
 - (D) Direct quotation

- (A) References
 - (B) Abstract
 - (C) Method
 - (D) Introduction
448. ____ is a quote or reference that tells people where you got your information from.
- (A) Citation
 - (B) Summary
 - (C) Opinion
 - (D) Headline

- 449.** In making a reference entry, the year of publication comes before the name/s of the author/s.
- (A) TRUE
 - (B) FALSE
 - (C) All the above
 - (D) None of the above
- 450.** Which statement is true?
- (A) If you quote less than three lines from a book, you don't have to cite it
 - (B) If you quote information from a web site, you don't have to cite it.
 - (C) If you quote information from a print or digital source, you must cite it
 - (D) If you state your opinion in your research paper, you must cite it
- 451.** We don't need to cite when make any reference to another sources.
- (A) True
 - (B) False
- 452.** Author:Rick WarrenBook Title:Purpose Driven ChurchYear Published:1995Publisher:Zondervan
the given information of the book, what will be the correct format if we will use APA Style 7th Edition in referencing?
- (A) Warren, R. (1995). Purpose Driven Church. Zondervan.
 - (B) Warren, R. (1995). Purpose driven church. Zondervan.
 - (C) Warren, R. (1995.) Purpose driven church. Zondervan.
 - (D) None of above
- 453.** What is the main function of the Citation Index?
- (A) To list all authors in alphabetical order
 - (B) To provide keywords for each article
 - (C) To show which articles have cited a particular work
 - (D) To rank articles by their importance
- 454.** Which word means writing only someone's key ideas?
- (A) Paraphrase
 - (B) Quote
 - (C) Summarize
 - (D) Cite
- 455.** What is an in-text or parenthetical citation?
- (A) A list of sources at the end of your paper
 - (B) The author and or page number in parentheses
 - (C) A quoted line from text
 - (D) The name of an article
- 456.** Below are examples of Bibliography, except.
- (A) Books
 - (B) Journals
 - (C) Publications
 - (D) Online source
 - (E) Curriculum vitae
- 457.** The bibliography lists all the sources in alphabetical order by the:
- (A) Date of publication
 - (B) Author's last name
 - (C) Title of source
 - (D) Publishing company
- 458.** What determines the margins of the work cited page?
- (A) Length of the research paper
 - (B) Length of the sheet of paper
 - (C) Margins of the research paper
 - (D) Margins within the software
- 459.** One purpose for citing a source is to ____
- (A) Show readers from where your information came.
 - (B) To add length to a paper.
 - (C) To stress out students.:/
 - (D) To prove information in the paper is true.
- 460.** The way the second line is tabbed in a Works Cited page.
- (A) Hanging Indent
 - (B) Works Cited
 - (C) MLA
 - (D) APA

461. What information about a source is most likely to appear in a bibliography?
- (A) Name of the author.
 - (B) Quotation from the author?
 - (C) Author's date of birth.
 - (D) Author's home city
462. References are added in brackets at the end of the place in the text where they are used
- (A) Yes
 - (B) No
 - (C) All the above
 - (D) None of the above
463. This is an incomplete reference. What is missing? Whelan, S., & Wright, D. J. (2013). Health services use and lifestyle choices of Indigenous and non-Indigenous Australians. *Social Science & Medicine*, 1-12.
- (A) Journal name
 - (B) Page numbers
 - (C) Volume, issue number and DOI
 - (D) Volume and issue number
464. Which of the following should NOT be included in the reference list?
- (A) Articles or books that were actually cited in the paper
 - (B) Sources that support the methodology
 - (C) References that were never cited in the text
 - (D) Relevant conference papers used in the literature review
465. In what order should sources be listed in a Works Cited page?
- (A) Alphabetical by source
 - (B) Alphabetical by author's last name
 - (C) Alphabetical by publisher
 - (D) None of the above
466. If you are not quoting from a source, you only need to include:
- (A) Author's name
 - (B) Year of publication
 - (C) Author's name and page number
 - (D) Author's name and year of publication
467. To repeat or copy a group of words from a text or speech, giving proper credit to the author or speaker.
- (A) Quote
 - (B) Paraphrase
 - (C) Summarize
 - (D) Cite
468. What structure lists down all the primary and secondary research sources?
- (A) Title
 - (B) Review of Literature
 - (C) References
 - (D) Conclusion
469. What is required in the Individual Research Report regarding sources?
- (A) Include a list of works cited
 - (B) Only use online sources
 - (C) Use at least five sources
 - (D) Summarize sources without citation
470. What criteria is considered in selecting and citing proper literature when a researcher makes sure that all the materials are relevant to the chosen study?
- (A) Appropriateness of the literature
 - (B) Reliability of the literature
 - (C) Identifiability of the literature
 - (D) Recency of the literature
471. Any time you include information in your work that isn't your own thinking, you need to ___ it.
- (A) Include a citation
 - (B) Pretend that it's yours

- (A) Author's name
 - (B) Publisher
 - (C) Color of the book cover
 - (D) Year of publication
473. Which of the following is NOT a part of a book bibliography format?
- (A) Name of Publisher
 - (B) Publication Year
 - (C) Date of Access
 - (D) Place of Publication
474. What MUST be included in a website citation?
- (A) The name of your Internet server
 - (B) The date you read the page
 - (C) The e-mail address of the author
 - (D) The location of the computer from which you accessed the page
475. How is the Reference page arranged?
- (A) Alphabetically, by title of the work
 - (B) Alphabetically, by the author's first name
 - (C) Alphabetically, by the author's last name
 - (D) By publication year
476. Bibliography given in a research report:
- (A) Has no relevance to research
 - (B) Shows vast knowledge of the researcher
 - (C) Helps those interested in further research
 - (D) All the above
 - (E) Not aware of
477. Where should your reference page be located in an APA formatted paper?
- (A) It should follow the last line after your essay body.
 - (B) It should be on its own page at the very end.
478. What are "quotation marks" used for?
- (A) To write the source information
 - (B) To represent text that is being borrowed directly for citation
 - (C) To give original sources credit
 - (D) To write a brief statement of events
479. What is the correct format for citing online sources in an annotated bibliography?
- (A) Author, year, title, publisher
 - (B) Author, year, title, publisher, URL, date accessed
 - (C) Author, title, URL only
 - (D) Title, author, publisher
480. Providing the audience information about the source including: titles, web pages, dates, authors, etc. Ex. According to ____
- (A) Primary source
 - (B) Citations
 - (C) Claims
 - (D) Testimony
481. Written by scholars or professionals who are experts in their fields. Also called peer-reviewed, academic or referenced.
- (A) Website
 - (B) Scholarly journals
 - (C) Periodical
 - (D) Atlas
482. Below are 4 correctly cited sources. Think about how a Works Cited page is organized. Which of these would be listed first?
- (A) Humera, Rhonda. Martin Luther King Jr. Harcourt, 2001.
 - (B) "Civil Rights at the Martin Luther King, Jr. Memorial." nps.gov. 2017.
 - (C) Blesser, JaRon. The Life of Martin Luther King Jr. Outside Press, 2004.
 - (D) Cinta, Gabriela. Like a King. Random House, 2011.
483. Data citation methods are required to
- (A) Connect scientific papers with the underlying data on which they are based
 - (B) Motivation for new generation
 - (C) Data collection

- (D) Literature Cited
(E) Literature review
484. There are more than three authors of an article. What is the rule for writing more than three authors?
(A) Lead author's name, comma, etc.
(B) Lead author's name, comma, n.d.
(C) Lead author's name, comma, ed.
(D) Lead author's name, comma, et al.
485. The Literature Cited section gives
(A) An alphabetical listing (by first author's last name) of the references that you actually cited in the body of your paper

584. To cite means
- (A) To do research
(B) To show where you found the information
(C) To point out something
(D) To start a riot

- 585.** This section presents the list of sources you used and cited in your research report.
- (A) Title
 - (B) Reference List
 - (C) Introduction
 - (D) Body
- 586.** Why is it important to include a bibliography in research?
- (A) To give credit to sources used, allow readers to verify information, and avoid plagiarism.
 - (B) To make the research look longer
 - (C) All the above
 - (D) None of the above
- 587.** Find the mistake: According to Jones, the “main reason for war is religion” (1998, p.199)
- (A) You must include “Jones” in the parenthesis
 - (B) The year of publication should come after “Jones”
 - (C) You do not need to include the page number
 - (D) The author’s name should be in square brackets
- 588.** How should you format an in-text citation when quoting directly from a source?
- (A) (Author’s Last Name, Year)
 - (B) (Author’s Last Name, Page)
 - (C) (Author’s Last Name, Year, Page)
 - (D) (Author’s First Name, Year)
- 589.** Which of the following citations is correct?
- (A) The library with the revolver (Scarlet, 2009; Plum, 2008).
 - (B) The library with the revolver (Plum, 2008, Scarlet, 2009).
 - (C) The library with the revolver (White, 2007; Mustard, 2008).
 - (D) The library with the revolver (Plum, 2008; Scarlet, 2009).
- 590.** The last page of your essay is your:
- (A) Conclusion
 - (B) Third body paragraph and conclusion
 - (C) Works cited page
 - (D) Introduction
- 591.** One purpose of a Works Cited page is to
- (A) Show readers from where your information came.
 - (B) To add length to a paper.
 - (C) To stress out students
 - (D) To prove information in the paper is true.
- 592.** What is a Works Cited in a research report?
- (A) A summary of the report’s main findings
 - (B) A complete listing of references cited parenthetically in the report
 - (C) An introduction to the research topic
 - (D) A list of all the books the author has written
- 593.** Which of the following statements best defines a bibliography?
- (A) A list of sources used in a research
 - (B) A sample of books to read later
 - (C) A list of books students need to buy
 - (D) A place to go and borrow books
- 594.** When should you use the abbreviation, “et al.?”
- (A) Only when a work has several authors
 - (B) Only when a work has no listed author
 - (C) Only when a source appears in a magazine or journal
 - (D) Only when a source has no listed publisher
- 595.** More reliable sources display a citation list indicating where the information came from.
- (A) True
 - (B) False
 - (C) All the above
 - (D) None of the above

- 596.** What is the purpose of citing sources in a research paper?
- (A) To confuse the readers
 - (B) To give credit to the original authors and allow readers to verify the information.
 - (C) To make the paper longer
 - (D) To take credit for someone else's work
- 597.** Refers to the source of the information within the body of the text — gives the author's name and date of an article which the writer used — example: (Smith, 2018)
- (A) Assumption
 - (B) Caption
 - (C) Citation
 - (D) Conclusion
- 598.** If a term or idea you want to use is used in a quote from another source, try to locate the original source if you can.
- (A) Inferior citations
 - (B) Secondary citations
 - (C) Tributary citations
 - (D) Minor citations
- 599.** A citation entry should be alphabetized by:
- (A) Date of publication
 - (B) Author's last name
 - (C) Author's first name
 - (D) Publisher
- 600.** Identify whether the following sources are VALID or NOT VALID. educational institutions and their websites
- (A) VALID
 - (B) NOT VALID
- 601.** Which type of citation corresponds to the definition: "The cited text is expressed in our own words"?
- (A) Indirect citation (paraphrase)
 - (B) Direct citation (verbatim)
 - (C) Block quotation
 - (D) Footnote-only reference
- 602.** What is bibliographic information?
- (A) A list of sources used in a research project
 - (B) Information including the title, author, date of publication, and pages of a source
 - (C) A final inference or understanding about a topic
 - (D) Taking credit for the ideas and words of others
- 603.** What is a common mistake when citing sources?
- (A) Relying only on memory to recall the source details
 - (B) Using footnotes correctly
 - (C) Including detailed reference lists
 - (D) Paraphrasing the text properly
- 604.** The person, book, or document that provides information is —?
- (A) A project
 - (B) A source
 - (C) An answer
 - (D) None of the above
- 605.** Imagine Zoe, Ava, and Samuel are working on a super cool project about space. They found an amazing fact about black holes and decided to include it in their presentation. What does it mean to "cite" the source of this amazing fact?
- (A) To find a source
 - (B) To use a source without mentioning where it came from
 - (C) To give credit to the source of information
 - (D) To compare different sources
- 606.** Which of the following would be included in a book citation?
- (A) Author, volume and issue number, publisher name
 - (B) Author, title, publisher name
 - (C) Title, month and date published
 - (D) None of above

- 607.** Choose the correct format for citing personal communication:
- (A) (M. Angelou, personal communication, September 8, 2020)
 - (B) (Maya, personal communication, September 8, 2020)
 - (C) (M. Angelou, email, September 8, 2020)
 - (D) None of above
- 608.** When the source is from YouTube, the author is the name of the person who uploaded the video.
- (A) True
 - (B) False
- 609.** What is the correct author and year format for a journal article in a reference list?
- (A) Brill, J. B. (2011).
 - (B) Brill, JB, (2011).
 - (C) Brill, J. B. 2011.
 - (D) John Brill, 2011.
- 610.** A list of the sources of a research paper, including full bibliographic references for each source the writer consulted while conducting research
- (A) Plagiarism
 - (B) Primary source
 - (C) Secondary source
 - (D) Bibliography
- 611.** A ____ is placed within the text and includes the authors' last names and the publication year. A ____ is placed at the end of a paper and includes information on the authors, year, title of the source, and publication data to prevent plagiarism and give proper citation to work referred.
- (A) Quotation; citation
 - (B) Reference list; quotation
 - (C) Citation; reference list
 - (D) Reference list; citation
- 612.** Which part of a Social Studies report will list all of the sources?
- (A) Table of Contents
 - (B) Title Page
 - (C) Works Cited
 - (D) Report Body
- 613.** As a verb, to provide a reference to a source.
- (A) Plagiarize
 - (B) Site
 - (C) Revise
 - (D) Cite
- 614.** Used to accompany parenthetical citations
- (A) Notes Page
 - (B) Works Cited
 - (C) Unbound Report
 - (D) Title Page
- 615.** Definition: The use of properly documented textual evidence in a paper or project.
- (A) Textual Evidence
 - (B) Summary
 - (C) Citation
 - (D) Hypothesis
- 616.** When you must use a long quotation, which of the following guidelines should you follow?
- (A) Put it directly at the start of the paragraph
 - (B) Summarize and introduce it in your own words
 - (C) Put another long quotation after it.
 - (D) Put the long quotation as the first sentence of the introduction
- 617.** What is the primary purpose of identifying relevant sources in research?
- (A) To ensure the information is entertaining.
 - (B) To make the research paper longer.
 - (C) To provide accurate and credible information.
 - (D) To confuse the reader with complex data.

- 618.** Which of the following is a key component of academic formatting in research reports?
- (A) Use of casual language, making research easy to understand
 - (B) Inclusion of emotional appeals in presenting data
 - (C) Consistent citation style throughout the report
 - (D) Avoidance of headings and subheadings
- 619.** What if you have more than three authors for a work?
- (A) List them all out
 - (B) List only one.
 - (C) List the first one followed by et al.
 - (D) Put the words "Too Many Authors to List"
- 620.** Look at this reference. What kind of material is being referenced? Tan, A. C. W., Emmerton, L. M. & Hattingh, H. L. (2012). Issues with medication supply and management in a rural community in Queensland. Australian Journal of Rural Health, 20(3), 138-143. doi:10.1111/j.1440-1584.2012.01269.x
- (A) Book
 - (B) Book chapter
 - (C) Journal article
 - (D) Web page
- 621.** What do you need to add to your project when you use a book for research?
- (A) Citation
 - (B) An Image
 - (C) Page Numbers
 - (D) None of above
- 622.** Which of the following quotes is cited correctly?
- (A) "Humor helps in difficult times." (Barry, 2005, p. 21).
 - (B) Barry (2005) said, "Humor helps in difficult times" (p. 21).
 - (C) Barry (2005) noted, "Humor helps in difficult times."
 - (D) None of above
- 623.** How do you cite a picture from the internet in your bibliography (what 3 things do you have to include)?
- (A) Accessed Day Month Year. URL. What web site it is on.
 - (B) Description of Image. URL. Accessed Day Month Year.
 - (C) Date. What project you used it in. URL.
 - (D) None of above
- 624.** To identify the source of ideas, information, and words that you use in your own writing.
- (A) Summarize
 - (B) Cite
 - (C) Quote
 - (D) Plagiarize
- 625.** The researcher should use the title of the article or the first important keyword followed by the date. "Based on the article, "Citing a Reference", (2014)"
- (A) Six or more authors
 - (B) No authors
 - (C) No date
 - (D) Organization as an author
 - (E) Same works of one author in the same year
- 626.** If you find a great website as a source for your English project, which of the following is true?
- (A) You can copy and paste the text, but not the images, into your report
 - (B) You can't use any of the information on the site without permission
 - (C) You can use information on the site as long as you cite it properly
 - (D) You don't have to cite your source if you only use short quotations
- 627.** Which practice describes rewriting a source in your own words while acknowledging the source?
- (A) Paraphrasing with proper source acknowledgement
 - (B) Translating text directly without credit

- (C) Summarizing original ideas with no citation
(D) Quoting extensively without attribution
- 628.** How is the Reference List arranged?
(A) Alphabetically, by title of the work
(B) Alphabetically, by the author's first name
(C) Alphabetically, by the author's last name
(D) By publication year
- 629.** What is the correct way to format author names when there are 3 or more?
(A) Smith, Eric, et al.
(B) Eric Smith, et al.
(C) Smith, Eric, et. al.
(D) Eric Smith, et. al.
- 630.** Blass, E. M. (1997). Interactions between contact and chemosensory mechanisms in pain modulation in 10-day-old rats. *Behavioral Neuroscience*, 111, 147-154. doi:10.1037/0735-7044.111.1.147 What type of citation is this?
(A) Book chapter
(B) Book
(C) Journal
(D) Website
- 631.** Colin and Nora are working on their research report. What is the purpose of a bibliography in their report?
(A) To summarize the report
(B) To list the sources used in the research
(C) To introduce the topic
(D) To provide a conclusion
- 632.** What should separate the main parts of each reference in a bibliography?
(A) Comma
(B) Colon
(C) Quotation marks
(D) Period
- 633.** After you locate a source, you should write down all details of the reference, except;
(A) Price.
(B) Volumes.
(C) Titles.
(D) Full names of the authors.
- 634.** Which of the following would be the best choice as a reference?
(A) Peer-reviewed article
(B) Corporate website
(C) Encyclopedia
(D) Search engine
- 635.** What should not be included when citing a magazine source in MLA format?
(A) The name of the magazine.
(B) The page numbers of the article.
(C) The author(s) of the article.
(D) The name of the magazine's editor.
- 636.** What is the role of citations in a literature review?
(A) To provide evidence to support the research hypothesis
(B) To give credit to the original authors and sources of information
(C) To demonstrate the author's expertise in the field
(D) To manipulate the data to fit the research objectives
- 637.** To copy a quote or idea from an author/source and give credit to it
(A) Evidence
(B) Research
(C) Credible
(D) Cite
- 638.** Imagine you're on a treasure hunt in the vast library of knowledge with Elijah, Kai, and Zoe. You stumble upon a golden piece of information. What does it mean to "Cite" this source?
(A) To make an educated guess based on the source

- (B) To collect data from the source
(C) To give credit to the source of information
(D) To find the main idea in the source
- 639.** In the bibliography, the first information written about a source is the ____.
(A) Name of the author
(B) Title of the book
(C) Name of the publisher
(D) Place of publication
- 640.** A student writes: "According to Cruz (2019), classroom design affects motivation." This is an example of:
(A) Citation
(B) Delimitation
(C) Scope
(D) Problem statement
- 641.** What information is needed when citing a website?
(A) A Summary
(B) URL
(C) The name of the company that built the site.
(D) Where it appears on Google
- 642.** When creating a Works Cited page, which detail is NOT necessary?
(A) The author's name
(B) The publication date
(C) The research question
(D) The source's title
- 643.** Only sources actually cited in the research paper should be included on the Works Cited page.
(A) TRUE
(B) FALSE
- 644.** What is citation?
(A) Special mention of favorite texts
(B) Paraphrased information
(C) Written acknowledgement of source
(D) None of above
- 645.** Which sentence correctly uses a citation in MLA format?
(A) According to Smith, "Research is essential" (Smith 23).
(B) "Research is essential" (Smith, 23).
(C) According to Smith, "Research is essential." (23)
(D) "Research is essential" (Smith 23).
- 646.** An in text indicator that lets the reader know where information was found
(A) Works cited page
(B) Parenthetical citation
(C) Source information
(D) Attribution
- 647.** What goes in the upper right corner of a MLA formatted paper?
(A) Your full name
(B) The name of your professor
(C) The title of your essay
(D) Your last name and page number
- 648.** Quoting is ____
(A) Copying the author's exact words and giving credit.
(B) Copying the author's exact words without giving credit.
(C) Restating the author's ideas and giving credit.
(D) None of the above
- 649.** When should you cite a source?
(A) Each time you write an idea that is your own
(B) Each time you write a fact or idea that's not your own
(C) Each time you write a word that the reader may not know
(D) Each time you include your own photo or drawing
- 650.** Bibliography may contain the name of the books and pamphlets.
(A) True
(B) False

651. Why is referencing important in academic writing?
- (A) To confuse the reader.
 - (B) To give credit to the authors.
 - (C) To avoid summarizing key ideas.
 - (D) None of the above
652. What information should be included when heading each page of notes or document in the secondary research file?
- (A) Author's name and date only
 - (B) Author and initials, date of publication, title, and place of publication
 - (C) Journal name and page numbers only
 - (D) Place of publication and publisher only
653. Works Cited entry for a webpage with a corporate author. If the CDC published a page on flu prevention, how do you cite it?
- (A) Flu Prevention. CDC, URL.
 - (B) CDC. "Flu Prevention." URL.
 - (C) CDC: Flu Prevention. Web.
 - (D) Flu Prevention, CDC, Accessed Date.
 - (E) CDC, "Flu Prevention," Web.
654. True or false, a citation shows we are building off the ideas and thought of others, and gives these people the credit they deserve.
- (A) True
 - (B) False
655. A common mistake when writing references is:
- (A) Citing credible sources such as journals and conferences
 - (B) Following a standard referencing style (e.g., IEEE, APA)
 - (C) Mixing different styles or providing incomplete details
 - (D) Numbering references consistently in the order they appear
656. This list typically appears at the end of a scholarly source and provides detailed information explaining where the writer took the information provided in the article from.
- (A) References
 - (B) Works Cited
 - (C) Logos
 - (D) Ethos
657. What do you include in an in-text citation?
- (A) Author's last name and page number
 - (B) Book title and page number
 - (C) Author's last name and book title
 - (D) Author's first and last name
658. Why would you use a direct quotation instead of a paraphrase?
- (A) The quotation is really well stated ____ you couldn't say it better
 - (B) The quotation is from an expert who lends credibility to your argument
 - (C) Both of these are reasons to use a direct quotation instead of a paraphrase
 - (D) None of the above
659. True or False? A Works Cited entry usually starts with an author's last name.
- (A) True
 - (B) False
660. Documenting information important to your research process; giving credit to the original information
- (A) Secondary Source
 - (B) Reliable Source
 - (C) Citing Sources
 - (D) Clarify
661. Why include updated and credible references in a protocol?
- (A) To replace the need for methodology
 - (B) To justify higher budget requests
 - (C) To strengthen the study's scientific foundation
 - (D) To serve as the primary data source
662. Affiliation should include:
- (A) Home address
 - (B) University/Department/Email

- (C) Social media handle
(D) Passport number
- 663.** A reference to a source; it tells where the information comes from
(A) Research
(B) Citation
(C) Works Cited Page
(D) None of the above
- 664.** There is no need to cite if the writer is paraphrasing.
(A) True.
(B) False.
- 665.** You find a photo on the Internet that you would like to include in your report. What is the proper way to use this photo?
(A) Copy and paste the photo into your paper.

(B) Cite the photo and include in your list of sources.
(C) Edit the photo to make it your own.
(D) Include a title for the photo in your paper. Edit
- 666.** To find out whether a specific source was used in a research paper, the reader should consult the:
(A) Introduction
(B) Table of contents
(C) Bibliography
(D) Conclusion
- 667.** Which section contains references to other works?
(A) Introduction section
(B) Conclusion section
(C) Appendix section
(D) References or Works Cited section
- 668.** A works cited page, or bibliography, lists the ____ used to create an educated final product.
(A) Information
(B) Sources
- (C) Data
(D) Quotes
- 669.** A list of all of the sources that an author consulted or quoted as he or she was writing his or her own work. (a list of where you got the information)
(A) Citation.
(B) Subheading.
(C) Bibliography.
(D) Heading.
- 670.** Which of these is cited correctly?
(A) Romantic poetry is characterized by the "spontaneous overflow of powerful feelings," (Wordsworth 263).
(B) Romantic poetry is characterized by the "spontaneous overflow of powerful feelings." (Wordsworth 263)
(C) Romantic poetry is characterized by the "spontaneous overflow of powerful feelings" (Wordsworth p. 263).
(D) Romantic poetry is characterized by the "spontaneous overflow of powerful feelings" (Wordsworth 263).
- 671.** APA Style stands for
(A) American Publicizing Association (APA) Style
(B) American Psychological Association (APA) Style
(C) American Publishing Association (APA) Style
(D) American Periodical Association (APA) Style
- 672.** How should sources be cited in an annotated bibliography?
(A) They should not be cited at all
(B) By providing full citations at the end of the document
(C) Using the appropriate citation format based on the source type
(D) Only including URLs

- 673.** References lists are ordered alphabetically by:
- (A) Authors first name
 - (B) Year
 - (C) Authors surname
 - (D) Title
- 674.** Which in-text citation uses the period correctly?
- (A) "This is the direct quote." (Author 1)
 - (B) "This is the direct quote" (Author 1).
- 675.** A list of resources that you create to give credit to the author
- (A) Works cited
 - (B) Citation
 - (C) Direct quote
 - (D) Plagiarize
- 676.** Which one has a correct direct quotation format?
- (A) "Teaching is touching lives forever" (Culaba, 2015).
 - (B) "Teaching is touching lives forever" (Culaba, 2015, p. 15).
 - (C) Culaba states that "teaching is touching lives forever" (2015).
 - (D) Culaba states that teaching is touching lives forever (2015, p.15).
- 677.** How are your sources cited in a work cited page?
- (A) Number order
 - (B) By Date
 - (C) ABC order
 - (D) Websites first
- 678.** On the last page of a writer's research paper, you'll find the:
- (A) Thesis Statement and Outline
 - (B) Works Cited Page
 - (C) Footnotes
 - (D) Conclusion
- 679.** Which of the following is acceptable for not having an APA citation following a key fact?
- (A) It's in the public domain.
 - (B) It's from another paper you wrote earlier in this class.
 - (C) It's common knowledge.
 - (D) It's in the paper's reference list.
- 680.** Why is it important to include a "Works Cited" slide in your Career Research Report?
- (A) To show creativity
 - (B) To list all the websites used for research and cite sources
 - (C) To describe your future goals
 - (D) To explain your job duties
- 681.** What is the correct format for citing a YouTube video?
- (A) Uploader's name. (Date). Title of the video. YouTube. URL
 - (B) Uploader's name. Date. Title of the video. URL
 - (C) Uploader's name. (Date). Title of the video [Video]. YouTube. URL
 - (D) Uploader's name. (Date). Title of the video. URL
- 682.** To give credit to someone else's words and/or ideas (a)
- (A) Cite
 - (B) Credible
 - (C) Research
 - (D) Synthesize
- 683.** To determine how credible a source is, it is important to know who the author is
- (A) True
 - (B) False
- 684.** Choose the correct in-text citation format for a direct quotation:
- (A) (Talusán, 2019)
 - (B) (2019, p.62)
 - (C) (Talusán, 2019, p. 62)
 - (D) None of above

- 685.** In the context of citations, what does the term "et al." mean?
- (A) An abbreviation for "especially"
 - (B) An abbreviation for "estimated"
 - (C) An abbreviation for "and others"
 - (D) An abbreviation for "eternal"
- 686.** What MUST be included in an Internet citation?
- (A) The name of your Internet server
 - (B) The date you read the page
 - (C) The e-mail address of the author
 - (D) The location of the computer from which you accessed the page
- 687.** In a bibliography, If a work has more than ten authors, how does the citation change?
- (A) The entry has to list the first author followed by et al.
 - (B) Only the initials of the authors should be used.
 - (C) The authors are replaced by the title of the work
 - (D) The entry has to list the first seven authors followed by et al.
- 688.** Which index allows researchers to follow the work of a particular author forward in time?
- (A) Source Index
 - (B) Citation Index
 - (C) Permuterm Subject Index
 - (D) Corporate Address Index
- 689.** How do you cite a book in a parenthetical citation?
- (A) "text"
 - (B) "text" (page number).
 - (C) "text" (name of book, page number).
 - (D) "text" (author last name pg #).
- 690.** Citing sources is
- (A) Listing the resources you used
 - (B) Only necessary for professional writers
 - (C) Checking the English mechanics
 - (D) Another copy of your notes
- 691.** How is a "works cited" spaced?
- (A) Single-spaced (1.0)
 - (B) One and a half spaced (1.5)
 - (C) Double-spaced (2.0)
 - (D) None of above
- 692.** A Works Cited is:
- (A) A list of sources used in a research paper
 - (B) A type of literary work
 - (C) A citation style
 - (D) A bibliography format
- 693.** What is a parenthetical citation?
- (A) A list of sources at the end of your paper
 - (B) The author and or page number in parentheses
 - (C) A quoted line from text
 - (D) The name of an article
- 694.** The order of information in in-text citations is as follows:
- (A) Author name, page number, year of publication
 - (B) Year of publication only
 - (C) Author name, page number
 - (D) Author name, year of publication, page number
- 695.** Sources in a bibliography should be listed in
- (A) Alphabetical order
 - (B) The order in which you used them
 - (C) Order from most to least important
 - (D) Order from best to worst
- 696.** Note cards that cite each source exactly as you will use them on your work cited page
- (A) Supporting Detail
 - (B) Secondary Source
 - (C) Source Card
 - (D) Summarize
- 697.** What happens if your source does not have an author listed?
- (A) Make one up

- (B) Leave it off, putting the page number only
- (C) Use the source title instead
- (D) Use your teacher's name
- 698.** A brief citation located within the text of a research paper that identifies a source of information.
- (A) Works Cited page
- (B) Quotation mark
- (C) Reference
- (D) In-text citation
- 699.** When documenting a research source cited from YouTube, we use ___ as the author.
- (A) The name of the person who uploaded the video.
- (B) The name of the YouTube owner.
- (C) Name of the person who watched the video.
- (D) Name of the person who deleted the video.
- 700.** A ___ is a list of sources arranged in alphabetical order by author or title (where no author is given)
- (A) Reference
- (B) Acknowledgement
- (C) Bibliography
- (D) None of above
- 701.** Why is it essential to follow a specific citation style in a research report?
- (A) It limits creativity in writing
- (B) It increases the word count unnecessarily
- (C) It ensures proper credit to original authors, maintains academic integrity, provides credibility to the research, and helps readers locate sources.
- (D) It confuses readers with inconsistent formatting
- 702.** Consider the following Statements: A Works Cited page lists the full MLA citations of each source you used to write your research paper. You should be interested in the topic you choose for a research project. When writing your background chapters, it is better to use the style and referencing that you intend to use in the final research report. Which of the following statement(s) is/are true?
- (A) Only 1, 2.
- (B) Only 1, 3.
- (C) Only 1, 2, 3.
- (D) Only 2, 3.
- 703.** A list of articles of books used for research
- (A) Analyze
- (B) Bibliography
- (C) Cite
- (D) Evidence
- 704.** The following are the three terms used to express your appreciation except,
- (A) Acknowledgement
- (B) Paraphrasing
- (C) Citation or In-text Citation
- (D) References or Bibliography
- 705.** What is an in-text citation?
- (A) Put the key ideas into your own words in complete sentences
- (B) The sentence that captures your position on the topic
- (C) Used after a quote to tell the author and page (Smith, 5)
- (D) Quoting a text word for word
- 706.** Why should a researcher acknowledge all the sources used in the bibliography of their report?
- (A) It shows academic integrity.
- (B) It shows awareness of the hypothesis.
- (C) It maintains participant confidentiality.
- (D) It enhances the reliability of the research.
- 707.** MLA requires two types of citation. What are they?
- (A) In-text citations & works cited page
- (B) Bibliography & works cited page
- (C) In-text citations & signal phrases
- (D) Works cited page & paraphrase

708. The books, articles, and websites where you find your text evidence are called:
- (A) Sources
 - (B) Direct quotes
 - (C) Indirect quotes
 - (D) Transitions
709. The best advice for making your report more credible is to:
- (A) Include your personal opinions.
 - (B) Use strong emotional language.
 - (C) Present only the side you support.
 - (D) Cite all sources used in your research.
710. In-text citations are longer than source citations.
- (A) True
 - (B) False
 - (C) All the above
 - (D) None of the above
711. Below is a citation for a web article. Identify the name of the article. Kirkman, Kim. "Revenge of the Spinach." Foodie, 18 Mar., 2014, foodiemage.com/revenge-of-spinach. Accessed 12 May 2016.
- (A) "Revenge of the Spinach."
 - (B) Foodie.
 - (C) Kirkman, Kim.
 - (D) Foodiemag.com/revenge-of-spinach
712. When citing a website, what should not be included in MLA format?
- (A) The date you accessed the resource
 - (B) Web.
 - (C) Where the website appears on a Google search.
 - (D) Date of publication
713. Why we need Mendeley?
- (A) Make a cake
 - (B) Make a softdrink
 - (C) Make a citation
 - (D) Make a game
 - (E) Make a holiday
714. Definition: Physical or digital cards used to document and organize source information for research
- (A) Information Cards
 - (B) Source Cards
 - (C) Note Cards
 - (D) Source Format
715. Look at this reference. What kind of material is being referenced below? Tiziani, A. (2013). *Havard's nursing guide to drugs* (9th ed.). Chatswood, Australia: Elsevier Australia.
- (A) Web page
 - (B) Book chapter
 - (C) Book
 - (D) Journal article
716. Why is it important to cite your sources?
- (A) You will get arrested if you don't
 - (B) It gives credit to your source
 - (C) Your teacher requires it
 - (D) All the these

- (A) True
 - (B) False
723. What should you do if you want to write down exact words from a source?
- (A) Use fancy writing
 - (B) Put quotation marks around the exact words
 - (C) Don't do it
 - (D) None of above
724. Templates are mostly provided by:
- (A) Readers
 - (B) Publishers and journals
 - (C) Students
 - (D) Libraries
725. What is a written reference to a source that provides information about the original author, title, and publication date and are used to credit the original author.
- (A) Credible
 - (B) Information
 - (C) Resources
 - (D) Citation
726. What should I do if no author is given for the work I am citing?
- (A) Omit the author's name and list only the page number.
 - (B) Use "anonymous" in place of the author's name.
 - (C) Use the year of publication in place of the author's name.
 - (D) Use an abbreviated form of the title in place of the author's name
727. The ___ section will be in either APA or MLA format.
- (A) Introduction
 - (B) Abstract
 - (C) Methods
 - (D) References
728. Where you found information
- (A) Citing
 - (B) Plagiarism
 - (C) Source
 - (D) Bibliography
729. In print source the specifies the location of a text in a container such as a periodical or a book anthology.
- (A) Page number
 - (B) Date of publication
 - (C) Volume number
 - (D) Title of the source

730. The address for your source. Author, title, publisher, date, etc. This information is organized according to MLA style in the works cited page.
- (A) Bibliographic information
 - (B) Categorizing
 - (C) Drafting
 - (D) None of the above
731. If you want to post someone's photo in your blog that is not originally yours, what is the best thing to do?
- (A) Do not mind a thing, just post the photo.
 - (B) Edit the photo.
 - (C) Give credit to a person by citing a caption on your content.
 - (D) Use it anyway.
732. What is the document that shows all of the sources of a paper or a project?
- (A) Citation
 - (B) Database
 - (C) Primary source
 - (D) Bibliography
733. Parenthetical Citations appear in
- (A) The Works Cited page
 - (B) The body of the research essay
 - (C) The text evidence
 - (D) The conclusion
734. Footnotes differ from bibliography citations in:
- (A) Their location in a report
 - (B) Their purpose
 - (C) The information they include
 - (D) The types of sources they cite
735. When in-text referencing we never include the author's name?
- (A) False
 - (B) True
736. What does a citation look like for an article with two authors?
- (A) ("Title").
 - (B) (Author's Last Name page#).
 - (C) (Author's Last Name).
 - (D) (Author's Last Name and Author's Last Name).
737. If one of your sources has no author listed, what should you do?
- (A) Just list the title and all other information
 - (B) Leave that source out of your bibliography
 - (C) Invent a name for the author of the source
 - (D) Call the publisher and find out who wrote the source
738. Why is it important to avoid using first-person references in an annotated bibliography?
- (A) To make the writing sound more objective
 - (B) To include personal opinions
 - (C) To summarize the article more clearly
 - (D) To explain how the article was written
739. Which type of source is cited in the entry (use your notes)? Konigsburg, E.L. The View from Saturday. New York: Aladdin, 1996.
- (A) An interview
 - (B) A film
 - (C) A book
 - (D) A magazine article
740. Citation
- (A) Reference to a source of information
 - (B) A type of database or computer system
 - (C) A summary of a book or journal article
 - (D) Direct quote from a text
741. This part of the research paper may be useful source of literature for others who are interested in studying this topic.
- (A) Research Objectives
 - (B) Statement of the Problem
 - (C) References
 - (D) Scope and Delimitations

742. The first line of each entry of should be flushed with the left margin in work cited
(A) True
(B) False
(C) All the above
(D) None of the above
743. What is the purpose of the Works Cited (bibliography)?
(A) To define words the reader may not know.
(B) To tell the reader where to find specific ideas in your paper.
(C) To tell where your facts and quotes came from.
(D) To give credit to your librarian for helping you.
744. Recording ideas found in a source and writing them word-for-word. They must be surrounded by quotation marks and documented correctly.
(A) Paraphrase
(B) Quotation
(C) Topic Sentence
(D) None of the above
745. The first piece of info listed in a bibliographical entry should be
(A) Author's last name if known
(B) Page numbers
(C) Date of publication
(D) City of publication
746. Though Wikipedia is usually not reliable, what part of a Wikipedia page is most helpful?
(A) The title
(B) The list of sources
(C) The author's name
(D) The introduction paragraph
747. How must a bibliography be ordered?
(A) By date of publication, from most recent to oldest
(B) By date of publication, from oldest to most recent
(C) Alphabetically, by author's last name
(D) Alphabetically, by title
748. What is the importance of using a consistent documentation style in academic writing?
(A) To ensure proper citation of sources and avoid plagiarism
(B) To analyze data collected over time to identify patterns, trends, or seasonality

749. A MLA in-text or parenthetical citation should be located
(A) Just after the information being cited
(B) Just before the information cited
(C) At the bottom of the page
(D) On the last page of the paper
750. Reference notes keyed in the body of the report.
(A) Endnotes
(B) Parenthetical citations
(C) Title
(D) None of the above
751. Symone is doing a research project on how to build a model airplane. She decides to use a magazine article to help her write her paper. Which citation below correctly credits her source?
(A) "Building Your Own Aircraft." Ronald Carr. Popular Mechanics, Feb. 2004: 14-16.
(B) Carr, Ronald. "Building Your Own Aircraft." Popular Mechanics, Feb.2004: 14-16.
(C) Ronald Carr. "Building Your Own Aircraft." Popular Mechanics, Feb.2004: 14-16.
(D) None of above
752. What are the two main reasons for using references in your literature review?
(A) To confuse the reader and make the text complex.

- (B) To protect against plagiarism and give credit to authors.
(C) To save time and avoid detailed citations.
(D) None of the above
753. How should you describe a source when its type is known?
(A) As vaguely as possible
(B) With precise details
(C) Only by its age
(D) By its physical condition
754. What is the purpose of citation in a research paper?
(A) To show off your knowledge
(B) To give importance to others' knowledge
(C) To confuse the readers
(D) To hide the sources
755. What order should be followed in the final list of references?
(A) Chronological
(B) Alphabetical-by author's last name
(C) Alphabetical-by title
(D) No particular order. It depends on the paper
756. John is doing a report on George Washington. He writes that Washington was the 1st president. He believes this is common knowledge so he does not give credit to a source for this fact. OKAY or NO WAY?
(A) Okay
(B) No Way
757. An alphabetized list of the sources that are cited in the paper.
(A) CONCLUSION
(B) REFERENCES
(C) INTRODUCTION
(D) ABSTRACT
758. ___ is a list that shows all the places you got your information.
(A) Works cited
(B) Table of contents
(C) Index
(D) Glossary
759. Which word means writing someone's ideas in your own words?
(A) Paraphrase
(B) Quote
(C) Summarize
(D) Cite
760. Match the definition to the term. Set of guidelines for formatting a paper
(A) MLA (Modern Language Association)
(B) Disorganization
(C) Table of contents
(D) None of the above
761. How should each reference be formatted in a bibliography?
(A) First line indent
(B) Hanging indent
(C) Centered
(D) Left aligned
762. Which is the correct internal citation for the article "Research is Fun, " by Mrs. Tunstead, first published in The New York Times?
(A) (Tunstead)
(B) ("Research is Fun")
(C) (The New York Times)
(D) None of the above
763. What source information should you keep track of?
(A) Author/Publisher
(B) Website/Article Title
(C) Date & URL
(D) All of these
764. To quote a passage, book, author, etc. as an authority
(A) Keyword
(B) Plagiarism

- (C) Primary sources
(D) Citing sources
- 765.** You have the following citation to a book. Identify the publisher. Winthrop, Elizabeth. *The Castle in the Attic*. New York: Holiday House, 1985. Print.
(A) Winthrop, Elizabeth
(B) *The Castle in the Attic*
(C) Holiday House
(D) New York Edit
- 766.** How should the reference list be written?
(A) According to date
(B) Descending
(C) According to type
(D) Alphabetical
- 767.** How should a name of the author appear on your citation?
(A) First name first
(B) Second name first
(C) First name only
(D) Surname only
- 768.** What does a bibliography list?
(A) Data tables
(B) Raw data
(C) Sources consulted
(D) Hypotheses
- 769.** Title your Works Cited page 'Works Cited' and start it on a new page in the same document. How do you properly set up your Works Cited page in your document?
(A) Start on the same page as your essay ends.
(B) Start on a new page titled "Sources."
(C) Start on a new page titled "Works Cited."
(D) Start on a new page titled "References."
(E) Start on a new page with no title.
- 770.** The Works Cited is ____
- (A) A list of sources in alphabetical order that you looked at for research.
(B) A list of sources in alphabetical order that you cited in your paper.
(C) A list of any reliable sources that could be used for research.
(D) None of the above
- 771.** Which of these in-text citations is formatted correctly?
(A) (Roth 179)
(B) (Oats, 35)
(C) "To Kill a Mockingbird 23"
(D) [Romeo and Juliet 125]
- 772.** Attribution means to
(A) Give credit to a particular author or artist
(B) Be the creator of an original work
(C) Get a copyright on your original work
(D) None of the above
- 773.** Decide in which cases should you reference. (Choose all correct answers)
(A) A quote from a biography of a famous person.
(B) An idea you formulated after watching several videos on a single topic.
(C) An item of common knowledge (i.e., The Earth is roughly a sphere.)
(D) Results of a scientific study from medical journal.
- 774.** In a works cited, you list
(A) Every source that you mentioned in a paper.
(B) Only the sources that you found online.
(C) Only the books that you used to write a paper.
(D) Ideas that you came up with by yourself.
- 775.** Your Works Cited Page should be the ____ page of your research.
(A) First
(B) Second
(C) Third
(D) Last

776. Suppose you are downloading an image from the Internet to add to a report for school. What should you include in your bibliography?
- (A) A header.
 - (B) A citation.
 - (C) A side note.
 - (D) An e-mail notification.
777. A list of sources referred to in the document and is placed at the end of the document
- (A) Evaluate
 - (B) Quotations
 - (C) Essential question
 - (D) Works cited
778. What is the correct format for citing a chapter in a book?
- (A) Book's title. Author. Chapter title. (Date). Source
 - (B) Chapter title. In Book's title. (Date). Author. Source
 - (C) Author. (Date). Chapter title. In Book's title. Source
 - (D) None of the above
779. If there is no author, which of the following is a proper citation for the works cited page?
- (A) "In Forecasting Their Emotions, Most People Flunk Out." New York Times, 16 Feb. 1999. www.nytimes.com
 - (B) New York Times. "In Forecasting Their Emotions, Most People Flunk Out." Foreman, R. 16 Feb. 1999. www.nytimes.com
 - (C) No Author. "In Forecasting Their Emotions, Most People Flunk Out." New York Times, 16 Feb. 1999. www.nytimes.com
 - (D) None of the above
780. Which section of a research report provides a reference to a source used in the report?
- (A) Hypothesis
 - (B) Methodology
 - (C) Citation
 - (D) Analysis
781. The initial of the authors' first name is used for distinction. A semi-colon is used to separate the two authors. "(A. Valdez, 2006; R. Valdez, 2008)"
- (A) Two or more works in one parenthesis
 - (B) Authors with the same last name
 - (C) Indirect sources
 - (D) Organization as an author
 - (E) Same works of one author in the same year
782. What does "citing" mean?
- (A) To write the exact words from a text
 - (B) To give original sources credit for ideas and words
 - (C) To use information by putting it into your own words
 - (D) To take credit for the ideas and words of others
783. Why is citing sources important in the Introduction?
- (A) To avoid doing experiments
 - (B) To support claims and show related studies
 - (C) To lengthen the paper
 - (D) To replace results
784. Maggie is making a book entry in her bibliography? What should be the first item listed?
- (A) Author's first name
 - (B) Author's last name
 - (C) Title of the book
 - (D) Publisher
785. Why is it important to double-check the accuracy of citation tools?
- (A) Citation tools always make mistakes
 - (B) Citation tools can be used as the only source of citation
 - (C) Citation tools are helpers, but may not always be accurate
 - (D) Citation tools are not allowed in academic writing

786. In APA 7th edition, which of the following is the proper way to write an in-text citation for a text message or email?
- (A) (B. Donald, personal communication, February 6, 2020)
 - (B) (Beth Donald, personal communication, February 6, 2020)
 - (C) (Donald, personal communication, February 6, 2020)
 - (D) (Donald, 2020)
787. What pages of this publication? Daniel, J. (2020). Education and the COVID-19 pandemic. Prospects, 49(1), 91-96.
- (A) 2020
 - (B) 49
 - (C) 1
 - (D) 91-96
788. A ____ is an indentation in which all lines are indented except the first. It is required for citations in a Works Cited page if the citation is longer than one line.
- (A) Hanging indent.
 - (B) Suspended indent.
 - (C) Dangling indent.
 - (D) Swinging indent.
789. In which part of a research paper would you find a bibliography?
- (A) At the beginning
 - (B) In the middle
 - (C) At the end
 - (D) In the footnotes
790. There is no need to use references in supporting one's ideas.
- (A) TRUE
 - (B) FALSE
791. Restating an author's idea in different words, often to share information by making the meaning clear to readers
- (A) Summarize
 - (B) Paraphrase
 - (C) Irrelevant
 - (D) Direct quotations
792. Provide proof for your points and enable readers to review the original data sources themselves
- (A) References
 - (B) Bibliography
 - (C) Table of contents
 - (D) Appendices
793. Why is sourcing important when evaluating a document?
- (A) It helps you understand the length of the document.
 - (B) It helps you evaluate the accuracy and applicability of the information.
 - (C) It helps you memorize the content.
 - (D) It helps you rewrite the document.
794. Sources contain the following information/data that a researcher needs for his/her literature review except ____
- (A) Name of the Editor
 - (B) Name of the Author
 - (C) Year of Publication
 - (D) Volume and Page
795. What is the format of a work cited page?
- (A) Hanging Indent
 - (B) Indented
 - (C) Block
 - (D) Plain
796. True or false, a citation adds credibility to your paper.
- (A) True
 - (B) False
797. Why do we cite our sources?
- (A) To get an A on our assignment
 - (B) To show our reader where we got our information
 - (C) To use quotation marks
 - (D) To write our topic sentence

798. At the end of the research report, list your sources on page ____
- (A) The outer cover.
 - (B) The list of works cited.
 - (C) The index.
 - (D) The inner cover.
799. A website (www.EnglishRocks.com) with a page called English Rocks with no page numbers. Which citation is correct?
- (A) English rocks (www.EnglishRocks.com).
 - (B) English rocks (English Rocks).
 - (C) English rocks ("English Rocks").
 - (D) English rocks (website).
800. Why is it important to cite the sources of information that you used in your research? It is important because it ____
- (A) Gives credit to the author
 - (B) Is required by the teacher
 - (C) Is generally a part of an essay
 - (D) Shows you made an effort in doing your assignment
801. Stating who said something or giving credit to the individual who originally stated something ____
- (A) Attribution
 - (B) Banner
 - (C) Aviation
 - (D) Attraction
802. What margin setting matches standard APA conventions for student papers?
- (A) Two-inch left margin only
 - (B) One-and-a-half inch top only
 - (C) One-inch margins on all sides
 - (D) Half-inch margins on sides
 - (E) Three-quarter inch margins overall
803. What element tells the reader the source of the information?
- (A) Quotation
 - (B) Citation
 - (C) Signal phrase
 - (D) Lead
804. Wisener, Kathy, "Wildlife Federation" www.wildlifefederation.org/pandas.
- (A) Citation
 - (B) Infer
 - (C) Implicit
 - (D) Paraphrase
805. Explaining inline citation versus Works Cited: Inline citations go in the text of your paper when you mention information from a source. Works Cited is a list at the end. What's the main purpose of inline citations?
- (A) To show where the information comes from.
 - (B) To list all the books you read.
 - (C) To make the text look interesting.
 - (D) To explain the source in detail.
 - (E) To credit the website design.
806. The main purpose of the References section in an engineering research paper is to:
- (A) Add extra length to the report
 - (B) Give credit to original sources and support credibility
 - (C) Replace the literature review
 - (D) Summarize the results of the study
807. True or False? A parenthetical in-text citation should always use the author's last name.
- (A) True
 - (B) False
808. Which of the following should be included in the bibliography of a research project?
- (A) Quotes from print sources
 - (B) Sources of materials used in research
 - (C) Graphs and tables of primary research
 - (D) Names of participants who were interviewed
809. How should the first line of each reference be formatted in a bibliography?

- (A) Centered
 - (B) Left aligned
 - (C) Right aligned
 - (D) Indented
- 810.** What is the use of textual evidence in a paper called?
- (A) Cite
 - (B) Citation
 - (C) Outline
 - (D) Research
- 811.** What is not the benefit of citation?
- (A) It shows that you read and learn the topic.
 - (B) Your readers can find relevant information.
 - (C) You show respect to the scholars.
 - (D) Your writing is less credible.
- 812.** When should information be used as a quote rather than paraphrased?
- (A) A quote should be used when sharing the main idea and key details of an argumen
 - (B) A quote should be used when the author shares information in a unique or meaningful way.
 - (C) A quote should be used whenever the information to be shared is common knowledge.
 - (D) A quote should be used when it is relatively short so there is no need for a paraphrase.
- 813.** Which of the following is NOT a good research reference?
- (A) Newspaper clippings
 - (B) Movie
 - (C) Books
 - (D) Journal/Article Edit
- 814.** Why do we need to use in-text citations?
- (A) So the reader can see where you got the information that you are borrowing.
 - (B) So you don't plagiarize by not giving credit to other people for their ideas or words.
 - (C) Because your teacher says so.
 - (D) Both A and B are correct
- 815.** Why is referencing important in a research report?
- (A) To improve visual layout
 - (B) To increase length
 - (C) To give credit to original sources
 - (D) To enhance grammar
- 816.** What information is needed when citing a book?
- (A) Authors name
 - (B) Book title
 - (C) All of these.
 - (D) Publishing Company, city, and date of publication
- 817.** It is the act of referring to another author's work on one's research paper.
- (A) Bibliography
 - (B) Citation
 - (C) Reference
 - (D) None of above
- 818.** Which term refers to sources that are not necessarily scholarly or peer-reviewed, like newspapers or magazines?
- (A) Scholarly Source
 - (B) Database
 - (C) Abstract
 - (D) Popular Source
- 819.** What should you do if you want to show an "exceptional ability to integrate source information"?
- (A) Paraphrase passages that are well-selected and structured.
 - (B) Copy everything without changing.
 - (C) Ignore the information.
 - (D) Leave the page blank.
- 820.** What is the importance of utilizing standard formats when citing sources?
- (A) To make the paper look professional.
 - (B) To demonstrate the researcher's creativity.

- (C) To avoid plagiarism and provide credit to the original authors.
- (D) To impress instructors with extensive citations.
- 821.** Research must give factual and exact data in which should be correctly and appropriately documented or acknowledged in the footnotes, notes and bibliographical entries.
- (A) Accuracy
- (B) Objectivity
- (C) Openness
- (D) Timeliness
- 822.** How should a research report be formatted?
- (A) With no citations
- (B) With direct quotations only
- (C) With paraphrasing as much as possible
- (D) With the required documentation style
- 823.** Why should you keep track of sources when you research?
- (A) So you know where your info is from and can cite it
- (B) Because your teachers told you to
- (C) So you can prove you researched
- (D) None of the above
- 824.** What does a citation look like for an article WITHOUT an author?
- (A) ("Title").
- (B) (Author's Last Name page#).
- (C) (Author's Last Name).
- (D) (Author's Last Name and Author's Last Name).
- 825.** Which one is the correct way of writing an MLA in-text citation?
- (A) According to Walsh, "MLA format provides a simple system for source documentation." (99)
- (B) According to Walsh, "MLA format provides a simple system for source documentation." (p. 99)
- (C) According to Walsh, "MLA format provides a simple system for source documentation" (99).
- (D) None of above
- 826.** Which is the correct way to cite a website with no date on the reference page?
- (A) Http://medicalcenter.osu.edu/patientcare/healthcare, (n.d.) Phobias
- (B) Phobias. (n.d.). Retrieved from http://medicalcenter.osu.edu/patientcare/healthcare
- (C) Http://medicalcenter.osu.edu/patientcare/healthcare
- (D) Retrieved from http://medicalcenter.osu.edu/patientcare/healthcare
- 827.** What elements could be considered references?
- (A) Academic journals
- (B) E-books
- (C) Personal interviews
- (D) All are correct
- 828.** What do we do if a resource has NO date of publication?
- (A) Put (n.d.)
- (B) Put (date unavailable)
- (C) Put (NA)

(D) None of above
- 178.** How to change the APA to Vancouver style in Mendeley?
(A) Insert endnote
(B) Insert citation
(C) Manage sources
(D) Styles
(E) Bibliography
- 179.** Modern Language Association rules for creating research papers
(A) Primary sources
(B) MLA format
(C) Periodicals
(D) Plagiarism
- 180.** What kind of references is it? Hackett, P. M. (2020). Being creative using projective techniques. In Handbook of Ethnography in Healthcare Research (pp. 341-349). Routledge.
(A) Journal
(B) Website
(C) Newspaper
(D) BookTagsReferences

1.7.6 Reference Management Software

1. Why is it recommended to put only one reference on each note card or page?
 - (A) To save space
 - (B) To avoid confusion
 - (C) To facilitate sorting and organizing
 - (D) To follow standard formatting
2. Search engines for literature reviews typically
 - (A) Include procedures for converting citations to the style format of the APA Publication Manual.
 - (B) Include a collection of bibliographic citations and procedures for searching through them.
 - (C) Include an option for direct purchase of a publication in hard-copy format.
 - (D) Typically have a time lag of two years between the publication of a journal article and its appearance in the search engine.
3. It allows you to add article to your reference library directly from any supported website.
 - (A) Citation plugin
 - (B) Web importer
 - (C) Mendeley desktop
 - (D) Reference manager
4. Citation software includes:
 - (A) WhatsApp
 - (B) Zotero, Mendeley, EndNote
 - (C) YouTube
 - (D) Excel
5. How to put Mendeley reference in word document?
 - (A) Insert endnote
 - (B) Insert citation
 - (C) Manage sources
 - (D) Styles
 - (E) Bibliography
6. What is a free reference manager and an academic social network that manages your research, showcase your work and collaborate with over five million researchers worldwide
 - (A) Mendel
 - (B) Mendeleyev
 - (C) Mendeley
 - (D) Mendeleev
7. Which tool is widely used for referencing in research?
 - (A) EndNote
 - (B) Excel
 - (C) Photoshop
 - (D) ERP
8. Mendeley can be accessed through —
 - (A) Mendeley desktop
 - (B) Web browser
 - (C) Mobile app
 - (D) All of the above
9. Is a reference manager software developed by Elsevier. It is used to manage and share research papers and generate bibliographies for scholarly articles.
 - (A) Mendeley
 - (B) Mendeleny
 - (C) Mendelay
 - (D) Mendelayer
10. The reference management software will keep the research well organized and save our time.
 - (A) True
 - (B) False
11. Which is the Reference Management Tool?
 - (A) Mendeley
 - (B) MS Power Point
 - (C) MS Excel
 - (D) Adobe Photoshop

12. The feature on Zotero which allows users to automatically generate citations is the ____
(A) Tagging
(B) Highlighting
(C) Citation Style Editor
(D) Word Processor Integration
13. How to make collaboration in Mendeley?
(A) Invite colleagues
(B) Install web importer
(C) Install MS word Plugins
(D) Check for duplication
(E) Options
14. The following CANNOT be done using Mendeley
(A) Automatic generation of bibliography
(B) Change of reference styles instantaneously
(C) Purchase article from an unsubscribed journal
(D) None of above
15. Student X is working on his postgraduate thesis, and he is struggling to keep track of all the sources he has consulted. Which of the following can be the best tool to track all the sources?
(A) Turnitin
(B) Zotero
(C) Harvard
(D) SPSS
16. What you should do after downloading and installing the Mendeley Reference Manager application
(A) Create your free Mendeley account profile.
(B) Download and install the Mendeley Reference Manager Application
(C) Install the Mendeley Citation Plugin
(D) Download published Research Articles
17. ____ are digital or physical cards that are used to document and organize your source information.
(A) Citations
(B) Cite
(C) Sources
(D) Source Cards
18. True or False? If you paste a link to your online source in the EasyBib website, EasyBib will always supply all of the information you need to format your Works Cited entry.
(A) True
(B) False
19. ____ is a free reference manager and academic social network that can help you organize your research, collaborate with others online, and discover the latest research.
(A) Mendeley
(B) Turnitin
(C) Citation maker
(D) None of the above
20. Mendeley is:
(A) A free application that is at the same time a reference manager, a PDF reader, a system to store and organize documents of scientific information, and an academic social network to share bibliographies and publications
(B) A statistical package for data analysis
(C) A general web browser
(D) A video conferencing platform Edit
21. What is software to organize and format references (e.g., NoodleTools, Easybib) called?
(A) Reference management software
(B) Word processor
(C) Spreadsheet software
(D) Presentation software
22. Which of the following is NOT true about Citation Managers (Mendeley)?
(A) It create instant bibliographies
(B) It format papers with in-text citations and bibliographies
(C) It creates personal citation database of articles related to your topics
(D) It shares your database only to you for reference purposes

23. What is Mendeley?
- (A) Reference management application
 - (B) Journal management application
 - (C) Paper management application
 - (D) Final task management application
24. What benefits do you get from using Mendeley?
- (A) Makes it easier to create a bibliography
 - (B) Avoid plagiarism
 - (C) All answers are correct
 - (D) Add files without having to download
25. How do you start using Mendeley?
- (A) Create your free Mendeley account profile.
 - (B) Download and install the Mendeley Reference Manager Application
 - (C) Install the Mendeley Citation Plugin
 - (D) Download published Research Articles

1.7.7 Application of ICT in Research

1. Statistical analysis can be done with
 - (A) SPSS
 - (B) Graphpad Prism
 - (C) Both
 - (D) None
2. Analogy:Media Learning:ICT IntegrationBlended Learning: ____
 - (A) Modular Distance
 - (B) Radio-Based
 - (C) Online & Traditional
 - (D) Asynchronous Teaching
3. During a hospital board meeting, Mason, a nurse executive, discussed one of the primary challenges in integrating digital health technologies while maintaining compassionate patient care. What is this challenge?
 - (A) Ensuring holistic patient assessment
 - (B) Developing digital competencies
 - (C) Balancing technology and human touch
 - (D) Cultural shift
4. Which of the following is a primary benefit of using online research tools?
 - (A) They provide instant access to a wide range of information.
 - (B) They are always more reliable than traditional sources.
 - (C) They eliminate the need for critical thinking.
 - (D) They guarantee the accuracy of information.
5. What does the author use to support student research?
 - (A) Only textbooks
 - (B) Online databases and research management software
 - (C) Traditional lectures
 - (D) Paper-based resources only
6. Which of the following statements is NOT correct?
 - (A) Computer is capable of processing only digital signal
 - (B) Appropriate software is required for processing the data
 - (C) Computer is capable of processing digital as well as analog signals
 - (D) Computer is capable of analysing both quantitative and qualitative data
7. It is a reference or address used to locate resources on the internet.
 - (A) URL
 - (B) HTML
 - (C) DNS
 - (D) API
8. The ____ places great emphasis on the processing and exchange of information.
 - (A) Industrial Revolution
 - (B) Information Age
 - (C) Renaissance
 - (D) Technology

9. Angelo created a website intended to help people with visual and reading impairments.
(A) Assistive Media
(B) Bookmarking Sites
(C) User Participation
(D) Mass Participation
(E) Microblogging
10. Which of the following is a potential disadvantage of using ICT in research?
(A) It can be difficult to access for some individuals or populations
(B) It can be subject to technological issues or malfunctions
(C) It can introduce bias into data collection or analysis
(D) All of the above
11. Wikis, blogs and audio-video conferencing are some of the most common applications available via the internet.
(A) False
(B) True
12. An administrator is seeking advice from an instructional technology coordinator about methods of cataloging anecdotal notes while observing teachers. Which of the following technology tools would best meet the needs of this administrator?
(A) Notating with a cloud-based fillable form.
(B) Recording notes on paper slips and filing them in a cabinet.
(C) Using a desktop-only word processor without backup.
(D) Sending anecdotal notes via email to oneself.
13. MS-Excel & paper spreadsheets can have all the same advantages as an electronic spreadsheet except which of the following?
(A) Rows and columns.
(B) Headings.
(C) Speed.
(D) Both (1) & (2).
14. A modern shoe company uses Instagram hashtags to gain traction. Which branding era does this best represent?
(A) Prehistoric branding
(B) Industrial Revolution branding
(C) 20th century branding
(D) Digital age branding
15. The address of a document you'll find on the WWW.
(A) TCP.
(B) IP.
(C) WEB.
(D) URL.
16. Which program is used to sort data alphabetically and organizing data?
(A) Excel
(B) Word
(C) PowerPoint
(D) Paint
17. Which practice best leverages AI for research in a learning journey?
(A) Replacing all reading with summaries
(B) Using AI for data analysis and retrieval
(C) Accepting outputs without verification
(D) Avoiding AI to keep work traditional
18. How has the Indian health sector been updated in response to recent challenges?
(A) Increased reliance on traditional medicine practices
(B) Reduction in healthcare funding and resources
(C) The Indian health sector has enhanced telemedicine, digital health records, and vaccination drives in response to recent challenges.
(D) Elimination of vaccination programs for safety concerns
19. Superb Toys is a factory and retail store in one building. The company keeps all its computer files on a server in the basement. A new employee suggests investing in a system that stores computer files and extra computing power in a separate location. What is the

- name of the system the employee is suggesting?
- (A) Remote working
 - (B) Wi-Fi
 - (C) Cloud computing
 - (D) Ransomware
20. The technology required for information processing, in particular, the use of electronic computers, communication devices and software applications to convert, store, protect, process, transmit and retrieve information from anywhere, anytime.
- (A) Information Technology
 - (B) Social Media
 - (C) Media
 - (D) Information and Communication Technology
21. Which of the following is not a benefit of using ICT for data analysis in research?
- (A) Increased accuracy and precision of results
 - (B) Ability to handle large amounts of data quickly and efficiently
 - (C) Reduced potential for bias in data collection and analysis
 - (D) Increased complexity and difficulty of analysis
22. What are online journals often called?
- (A) Print journals
 - (B) Scholarly journals
 - (C) E-journals
 - (D) Open-access journals
23. Persons at a downtown cafe realized that they were able to access the internet on their laptop computers. The cafe could be considered as a?
- (A) Metropolitan area network.
 - (B) Hotspot.
 - (C) Local area network.
 - (D) Satellite.
24. Which of the following is an example of using ICT for data visualization in research?
- (A) Creating charts and graphs using a spreadsheet program
 - (B) Drawing diagrams by hand
 - (C) Writing descriptions of data in a report
 - (D) All of the above
25. Why is it beneficial to organize your digital notecards into a sequence?
- (A) It makes the final slideshow look more decorative
 - (B) It helps create a logical flow for your research presentation
 - (C) It increases the number of slides you have
 - (D) It is only needed for group projects
26. Which of the following is not an application of ICT in research?
- (A) Collecting data through online surveys
 - (B) Analyzing data using statistical software
 - (C) Conducting experiments in virtual environments
 - (D) Building physical models for testing
27. Tool used to organize, calculate, and store data (information).
- (A) Calculator
 - (B) Stopwatch
 - (C) Computer
 - (D) Thermometer
28. What is one way ICT is used in public safety?
- (A) To reduce communication
 - (B) To ignore emergencies
 - (C) To create chaos
 - (D) To collect and store information
29. Which of these DOES NOT describe the internet?
- (A) A philosophy of making information and knowledge accessible to all
 - (B) A network of networks
 - (C) It is built on agreed upon protocols
 - (D) It is run from one central server

30. How does Boolean logic assist researchers in locating related literature?
- (A) It allows for efficient searching of databases
 - (B) It provides a list of relevant journals.
 - (C) It translates research findings.
 - (D) It summarizes key articles.
31. PSPP is commonly used as an alternative to:
- (A) Excel
 - (B) SPSS
 - (C) Stata
 - (D) None of the above
32. Dr. Magat, a math teacher, would like to develop gamified mobile courseware that he will use in teaching his Grade 11 students for flexible learning. One of his considerations for doing this was his knowledge of different programming languages. Which element of designing new materials did he demonstrate?
- (A) Audience
 - (B) Cost
 - (C) Objectives
 - (D) Technical expertise
33. What is the role of the Chief Information Officer (CIO) in government agencies?
- (A) To create marketing strategies
 - (B) To handle customer service
 - (C) To manage financial resources
 - (D) To oversee the development and management of ICT systems
34. How can digital technologies help bridge the rural-urban divide?
- (A) Digital technologies can enhance connectivity, access to services, and economic opportunities in rural areas.
 - (B) Digital technologies can solely focus on urban development.
 - (C) Digital technologies can reduce urban population growth.
 - (D) Digital technologies can eliminate all rural challenges.
35. Converting map-point locations into numbers is known as ____
- (A) Pixellating
 - (B) Digitizing
 - (C) Data layering
 - (D) Aerial photographing
36. Specialized search engines provide access to documents and media that are not standard web pages, such as e-books, Microsoft Word documents, spreadsheets, digital slides in PowerPoint, Adobe PDFs, and text documents.
- (A) True
 - (B) False
37. SPSS is
- (A) Statistical Package for Scientific Studies.
 - (B) Statistical Package for Social Sciences.
 - (C) Scientific Package for Statistical Study.
 - (D) Scientific Package for Social Scientists.
38. A(n) ____ is a characteristic or quality that describes a database entity.
- (A) Field
 - (B) Tuple
 - (C) Key field
 - (D) Attribute
 - (E) Relationship
39. Which of the following is not a benefit of using ICT in research?
- (A) Increased efficiency in data collection and analysis
 - (B) More accurate results
 - (C) Increased potential for bias in data collection and analysis
 - (D) More efficient communication between researchers and participants
40. Which of these is NOT an Open standard
- (A) HTML.
 - (B) CSS.
 - (C) XLS.
 - (D) HTTP.

41. Which screen of SPSS use for recording the data?
(A) Data view
(B) Variable view
(C) Syntax editor
(D) Output viewer
42. What is an advantage of using websites for research?
(A) Websites can be created by anyone.
(B) Information is not quality checked.
(C) Websites often require subscription fees.
(D) Quick access to a wide range of information.
43. Which of the following is LEAST LIKELY a way ICT can enhance business efficiency?
(A) Streaming communication through email and instant messaging.
(B) Automating repetitive tasks such as entry and invoicing.
(C) Implementing cloud computing for flexible access to data and resources.
(D) Using outdated software and hardware systems.
44. In which scenario is ICT commonly used in healthcare?
(A) Sending smoke signals for medical emergencies
(B) Maintaining electronic health records and telemedicine
(C) Reliance on carrier pigeons for patient communication
(D) Using Morse code for medical research
45. What should be done with search strategies used in online databases?
(A) Discarded after the search is complete
(B) Shared with other researchers
(C) Kept on file for future reference
(D) Published in the research report
46. In which of the following is an NHS doctor's surgery most likely to use digital communication?
(A) To provide product information on its website for customers
(B) To text patients to remind them of appointments
(C) To receive payment for goods/services sold at the surgery
(D) To sell products to patients
(E) To book hospital appointments
47. Sam Pitroda is known as the Father of which of the following in India?
(A) Homeopathy
(B) Robotics
(C) India's Communication Revolution
(D) Artificial Intelligence
48. It is essential that you evaluate the quality of internet resources because information obtained via the internet ranges from very poor to very good
(A) Neither True nor False just a statement.
(B) None of the above.
(C) True.
(D) False.
49. Which frontier tools characterize the 2020s and beyond for marketing research?
(A) Manual tally sheets only
(B) Paper diaries, postal returns
(C) AI, automation, AR and VR
(D) Doorstep quota canvassing
50. Which of the following supports citizen engagement?
(A) Private surveys
(B) Closed government meetings
(C) Mobile reporting apps
(D) Security-only platforms
51. Which statement about digital sources is TRUE?
(A) All websites ending in.com are unreliable
(B) Social media is always a reliable source
(C) Information should be verified across multiple credible sources
(D) The most popular websites are always the most reliable

52. Which of the following is not an example of using ICT in research dissemination?
- (A) Publishing research articles in online journals
 - (B) Presenting research findings through video conferencing
 - (C) Using social media platforms to share research highlights
 - (D) Conducting experiments in virtual reality environments
53. What is e-Government?
- (A) Government services provided through newspapers
 - (B) Government services provided through traditional mail
 - (C) Government communication using ICT
 - (D) Government services provided in person
54. True or False: The Internet changed the way journalists conduct research.
- (A) True
 - (B) False
55. One of the free services provided by Google is the ____ where you can make forms for survey or poll.
- (A) Google Map
 - (B) Google Forums
 - (C) Google Forms
 - (D) Google From
56. Internet is used for
- (A) Only for communication
 - (B) Research, download files, read news and make an appointment, etc.
57. What command can recreate your document in another language?
- (A) Save As.
 - (B) Research.
 - (C) Language.
 - (D) Translate Document.
58. What should researchers consider when evaluating the quality of a website?
- (A) The end of the website address (e.g., .edu, .gov, .org)
 - (B) The presence of advertising on the website
 - (C) The date the website was last updated
 - (D) All of the above
59. Over Dependence on the Electronic Media for Access to Information may lead to
- (A) Losing the ability to effective interpersonal communication
 - (B) Addiction over the net
 - (C) Getting fake news and other info
 - (D) All that's mentioned
60. Which ICT area helps in efficient information exchange between health professionals?
- (A) E-commerce
 - (B) Telemedicine
 - (C) Social Media
 - (D) Education platforms
61. Which ICT impact gives businesses more targeted advertising opportunities?
- (A) Encryption
 - (B) Data mining
 - (C) Social media isolation
 - (D) Internet browsing
62. In the employment sector, how does ICT impact organizations?
- (A) It makes manual labor the preferred method of work
 - (B) It forces organizations to hire more staff
 - (C) It enables organizations to operate more efficiently by employing staff with ICT skills
 - (D) It reduces the need for human intelligence and interaction
63. What is e-Governance?
- (A) None of the above
 - (B) Use of ICT in government services
 - (C) A type of online shopping
 - (D) A social media platform

64. Which of the following represents a drawback of using the World Wide Web for research?
- (A) Real-time updates
 - (B) Timely information
 - (C) Diverse content formats
 - (D) Questionable information reliability
65. Which of these is used to quickly create, manipulate and analyze data arranged in rows and columns?
- (A) Application package.
 - (B) Outline processors.
 - (C) Word processing package.
 - (D) Spreadsheet package.
66. Which of the following can provide a range of invaluable information and is a good starting point for finding other sources of secondary market research data?
- (A) Universe
 - (B) Bank
 - (C) Internet
 - (D) Joma Cafe
67. Information and Communications Technology (ICT) is defined as the infrastructure and components that enable what?
- (A) Modern computing
 - (B) Communication between friends and family
 - (C) The creation of new software
 - (D) The development of video games
68. Technology is the use of ___ knowledge towards creating solutions to problems.
- (A) Scientific
 - (B) Grammatical
 - (C) Physical
 - (D) None of above
69. What are raw facts and figures processed by ICT systems?
- (A) Data
 - (B) Information
 - (C) Knowledge
 - (D) None of above
70. How has ICT changed the way people work?
- (A) By increasing the need for physical presence
 - (B) By enabling remote work and digital communication
 - (C) By eliminating all jobs
 - (D) By reducing the use of technology
71. What is the primary advantage of using electronic data capture in research?
- (A) Reduced potential for human error
 - (B) Increased speed of data collection
 - (C) Increased access to data
 - (D) None of the above
72. What are some common pitfalls to avoid when using search engines for research?
- (A) Relying on only the first few results, not verifying the credibility of sources, using overly broad search terms, and not properly citing information found.
 - (B) Using search terms that are too specific
 - (C) Believing everything in the search results without verification
 - (D) Only using the search engine's auto-complete suggestions
73. Students are actively engaged in using technology as a tool rather than passively receiving information from the technology
- (A) Goal directed
 - (B) Authentic
 - (C) Active
 - (D) Collaborative
74. Computers use the ___ number system to store data and perform calculations.
- (A) Decimal.
 - (B) Hexadecimal.
 - (C) Octal.
 - (D) Binary.

75. Which of the following is an example of using ICT in qualitative data analysis?
- (A) Using statistical software to analyze survey responses
 - (B) Using transcription software to transcribe audio or video recordings
 - (C) Using virtual reality environments to code and analyze observations
 - (D) None of the above
76. Which of the following is an example of ICT use in healthcare?
- (A) Telemedicine
 - (B) E-commerce
 - (C) Social networking
 - (D) E-banking
77. Justin is a technology specialist. He frequently makes updates to systems, software, and user interface better through open-sourced licenses. Justin is on the search for a new computer and is having some trouble deciding between three operating systems. Which type of operating system will suit Justin the best for modifying its code?
- (A) Mac OS.
 - (B) Microsoft Windows.
 - (C) Chrome OS.
 - (D) Linux.
78. What role does ICT play in healthcare?
- (A) ICT is only relevant for administrative tasks in healthcare.
 - (B) ICT is primarily used for entertainment in healthcare.
 - (C) ICT has no impact on patient data management.
 - (D) ICT plays a crucial role in improving communication, enabling telemedicine, managing health records, and enhancing patient engagement in healthcare.
79. What is the most widely used source of information today?
- (A) Books
 - (B) Facebook
 - (C) Zalo
 - (D) Internet
80. What is one advantage of using data from digital sources in research?
- (A) Equity of access
 - (B) Ease of searching
 - (C) Reliability of the data
 - (D) Accuracy of the source
81. Which is a disadvantage of current media trends?
- (A) Educational access
 - (B) Information overload
 - (C) Global communication
 - (D) Civic engagement
82. This app enables user to use spreadsheets to organize numbers and data with formulas and functions.
- (A) Excel
 - (B) Word
 - (C) Teams
 - (D) Powerpoint
83. E-research refers to:
- (A) Conducting research using digital and online tools
 - (B) Avoiding traditional research methods
 - (C) Relying only on face-to-face interviews
 - (D) Ignoring ethical concerns in data collection
84. How has ICT influenced business costs in industries?
- (A) Increased operating expenses
 - (B) Decreased resource optimization
 - (C) Reduced energy-efficient technologies
 - (D) Cost-saving through automation
85. What type of initiatives are universities expected to adopt for income generation?
- (A) Reducing research activities
 - (B) Limiting services offered to students
 - (C) Focusing solely on tuition fees

- (D) Leveraging research output and commercializing technologies
86. What tools are mentioned as helpful for academic research?
- (A) Online shopping platforms.
(B) Statistical analysis software and online databases.
(C) Video editing tools.
(D) Social media platforms.
87. Unethical use of ICT in businesses include ALL of the following except:
- (A) Copyright infringement
(B) Releasing customers personal data without permission
(C) Sending unwanted advertisements to customers
(D) Sharing information about the business on social media
88. Which is the software used for qualitative research?
- (A) NVIVO
(B) AMOS
(C) SPSS
(D) None of above
89. Software applications and data that are stored online and used through the internet.
- (A) Cloud.
(B) Spyware.
(C) Smishing.
(D) Vishing.
90. How can Boolean operators improve online research?
- (A) By making searches more complex.
(B) By narrowing or broadening search results.
(C) By confusing the search engine.
(D) By eliminating all irrelevant results.
91. Which part of the lesson is involved in the giving of situations or activities based on the concepts learned?
- (A) Preparation
(B) Generalization
(C) Application
(D) Comparison and abstraction
92. How can ICT support small businesses?
- (A) By increasing operational costs.
(B) By providing tools for online marketing and customer engagement.
(C) By limiting access to global markets.
(D) By complicating financial management.
93. An error in computer data is called
- (A) Chip.
(B) Bug.
(C) Bit.
(D) Byte.
94. World Wide Industries uses technology to connect a group of workers from all its global sites to plan a new advertising campaign. This is an example of a(n) ____
- (A) Virtual Team
(B) Remote Team
(C) In-Person Team
(D) Analysis Team
95. E-thesis repository is:
- (A) Shodh Ganga
(B) Shodh Gangotri
(C) Shodh Sindhu
(D) Shodh Shuddhi
96. Google Forms allows answers and data to be automatically collected in ____
- (A) DVD player
(B) Google Spreadsheets
(C) Blog site
(D) Flash drive
97. An example of a person using technology initially designed for the military that has greatly affected our daily life habits?
- (A) A teenager pumps gasoline into a new car.

- (B) A man uses a credit card to pay for new purchases.
- (C) A woman uses a Global Positioning System to navigate around town
- (D) A pediatrician vaccinates patients against polio.
- 98.** A word or phrase used in a search query to find information is called a:
- (A) Keyword
- (B) Tag
- (C) Snippet
- (D) Link
- 99.** How does ICT facilitate communication in everyday life?
- (A) Through carrier pigeons
- (B) By sending smoke signals
- (C) Via email, instant messaging, and video calls
- (D) Through Morse code
- 100.** Which of the following is not an application of Information and Communication Technology?
- (A) Cooking
- (B) Medicine
- (C) Farming
- (D) Transport
- 101.** Data is delayed when we use
- (A) 3G/4G.
- (B) Wi-Fi.
- (C) Fiber-optic.
- (D) Satellite.
- 102.** Sara is doing research for her history class. Which resource would have the MOST current information about presidents of the United States?
- (A) An encyclopedia
- (B) A book called American Presidents, copyright 2000
- (C) An article written in 2008
- (D) "whitehouse.gov", updated daily
- 103.** How can students effectively organize their research findings from various online sources?
- (A) By relying solely on memory
- (B) By using digital note-taking tools, creating outlines, and categorizing information based on themes or topics.
- (C) By writing everything down on paper without any structure
- (D) By mixing all information together without categorization
- 104.** What is the primary function of computers in healthcare?
- (A) Weather forecasting
- (B) Entertainment
- (C) Patient monitoring
- (D) Data entry
- 105.** What is one of the objectives of the ICT module?
- (A) To memorize historical dates
- (B) To recognize capacity for new understandings
- (C) To avoid using technology
- (D) To focus solely on theory
- 106.** Which need has the cellular phone primarily evolved to satisfy technologically?
- (A) Nutrition
- (B) Health
- (C) Communication
- (D) Exercise
- 107.** Read the following two statements: I: Information and Communication Technology (ICT) is considered a subset of Information Technology (IT). II: The 'right to use' a piece of software is termed as copyright. Which of the above statement(s) is/are CORRECT?
- (A) Both I and II
- (B) Neither I nor II
- (C) II only
- (D) I only

108. Sending and receiving information is called ____
- (A) Conversation
 - (B) Content
 - (C) Communication
 - (D) Internet
109. How can ICT be used in research?
- (A) To collect data
 - (B) To analyze data
 - (C) To disseminate research findings
 - (D) All of the above
110. Personal logs or journal entries posted on the Web are known as:
- (A) Listservs.
 - (B) Webcasts.
 - (C) Blogs.
 - (D) Subject Directories.
111. A quick way to find data in a database is to use ____
- (A) Questions
 - (B) Quandries
 - (C) Queries
 - (D) File folders
112. How can internet research be useful in market research?
- (A) By providing a vast array of websites and resources.
 - (B) By offering free products.
 - (C) By reducing marketing costs.
 - (D) By avoiding customer feedback.
113. Companies can adjust prices dynamically in response to fluctuations in demand-this is the impact of ICT on ____
- (A) Product
 - (B) Price
 - (C) Place
 - (D) Promotion
114. Why should you use key words, phrases, and focus questions when you are researching?
- (A) They help you narrow down results and find what you are looking for
 - (B) You shouldn't use those
 - (C) All the above
 - (D) None of the above
115. The role of Information Technology (IT) in the environment includes:
- (A) Tracking wildlife through sensors and satellite images
 - (B) Promoting online games
 - (C) Encouraging pollution
 - (D) Decreasing internet access
116. Computers cannot be used to ____
- (A) Play music.
 - (B) Play games.
 - (C) Control traffic lights.
 - (D) Change diapers.
117. A file made of rows and columns that help sort, organize, and arrange data efficiently, and calculate numerical data. What makes a spreadsheet software program unique is its ability to calculate values using mathematical formulas and the data in cells.
- (A) Cloud Storage
 - (B) Video Conferencing Tool
 - (C) Presentation Tool
 - (D) Spreadsheet
 - (E) Word Processing Tool
118. Using words such as AND, OR, and NOT in order to create a more meaningful search
- (A) Boolean
 - (B) Publication
 - (C) Quotation
 - (D) Authoritative
119. Which of the following inventions is NOT included in the background of digital communications?
- (A) Quill

- (B) Telegraph
 - (C) Computer
 - (D) Cell phone
- 120.** Business researchers frequently utilize electronic resources like mailing lists, discussion boards, social networking sites, and blogs for their research.
- (A) False
 - (B) True
 - (C) Only sometimes
 - (D) Rarely
- 121.** How do you communicate with your database?
- (A) By using HTML.
 - (B) By using JavaScript.
 - (C) By using Structured Query Language (SQL).
 - (D) By using PHP.
- 122.** Which of the following is an example of ICT used for data analysis in research?
- (A) Statistical software
 - (B) Paper and pencil
 - (C) Human coders
 - (D) None of the above
- 123.** How do ICT tools employed within companies help improve efficiency?
- (A) They complicate business operations
 - (B) They reduce customer reach
 - (C) They streamline business processes
 - (D) They have no impact on efficiency
- 124.** Seek information on how they will resolve their sickness, 2/3 of netizens have used the computer as a source of health-related information
- (A) Information Seeking
 - (B) Decision Support
 - (C) Personal Health Records
 - (D) Communications and Support
 - (E) Disease Management
- 125.** How has technology impacted academic research?
- (A) By limiting data analysis tools.
 - (B) By providing resources and fostering collaboration.
 - (C) By reducing research efficiency.
 - (D) By discouraging virtual interactions.
- 126.** The application of business research is strongest in:
- (A) Guesswork
 - (B) Decision support
 - (C) Literature writing
 - (D) History building
- 127.** The primary purpose of software is to turn data into ____
- (A) Web sites.
 - (B) Information.
 - (C) Programs.
 - (D) Objects.
- 128.** Which factor does NOT contribute to the digital divide?
- (A) Age and level of digital literacy
 - (B) Government policies on Internet access
 - (C) Personal preference for using analog technology
 - (D) Availability of broadband infrastructure
- 129.** Which of the following is an example of ICT used for participant recruitment in research?
- (A) Flyers posted on bulletin boards
 - (B) Personal referrals from friends or family
 - (C) Social media ads
 - (D) Phone calls to potential participants
- 130.** Emails and texts are easily tracked to confirm what was discussed in previous correspondence. Even phone conversations can be recorded and logged in digital formats through customer retention management software
- (A) Communication Log
 - (B) Mobile Worker
 - (C) Lack of Relationship Building
 - (D) Speed and efficiency

131. What is the practical approach when dealing with hundreds of related articles?
- (A) Skimming to assess relevance and value
 - (B) Focusing only on articles with long reference lists
 - (C) Reading all articles carefully
 - (D) Avoiding reading articles with complex techniques
132. What happens when a phrase or sentence is placed inside quotation marks when doing research?
- (A) Will only return items that have both terms.
 - (B) Will search for words that are together and in order
 - (C) Will return items that exclude a term
 - (D) Will return items that have either of the terms
133. Which type of signal includes voice?
- (A) Digital signal
 - (B) Analog signal
 - (C) Binary code
 - (D) Morse code
134. Who invented the loom that uses punched wooden cards?
- (A) Charles Babbage
 - (B) Joseph Marie Jacquard
 - (C) Herman Hollerith
 - (D) Alan Turing
135. In ____, the cells are referred by their fixed position in the worksheet.
- (A) Relative referencing.
 - (B) Absolute referencing.
 - (C) Mixed referencing.
 - (D) None of these.
136. Which type of digital communication is best suited for conveying complex data and analysis?
- (A) Audio
 - (B) Collaboration Tools
 - (C) Reports
 - (D) Social Media
137. SPSS stands for ____
- (A) Statistical Product and Service Solution
 - (B) Software Platform Statistical Science
 - (C) Statistical Package for the Social Science
 - (D) Solved Product Statistical Science Edit
138. At the end of the course, you are expected to:
- (A) Demonstrate public speaking skills
 - (B) Analyze data for decision making
 - (C) Demonstrate proficiency in using computer applications software
 - (D) Comprehend the rapid change of the economic growth and environment
139. What are the two main ways to do a literature search?
- (A) Interviewing researchers and using a manual approach
 - (B) Electronically with a computer and with a PDA
 - (C) Manually and electronically with a computer
 - (D) None of these
140. How might technological advancements impact experimental research in psychology?
- (A) They may limit the scope of research to traditional methods.
 - (B) They could offer new tools for conducting research, potentially opening up new areas of study.
 - (C) They will make experimental research obsolete.
 - (D) They will prevent ethical considerations.
141. The use of operators like AND, OR and NOT to narrow a search is called:
- (A) Cookie
 - (B) Search Engine
 - (C) Boolean Logic
 - (D) Cache

- 142.** What is the significance of finding internet resources in research?
- (A) To gather information for personal use.
 - (B) To challenge existing knowledge.
 - (C) To showcase the researcher's creativity.
 - (D) To locate materials on the Web for research purposes.
- 143.** What is the primary use of a scanner?
- (A) To output sound
 - (B) To capture and digitize physical documents
 - (C) To store data
 - (D) To display images
- 144.** Which of the following is not an advantage of using ICT in data collection?
- (A) Increased potential for respondent bias
 - (B) Increased speed and efficiency of data collection
 - (C) Ability to collect data from remote locations
 - (D) Ability to collect data in real-time
- 145.** Real-time news access is enabled by:
- (A) Fax machines
 - (B) Digital platforms
 - (C) Typewriters
 - (D) Cassettes
- 146.** Virtual teams face challenges related to:
- (A) Reduced travel expenses
 - (B) Increased face-to-face interactions
 - (C) Time zone differences
 - (D) Employee benefits administration
- 147.** The purpose of using presentation software to prepare multimedia presentations often is to use those presentations to
- (A) Support report findings.
 - (B) Develop web sites.
 - (C) Maintain customer files.
 - (D) Access online resources.
- 148.** Why is technology important in modern research?
- (A) It simplifies collaboration and data analysis.
 - (B) It discourages traditional research methods.
 - (C) It limits access to resources.
 - (D) It reduces the need for efficiency.
- 149.** Is a student database (PReM) management system an example of ___?
- (A) Information Technology (IT)
 - (B) Communication Technology (CT)
 - (C) Information and Communication Technology (ICT)
 - (D) None of above
- 150.** Internet applications in which the users can provide content as well as consume it.
- (A) Cookies
 - (B) Encryption
 - (C) Spyware
 - (D) Web 2.0
- 151.** When including a reference to an outside website or online resource, you can use a ___ to give direct access to this resource.
- (A) Attachment
 - (B) Emoji
 - (C) Hyperlink
 - (D) Draft
- 152.** Which of the following is a potential benefit of using ICT in research?
- (A) It can increase the generalizability of research findings
 - (B) It can reduce the risk of participant discomfort or harm
 - (C) It can increase the number of participants who can be reached
 - (D) It can decrease the need for ethical considerations in research
- 153.** What computer system is used to present data in visual forms making it easier to see geographic patterns.

- (A) Global Position System (GPS)
 - (B) Cell Phones
 - (C) Geographic Information System (GIS)
 - (D) Physical Maps
- 154.** The main objective of NME-ICT is to:
- (A) Replace teachers with technology
 - (B) Integrate ICT in higher education
 - (C) Provide free internet to all schools
 - (D) Promote foreign universities in India
- 155.** What is the main purpose of search engines in research?
- (A) To evaluate the quality of sources
 - (B) To locate and access relevant online resources
 - (C) To create academic papers
 - (D) To catalog library books
- 156.** Data is entered into the computer through a variety of devices such as a keyboard, microphone, scanner, flash drive, or mouse (a)
- (A) Input
 - (B) Output
 - (C) Internet
 - (D) None of above
- 157.** People in offices use me the most, to send information without much cost.
- (A) Letter
 - (B) Newspaper
 - (C) Mobile
 - (D) Email
- 158.** Which is the lowest in the order of the database hierarchy?
- (A) Character
 - (B) Field
 - (C) File
 - (D) Table
- 159.** ICT Infrastructure is provided under which Scheme
- (A) DIKSHA
 - (B) PMeVIDYA
 - (C) EPathshala
 - (D) ICT Scheme of Samagra Shiksha
- 160.** Which of the following reduces paper waste in healthcare?
- (A) Green buildings
 - (B) Electronic Health Records (EHRs)
 - (C) Telemedicine
 - (D) Solar panels
- 161.** Disadvantage of Online Research such as —
- (A) Inconsistencies
 - (B) Versatility
 - (C) Inexpensive
 - (D) Accuracy of data
- 162.** What is the impact of ICT on job creation?
- (A) It decreases job opportunities
 - (B) It only creates jobs in the manufacturing sector
 - (C) It has no effect on job creation
 - (D) It creates new jobs in the ICT sector
- 163.** Nurse Nami a nursing informatic nurse is conducting an in-service regarding different apps that can be downloaded in the PDA that focuses on the pharmacologic database. Following are some of the apps, except
- (A) Epocrates Rx
 - (B) MobileMicromedex
 - (C) Lexi-Complete
 - (D) Socrates Rx
- 164.** What is a key advantage of using video conferencing software in internet-based interviews?
- (A) It allows interviewees to choose their own interview questions.
 - (B) It provides a physical setting for the interview.
 - (C) It enables real-time audio and visual communication.
 - (D) It eliminates the need for interview preparation.

- 165.** What is the term for the use of ICT to conduct research with participants who are not physically present?
(A) Online research
(B) Virtual research
(C) Remote research
(D) Tele-research
- 166.** How does technology facilitate collaboration?
(A) By reducing communication
(B) By using cloud services to share work
(C) By eliminating the need for meetings
(D) By increasing manual paperwork
- 167.** What describes the information you want to find?
(A) Database
(B) Store
(C) Computer
(D) Query
- 168.** How does ICT facilitate remote work?
(A) ICT enables effective communication, collaboration, and access to resources for remote work.
(B) ICT creates barriers to communication among remote workers.
(C) ICT limits access to essential resources for remote work.
(D) ICT reduces the need for technology in remote work.
- 169.** The students were asked to do a google form survey to reflect about their studying styles. Which key affordances does this technology (google form) facilitates?
(A) Learning together
(B) Scaffolding
(C) Differentiated instruction
(D) Metacognition
- 170.** How does computation help people to process data and information to gain knowledge?
(A) Scope
(B) Perspectives
(C) Methods and Tools
(D) Ethics
- 171.** It is a software package used for logical batched and non-batched statistical analysis.
(A) SPSS
(B) SSS
(C) PSST
(D) DWSS
- 172.** A computer system that stores, organizes, retrieves, analyzes, and displays geographic data in layers is:
(A) GIS.
(B) GPS.
(C) Remote sensing.
(D) Topographic analysis.
- 173.** The Partnership of Measuring ICT for development was launched in ____?
(A) Beijing China in July 2004
(B) Hyderabad in June 2006
(C) Sao Paulo, Brazil in June 2004
(D) New Delhi in June 2004
- 174.** What's the home address of a web page?
(A) WWW
(B) LAN
(C) URL
(D) World Wide Web
- 175.** The ____ is a network of networks.
(A) Internetworking Protocol
(B) Internet
(C) IP Address
(D) Domain
- 176.** What pivotal role do librarians or media specialists play?
(A) Conduct disciplinary hearings for major breaches
(B) Draft teacher evaluation criteria for integrity

- (C) Guide integrity through resources and research instruction
(D) Approve personal devices for exam use
- 177.** MS-Access is program for ____?
(A) Presentation.
(B) Documentation.
(C) Calculation.
(D) Data Base.
- 178.** How has ICT affected the overall skill level within industries?
(A) Hindered professional growth
(B) Limited access to education
(C) Enhanced skill development
(D) Reduced knowledge acquisition
- 179.** Nurse Luffy from the Gomu Gomu no Mi Hospital ask you as a Informatic Nurse about the advantages of PDA. Following are some of the advantages, except.
(A) It is lightweight and fits nicely into pockets
(B) The program works slowlyly with lagging or booting up
(C) It provides medical information at the point of care
(D) It reduces stress and saves time and money
- 180.** Oliver is working on a digital health project. Which of the following is a component of standardisation in digital health?
(A) Using ICT platforms that conform to accredited standards
(B) Developing engagement plans
(C) Implementing systems to collect patient-reported experiences
(D) Providing resources and education
- 181.** Which sector uses ICT for diagnosing diseases?
(A) Banking
(B) Medicine
(C) Transportation
(D) Agriculture
- 182.** How can technology be used to combat environmental racism?
(A) By ignoring technological advancements
(B) By using data analytics to identify affected areas
(C) By reducing technological investments
(D) By focusing only on urban development
- 183.** Data going into the computer is called?
(A) Output.
(B) Algorithm.
(C) Calculations.
(D) Input.
- 184.** Which of the following is a potential limitation of using ICT in research?
(A) It can be expensive to implement
(B) It can be time-consuming to learn and use
(C) It can be difficult to obtain participant consent for online research
(D) All of the above
- 185.** Which of the following is not an example of using ICT in research recruitment?
(A) Using social media platforms to recruit participants
(B) Using online advertisements to recruit participants
(C) Using virtual reality environments to recruit participants
(D) Using email lists to recruit participants
- 186.** Which service has been largely replaced by instant messaging through email?
(A) Free social media
(B) International calling
(C) Postal mail
(D) Local delivery
- 187.** How can ICT improve the efficiency of a business? By:
(A) Increasing paperwork and manual processes.
(B) Limiting access to information.
(C) Automating tasks and processes.
(D) Decreasing reliance on digital tools.

188. Shakira posts an update on a social media site.
- (A) Electronic communication
 - (B) Nonverbal communication
 - (C) Verbal communication
 - (D) Written communication
189. Excel is useful for using ____ as opposed to words or presentations?
- (A) Excel is useful in presenting
 - (B) Excel is useful in documents
 - (C) Excel is useful in numbers
 - (D) Excel is useful in publishing
190. What is the role of information and communication technology (ICT) in the medical field?
- (A) To improve the acquisition, retrieval, storage, and use of information in health and biomedicine.
 - (B) To facilitate more convenient government services and make the government more transparent and accountable.
 - (C) To increase access to home care and manage house systems.
 - (D) To analyze, store, process, and share vast amounts of data in businesses.
191. A computer helps us to gather information via the
- (A) Www world wide web
 - (B) Radio
192. Which feature of Excel allows you to easily arrange and summarize complex data?
- (A) Charts
 - (B) Smart Art Graphics
 - (C) Pivot Table
 - (D) Table
193. What is the term for the use of ICT to connect researchers from different parts of the world?
- (A) Virtual collaboration
 - (B) Online networking
 - (C) Global research
 - (D) Digital communication
194. How does the use of ICT contribute to economic development?
- (A) By reducing employment opportunities
 - (B) By fostering innovation and efficiency in business
 - (C) By discouraging entrepreneurship
 - (D) By limiting global trade
195. How did a community in Detroit address the digital divide among students?
- (A) By sending out computer tablets with internet plans
 - (B) By promoting public Wi-Fi spots
 - (C) By organizing internet workshops
 - (D) By banning online classes
196. Kiri created a timeline of how information has been stored and shared over time. Her timeline ranges from clay tablets that were created over 4,500 years ago to the smart phones that we use today. She divided her timeline into sections based on the most popular medium of the time period. What is the period of today's information technology called?
- (A) Cell phone age
 - (B) Technology age
 - (C) Information age
 - (D) Sharing age
197. Which of the following technologies would you use to analyze the social media data collected by a major online retailer?
- (A) OLAP
 - (B) Data warehouse
 - (C) Data mart
 - (D) Hadoop
 - (E) DBMS
198. Which action best reflects responsible use of AI tools during drafting and revision?
- (A) Copying AI text without any changes or citation
 - (B) Ignoring revision history to save time

- (C) Letting AI fully write the assignment uncredited
(D) Using AI to brainstorm ideas and track edits
- 199.** A word used in computing in a search to match a desired topic is called ____
(A) Hint.
(B) Passsword.
(C) User.
(D) Keyword.
- 200.** What is the importance of using keywords during a search for background research?
(A) To make the search complicated.
(B) To narrow down the topic and find relevant sources.
(C) To confuse the reader.
(D) None of the above
- 201.** Which digital behavior causes misunderstandings most often?
(A) Using emojis
(B) Rereading before sending
(C) Sending messages while angry
(D) Adding punctuation
- 202.** The address of a World Wide Web page.
(A) URL
(B) Blog
- 203.** Web sources are:
(A) Always reliable
(B) Need evaluation for authenticity
(C) Only government websites
(D) Irrelevant for research
- 204.** Which of the following is the most helpful device in research and to researchers?
(A) Calculator.
(B) Fax machine.
(C) Xerox machine.
(D) Computer.
- 205.** Which is the BEST word to describe the type of network that is the Internet?
(A) Expensive
(B) Centralised
(C) Complicated
(D) Distributed
- 206.** What role does ICT continue to play in industries?
(A) Diminishing innovation and entrepreneurship
(B) Limited participation in global markets
(C) Driving growth and success
(D) Decreasing efficiency and accessibility
- 207.** Computer professionals working in a computer centre are
(A) Software.
(B) Firmware.
(C) Hardware.
(D) Humanware.
- 208.** The primary advantage that the World Wide Web has brought to literature reviews is
(A) More time efficiency when conducting a literature search.
(B) A strong classification system that is globally accepted.
(C) Increased certainty that information is reliable and credible.
(D) Immediate access to a wide variety of current materials.
- 209.** The data we type into a computer act as?
(A) Input
(B) Output
- 210.** Which one is not the Advantage of ICT Effect on employment?
(A) Machines do not take holidays
(B) Safe working environment
(C) Fewer manual tasks
(D) Workers getting replaced

- 211.** Which keyword is the most effective to search population of Nigeria in 2019?
- (A) Nigeria population
 - (B) Nigeria 2019
 - (C) Nigeria population 2019
 - (D) Population 2019
- 212.** Why is it important to consider both rural and urban perspectives in technology development?
- (A) It is crucial to focus solely on urban needs for effective technology.
 - (B) Rural perspectives are irrelevant in modern technology development.
 - (C) Urban technology should dominate to drive economic growth.
 - (D) It is important to ensure technology is inclusive and meets the diverse needs of both rural and urban communities.
- 213.** Which of the following is NOT an advantage of ICT?
- (A) Job creation
 - (B) Increased isolation
 - (C) Globalization
 - (D) Cost-effectiveness
- 214.** This code uses 1s and 0s to transfer data
- (A) Braille
 - (B) ASL
 - (C) Binary Code
 - (D) Morse Code
 - (E) Semaphore
- 215.** EBCDIC code developed by
- (A) ANSI.
 - (B) IBM.
 - (C) SILICA.
 - (D) Plastic.
- 216.** Which of the following best describes ICT's role in communication?
- (A) Expensive and unreliable
 - (B) Provides cheaper and faster communication methods
 - (C) Limited to face-to-face interaction
 - (D) Only useful for businesses
- 217.** Can medical personnel in remote areas conduct videoconferencing with specialized doctors?
- (A) Yes
 - (B) No
- 218.** A substitute to represent part of a word that you are uncertain about when searching for a similar word.
- (A) Wildcard Searches.
 - (B) Placeholders.
 - (C) Foreign Key.
 - (D) Boolean Operators.
- 219.** Application /app (n)
- (A) Easy to carry or to move
 - (B) A software programme designed to do a particular job
 - (C) Producing a successful result
 - (D) A device that stores and plays sound and pictures
- 220.** Which one of the following software applications would be the most appropriate for performing numerical and statistical calculations?
- (A) Database.
 - (B) Document processor.
 - (C) Graphics package.
 - (D) Spreadsheet.
- 221.** How could a student demonstrate the adoption of technology by agriculture producers in their area?
- (A) Hold a classroom demonstration on automated systems
 - (B) Write a poem about farming
 - (C) Paint a picture of a farm
 - (D) Organize a sports event

222. Companies use computers for which of the following?
- (A) Keep track of NCAA Final Four Tournament brackets.
 - (B) Managing a personal bank account.
 - (C) Managing product research & development.
 - (D) Writing a thesis paper.
223. An organization is concerned with the amount of sensor data that is being generated locally, analyzed in the cloud and returned for processing at the local site. Which solution will keep the data closer to the source for pre-processing?
- (A) Cloud computing.
 - (B) Distributed processing.
 - (C) Data mining.
 - (D) Fog computing.
224. A word processor would most likely be used to do
- (A) Keep an account of money spent.
 - (B) Do a computer search in media center.
 - (C) Maintain an inventory.
 - (D) Type a biography.
225. ICT security is improved through:
- (A) More competition
 - (B) Encryption methods
 - (C) Manual record keeping
 - (D) Reduced physical activity
226. A teacher encourages students to evaluate websites before citing them. Which digital principle is emphasized?
- (A) Netiquette
 - (B) Information literacy
 - (C) Cybercrime prevention
 - (D) Data hacking
227. Which of the following is a potential limitation of using ICT in research data collection?
- (A) Increased potential for respondent bias
 - (B) Decreased speed and efficiency of data collection
 - (C) Inability to collect data from remote locations
 - (D) None of the above
228. It is important to select reliable electronic sources when conducting research.
- (A) True
 - (B) False
229. What is a direct impact of technology on students' research skills mentioned in the passage?
- (A) Students must consult a single expert source to avoid misinformation
 - (B) Immediate access to abundant, quality information accelerates learning
 - (C) Research skills develop only after extensive laboratory experience
 - (D) Access to information slows learning due to distractions
230. Application that allows you to type papers
- (A) Google Forms
 - (B) Google Slides
 - (C) Gmail
 - (D) Google Docs
231. Including someone in an e-mail message without their name being visible to the other recipients.
- (A) Signature
 - (B) Blind copy carbon
 - (C) Spam
 - (D) Blind carbon copy
232. What never changes when you insert rows or copy or move formulas?
- (A) Absolute reference
 - (B) Relative reference
 - (C) Automatic
 - (D) Create
233. Did technology aid in the spread of citizen journalism
- (A) Yes
 - (B) No

234. Which of the following best describes ICT?
- (A) A single device for personal computing
 - (B) The infrastructure and components that enable modern computing
 - (C) A type of social media application
 - (D) An internet browser
235. A college wants to give training in use of Statistical Package for Social Sciences (SPSS) to researchers. For this the college should organise:
- (A) Workshop.
 - (B) Seminar.
 - (C) Conference.
 - (D) Lecture.
236. What is a potential challenge of using the internet for research?
- (A) Lack of websites
 - (B) Lack of access to information
 - (C) The availability of unreliable or irrelevant resources
 - (D) Too few search engines
237. Keyword
- (A) Random word in a text
 - (B) Title of a book or article
 - (C) Passwords for databases
 - (D) Essential words that represent the main ideas in a search
238. Which of the following can help a business monitor quantitative business factors?
- (A) Question options:E-commerce
 - (B) Scheduling and filing systems
 - (C) E-mail and messenger systems
 - (D) Inventory and transaction systems
239. Which of the following is not an example of ICT in research?
- (A) Online data analysis software
 - (B) Mobile apps for data collection
 - (C) Social media for participant recruitment
 - (D) In-person interviews
240. Jill says her boss' emails always seem to be rude and pushy, and they make her feel like he is always angry with her. Jill's boss might have a problem with the ___ of his communication in his emails.
- (A) Bias
 - (B) Tone
 - (C) Style
 - (D) Context
241. How has ICT impacted industries' access to markets?
- (A) Limited reach to local audiences
 - (B) Reduced diversity within industries
 - (C) Expanded reach to global audience
 - (D) Decreased sales opportunities
242. Computers use a series of ___ numbers to encode information
- (A) Large
 - (B) Multiple
 - (C) Single
 - (D) Binary
243. Which of the following is not an example of ICT used for data collection in research?
- (A) Online surveys
 - (B) Phone interviews
 - (C) Mobile apps
 - (D) Paper and pencil questionnaires
244. Computers gather data, which means that they allow users to.
- (A) Present data.
 - (B) Input data.
 - (C) Output data.
 - (D) Store data.
245. Which of the following is considered a positive impact of ICT in society?
- (A) Reduced physical activity
 - (B) Reduced personal interaction
 - (C) Increased access to information
 - (D) High cost of hardware and software

246. Looking for commonality in the contents of health information, to know if valid or not
- (A) Information Seeking
 - (B) Decision Support
 - (C) Personal Health Records
 - (D) Communications and Support
 - (E) Disease Management
247. A word or phrase used in a search
- (A) Distribution list
 - (B) Keyword
 - (C) Address book
 - (D) To-do bar
248. The structure and use of technology can promote higher-level thinking skills.
- (A) Active learning
 - (B) Cooperative learning
 - (C) Critical Thinking
 - (D) Instructional effectiveness
249. What is one way ICT is used in health care?
- (A) To ignore patient needs
 - (B) To increase recovery time
 - (C) To improve precision in surgeries
 - (D) To make surgeries more invasive
250. What is the tiniest nugget of data in a database, representing a characteristic or attribute of an entity?
- (A) Row
 - (B) Database
 - (C) Field
 - (D) Table
251. Cloud computing allows ___ providers to gain easy access to the patient data collated from numerous sources, share it with the important stakeholders and give out timely prescriptions and treatment protocols
- (A) Service
 - (B) Healthcare
 - (C) Data
 - (D) Information
252. Match the term to the definition: The personal space for researchers in Google Scholar, where their publications and the citations they receive are listed, is called:
- (A) Google Scholar Profile
 - (B) Google Scholar Alerts
 - (C) Google Scholar Library
 - (D) Google Scholar Search
253. What is the primary advantage of computer searching over manual searching?
- (A) Computer searching is more affordable.
 - (B) Computer searching requires less training.
 - (C) Computer searching is more comprehensive and time-efficient.
 - (D) Computer searching provides more accurate results.
254. What is a challenge of ICT related to constant risks?
- (A) Security Threats
 - (B) Privacy Concerns
 - (C) Digital Divide
 - (D) None of above
255. Which systematic method would best help a community group understand patterns of land use and resource distribution?
- (A) Geographic Information Systems (GIS) Mapping
 - (B) Random Sampling
 - (C) Focus Group Discussions
 - (D) Case Study Analysis
256. Which of the following is the most significant advantage of using ICT tools in research?
- (A) Easier hypothesis formulation
 - (B) Faster publication of research articles
 - (C) Improved access to remote participants and global data
 - (D) Reducing the need for ethical approval

257. Data transfer on the Internet primarily relies on which protocol?
- (A) HTTP
 - (B) FTP
 - (C) TCP/IP
 - (D) SMTP
258. All information, or data, transmitted on the Internet (websites, photos, emails, texts, videos, etc) is converted and sent in
- (A) WiFi signals
 - (B) Binary Code
 - (C) One ISP
 - (D) High security
259. What is a major privacy concern with smart cities?
- (A) Free Wi-Fi
 - (B) Lack of entertainment
 - (C) Too many public spaces
 - (D) Data collection from sensors and cameras
260. Why is ICT important for global communication?
- (A) ICT hinders collaboration by creating barriers.
 - (B) ICT is important for global communication because it enables instant, real-time interaction and collaboration across geographical boundaries.
 - (C) ICT is only useful for local communication.
 - (D) ICT is primarily used for entertainment purposes.

1.7.8 Research Databases

1. Which field does the AHCI (Arts & Humanities Citation Index) belong to?
 - (A) Natural sciences
 - (B) Social sciences
 - (C) Arts and humanities
 - (D) Natural sciences and social sciences
2. One of the following search engine is exclusively meant for scientific information:
 - (A) Google
 - (B) Yahoo
 - (C) SCIRUS
 - (D) Altavista
3. What are the advantages of using educational websites as sources for research?
 - (A) They contain less information than personal blogs
 - (B) They are usually biased towards government policies
 - (C) They are often outdated and irrelevant
 - (D) They often provide reliable, well-researched information that is subject to rigorous standards and scrutiny
4. An electronic place that holds articles, e-books, and a lot of collected information like an online library
 - (A) Database
 - (B) Research
 - (C) Source
 - (D) Direct quotation
5. Text database can be ____
 - (A) Unstructured
 - (B) Semi-structured
 - (C) Well-structured
 - (D) Both A and B
 - (E) A, B, C
6. What is a subscription database?
 - (A) A search on Follett Destiny
 - (B) An internet resource with incorrect information
 - (C) A computer catalog to look up library books
 - (D) An internet resource your school pays for with good information

7. An organized collection of data for research purposes is called:
(A) Database
(B) Spreadsheet
(C) Document
(D) Presentation
8. Databases are used for:
(A) To store information
(B) To create a presentation
(C) To setup information
(D) To entertain your friends
9. A good way to get away from Googling and searching for hours for credible research is to use a ____
(A) Website
(B) Database
(C) Newspaper
(D) Almanac
10. What does Buzzsumo do?
(A) Curates images
(B) Stores bookmarks
(C) Collects popular content
(D) Creates magazines
11. Where can we find related studies?
(A) In the basket
(B) In Messenger
(C) Google Scholar
(D) None of the above
12. Which classification system was developed by Dr. Ranganathan?
(A) Dewey Decimal Classification
(B) Universal Decimal Classification
(C) Colon Classification
(D) Library of Congress Classification
13. A database is a collection of organized information on a computer
(A) True
(B) False
14. Complete the statement: Scientific or academic databases contain ____ that is relevant, up-to-date, accurate, verified, and of high quality.
(A) Information
(B) Summaries
(C) Advertising
(D) Metadata only
15. What is a significant benefit of using research databases?
(A) They offer limited access to information
(B) They provide peer-reviewed and credible sources
(C) They contain mostly opinion pieces
(D) They focus only on recent studies
16. Which example fits electronic or digital secondary sources?
(A) Handwritten field schedules
(B) Face-to-face structured interviews
(C) Physical laboratory instruments
(D) Online databases like Scopus
17. It guides you to several sources and provide abstract and often full text version of the article.
(A) Electronic Catalog
(B) Electronic Database
(C) Electronic Networks
(D) Electronic Book
18. Database can be classified based on users. Based on this classification, what type of database provides simultaneous access for multiple users?
(A) Single user database
(B) Multi-user database
(C) Heterogeneous database
(D) Distributed database
19. What is a stored question about information in a data-base?
(A) Query.
(B) Report.
(C) Record.
(D) Field.

20. What program works with databases?
(A) MS Access
(B) MS PowerPoint
(C) MS Word V
(D) None of above
21. What type of print resource provides excellent in-depth, historical data?
(A) Periodicals
(B) Bibliographic indexes
(C) Databases
(D) Books
22. You're working for a lab that is looking at the human gene for insulin, what would be the best database to use?
(A) Google
(B) NCBI
(C) Flybase
(D) Bing
23. A comprehensive collection of related sources and articles organized for convenient access, usually in a digital format
(A) Sources
(B) Database
(C) Paraphrase
(D) Citation
24. Why is it important to learn how to do online database searching?
(A) Because online databases are always free to access
(B) Because online databases are more up-to-date than printed indexes
(C) Because many important indexing and abstracting periodicals no longer exist in hard copy
(D) Because online databases are easier to use than printed indexes
25. What are some effective strategies for searching for relevant literature?
(A) Using keywords and Boolean operators
(B) Narrowing searches by subject area, publication date, or language
(C) Utilizing advanced search features like citation tracking
(D) All of the above
26. Which of the following statements best defines the word 'database'?
(A) A database is a collection of data or information which is stored in a logical and structured way
(B) A database is a collection of statistics stored only for computers.
(C) A database does not collect data or information.
(D) None of above
27. What type of database is ERIC?
(A) An education research database
(B) A financial database
(C) A medical database
(D) A legal database
28. Which of these sources would you find in a library?
(A) Old letters.
(B) Academic journal articles.
(C) Speeches.
(D) Scrapbooks.
29. Which of the following is a Premier database of profiles of Scientists, Researchers and other faculty members working at leading institutions of India.
(A) VIDWAN
(B) E-Kalpa
(C) E-Acharya
(D) A-View
30. Which of the following is a reliable source for academic research?
(A) A personal blog
(B) A peer-reviewed journal
(C) A social media post
(D) A fictional novel

31. Refers to the use of "AND", "OR" and "NOT" when searching for data within a database.
- (A) Pronoun Operators
 - (B) Boolean Operators
 - (C) Conjunction Operators
 - (D) Mathematical Operators
32. How can JSTOR be accessed?
- (A) It is freely available to everyone.
 - (B) Only through a personal subscription.
 - (C) Through a participating institution or a JSTOR username and password.
 - (D) By contacting the publisher directly.
33. A database is ____
- (A) A collection of files.
 - (B) A persistent, organised store of data.
 - (C) An unstructured collection of data.
 - (D) A folder containing related files.
34. Reputable journal
- (A) Are indexed in large, trusted databases of scholarly work such as Web of Science, Scopus, MEDLINE (for biomedical work), the Directory of Open Access Journals (DOAJ), Open Access Scholarly Publishers Association (OASPA), and the Committee on Publication Ethics (COPE)
 - (B) Does not provide the adequate and qualified review
 - (C) Do not have Qualified, independent editorial oversight
 - (D) None of above
35. A source or resource is ____
- (A) Any information used in a research paper
 - (B) Any place information was found for a research paper
 - (C) Any national library card
 - (D) Any library card catalog
36. What is the primary function of indexing and abstracting periodicals?
- (A) To help researchers find pertinent sources in their field
 - (B) To provide full-text access to all articles
 - (C) To evaluate the quality of research articles
 - (D) To store and archive old journals
37. When doing an advanced Google search, which websites can be trusted?
- (A) .edu.
 - (B) .org.
 - (C) .gov.
 - (D) All websites have potential for bias.
38. Written for a specific audience; filled with technical jargon on a particular topic
- (A) Articles
 - (B) Periodicals
 - (C) E-journal
 - (D) Scholarly Journals
39. Where can you go to find credible websites for research?
- (A) Gwinnett County Library Website
 - (B) Wikipedia
 - (C) Personal Blogs
 - (D) Social Media Platforms
40. Which index would be most helpful for finding articles that cite a specific author's work?
- (A) Source Index
 - (B) Citation Index
 - (C) Permuterm Subject Index
 - (D) Corporate Address Index
41. Which of the following is a benefit of using academic databases for research?
- (A) Access to peer-reviewed and credible sources
 - (B) Unlimited free access to all content
 - (C) Only opinion-based articles are available
 - (D) No need to reference sources
42. Used to organise, manipulate and analyse data; uses one or two tables to organise the data; tables are made up of records; common functions include the ability to carry out

- queries on data and produce reports and add, delete and modify data in tables.
- (A) Database.
 - (B) Spreadsheet.
 - (C) Video editing.
 - (D) Word Processor.
43. A type of query language
- (A) CD
 - (B) HD
 - (C) iPhone
 - (D) SQL
44. Also, many databases and online catalogs have added tools that connect researchers to ___ material. For example, after a researcher has clicked on a source, the database may give a list of similar search words or subjects.
- (A) Related
 - (B) Resource
 - (C) Websites
 - (D) Adjacent
 - (E) Works cited
45. Which of the following are Canadian Business and Current Affairs (CBCA) (ProQuest), EBSCO, and CPL.Q examples of?
- (A) Card catalogues
 - (B) Websites
 - (C) Online catalogues
 - (D) Research databases
46. What is the main purpose of Google Scholar?
- (A) To provide access to news articles.
 - (B) To rank websites by popularity.
 - (C) To search for scholarly materials.
 - (D) To facilitate online discussions.
47. A location or address identifying where documents can be found on the Internet
- (A) Email address
 - (B) IP address
 - (C) Phone number
 - (D) URL
48. Why is source identification important in the research process?
- (A) It helps you create focused questions
 - (B) It allows you to locate credible materials from academic databases, library resources, and reputable websites
 - (C) It helps you identify key terminology
 - (D) It helps you gain background knowledge
49. What is the main advantage of using periodical indexes in education research?
- (A) They provide access to historical documents.
 - (B) They offer free access to all articles.
 - (C) They provide up-to-date information on research and current opinions.
 - (D) They are easier to use than electronic databases.
50. A ___ is a collection of data organized in a manner that allows access, retrieval and use of that data.
- (A) Recordset.
 - (B) Database.
 - (C) Document.
 - (D) None of the above.
51. Databases make research findings more ___
- (A) Credible
 - (B) Accurate
 - (C) Current
 - (D) All of the above
52. Which databases cover academic areas such as social sciences, education, and humanities?
- (A) JSTOR and Google Scholar
 - (B) Web of Knowledge and Dissertation Abstracts
 - (C) Academic Search Premier and Academic Search Complete
 - (D) Professional Development Collection and ERIC

53. According to the text, what is an advantage of electronic databases over manual searching?
- (A) Electronic databases save time.
 - (B) Electronic databases are free to use.
 - (C) Electronic databases provide more accurate information.
 - (D) Electronic databases require no training.
54. You are assigned to review literature on mobile learning. How should you start?
- (A) Search for studies in reputable databases
 - (B) Copy from Wikipedia
 - (C) Use only one random blog
 - (D) Avoid online sources
55. Shodh Sindhu is:
- (A) A consortium for higher education electrical resource
 - (B) A consortium for secondary education electronic resource
 - (C) A consortium for higher education electronic resource
 - (D) A consortium for primary education electronic resource
56. What are databases mainly used for?
- (A) To store archived data
 - (B) To store and organise data
 - (C) To analyse data
 - (D) None of above
57. What term is used to describe a collection of information that you can use to build reports or discover facts about an environment?
- (A) Database.
 - (B) Wiki.
 - (C) Relation.
 - (D) None of these.
58. What is the main purpose of discovery tools in research?
- (A) To provide access to a single, unified index of research materials
 - (B) To help researchers discover new research topics
 - (C) To evaluate the quality of research articles
 - (D) To facilitate collaboration between researchers
59. Which of the following is a tool to research scholarly articles?
- (A) Google Scholar
 - (B) Peardeck
 - (C) OneTab
 - (D) Google Search Bar
60. Which of the following search engines is BEST used when reviewing related literature?
- (A) Google
 - (B) Google Scholar
 - (C) Bing
 - (D) Yahoo Edit
61. In the context of research, academic citation search engines are mainly used for —
- (A) Finding full text articles and books
 - (B) Generating footnotes for papers
 - (C) Searching library catalogues
 - (D) Locating citation information for sources
62. Library databases are an example of sources
- (A) True
 - (B) False
 - (C) All the above
 - (D) None of the above
63. A collection of information that is organized and retrievable through a variety of means.
- (A) Bibliography
 - (B) Card catalogue
 - (C) Primary source
 - (D) Database
64. Databases such as Academic Search Elite function like — centers. They collect and categorize articles-most of which have been published in print prior to being uploaded in the electronic format.
- (A) Related

- (B) Resource
 - (C) Websites
 - (D) Adjacent
 - (E) Works cited
65. Newspapers and magazines most often have their own websites. But researchers can rely on electronic ____ such as Academic Search Elite, JSTOR, or Academic One File to navigate through the millions of available articles.
- (A) Catalogs
 - (B) Databases
 - (C) Invention
 - (D) Adjacent
66. A doctoral student who begins working on his bibliography for his thesis would most likely utilize
- (A) O*NET
 - (B) ERIC, for primary and secondary resources
67. Gale Educational Database
- (A) Credible source
 - (B) Not a credible source
68. The specific organization and method of keeping track of data is the definition of
- (A) Extraction
 - (B) Cache
 - (C) Analytics
 - (D) Utility
 - (E) Indexing
69. Which of the following sites/search engines is NOT advisable to use when reviewing related literature?
- (A) JSTOR
 - (B) WIKIPEDIA
 - (C) EBSCOHost
 - (D) GOOGLE SCHOLAR Edit
70. What is a key advantage of using discovery tools?
- (A) They are freely available to everyone.
 - (B) They provide access to a wider range of resources than traditional search engines.
 - (C) They allow researchers to search different databases simultaneously.
 - (D) They offer personalized search results based on user preferences.
71. Which of the following is NOT a reputable research database?
- (A) JSTOR
 - (B) PubMed
 - (C) Wikipedia
 - (D) ScienceDirect
72. Which of the following defines the term 'file' in relation to databases?
- (A) A file is all of the information about one person or one thing
 - (B) A file is one type or piece of information
 - (C) A file is the collection of all the database records on one topic or subject
 - (D) None of above
73. Avery is conducting research for her thesis and needs to find reliable, peer-reviewed articles. Which type of source is most likely to contain these articles?
- (A) Periodicals
 - (B) Internet Sources
 - (C) Journals
 - (D) Books
74. What is a good place to research?
- (A) Ask my pet dog
 - (B) Instagram
 - (C) The internet (with credible sources!)
 - (D) My 2nd grade cousin
75. An appropriate source to find out descriptive information is ____
- (A) Bibliography
 - (B) Directory
 - (C) Encyclopedia
 - (D) Dictionary

76. Which is not a feature of database software?
- (A) Tables
 - (B) Queries
 - (C) Filters
 - (D) Cropping
77. What helps you find reliable sources?
- (A) Looking for .edu, .gov, or .org websites
 - (B) Choosing the first result
 - (C) Searching for your exact question
 - (D) Only looking at news websites
78. How can online databases be effectively utilized for research purposes?
- (A) Use outdated databases
 - (B) Identify relevant database, use advanced search features, evaluate credibility of sources, cite information properly
 - (C) Accept information without verification
 - (D) Ignore search features
79. Which of the following is mentioned as a reliable source for authentic information in data acquisition?
- (A) Random internet websites
 - (B) Private databases without proper sources
 - (C) Government-hosted open-access websites
 - (D) Social media platforms
80. What does the "One Nation, One Subscription" initiative aim to achieve in higher education?
- (A) To provide free access to digital textbooks
 - (B) To promote research collaboration among universities
 - (C) To provide free access to academic journals and research databases to universities
 - (D) To create a single academic portal for all universities
81. Which one is the database software?
- (A) MS Word.
 - (B) Word Perfect.
 - (C) MS Excel.
 - (D) Ms Access.
82. A Database in academic research is:
- (A) A collection of data organized for easy access and analysis.
 - (B) A type of software used for creating presentations.
 - (C) A method of statistical analysis.
 - (D) A tool for editing academic papers.
83. Select all the credible sources to use in a research paper listed below.
- (A) Newspapers
 - (B) Advertisement
 - (C) Popular magazines
 - (D) Non-fiction
 - (E) Academic Journals
84. It is possible to locate information on a particular topic in several different publications by using ____
- (A) A newspaper
 - (B) A social media
 - (C) An index
 - (D) A cookbook
85. Which of the following databases is used to store image, audio, and video data
- (A) Heterogeneous databases
 - (B) Temporal databases
 - (C) Legacy databases
 - (D) Multimedia databases
86. An article, website, or book which researchers read and take notes from to learn about their topic
- (A) Source
 - (B) Works Cited
 - (C) Credible
 - (D) Database
87. Which of the following sources found on the Internet would be considered credible enough to include in a formal report?

- (A) Wikipedia and other online encyclopedias
(B) Information found in discussion forums
(C) A personal blog
(D) Library databases
88. Which of the following is not a database containing information to be used during the literature review?
(A) ERIC.
(B) PsychINFO.
(C) SocioFILE.
(D) All of the above are potentially useful data bases.
89. It is the most effective way to locate and access scholarly journal articles.
(A) Bibliography
(B) Abstract
(C) Library Database
(D) Electronic Book
90. What is the primary purpose of using databases in the research process?
(A) To find background information.
(B) To challenge existing knowledge.
(C) To locate materials on the Web.
(D) To find citations to journal articles.
91. Some professors expect at least some of your research to be based on articles in ____ (1) ____ sources called scholarly or academic ____ (2) ____
(A) Credibility; 2) reviews
(B) Articles; 2) current
(C) Specialized; 2) journals
(D) None of above
92. Vidwan is a data base of:
(A) Expert Database and National Researcher Network
(B) Journal Database
(C) Digital Library Database
(D) Librarian database and their network
93. What is the name of the on-line database that allows you to browse through journal articles about your research topic?
(A) Bryman's Resources for International Language Learning (BRILL).
(B) Www. amazon. co. uk (ACU).
(C) Social Science Citation Index (SSCI).
(D) ABC/CONFORM.
94. If you don't have access to a library database, which tool is recommended for academic research?
(A) Wikipedia
(B) Google
(C) Google Scholar
(D) Bing
(E) Yahoo
95. A data ____ contains data about each file in the database and each field within those files.
(A) Log.
(B) Warehouse.
(C) Model.
(D) Dictionary.
96. A good source online can be found at ____
(A) Wikihow
(B) Urban dictionary
(C) Wikipedia
(D) Library Databases (Symbaloo)
97. Which of the following best describes a credible online source?
(A) A website with flashy graphics and advertisements.
(B) A blog with personal opinions.
(C) A peer-reviewed journal article.
(D) A social media post with many likes.
98. ORCID can be linked to:
(A) Google Scholar
(B) Scopus and Web of Science
(C) Grant applications
(D) All of the above

99. What is the purpose of using catalogs in the research process?
- (A) To find background information.
 - (B) To locate materials on the Web.
 - (C) To find books and media.
 - (D) To evaluate research findings.
100. What are the benefits of using academic journals as sources for online research?
- (A) They contain only opinions and no factual data
 - (B) They are less reliable than personal blogs
 - (C) They provide peer-reviewed, credible information that is often more reliable than general websites.
 - (D) They are usually free to access without any restrictions
101. Identify whether the following sources are VALID or NOT VALID. Google scholar
- (A) VALID
 - (B) NOT VALID
102. What is the primary advantage of using a search engine like Google Scholar?
- (A) It provides access to only peer-reviewed articles.
 - (B) It allows users to search multiple databases simultaneously.
 - (C) It offers a personalized search experience based on user preferences.
 - (D) It ranks search results by relevance to the user's query.
103. 'Social Science Citation, Index' is published by:
- (A) Indian Council of Social Science Research
 - (B) Tata Institute of Social Sciences
 - (C) American Sociological Association
 - (D) Institute for Scientific Information, Philadelphia
104. How are keywords important in a research study?
- (A) They are used to keep the researcher motivated during the study.
 - (B) They are used to index the study in databases, aiding other researchers in finding the work.
 - (C) They are used to create a thesis statement in a research paper.
 - (D) They are used to cite other studies in the research paper.
105. Which of the following is a collection of organized information or sources, often digital, used for academic research?
- (A) Keywords
 - (B) Abstract
 - (C) Database
 - (D) Literature Review
106. Which database is particularly useful for interdisciplinary research?
- (A) Google Scholar
 - (B) Professional Development Collection
 - (C) Web of Knowledge
 - (D) JSTOR
107. A research database such as Scopus is an example of;
- (A) Secondary source of literature
 - (B) Primary source of literature
 - (C) Tertiary source of literature
 - (D) None of these
108. As you begin using databases for research, you must be careful in developing ____ Always ask what words and phrases you think someone writing on your topic might use.
- (A) Topics
 - (B) Key words
 - (C) Subjects
 - (D) Queries
109. When doing a database search, one begins with one or more ____
- (A) Keywords
 - (B) Titles
 - (C) Authors
 - (D) Websites

110. Indexing and abstracting services are used for:
- (A) Writing reports
 - (B) Locating relevant literature efficiently
 - (C) Editing manuscripts
 - (D) Citing sources incorrectly
111. Where do we get research article on the internet?
- (A) Google.com
 - (B) Scholar.google.com
 - (C) Book.google.com
 - (D) Papers.google.com
112. Which of the following is a reference source?
- (A) Encyclopedia
 - (B) Interview
 - (C) Article
 - (D) News program
113. A ___ is a collection of data that is stored electronically as a series of records in a table.
- (A) Presentation.
 - (B) Database.
 - (C) Web page.
 - (D) None of these.
114. What website is okay for quick general research but users need to be cautious because its information can be edited?
- (A) Britannica
 - (B) Facebook
 - (C) Buzz Feed
 - (D) Wikipedia Edit
115. Search engines like Google.com and Yahoo.com are the best places to do all your academic research.
- (A) True
 - (B) False
116. What is the primary purpose of indexes to periodical literature?
- (A) To help researchers find related literature in their field
 - (B) To summarize the main points of each article
 - (C) To provide citations for books and journals
 - (D) To evaluate the quality of research articles
117. Where would a researcher most likely search for relevant literature and studies?
- (A) Only government reports
 - (B) Online forums and textbooks
 - (C) Research journals, academic databases, and books
 - (D) Newspapers and magazines
118. When authors provide open access to their own published articles, by making their own e-prints free for all, it is referred as ___?
- (A) Publicity
 - (B) Green Road
 - (C) Philanthropy
 - (D) Egalitarian
119. Some useful printed information may not be available at any library. This content is known as "___ literature."
- (A) Black-and-white
 - (B) Gray
 - (C) Yellow
 - (D) Green
120. Which of the following is an example of a source?
- (A) Infographic
 - (B) Videos
 - (C) Online Articles
 - (D) All are examples of a source.
121. All of the following can be used as a sources of literature EXCEPT
- (A) Journal
 - (B) Pubmed
 - (C) Blog
 - (D) Conference proceeding

122. When doing research for school paper, a research database, like SIRS, is far superior to a regular search engine, like Google, because —

- (A) They receive national recognition
- (B) They are paid subscriptions services
- (C) They contain controversial topics
- (D) The information comes from verifiable sources, and have been evaluated by credible

authors

123. It guides you to several sources and provide abstract and often full text version of the article. A. B. C. D.

- (A) Bibliography
- (B) Index
- (C) Catalog
- (D) Electronic Database

1.7.9 Digital Libraries

1. Which learning platform is widely used for research literature?

- (A) Coursera
- (B) Edmodo
- (C) Shodhganga
- (D) Byju's

2. What is the purpose of the National Digital Library Initiative in higher education?

- (A) To offer online degree programs
- (B) To provide free access to online courses
- (C) A digital repository of academic resources to support research and higher education
- (D) To store research journals

3. The project titled “Development of National Digital Library of India towards building a National Asset” has been sanctioned under NMEICT to:

- (A) IIT Bombay
- (B) IIT Kharakpur
- (C) IGNOU
- (D) IIT Delhi

4. Shodhganga is a digital repository managed by INFLIBNET.

- (A) True
- (B) False

5. Which initiative by INFLIBNET provides access to e-resources for higher education institutions?

- (A) SWAYAM

(B) E-Shodhganga

(C) Vidya Lakshmi

(D) National Digital Library

6. What is the objective of the National Digital Library of India?

- (A) To provide free access to digital content to all
- (B) To provide vocational training to rural youth
- (C) To digitize all books in India
- (D) To promote research in emerging technologies

7. An article or complete journal available electronically via a website

- (A) Books
- (B) E-journal
- (C) Articles
- (D) Periodicals

8. Which organization is responsible for the National Digital Library?

- (A) University Grants Commission
- (B) National Council of Educational Research and Training
- (C) Ministry of Human Resource Development
- (D) Indian Institute of Management

9. How does the National Digital Library benefit students?

- (A) The National Digital Library benefits students by providing access to a wide range of educational resources.

- (B) It charges students a fee for access to resources.
- (C) It provides only physical books to students.
- (D) It limits access to outdated materials.
10. Which initiative provides access to a large collection of e-books and research materials?
- (A) SWAYAM
- (B) EPG Pathshala
- (C) National Digital Library of India (NDLI)
- (D) FOSSEE
11. The complete back issue of a journal is stored on a digital platform as.
- (A) Google Scholar.
- (B) JSTOR.
- (C) Netflix.
- (D) Google books.
12. Books in digital forms can be borrowed and returned in this place
- (A) Digital Library
- (B) Learning Management System
- (C) Distance Learning
- (D) None of above
13. Alexandria Digital library is considered one of the unreliable online resources.
- (A) True
- (B) False
14. How can students access resources from the National Digital Library?
- (A) Students can access resources by calling the National Digital Library's hotline.
- (B) Students can only access resources through their school library.
- (C) Students must visit a physical location to access the National Digital Library.
- (D) Students can access resources by visiting the National Digital Library's website and using the search function.
15. What are the main obstacles in content-based retrieval in digital libraries?
- (A) Subjectivity of human perception
- (B) Fundamental nature of machine systems
- (C) Sensory gap
- (D) Semantic gap

1.7.10 Intellectual Property Rights and Patents

1. You own the copyright to anything you create from the moment you write it as long as you are not infringing on someone else's copyright:
- (a)
- (A) TRUE
- (B) FALSE
2. What is copyright?
- (A) Asking someone if you can use their work.
- (B) A form of protection for your own creative work.
- (C) Taking something off of the internet and using it in your presentation.
- (D) A form saying you're the author of a specific piece of work.
3. It refers to any product of human intellect that is unique and has value in the market place. This covers ideas, inventions, unique name, computer program codes and many more.
- (A) Computer Ethics
- (B) Intellectual Property
- (C) Privacy
- (D) Cyberlaw
4. "A method of protecting the rights of an originator of a creative work, such as text, piece of music, painting, or computer program, through law."
- (A) Copyright.
- (B) Slander.
- (C) Libel.
- (D) Hacker.

5. Something that comes from a person's mind, such as an idea, invention, or process is ____
- (A) Intellectual Property
 - (B) Physical Property
 - (C) Natural Resource
 - (D) Material Asset
6. Which of the following is NOT typically protected as intellectual property in science?
- (A) Theories/ideas
 - (B) Published research papers
 - (C) Common scientific facts
 - (D) Bespoke equipment
7. The exclusive and assignable protection of intellectual property by law.
- (A) Copyright.
 - (B) Firewall.
 - (C) Cloud.
 - (D) Spyware.
8. Original ideas are considered
- (A) Bogus
 - (B) Intellectual property
 - (C) Free to use and share
 - (D) All of these
9. Piracy
- (A) Robbing from the rich and giving to the poor
 - (B) Illegal distribution of open source material
 - (C) Attacking, kidnapping or murdering online content creators
 - (D) Illegal distribution of online content like downloading and sharing music, music videos and movies so the original content creators don't get paid for their intellectual property
10. Who Owns the Copyright in a Work?
- (A) You and family members.
 - (B) Author who created it.
 - (C) The president.
 - (D) The government.
11. Can a company slogan like KFC be registered under intellectual property rights?
- (A) NO
 - (B) YES, UNDER PATENT
 - (C) YES, UNDER COPYRIGHT
 - (D) YES, UNDER TRADEMARKS
12. A ____ format is considered to be intellectual property, which means it is owned by an individual or organization.
- (A) Free.
 - (B) Proprietary.
 - (C) Closed.
 - (D) Binary.
13. Software which has a copyright and can be used for free for a stipulated amount of time
- (A) Public Domain Software.
 - (B) Freeware.
 - (C) Firmware.
 - (D) Shareware.
14. In an educational setting, instructors have access to and use a whole host of copyrighted materials. What allows these individuals to make use of these materials ____
- (A) Fair Use Doctrine.
 - (B) Intellectual property laws.
 - (C) Higher educational board.
 - (D) All the above.
15. Complete the missing parts using the words (Opinions-flash memory-Copyrights-password manager-Public domains): ____ are creative works that are not covered by copyright.
- (A) Flash memory
 - (B) Copyrights
 - (C) Opinions
 - (D) Password manager
 - (E) Public domains
16. Which one of these do not concern the Copyright Designs and Patents Act?
- (A) Illegally downloading a game.

- (B) Illegally downloading music.
 - (C) Illegally downloading a software license.
 - (D) Illegally distributing a virus.
17. Which law protects intellectual property from being copied without permission?
- (A) Data Protection Act.
 - (B) Freedom of Information Act.
 - (C) Copyright, Designs and Patents Act.
 - (D) Computer Misuse Act.
18. Hayley has designed a new web app. She thinks another company is changing her idea. Which act would Hayley use to stop this person from doing this?
- (A) Creative Commons License.
 - (B) Computer Misuse Act.
 - (C) Copyright designs and Patents Act.
 - (D) Freedom of Information Act.
19. A teacher using YouTube videos in class makes sure to cite the creator. Which policy is upheld?
- (A) Copyright respect
 - (B) Privacy invasion
 - (C) Online etiquette
 - (D) Security filtering
20. Giving appropriate credit to the sources of ideas or results.
- (A) Social Responsibility
 - (B) Competence
 - (C) Respect for Intellectual Property
 - (D) Risk of Harm
 - (E) Openness
21. Which one of the following shows respect for Intellectual Property-
- (A) Be open for criticism
 - (B) Strive for honesty in communication
 - (C) Keep promises and act with sincerity
 - (D) No use of unpublished data without permission
22. Which action best demonstrates respect for intellectual property in a research paper?
- (A) Paraphrasing without mentioning the source
 - (B) Listing sources but omitting in-text citations
 - (C) Quoting with accurate citation and attribution
 - (D) Summarizing ideas with no references
23. This work can be registered under ____ rights.
- (A) COPYRIGHT
 - (B) PATENT
 - (C) TRADEMARKS
 - (D) INDUSTRIAL DESIGN
24. "Creations of the mind, such as inventions; literary and artistic designs; designs; and symbols, names and images used in commerce."
- (A) Computer security.
 - (B) Intellectual property.
 - (C) Copyright.
 - (D) Computer privacy.
25. What happens to the work after the copyright time has passed?
- (A) It can be bought.
 - (B) There is no time-limit on copyright.
 - (C) The work must be destroyed.
 - (D) It goes into the public domain.
26. Why Should I Care About Copyright?
- (A) Allows others to copy your work.
 - (B) Prevents other people from copying your work.
 - (C) Either (A) or (B).
 - (D) Neither (A) nor (B).
27. "Risk involved with stealing ideas from other businesses" talks about
- (A) Conflict of Interest
 - (B) Confidentiality
 - (C) Intellectual Property
